- Appendix E-8: Potential Projects Identified by Narrative Description

Appendix F: Public Parcel Screening by County of San Joaquin Parcel Assessor Dataset Use Codes

1. INTRODUCTION

1.1 PURPOSE

The San Joaquin County Region Stormwater Resource Plan (San Joaquin County Region SWRP) was developed by the County of San Joaquin and cities of Lodi, Manteca, Stockton, and Tracy (Participating Agencies) to identify, prioritize, and ultimately implement stormwater and dry weather runoff capture projects that provide multiple benefits including improved regional water quality, reduced localized flooding, increased water supplies, and community & Tribal enhancement[1]. Consistent with Senate Bill 985 (SB 985), once identified and incorporated into a SWRP that is developed consistent with the State Water Resources Control Board's (State Water Board's) SWRP Guidelines, these projects may pursue potential grant funding to assist in offsetting costs[2]. The San Joaquin County Region SWRP was developed consistent with the SWRP Guidelines set forth by the State Water Board[3], as demonstrated by the completed SWRP Checklist and Self-Certification (**Appendix A**).

The San Joaquin County Region SWRP is a planning-level document that identifies and prioritizes potential stormwater and dry weather capture projects within the San Joaquin County Region Participating Agency's jurisdictions. Projects are designed to capture, treat, and increase infiltration capacity, and/or use stormwater in ways that provide multiple benefits. Although the SWRP identifies potential projects, the development, planning, and implementation of these projects will have to undergo additional municipal planning processes once a project is selected for implementation. The implementation of the identified multiple-benefit projects will assist in protecting the beneficial uses of the receiving waters within the San Joaquin County Region, which provides important environmental, community, health, and economic benefits. Implementation of these projects will also strengthen regional climate adaptation efforts and enhance resilience to climate change impacts such as drought and flooding.

This document relies, in part, on existing regional and local plans, such as Integrated Regional Water Management Plans (IRWMPs) and watershed management plans. **Section 8** lists the references used to prepare this SWRP and provides the uniform resource locators (URL) to enable online access to each reference.

[1] The authors of this document acknowledge several other SWRPs that aided in the development of this SWRP, namely *the Marin County SWRP* (https://mcstoppp.org/municipal-staff/) and the *Napa River Watershed SWRP* (https://www.napawatersheds.org/stormwater-resource-plan).
[2] Pursuant to SB 985, a SWRP must be developed in order to receive grant funding for stormwater and dry weather runoff capture projects from any voter-approved bond after January 1, 2014.
[3] State Water Board Storm Water Grant Program (SWGP) Proposition 1 Funding Information: https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swgp/prop1/

1.2 SAN JOAQUIN COUNTY REGION CHARACTERIZATION

The San Joaquin County Region boundary generally delineates the SWRP planning area (as described in **Section 3** and shown in **Figure 1-1**). There are six watersheds within the Region:

1. Lower Mokelumne River
2. Sacramento-San Joaquin Delta
3. Lower Calaveras River
4. Lower Rock Creek-French Camp Slough
5. Upper Stanislaus River
6. Lower San Joaquin River

This SWRP focuses on the four watersheds that are in bold above, the Lower Mokelumne River, the Sacramento-San Joaquin Delta, the Lower Calaveras River, and Lower Rock Creek-French Camp Slough. Since the portion of the San Joaquin County Region that extends into the Upper Stanislaus River and Lower San Joaquin River watersheds is minimal, these watersheds are not addressed in this plan.

The San Joaquin County Region watersheds are subject to local water quality stressors and Total Maximum Daily Loads (TMDLs) as well as municipal stormwater regulatory requirements to address these stressors (**Section 3** and **Section 4**).

The effort to create a SWRP for the San Joaquin County Region was undertaken by staff of the Participating Agencies and a team of consultants (Project Team) to efficiently use administrative resources in its creation and facilitate integration with other watershed and water quality-based programs and activities.

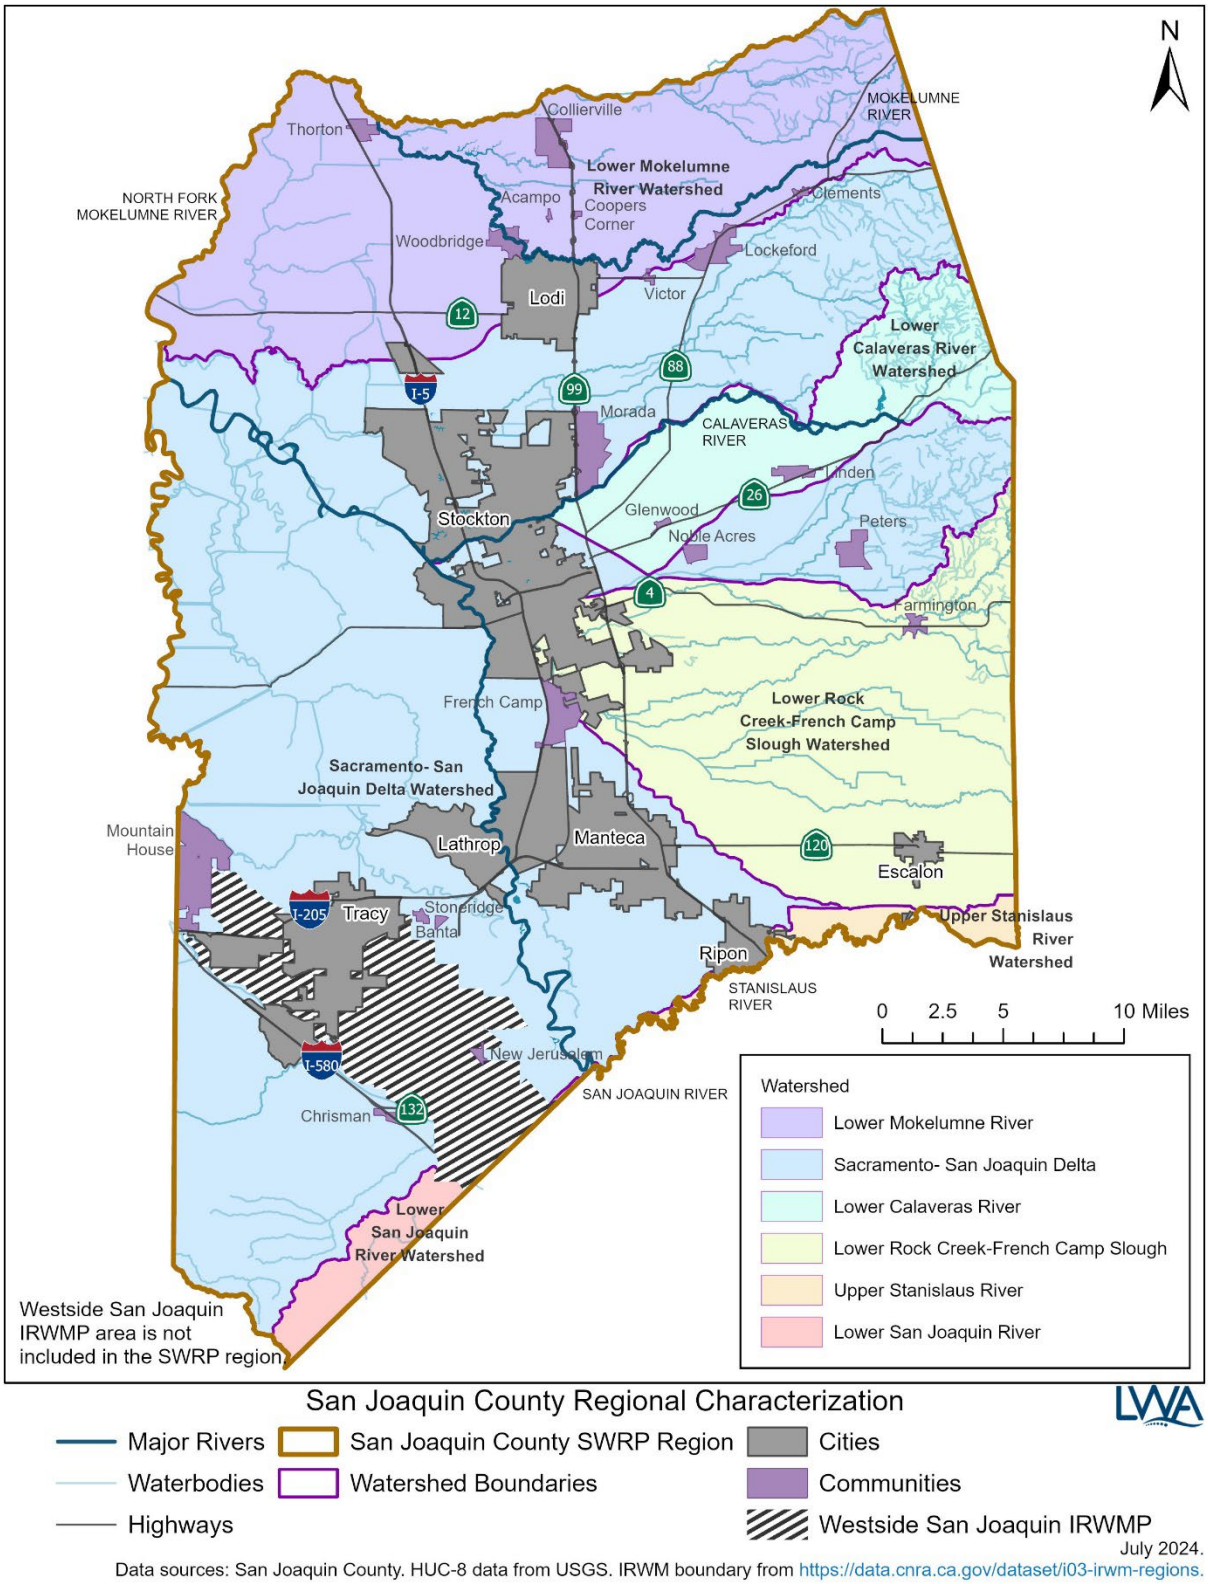

Figure 1-1. San Joaquin County Region SWRP Area

1.3 REGULATORY REQUIREMENTS

The SWRP Participating Agencies include municipalities that are subject to a municipal stormwater permit and other associated regulatory requirements:

- **Phase I and II Participating Agencies** – County of San Joaquin (Phase I and Phase II) and City of Stockton (Phase I)
  - Subject to the Central Valley Regional Water Quality Control Board (Regional Water Board) Region-wide Municipal Stormwater Permit (Order No. R5-2016-0040[4], and subsequent amendments and renewals)
- **Phase II Participating Agencies** – City of Lodi, City of Manteca, and City of Tracy
  - Subject to the State Water Board Phase II Municipal Stormwater Permit (Water Quality Order 2013-0001-DWQ[5], and subsequent amendments and renewals).

Both the Phase I and Phase II permits recognize that stormwater is a resource and can be managed in such a way as to provide multiple benefits:

- **Region-wide Permit**
  - Finding 33 - This Order encourages the Permittees to develop Storm Water Management Programs that promote the use of storm water as a resource.
  - Attachment J - …Senate Bill 985 and the State Water Resources Control Board's Storm Water Strategy encourage the use of storm water as a resource to augment water supply.
- **Phase II Permit (Finding 1)** - Storm water is a resource and an asset and should not be treated as a waste product. Managing rainwater and storm water at the source is a more effective and sustainable alternative to augmenting water supply, preventing impacts from flooding, mitigating storm water pollution, creating green space, and enhancing fish and wildlife habitat. California encourages alternative, innovative, multi-objective solutions to help use and protect this valuable resource, while at the same time controlling pollution due to urban runoff.

In addition, both permits include TMDLs that require the Participating Agencies to develop and implement programs and/or conduct specific activities in order to meet the permit-specified water quality based effluent limitations (WQBELs). The specific requirements are included within the National Pollutant Discharge Elimination System (NPDES) Permit provisions and attachments/appendices.

Compliance with the applicable municipal stormwater permits and TMDLs was used to inform the identification and prioritization of the SWRP projects. To this end, the San Joaquin County Region SWRP identifies potential projects that reduce stormwater runoff, which, in turn, reduces pollutants in stormwater discharges, increases infiltration, recharges groundwater, improves flood control, and protects receiving water quality. The multi-benefit potential projects are

[4] https://www.waterboards.ca.gov/centralvalley/board_decisions/adopted_orders/general_orders/r5-2016-0040_ms4.pdf
[5] https://www.waterboards.ca.gov/water_issues/programs/stormwater/phase_ii_municipal.html

consistent with and will contribute toward compliance with applicable water quality regulations, including the municipal stormwater permits and TMDLs.

1.4 ORGANIZATION OF THE SWRP

This SWRP is comprised of the following sections:

Section 2 – Coordination and Collaboration

This section describes the processes associated with SWRP development, the regional participation and outreach efforts, the relationship of this SWRP to other existing watershed management plans and regulatory documents, and the decisions and actions that must be made at the local, state or federal level to implement future projects.

Section 3 - Watershed Characterization

This section describes the watershed delineations within the San Joaquin County Region and summarizes the characteristics of each of the four watersheds including the boundaries within each of the watersheds (municipalities, service areas for individual water, wastewater, and identification of surface water resources and groundwater basins), and water quality priorities.

Section 4 - Water Quality Concerns and Regulatory Compliance

This section identifies the anthropogenic activities that may generate or contribute to the pollution of stormwater or dry weather runoff as well as the associated pollutants of concern, the applicable permits and plans that address water quality and regional water quality priorities. This section also identifies how the SWRP is consistent with and assists in complying with applicable municipal stormwater permit requirements including TMDLs and the Statewide Trash Amendments to address the identified pollutant generating activities and pollutants of concern.

Section 5 - Quantitative Methods and Identification and Prioritization of Projects

This section presents the quantitative methodology used to identify and prioritize potential multi-benefit projects in the San Joaquin County Region SWRP Area, provides a description of the multiple benefits assessed for each of the potential projects (general suitability, water quality, water supply, flood control, environmental, and community and Tribal) as well as the results of the prioritization process.

Section 6 – Education, Outreach, and Public Participation

This section provides an overview of the purpose and methods for outreach to regional and Tribal Governments and non-governmental partners (including IRWMPs, watershed/advisory groups, non-municipal public landowners, non-governmental organizations, and the general public) during development of the San Joaquin Region SWRP.

Section 7 – Implementation Strategy

This section describes the implementation strategy and schedule, and includes a discussion of decision tools, project resources, and funding and engagement opportunities for supporting the implementation of the SWRP.

Section 8 – References

This section provides detailed reference information for the SWRP and includes URL links to existing regional and local plans (such as IRWMPs and watershed management plans).

2. COORDINATION AND COLLABORATION (GUIDELINES SECTION VI.B)

2.1 ENTITIES INVOLVED IN PLAN DEVELOPMENT

Although the San Joaquin County Region SWRP was prepared by the Project Team, the Participating Agencies invited Tribal governments and regional Tribal and non-Tribal Partners to participate and collaborate on the development of the SWRP, as described below.

2.2 REGIONAL PARTICIPATION AND OUTREACH EFFORTS

Key parties identified for outreach and participation in the SWRP development process as well as the ongoing implementation of the SWRP include the Participating Agencies, Tribal governments, and Tribal and non-Tribal Partners, including members of regional watershed management and watershed advisory groups, non-municipal public landowners, (school districts, transportation districts, housing authorities), non-governmental organizations (NGOs), and the general public. Engagement and coordination with each of these parties and water management groups (including the Greater San Joaquin County Regional Water Coordinating Committee for the Eastside San Joaquin IRWMP and the San Luis & Delta-Mendota Water Authority for the Westside-San Joaquin IRWMP) is described in **Section 6** and **Appendix C**.

2.3 RELATIONSHIP WITH EXISTING PLANNING DOCUMENTS

As noted above, the SWRP identifies potential projects that reduce stormwater and dry weather runoff, which, in turn, reduces pollutants in stormwater discharges, increases infiltration, recharges groundwater, improves flood control, and protects receiving water quality. Thus, these multi-benefit potential projects assist in achieving the goals and objectives of other watershed and water quality-based programs, plans, and initiatives. The relationship between the SWRP and the existing planning documents and programs is summarized within this section.

2.3.1 Integrated Regional Water Management Plans

Eastern San Joaquin Integrated Regional Water Management Plan[6]

The Eastern San Joaquin (ESJ) Integrated Regional Water Management Plan (ESJ IRWMP) defines and integrates water management strategies and establishes protocols and courses of action to implement the ESJ Integrated Conjunctive Use Program (ICU Program). The ESJ Regional Planning Area is defined as that portion of the San Joaquin region that overlies the ESJ Subbasin, which coincides with the adopted Groundwater Management Area (GMA) (**Figure 2-1**). The overall goals for the region are focused on developing a comprehensive planning document to facilitate regional cooperation in providing water supply reliability, water recycling, water conservation, water quality improvement, stormwater capture and management, flood management, and environmental and habitat protection and improvement. In 2019 the member agencies formed a Regional Watershed Management Group called the Greater San Joaquin County Regional Water Coordinating Committee (GSJRWCC). The GSJCRWCC is the Regional Water Management Group (RWMG) responsible for developing and implementing the ESJ

[6] https://www.esjirwm.org/Portals/0/assets/docs/IRWMP/ESJIRWMP_2020_Addendum.pdf?ver=97AzFMXzKgzxFb4kU3dX0Q%3D%3D

IRWMP. The IRWMP is a comprehensive prioritized menu of projects and actions that fulfills the mission of the GSJCRWCC and supports the ESJ Groundwater Authority (GWA).

The GSJCRWCC has not previously developed or incorporated a SWRP within the IRWMP. The final San Joaquin County Region SWRP will be provided to the ESJ IRWM group for incorporation into the IRWMP according to the schedule in **Section 7**.

Projects identified in the SWRP may be further evaluated per the criteria developed as part of the Eastern San Joaquin IRWMP. For example, the ESJ IRWMP evaluates the capacity of regional planning projects to protect resources under future greenhouse gas emissions scenarios (i.e. low emission, medium emission and high emission mid- and late- century scenarios). In 2014, the IRWM Plan conducted a climate vulnerability assessment under each emissions scenario to evaluate which systems in the region (e.g. water reserve and storage, water quality, ecosystems and habitats, localized flood risk, sea-level, hydropower generation) were most vulnerable to impacts of climate change[7]. Using the 2014 climate vulnerability assessment, the current ESJ IRWMP[8] evaluates projects to address regional climate vulnerabilities as well as evaluate projects for their impact on regional greenhouse gas emissions (i.e. the net emissions avoided or introduced through project implementation). These types of evaluations can be considered by interested parties when selecting projects from this SWRP for future implementation.

Westside-San Joaquin Integrated Regional Water Management Plan[9]

The initial Westside-San Joaquin (WSJ)IRWMP was an effort undertaken by the United States Bureau of Reclamation (USBR), the San Luis & Delta-Mendota Water Authority (SLDMWA), and other local partners to develop a plan to provide guidance for future water management and planning decisions. The Regional Water Management Group for the WSJ Integrated Regional Water Management (IRWM) Region is the SLDMWA, which consists of 28 member agencies. The WSJ IRWM planning region, which encompasses approximately 2,000 square miles of land on the western side of the San Joaquin Valley, serves a multitude of interests through agricultural, municipal, industrial, and habitat management endeavors (**Figure 2-1**).

The WSJ IRWMP guides water resource management in the context of solving regional issues and conflicts. The Plan's overarching goal is to provide a more reliable water supply, protect agricultural, municipal, and environmental water uses, and meet community needs, including those of disadvantaged communities, by improving water supply sustainability, water quality, and drainage.

[7] https://www.esjirwm.org/Portals/0/assets/docs/IRWMP-2014/Eastern-SJ-2014-IRWMP-Chap15.pdf?ver=2014-06-26-111535-887
[8] https://www.esjirwm.org/IRWMP/2020-IRWMP-Addendum
[9] https://sldmwa.org/IRWMP/WSJ%20IRWMP%202019%20Final_ADA-OK.pdf

Five SWRPs overlap the WSJ Region, which include:

1. WSJ SWRP;
2. Stanislaus Multi-Agency Regional SWRP;
3. Merced SWRP;
4. Madera County SWRP; and
5. Kings Basin Storm Water Resources Management Plan (SWRMP).

The WSJ SWRP covers the entire IRWM region; whereas overlap with the other SWRPs is minimal. The City of Tracy is included in the WSJ SWRP as well as the San Joaquin County Region SWRP (this document). Given this overlap of the area within the City of Tracy jurisdiction, the final San Joaquin County Region SWRP will be provided to the WSJ IRWM group for incorporation into the IRWMP according to the schedule in **Section 7**. However, it is recognized that the overlap within the WSJ IRWM region is minimal.

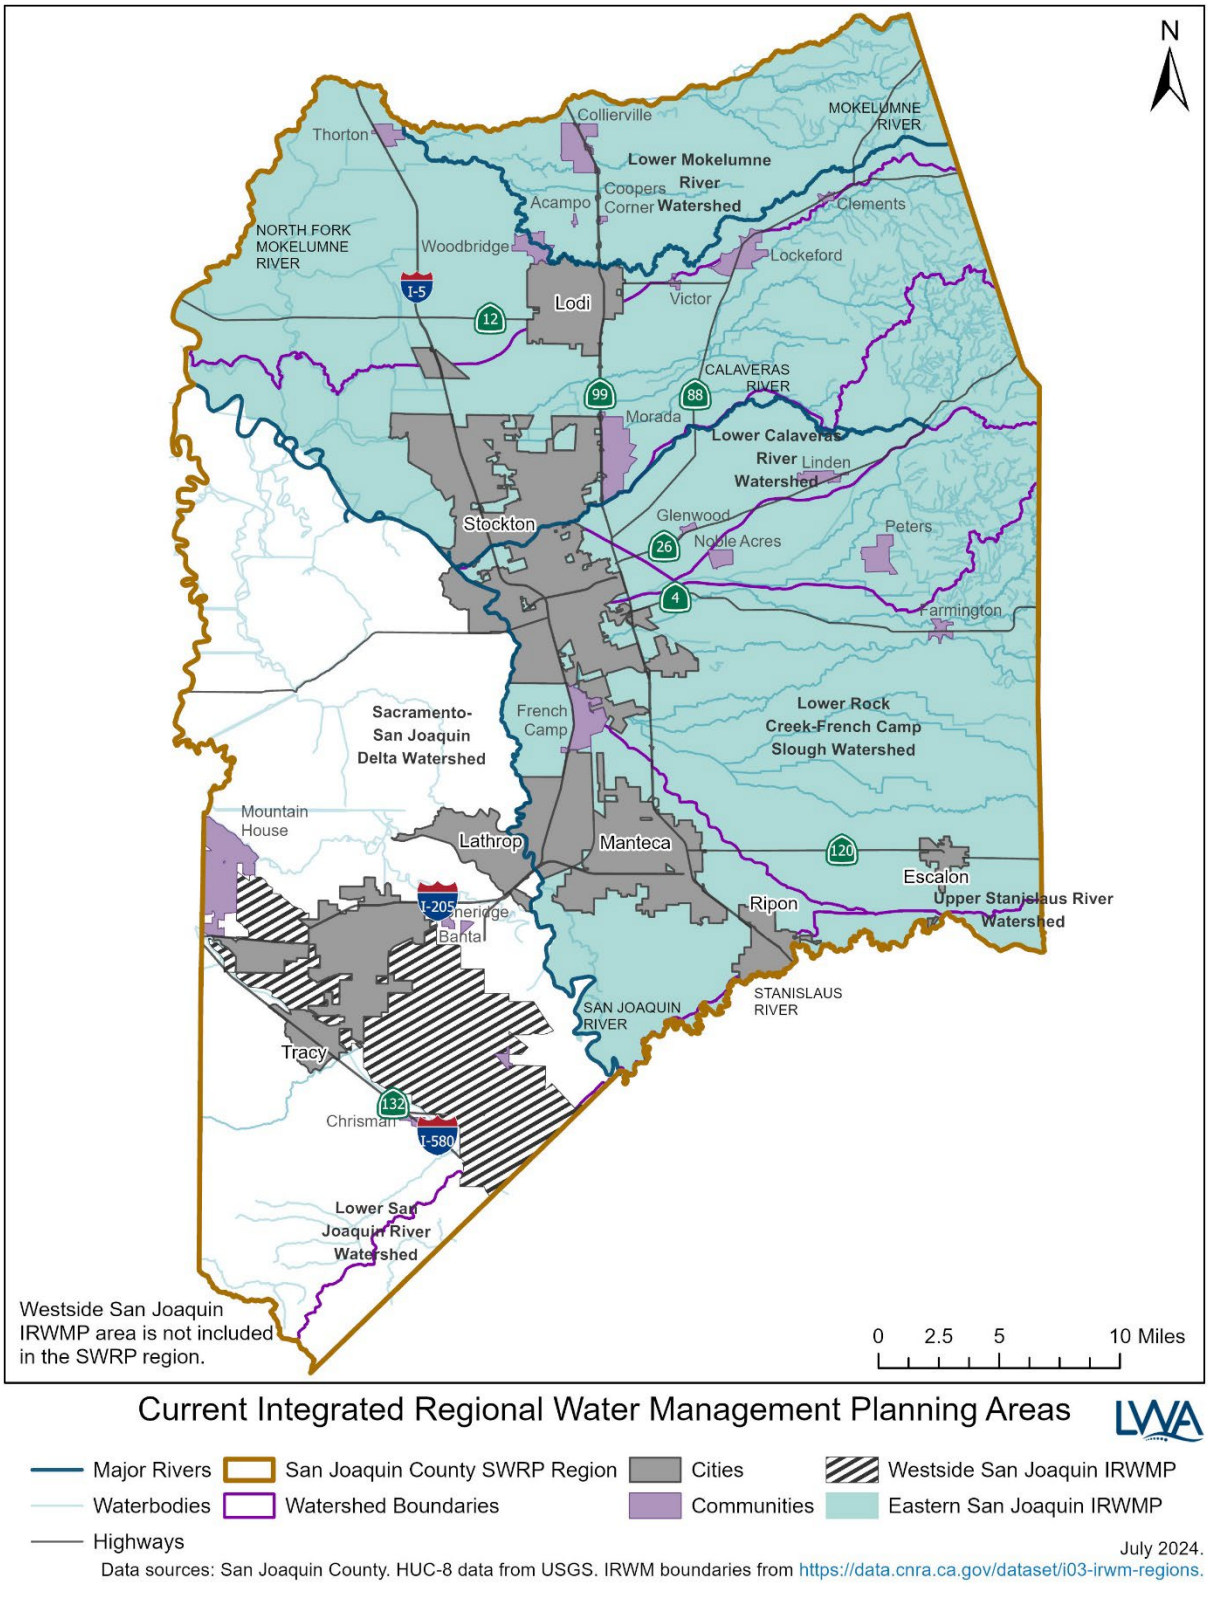

Figure 2-1. Current Integrated Regional Water Management Planning Areas

2.3.2 Design Criteria for New and Redevelopment Projects

Consistent with the Phase I and Phase II municipal stormwater permits (**Section 1.3**), the Participating Agencies have adopted new development and redevelopment standards to, in part:

- Protect water resources from the potential adverse impacts of urban stormwater runoff;
- Ensure that the implementation of the treatment control measures is consistent with the applicable municipal stormwater permit as well as other State requirements, including the Trash Provisions;
- Provide clear development standards for developers, design engineers, agency engineers, and planners to use in the selection and implementation of appropriate treatment control measures;
- Emphasize the implementation of low-impact development (LID)-based strategies and controls; and
- Provide maintenance procedures to ensure that the treatment control measures will be maintained to provide effective, long-term pollution control and reduce stormwater runoff.

Treatment controls are required in addition to site design and source control measures in order to reduce pollutants in stormwater discharges. Treatment controls are engineered technologies designed to remove pollutants from stormwater runoff. The type of treatment control(s) to be implemented at a site depends on several factors, but may include the following:

1. **Certified Multi-Benefit Full Capture Systems**[10] – These types of projects/facilities utilize treatment designs that have multiple environmental benefits such as pollutant removal, trash capture, reuse and/or infiltration of stormwater runoff (which assists with groundwater recharge).
2. **Non-Green-Infrastructure Projects** – These types of projects may or may not include vegetation, provide moderate stormwater pollutant removal, moderately reestablish natural water drainage systems, and may remove trash consistent with the Trash Provisions. These types of projects typically include facilities such as flood control basins or detention basins (which assists with groundwater recharge).

[10] https://www.casqa.org/resources/water-quality-priorities/trash/certified-multi-benefit-trash-treatment-systems

3. **Green Infrastructure[11] (distributed or regional) Projects** – These types of projects are assumed to provide good stormwater pollutant removal, moderately reestablish natural hydrology, moderately develop, restore, or enhance habitat and open space, provide enhanced community benefit, and may remove trash consistent with the Trash Provisions.

The development standards that have been adopted by the SWRP Participating Agencies include:

- **Phase I and II Participating Agencies** – County of San Joaquin (Phase I and Phase II) and City of Stockton (Phase I)
  - Stormwater Quality Control Criteria Plan (SWQCCP)[12,13]
- **Phase II Participating Agencies** – City of Lodi, City of Manteca, and City of Tracy
  - Multi-Agency Post-Construction Stormwater Standards Manual[14]

The development standards identify the processes that need to be followed to ensure that stormwater treatment controls meet the development requirements. These standards may apply to the projects identified in the SWRP depending on the type of project that is implemented.

2.3.3 Other Documents/Plans

As a part of the development of the SWRP, the Participating Agencies reviewed other, related plans, work efforts, and programs to ensure that the SWRP is consistent with and supplementary to these planning documents.

In addition, the potential projects identified in the San Joaquin County Region SWRP, when implemented, will support the Participating Agencies' strategy to meet TMDLs, the Statewide Trash Amendments, and other municipal stormwater permit mandated water quality improvement goals.

The documents that were used to inform the SWRP and potential project list include, but are not limited to, the following:

- Capital Improvement Plans;
- General Plans;
- Low Impact Development Plans;
- Regional Environmental Impact Reports;
- Storm Drainage Master Plans;
- Stormwater Management Plans;
- Sustainability Action Plans;

[11] Infrastructure that uses vegetation, soils, and natural processes to manage water and create healthier urban environments. At the scale of a city or county, green infrastructure refers to the patchwork of natural areas that provides habitat, flood protection, cleaner air, and cleaner water. At the scale of a neighborhood or site, green infrastructure refers to stormwater management systems that mimic nature by soaking up and storing water (San Francisco Regional Water Quality Control Board, Municipal Regional Permit, Order No. R2-2022-0018).
12 http://www.stocktonca.gov/government/departments/municipalUtilities/utilStormDev.html
13 http://www.sjwater.org/Stormwater-Management/Development
14 https://www.cityoftracy.org/home/showpublisheddocument/3158/637522653643300000

- Urban Water Management Plans;
- Water Master Plans; and
- Water Shortage Contingency Plans.

The SWRP supports the concepts from these local and regional plans for stormwater treatment and control, habitat enhancement, water quality improvement, flood control, adaptation to sea level rise, and other benefits. A complete list of the related references for these documents is provided in **Section 8**.

2.4 REQUIRED DECISIONS AND ACTIONS FOR LOCAL, STATE, OR FEDERAL AGENCIES AND TRIBAL GOVERNMENTS FOR PROJECT IMPLEMENTATION

The San Joaquin County Region SWRP will be coordinated and implemented within the existing governance framework of each of the Participating Agencies. It is not anticipated at this time that a revised governance structure will be necessary.

Decisions will be required by local, state and federal regulatory agencies, Tribal governments, and Interested Parties for future SWRP project selection and implementation. The types of decisions include, but may not be limited to:

- **Project Prioritization** – The Participating Agencies will collaborate and coordinate with regional and Tribal governments, as well as Tribal and non-Tribal partners (e.g. watershed management groups) as needed to identify, prioritize, and select priority projects for implementation.
- **Permitting and Environmental Processes** – Once a project is selected for implementation, the applicable Participating Agency(ies) and collaborating parties will work with the California Department of Fish and Wildlife, the Regional Water Board, U.S. Fish & Wildlife, and/or the U.S. Army Corps of Engineers to obtain the necessary permits and approvals.
- **Funding** – The Participating Agency(ies) will coordinate with collaborating parties to submit grant applications, as needed, to obtain funding for high priority or other selected projects. This may involve or necessitate support/approvals from the Regional Water Board, the State Water Board, and/or the California Department of Water Resources (DWR) in order to obtain grant funding. In addition, local municipalities may need to obtain City Council or Board of Supervisor approvals for any grant matches/local financial requirements consistent with the applicable grant requirements.
- **Monitoring and Reporting** - Monitoring and reporting requirements will be project-specific. The project applicant(s) will be responsible for fulfilling the requirements contained in the grant agreement and will coordinate efforts to ensure that the programs are optimized. To the extent possible, monitoring data will be integrated with existing datasets and shared with collaborating parties. In instances of state government and Tribal government collaboration, existing policies and procedures must be followed

and/or new policies and procedures developed to ensure protection of Indigenous data sovereignty[15].

For additional information on SWRP implementation and project planning processes, refer to **Section 7**.

[15] For further information on Indigenous data sovereignty ("the rights of Indigenous nations to control data about their peoples, lands, and resources"), see the Collaboratory for Indigenous Data Governance (https://indigenousdatalab.org/projects-working/) or the U.S. Indigenous Data Sovereignty Network (https://usindigenousdatanetwork.org/about-2/).

3. WATERSHED CHARACTERIZATION (GUIDELINES SECTION VI.A)

The San Joaquin County Region encompasses about 1,440 square miles of relatively flat, agricultural land, with most development occurring along Highway 99, Interstate 5, and 580 transportation corridors. The region is bounded by the Diablo range along the southwest area and the Sierra Nevada range along the eastern area.

The SWRP planning area consists of the entirety of the County of San Joaquin jurisdictional area except for a small portion that is currently included within the WSJ IRWMP and accompanying SWRP. Thus, the San Joaquin County Region SWRP area encompasses a subset of the County area; 1,363 square miles.

The State Water Board and the Regional Water Board promote and encourage watershed-based coordination, collaboration, and development/implementation of water quality protection programs and projects, as evidenced below:

Phase I and Phase II Region-wide Municipal Stormwater Permit

- "The Central Valley Water Board has developed a single Region-wide MS4 Permit (Order) that promotes greater watershed/drainage shed coordination, water quality measure protections, and program implementation efficiencies."[16]
- "This Order also encourages Permittees to coordinate with each other at regional and/or watershed level scales for greater water quality improvement and efficiency."[17]

Phase II Small Municipal Stormwater Permit

- "Regional outreach and education collaboration includes Permittees defining a uniform and consistent message, deciding how best to communicate the message, and how to facilitate behavioral changes, then collaboratively apply what is learned through local jurisdiction groups, pooling resources and skills."[18]
- "Permittees are encouraged to participate in a regional monitoring program in order to cost- effectively combine resources and water quality information. Regional monitoring is the collaboration of local and regional monitoring programs that are designed to create a more comprehensive picture of water quality conditions within a watershed."[19]

Consistent with the municipal stormwater permits and in order to leverage resources and provide consistent messaging to the community, the municipalities collaborate on numerous program elements and projects including the development and implementation of this SWRP. Since the municipalities are currently engaged in several community/watershed-based groups and projects within the San Joaquin County Region, the Participating Agencies determined that the SWRP planning area boundary should include the San Joaquin County jurisdiction and focus on the four primary watersheds, which are based on HUC-8 watershed boundaries as delineated by the United States Geological Survey (USGS) (**Figure 1-1**):

[16] Region-wide Permit, Finding 1.
[17] Region-wide Permit, Finding 5.
[18] Phase II Permit, Provision E.7.a.
[19] Phase II Permit, Provision E.13.

1. Lower Mokelumne River
2. Sacramento-San Joaquin Delta
3. Lower Calaveras River
4. Lower Rock Creek-French Camp Slough

A general description and maps of each of the primary watersheds within the SWRP Region area is provided in the following sections. The series of maps include the boundaries of the municipalities, service areas for individual water and wastewater providers, and identification of surface water resources and groundwater basins for each watershed.

3.1 MUNICIPALITIES AND STORMWATER MANAGEMENT

The San Joaquin County Region includes two Phase I municipalities, eight Phase II municipalities, and 20 small communities. The Participating Agencies consist of both Phase I stormwater municipalities and four of the eight Phase II stormwater municipalities[20]. The Phase I and Phase II municipalities implement comprehensive stormwater management programs to prevent stormwater pollution, protect and enhance water quality, preserve beneficial uses of local waterways, and to meet state and federal water quality regulations. Collectively and independently, these municipalities have been taking action to reduce stormwater pollution since the first Phase I and Phase II Permits were issued (in the early 1990s and early 2000s, respectively). Phase I and Phase II municipalities and communities are listed by corresponding watershed in **Table 3-1** and **Figure 3-1.** Over the years, actions taken by the municipal stormwater programs have intensified in response to evolving regulatory requirements and community needs.

[20] The City of Escalon, City of Lathrop, and City of Ripon are not designated as Participating Agencies.

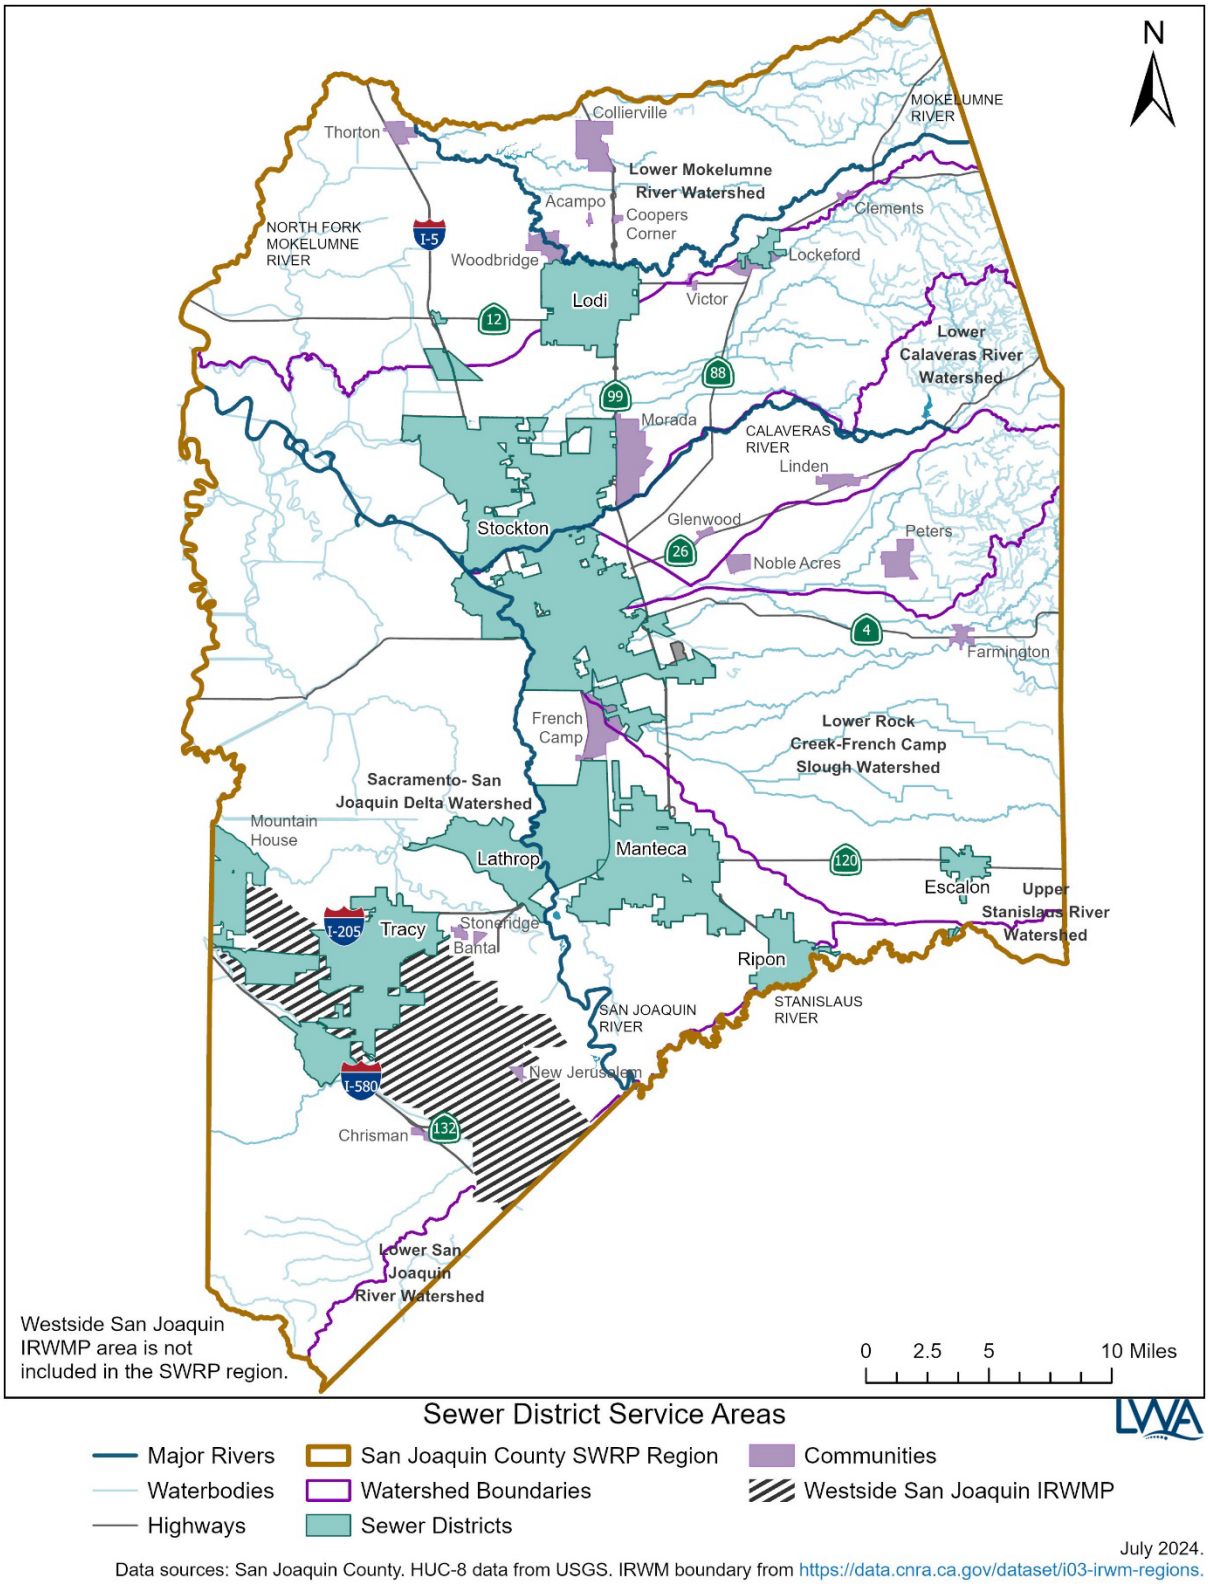

Figure 3-3. Sewer District Service Areas within the SWRP Boundary

3.4 GROUNDWATER BASIN BOUNDARIES

There are two primary groundwater basins underlying the San Joaquin County Region SWRP area; the Eastern San Joaquin Groundwater Subbasin and the Tracy Groundwater Subbasin (**Figure 3-4**). The 2017 adoption of the Sustainable Groundwater Management Act (SGMA) required that governments and agencies halt overdraft and balance groundwater levels in medium and high priority groundwater basins across California by 2022 and 2020, respectively. DWR identified the Eastern San Joaquin Groundwater Subbasin as a high-priority basin in a state of critical overdraft, and the Tracy Subbasin as a medium priority basin (not in overdraft).

The Eastern San Joaquin Groundwater Authority (ESJGWA) consists of 16 regional Groundwater Sustainability Agencies (GSAs; **Table 3-4**). The ESJGWA prepared and now implement the Eastern San Joaquin Groundwater Subbasin Groundwater Sustainability Plan (ESJ GSP[50]) in order to achieve groundwater sustainability and meet the requirements of SGMA and DWR. Likewise, six GSAs prepared and are implementing the Tracy Groundwater Sustainability Plan (Tracy GSP[51]).

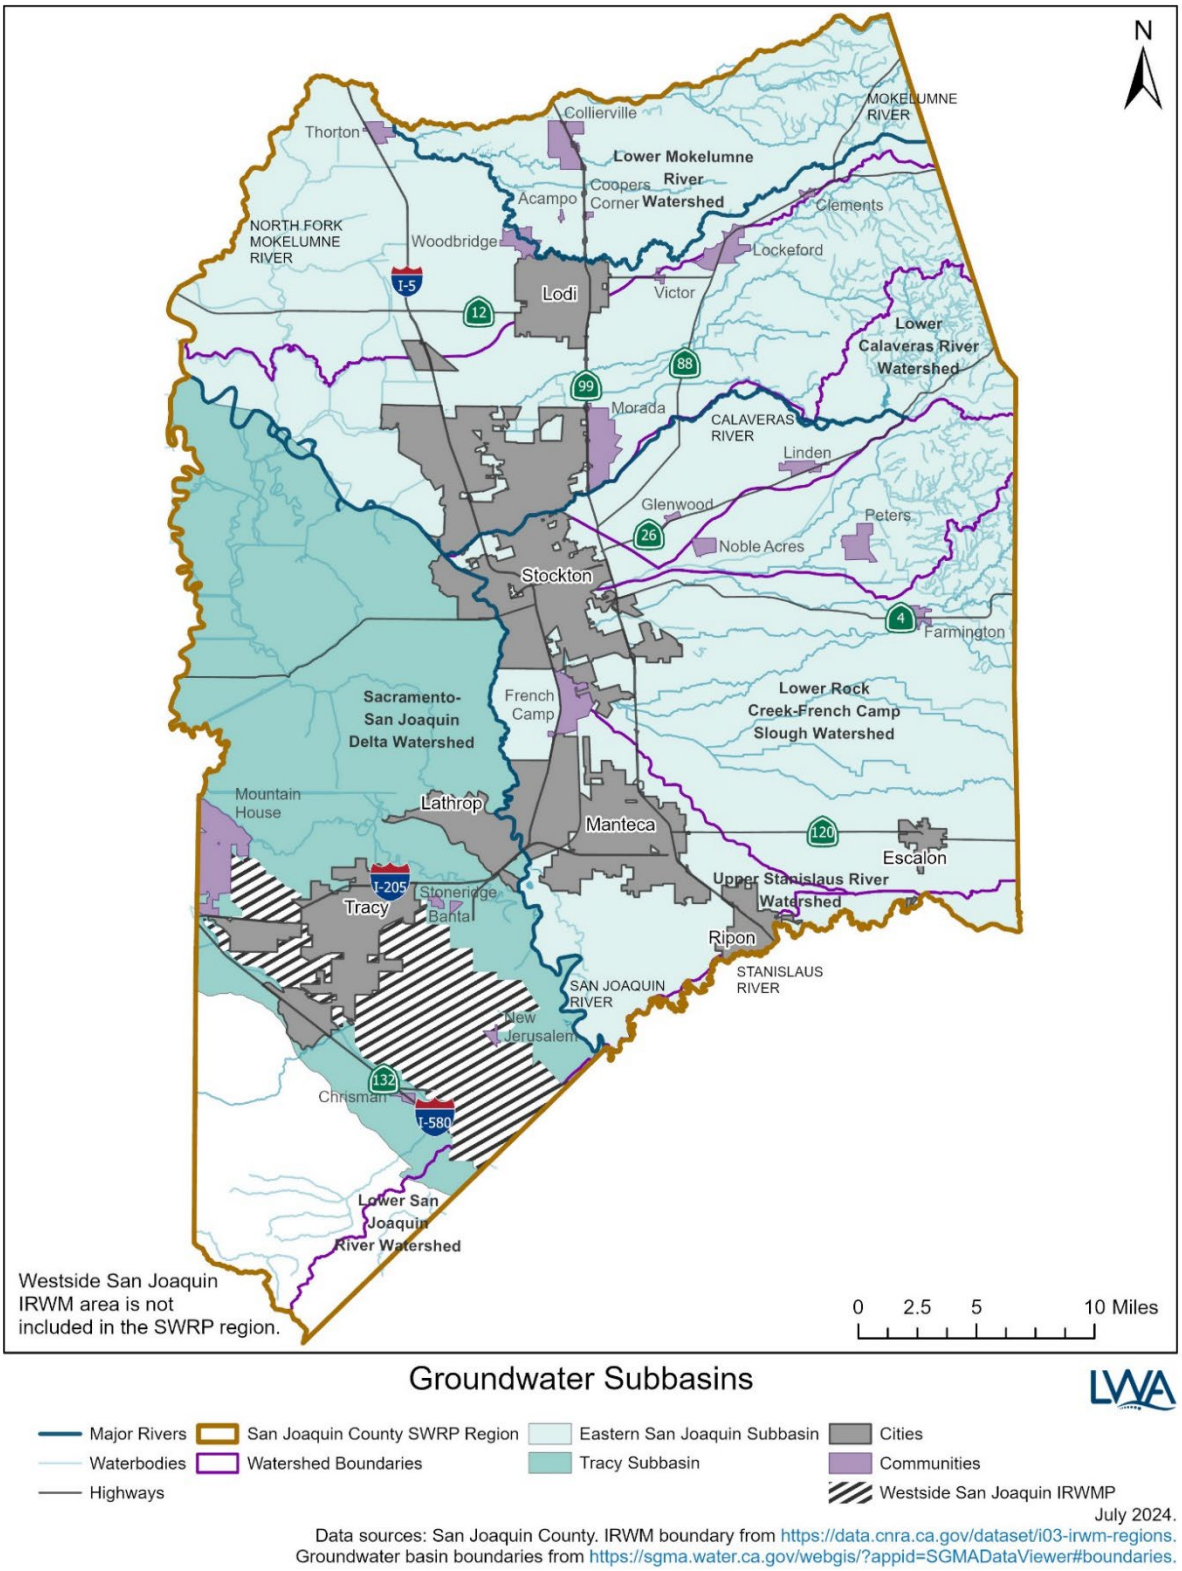

Figure 3-4. San Joaquin County Region SWRP Area by Groundwater Subbasin

3.5 WATER CONSERVATION ACTIVITIES

The municipalities in the San Joaquin County SWRP Region support and/or directly implement various water conservation and efficiency practices that encourage and promote water savings and reuse such as "Cash for Grass" incentives, ultra low flush toilet rebates, and WaterSmart irrigation controller rebates for both residential and commercial water consumers. The municipalities also participate in local events to promote conservation and efficiency through outreach and education as well as in school classroom and assembly presentations. These water savings result in a decreased water demand which, in turn, optimizes the available water supply.

The San Joaquin County General Plan contains policies that are designed to address water supply, conservation, and reuse to meet future water needs. In addition, the General Plan policies also support the protection of groundwater and surface water resources.

3.6 WATERSHED CHARACTERIZATIONS

3.6.1 Lower Mokelumne River Watershed

The Mokelumne River, largely fed by snowmelt, originates in the Sierra Nevada and flows west to its confluence with the Cosumnes River in San Joaquin County. The Mokelumne River, and the watershed as a whole, receive variable rates of annual precipitation both month-to-month and interannually, thereby influencing monthly and yearly streamflow conditions. Streamflow is also influenced by upstream diversions and reservoir storage operations supporting hydroelectric power generation and water supply. In fact, the Mokelumne River is the primary source of drinking water for one and a half million people living both within and outside of the watershed.

The Mokelumne River watershed is spatially subdivided into an Upper and Lower watershed; the upper watershed occurs upstream of the Pardee Reservoir, and the lower watershed occurs downstream of the Pardee Reservoir and Camanche Dam[52,53]. Both dams are owned and operated by the East Bay Municipal Utility District (EBMUD) and provide electricity to Pacific Gas and Electric (PG&E). The majority of the SWRP area overlaps with the Lower Mokelumne River subwatershed, which extends from downstream of Pardee Reservoir (and the Camanche Dam) through north San Joaquin County to the river's confluence with the Cosumnes River. The Lower Mokelumne River offers important habitat to resident and migratory fish species, primarily Chinook salmon and steelhead[54].

The Mokelumne River watershed (**Figure 3-5**) is the largest of the four primary regional watersheds, draining 1,266 square miles across portions of San Joaquin, Sacramento, Calaveras, and Amador counties. The Lower Mokelumne River watershed, which overlaps with the SWRP Region, covers 252 square miles of the San Joaquin County Region SWRP Area. The Lower Mokelumne River Watershed is the 2nd largest watershed area within the county.

[52] https://mokewise.org/docs/MokeWISE%20Final%20Report%20June%202015.pdf
[53] https://www.umrwa.org/files/bc81cfafe/1_MAC_IRWMP_Section_Update_MAC_Region__26sept11.pdf
[54] ibid.

Water Quality

The San Joaquin County Region watersheds are subject to local water quality stressors and TMDLs as well as municipal stormwater regulatory requirements to address these stressors. The SWRP will support water quality improvements for impaired water bodies both with and without established TMDLs by identifying and prioritizing potential projects that can provide multiple benefits, including reduced pollutant loading. Additional, detailed information is provided in **Section 4**.

Watershed Processes

The natural flow regime of the Mokelumne River has been highly altered by gold mining, gravel extraction, logging, channelization, conversion of floodplains and riparian corridors to agricultural fields via shallow floodplain lake infill, channel cutoff, and levee building[55]. During the second half of the 19th century, early settlers used the Mokelumne River for mining, hydropower development, and transportation. After the discovery of gold in 1848 and copper in 1861, the influx of mining operations adversely impacted water quality of the Mokelumne River. In particular, mining involved the unregulated release of acidic mine drainage, which contained mercury and other heavy metals, to the river[56]. Gold mining peaked in 1854 but soon declined, while copper remained heavily mined from 1899 to 1919.

PG&E, East Bay Municipal Utility District (EBMUD), and Jackson Valley Irrigation District (JVID) use the river and its tributaries for hydroelectricity generation[57,58,59]. While the Camanche and Pardee Dams have benefited stormwater regulation (flood control) and water supply regionally, they have adversely impacted river flow, delivery of snowmelt and sediment transport to the Lower Mokelumne River watershed[60].

Today, there are 10 public water suppliers and 4 wastewater agencies (**Table 3-2** and **Table 3-3**) within the SWRP boundaries of the Lower Mokelumne River watershed. The Lower Mokelumne River watershed's land uses are predominately grazing, recreation, vineyards, water storage within the Camanche Reservoir, and residential and commercial development[61]. Water stored in Camanche Reservoir, a flood control and recreation reservoir, is used for downstream fisheries, recreation, hydroelectric generation and water supply[62].

The Mokelumne Watershed Interregional Sustainability Evaluation (MokeWISE) Program builds upon earlier interregional project concepts by expanding the scope to include a thorough, holistic evaluation of a wide array of water resource strategies that could be implemented to help balance water supplies and demands and sustain the environment.

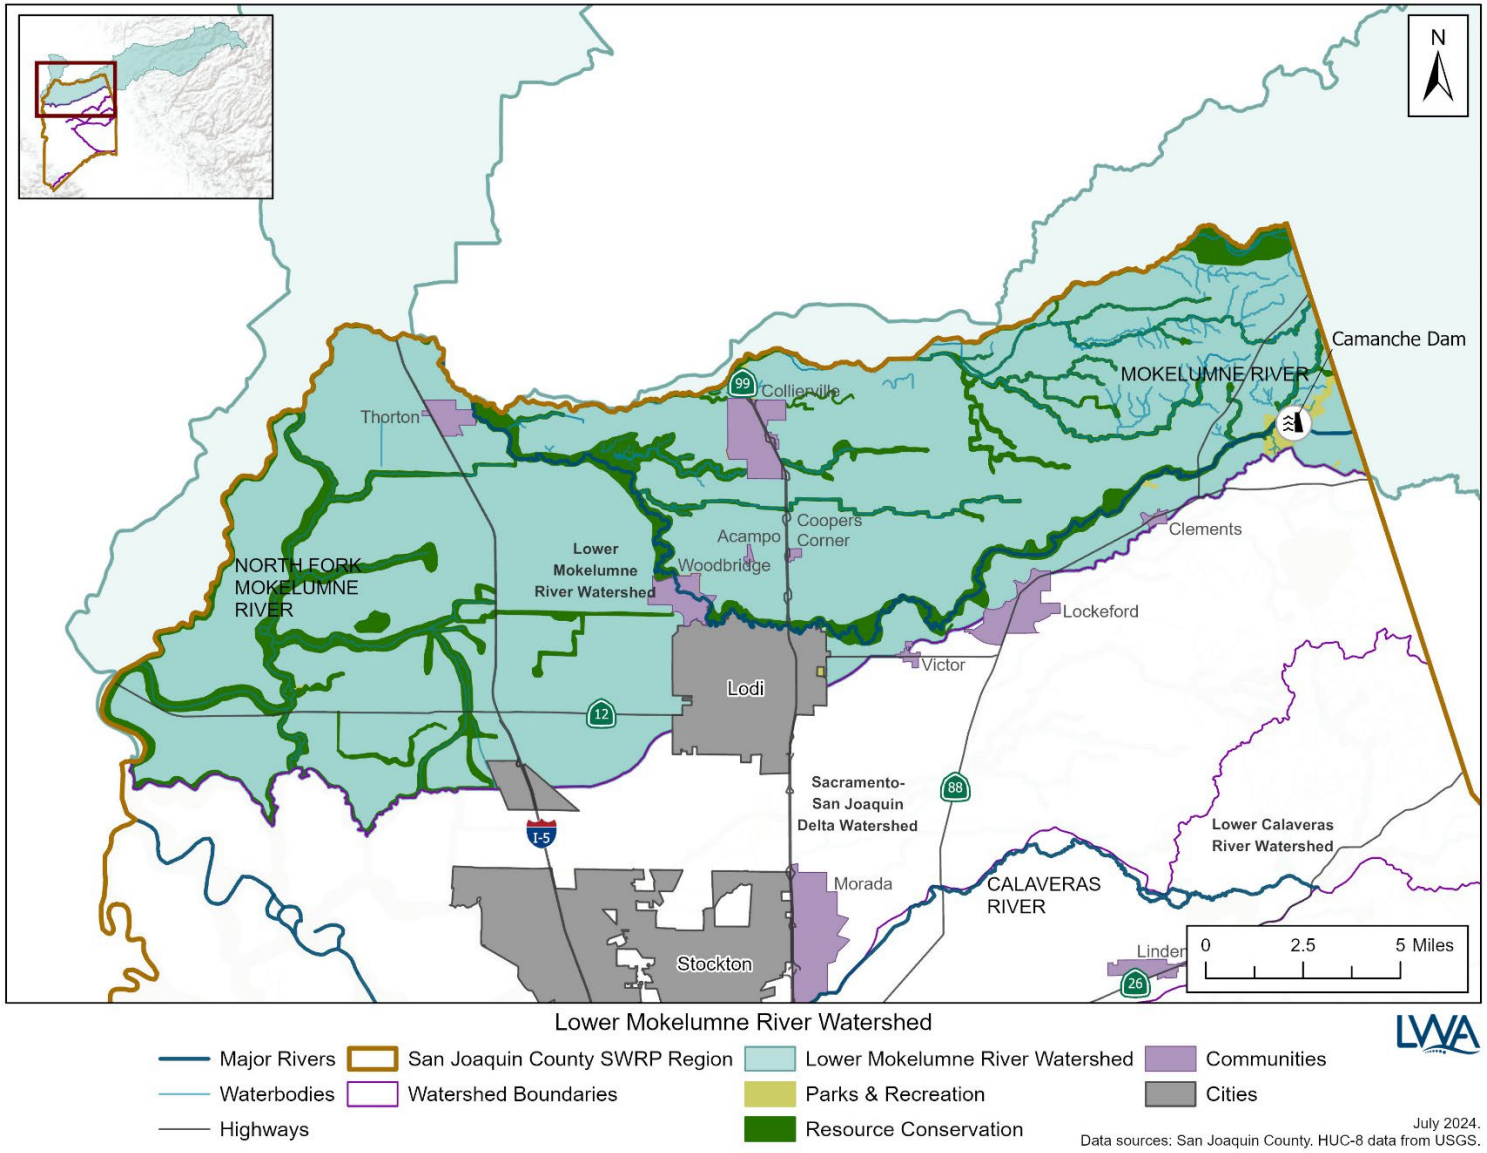

Figure 3-5. Lower Mokelumne River Watershed within the San Joaquin County Region SWRP Area

3.6.2 Sacramento-San Joaquin Delta Watershed

The Sacramento-San Joaquin Delta watershed (**Figure 3-6**) has the second largest drainage area of the four primary regional watersheds, draining 1,232 square miles of land. The watershed comprises 836 square miles of land within the SWRP Area, making it the predominant watershed within SWRP boundaries.

The San Joaquin River is the second longest river in California and the primary receiving water in the SWRP boundary. The San Joaquin River is fed by the tributary waters of the Lower Calaveras River and Lower Rock Creek-French Camp Slough watersheds. The Delta's freshwater feeds the San Fransico Estuary, the West Coast's largest estuarine system, known for its essential role in bird migration via the Pacific Flyaway and fish migration from the coast to inland spawning grounds[63]. The Delta water system is "the hub of California's water supply"[64], serving as the source of water for two-thirds of California's population and 4.5 million acres of farmland[65].

Water Quality

The San Joaquin County Region watersheds are subject to local water quality stressors and TMDLs as well as municipal stormwater regulatory requirements to address these stressors. The SWRP will support water quality improvements for impaired water bodies both with and without established TMDLs by identifying and prioritizing potential projects that can provide multiple benefits, including reduced pollutant loading. Additional, detailed information is provided in **Section 4**.

Watershed Processes

In the early 1800s, the Sacramento-San Joaquin Delta Watershed was a complex network of waterways (bays, tidal channels and flats, rivers, lakes, and intermittent streams) and tidal marshes (both brackish and freshwater)[66]. Dams and water diversions were built to provide water supply to cities and agriculture, and by the 2000s, the Delta had lost most of its tidal marshes to development.

In 2009, the Delta Reform Act and its associated bills were passed to serve two "coequal goals": first, to provide a more reliable water supply for California, and second, to protect, restore, and enhance the Delta Ecosystem[67]. The legislation established a Delta Stewardship Council to support. In 2019, the Council produced the Delta Plan, which serves as a comprehensive, long-term, and legally enforceable plan for organizations and agencies to manage Delta waters and environmental resources. Today, State and local public agencies must certify that a Delta project is consistent with the Delta Plan before implementation.

[67] https://www.deltacouncil.ca.gov/pdf/delta-plan/2019-01-02-amended-chapter-2.pdf

The Sacramento-San Joaquin Delta currently utilizes more than 1,000 miles of levees to protect agricultural and residential areas from flood risk[68]. There are 26 public water suppliers and 7 wastewater agencies (**Table 3-2** and **Table 3-3**), within the SWRP boundaries of the Sacramento-San Joaquin Delta watershed.

Sacramento-San Joaquin Delta Watershed

Figure 3-6. Sacramento-San Joaquin Delta Watershed within the San Joaquin County Region SWRP Area

3.6.3 Lower Calaveras River Watershed

The Calaveras River, a primary tributary to the San Joaquin River that flows west through the City of Stockton, is largely fed by rainfall and is spatially subdivided into an upper and a lower watershed[69]. The Upper Watershed consist of the North and South Fork and the New Hogan Reservoir, while the Lower Watershed occurs downstream of the New Hogan Dam and contains not only the lower Calaveras River, but also Mormon Slough, Old Calaveras River, and numerous developed landmarks including the Bellota Weir and the Stockton Diverting Canal[70]. The source flow of the Lower Calaveras River is controlled by releases from the New Hogan Dam, however four tributaries contribute to Calaveras River flow below the New Hogan Dam, namely South Gulch, Indian Creek, Duck Creek, and Cosgrove Creek[71].

The Calaveras River watershed (**Figure 3-7**), has an overall drainage area of 529 square miles across Calaveras, Stanislaus and San Joaquin counties. The Lower Calaveras River watershed begins just west of the New Hogan Reservoir (slightly east of San Joaquin County). The portion of the Lower Calaveras River watershed within the SWRP boundaries spans 84 square miles, and is the smallest of the four primary watersheds within the SWRP area.

In 2020, NOAA Fisheries developed a Habitat Conservation Plan to protect migratory fish species in the Calaveras while also protecting regional water supply[72].

Many organizations involved in management and preservation of the Mokelumne River Watershed are also involved in the lower Calaveras River below the New Hogan Dam, however Calaveras River Watershed protection is also overseen by the Calaveras River Watershed Stewardship Group[73].

Water Quality

The San Joaquin County Region watersheds are subject to local water quality stressors and TMDLs as well as municipal stormwater regulatory requirements to address these stressors. The SWRP will support water quality improvements for impaired water bodies both with and without established TMDLs by identifying and prioritizing potential projects that can provide multiple benefits, including reduced pollutant loading. Additional, detailed information is provided in **Section 4**.

Watershed Processes

The Calaveras River has historically experienced seasonal extremes in hydrology, with flooding in winter months and drought in the summer[74]. In an effort to control flood risk for the City of Stockton (along the Calaveras River), the Army Corp of Engineers constructed the Hogan Dam in 1930 and then the New Hogan Dam in 1963[75]. The latter provided about four times the storage capacity compared to the original Hogan Dam (from 75 to 317 thousand acre-feet) and enhanced regional flood protection and water supply to surrounding users (municipal, industrial,

[75] Ibid.

irrigation)[76]. Downstream of the Hogan Dam, intricate water conveyance systems and infrastructure have been introduced to enhance water supply and water quality through Stockton[77]. There are 5 public water suppliers and 1 wastewater agency (**Table 3-2** and **Table 3-3**) within the SWRP boundaries of the Lower Calaveras River watershed.

In the 2023 Stormwater Master Plan, the City of Stockton used models to evaluate imperviousness and system performance of stormwater infrastructure in flood-prone study areas (General Plan Study Areas) within the watershed[78]. The plan identified impervious regions such as the Bianchi and Calaveras River study area (a tributary to Calaveras River) with 70% impervious land area that experiences flooding due to stormwater pipe conveyance limitations and an undersized pump station. The Master Plan identified improvement concepts for each flood-prone region within the watershed.

Watershed Summary (Sections 3.1-3.4 and 4.2-4.3)

Attribute/Feature	Description
Municipalities	County of San Joaquin; City of Stockton
Water Suppliers	5 Cities, Districts, or Community Service Area Suppliers
Wastewater Agencies	1 City
Groundwater Subbasin	Eastern San Joaquin

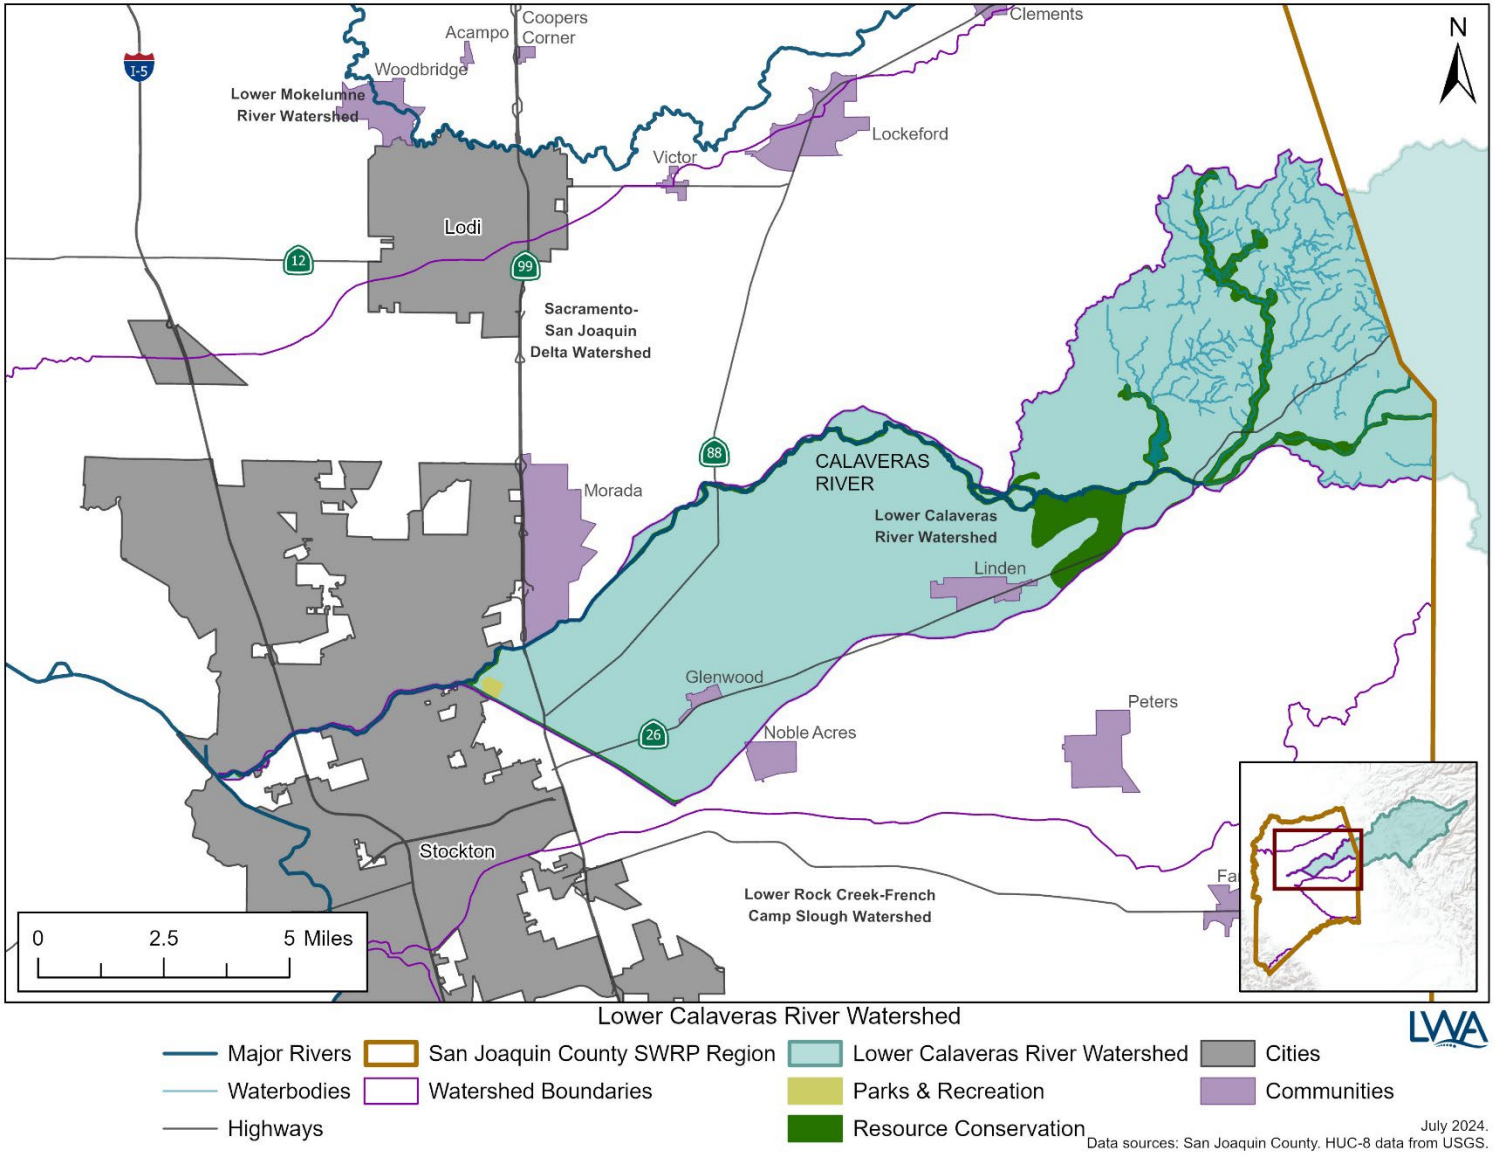

Figure 3-7. Lower Calaveras River Watershed within the San Joaquin County Region SWRP Area

3.6.4 Lower Rock Creek-French Camp Slough

Much like the Mokelumne and Calaveras watersheds, the Rock Creek-French Camp Slough watershed can be split into an Upper and Lower watershed. The Upper Watershed is located entirely in Calaveras County[79], and overlaps with the upper portion of two sub-watersheds, namely Rock Creek and Little John Creek. The Lower Watershed occurs largely in San Joaquin County, and contains the French Camp Slough and Lone Tree Creek sub-watersheds, as well as a small portion of the Little John Creek sub-watershed[80].

The Rock Creek-French Camp Slough watershed (**Figure 3-8**) has an overall drainage area of 473 square miles within San Joaquin, Stanislaus, and Calaveras counties. The Lower Rock Creek-French Camp Slough watershed is the third largest with the SWRP, and the portion of the Lower Watershed within San Joaquin County covers 220 square miles.

The Upper Watershed drains west towards the Lower Watershed, specifically to the San Joaquin River in the City of Stockton, passing along Rock Creek, Little John Creek and French Camp Slough sub-watersheds[81]. In the southern region of the Upper Watershed, Frech Camp Slough becomes the confluence of Little John Creek and Lone Tree Creek; Duck Creek flows from the Upper Watershed to feed Walker Slough.

Water Quality

The San Joaquin County Region watersheds are subject to local water quality stressors and TMDLs as well as municipal stormwater regulatory requirements to address these stressors. The SWRP will support water quality improvements for impaired water bodies both with and without established TMDLs by identifying and prioritizing potential projects that can provide multiple benefits, including reduced pollutant loading. Additional, detailed information is provided in **Section 4**.

Watershed Processes

Prior to urbanization and agriculture and much like the Calaveras and Mokelumne River, Rock Creek-French Camp Slough watershed experienced extreme flooding and variable flows. Salt Springs Valley Reservoir (east of the San Joaquin boundary) successfully addressed seasonal flooding, with releases from the reservoir feeding Rock Creek and Little John Creek[82].

Future projects may seek to expand the general capacity of waterways within the Rock Creek-French Camp Slough watershed. There is one water supplier within the SWRP boundaries of the Lower Rock Creek-French Camp Slough watershed (**Table 3-2**).

4. WATER QUALITY CONCERNS AND REGULATORY REQUIREMENTS (GUIDELINES SECTION V)

4.1 POLLUTANT GENERATING ACTIVITIES

The municipal stormwater permits identify activities that may contribute pollutants to stormwater or dry weather runoff and/or that may impair the designated beneficial uses within the receiving waters. The anthropogenic activities that may deposit pollutants on to the urban landscape that may then be transported during storm events or directly discharge to the storm drain system generally include, but are not limited to, the following[83,84]:

- Emissions, drips and spills from cars;
- Use of pesticides, fertilizers or other chemicals on landscaped areas;
- Pet waste;
- Lack of good housekeeping practices;
- Sanitary sewer overflows (SSOs); and
- Improper handling and/or deposition of household hazardous wastes or other wastes.

As a result of these activities, the pollutants of concern that may be found in stormwater or dry weather runoff include, but are not limited to: sediments, nutrients, pathogens, oxygen-demanding substances, petroleum hydrocarbons, metals, pesticides, herbicides, polychlorinated biphenyls (PCBs), and trash[85,86] (**Section 4.3**).

- The Region-wide Permit notes that "Adverse responses of organisms to chemicals or physical agents in runoff range from physiological responses, such as impaired reproduction or growth anomalies, to mortality. Increased volume, velocity, rate, and duration of stormwater runoff can greatly accelerate the erosion of downstream natural channels. When individually or cumulatively significant, such increases alter stream channels and habitats and can adversely affect aquatic and terrestrial organisms."[87]
- In addition, the Phase II Permit notes that "Trash impacts aquatic life in streams, rivers, and the ocean as well as terrestrial species in adjacent riparian and shore areas. Trash, particularly plastics, persists for years. It concentrates organic toxins, entangles and ensnares wildlife, and disrupts feeding when animals mistake plastic for food and ingest it. Additionally, trash creates aesthetic impacts, impairing our ability to enjoy our waterways."[88]

The Phase II Permit also recognizes that "Storm water is a resource and an asset and should not be treated as a waste product. Managing rainwater and storm water at the source is a more effective and sustainable alternative to augmenting water supply, preventing impacts from

88 Phase II Permit, Finding 4.

flooding, mitigating storm water pollution, creating green space, and enhancing fish and wildlife habitat. California encourages alternative, innovative, multi-objective solutions to help use and protect this valuable resource, while at the same time controlling pollution due to urban runoff."[89,90]

To this end, the SWRP quantifies the water quality benefits of potential projects (**Section 5**). Thus, the SWRP supports water quality improvement efforts, including those identified as part of regulatory requirements and applicable planning documents such as the Region-wide Permit and Phase II Permit and IRWMPs.

4.2 APPLICABLE PERMITS AND PLANS

The San Joaquin County Region SWRP is consistent with and assists in complying with applicable municipal stormwater permit requirements including TMDLs to address the pollutant generating activities and pollutants of concern identified in **Section 4.1** and **Section 4.3**.

The Participating Agencies are required to comply with the following stormwater NPDES permits, as applicable to their jurisdictions and activities:

- Region-wide NPDES Permit and Waste Discharge Requirements (WDRs) General Permit [Region-wide Permit] for Discharges from Municipal Separate Storm Sewer Systems (MS4s) (Order R5-2016-0040)[91] [Phase I municipalities and Phase IIs as requested] and subsequent amendments and reissuances.

  It should be noted that, in 2021, the County of San Joaquin submitted a Notice of Intent (NOI) for coverage of its Phase II MS4 jurisdictional area under the Region-wide Permit. On February 11, 2022 the Regional Water Board amended the County's enrollment under the Region-wide Permit to include both the Phase I and Phase II jurisdictional areas.

- Phase II Small MS4 General Permit (Phase II Permit) (Order 2013-0001-DWQ)[92] [Phase II Municipalities] and subsequent amendments and reissuances;
- General Permit for Discharges of Storm Water Associated with Construction Activity (Construction General Permit) (Order 2022-0057-DWQ)[93] and subsequent amendments and reissuances; and
- General Permit for Discharges of Storm Water Associated with Industrial Activity (Industrial General Permit) (Order 2014-0057-DWQ)[94] and subsequent amendments and reissuances.

The Construction General Permit (CGP) and Industrial General Permit (IGP) generally require that sites and facilities that are regulated by the Permits implement BMPs to protect stormwater quality and prevent non-stormwater discharges.

89 Phase II Permit, Finding 1.
90 Region-wide Permit, General Findings
91 https://www.waterboards.ca.gov/centralvalley/water_issues/storm_water/municipal_permits/#regwidepermit
92 https://www.waterboards.ca.gov/water_issues/programs/stormwater/phase_ii_municipal.html
93 https://www.waterboards.ca.gov/water_issues/programs/stormwater/construction/general_permit_reissuance.html
94 https://www.waterboards.ca.gov/water_issues/programs/stormwater/industrial.html

The Region-wide Permit and Phase II Permit include TMDL requirements, as specified in Attachment G:

- Region-wide Permit Attachment G - Specific Provisions for TMDLs Applicable to Order R5-2016-0040; and
- Phase II Permit Attachment G – Region-Specific Requirements (Regional Water Board-Approved TMDLs with Urban Runoff Listed as a Source).

The Region-wide and Phase II Permits (including the TMDLs) generally require the municipalities to implement a series of Best Management Practices (BMPs) in order to reduce pollutants from the MS4s. The Permits require the municipalities to apply BMPs that are effective in reducing or eliminating the discharge of pollutants to the waters of the U.S.

As a part of the overall strategy for the municipal stormwater program, a series of BMPs (including source controls and/or treatment controls) are implemented to comply with the Discharge Prohibitions[95], Effluent Limitations[96], and Receiving Water Limitations[97] provisions. The implementation of these BMPs addresses a wide range of pollutant generating activities and pollutants of concern.

In addition, the Permits also require the municipalities to implement plans, programs, or BMPs to address specific, impaired pollutant-waterbody combinations that have adopted TMDLs that are incorporated in the respective Attachment G[98]. A summary of the applicable TMDLs and the Participating Agencies is provided in **Table 4-1**.

Compliance with the Region-wide Permit and Phase II Permit general requirements as well as the specific TMDL implementation and monitoring requirements is documented in the Annual Reports submitted to the Regional Water Board and State Water Board, respectively.

The San Joaquin County Region SWRP is consistent with and assists in complying with the municipal stormwater permit and applicable TMDLs as well as the CGP and IGP since it identifies and prioritizes potential multi-benefit potential projects that provide numerous benefits including improvements to water quality.

[95] Region-wide Permit – Provision II; Phase II Permit – Provision B
[96] Region-wide Permit – Provision III; Phase II Permit – Provision C
[97] Region-wide Permit – Provision IV; Phase II Permit – Provision D
[98] Region-wide Permit – Provision III.B; Phase II Permit – Provision E.15

Table 4-1. Waterbodies Within the San Joaquin County Region with Approved TMDLs for the Participating Agencies

Waterbody	TMDL	Participating Agencies	SWRP Watershed(s)			
			Lower Mokelumne	Sac-San Joaquin Delta	Lower Calaveras	Rock Camp-French Camp
Region-wide Permit – Attachment G						
Stockton Urban Water Bodies	Pathogen TMDL [Resolution R5-2008-0030]	County of San Joaquin City of Stockton		X	X	X
Region-wide Permit – Attachment G and Phase II Permit – Attachment G						
Sacramento-San Joaquin Delta[a]	Diazinon & Chlorpyrifos TMDL [R5-2006-0061]	County of San Joaquin City of Lodi City of Manteca City of Stockton City of Tracy	X	X	X	X
Sacramento-San Joaquin Delta Estuary	Methylmercury TMDL [R5-2010-0043]	County of San Joaquin City of Lodi City of Stockton City of Tracy	X	X	X	X
Lower San Joaquin River, San Joaquin River and Stockton Deep Water Ship Channel[b]	Organic Enrichment and Low Dissolved Oxygen TMDL [R5-2005-005]	County of San Joaquin City of Manteca City of Stockton		X	X	X

[a] – The 2020-2022 California Integrated Report, Appendix J identified the delisted waterways including, but not limited to the Lower Calaveras River and Mosher Slough, noting that the applicable water quality standards were attained.

[b] – In October 2021, the Regional Board deemed the responsible parties in attainment of the final waste load allocation for the TMDL. Letter from the Central Valley Regional Water Quality Control Board. October 6, 2021.

4.3 WATER QUALITY PRIORITIES

The Region-wide Permit establishes a Pollutant Prioritization Approach as the primary way in which a Permittee complies with the Permit "The Pollutant Prioritization approach focuses on the outcomes to be achieved rather than prescribing specific actions with which Permittees shall comply. . . .". This approach allows the Permittee to optimize water quality improvements by shifting resources and taking different approaches to achieving outcomes or performance."[99]

This approach represents an important paradigm shift for permitting within the Central Valley region by providing a water-quality based focus that allows the applicable Permittees the flexibility to focus resources and, ultimately the stormwater management program, on the highest priority water quality constituents.

The County of San Joaquin and the City of Stockton (the two Phase I Participating Agencies) submitted the *Assessment and Prioritization of Water Quality Constituents in the Stockton Urbanized Area* to the Regional Water Board in October 2018. The purpose of the assessment and prioritization is to identify and rank the monitored water quality constituents (WQCs), thereby identifying the priority WQCs (PWQCs) to be addressed by the stormwater management program. This effort consisted of two elements – assessment of receiving water conditions and assessment of the municipal stormwater discharges.

- The assessment of receiving water conditions first identified the regulatory drivers for prioritization, and then identified waterbodies with persistent exceedances of water quality objectives. This included considerations of TMDLs, the Clean Water Act Section 303(d) list, local water quality monitoring data and other special studies.
- Based on the results of the receiving water assessment, the municipal stormwater outfall discharges were evaluated to determine whether they caused or contributed to the persistent exceedances observed in the receiving water.

This information was ultimately used to rank the assessed WQCs, thereby identifying the PWQCs to be addressed by the stormwater management program. The PWQCs that were identified as a part of this process are summarized in **Table 4-2**.

[99] Region-wide Permit Section V.D.1.

Table 4-2. Priority Water Quality Constituents for the County of San Joaquin

Water Quality Constituent	Waterbody	SWRP Watershed(s)			
		Lower Mokelumne	Sac-San Joaquin Delta	Lower Calaveras	Rock Camp-French Camp
E. coli, Fecal Coliform	Five-Mile Slough, Lower Calaveras River, Mormon Slough, Mosher Slough, Smith Canal, Walker Slough		X	X	X
Dissolved Oxygen	Lower San Joaquin River (Stockton Deep Water Ship Channel)		X	X	X
Methylmercury	Delta Waterways[a]	X	X	X	X
Trash	All Participating Agency receiving waters	X	X	X	X

[a] Waterbodies identified in Basin Plan Appendix 43, Table A43-1.

The characteristics and water quality issues of concern are similar for both the Phase I and Phase II areas within the County of San Joaquin such that the water quality assessments and determinations based on data and information obtained within the Phase I area are reasonably representative of the Phase II area[100].

4.4 WATER QUALITY COMPLIANCE STRATEGIES AND THE SWRP

A broad array of actions including the implementation of source controls and treatment controls is expected to achieve the applicable TMDLs and protect water quality. The potential projects identified in the San Joaquin County Region SWRP are expected to be consistent with and support the Participating Agencies in meeting the TMDLs and other Permit-mandated water quality improvement goals and requirements. To this end, the San Joaquin County Region SWRP incorporates water quality metrics into the process of selecting potential projects, prioritizing them, and evaluating their benefits.

The multi-benefit projects identified in the SWRP are expected to improve water quality and watershed health since they will assist in reducing runoff and pollutant loads. Reducing runoff through infiltration disrupts the delivery of pollutants to the storm drainage system and water bodies. Implementation of these projects also reduces runoff volumes entering storm drain infrastructure and reduces peak flow rates, which influence the physical characteristics of streams. As a result, the multi-benefit potential projects identified in the SWRP are expected to help reduce surface water pollution and flooding, increase groundwater sustainability, and support perennial stream channel conditions.

[100] The Regional Water Board approved this approach for the Phase II portion of the County of San Joaquin [Central Valley Regional Water Quality Control Board. Amended Notice of Applicability; General Permit for Discharges from MS4s, Order R5-2016-0040. 11 February 2022].

5. QUANTITATIVE METHODS (GUIDELINES SECTION VI.C) AND IDENTIFICATION AND PRIORITIZATION OF PROJECTS (GUIDELINES SECTION VI.D)

5.1 APPROACH

The San Joaquin County Region SWRP utilized a multi-step identification, quantification, and prioritization process to identify planned and potential projects. Projects were evaluated and scored using a multiple benefit quantitative metrics-based approach based on the benefits that the potential projects are assumed to achieve. The six multiple benefits categories incorporated into the approach are those included in the State's SWRP Guidelines, including:

- Water quality - Provide treatment control for both stormwater pollution and dry weather runoff, onsite and local infiltration, or capture and reuse of stormwater and dry weather runoff
- Water supply - Augment local water supply and increase water supply reliability
- Flood control - Reestablish natural water drainage treatment/infiltration systems or mimic natural system functions to the maximum extent feasible
- Environmental - Develop, restore, or enhance habitat and open space through runoff management including creating wetlands, riverside habitats, parkways, and parks
- Community & Tribal[101] - Enhance and/or create recreational and public areas, include community involvement, protect or restore Tribal Cultural Resources.

The methodology included the steps described below and outlined in **Figure 5-1**.

STEP 1. IDENTIFY PLANNED OR POTENTIAL PROJECTS

a. Specific planned and potential projects were requested from the Participating Agencies, Tribal Governments (**Appendix B** and **Appendix C**).
b. Additional potential project locations were identified and catalogued by using a desktop Geographic Information System (GIS)-based opportunity analysis.

STEP 2. PROJECTS WERE SCORED USING AN AUTOMATED METRICS-BASED EVALUATION – As required by the SWRP Guidelines, the potential projects were classified and scored using a quantitative metrics-based multiple benefit evaluation. The scoring was automated for all potential projects using metrics derived from available data.

STEP 3. PROJECTS WERE RANKED BASED ON WEIGHTED BENEFITS – Following the summation of raw total scores based on the metrics-based evaluation (Step 2), the projects were ranked using a weighted distribution for the six benefit categories (Step 1).

101 Per the SWRP Guidelines, these include enhanced and/or created recreational and public use areas, community involvement, and/or employment opportunities provided. The community benefits classification was revised based on engagement with Tribal representatives.

These methodologies were developed and used to rank potential projects and are described in additional detail in the following sections. The development and implementation of specific stormwater and dry weather capture and use projects will undergo separate municipal planning, permitting, and environmental review processes following technical and design criteria by the responsible entity (**Section 7**).

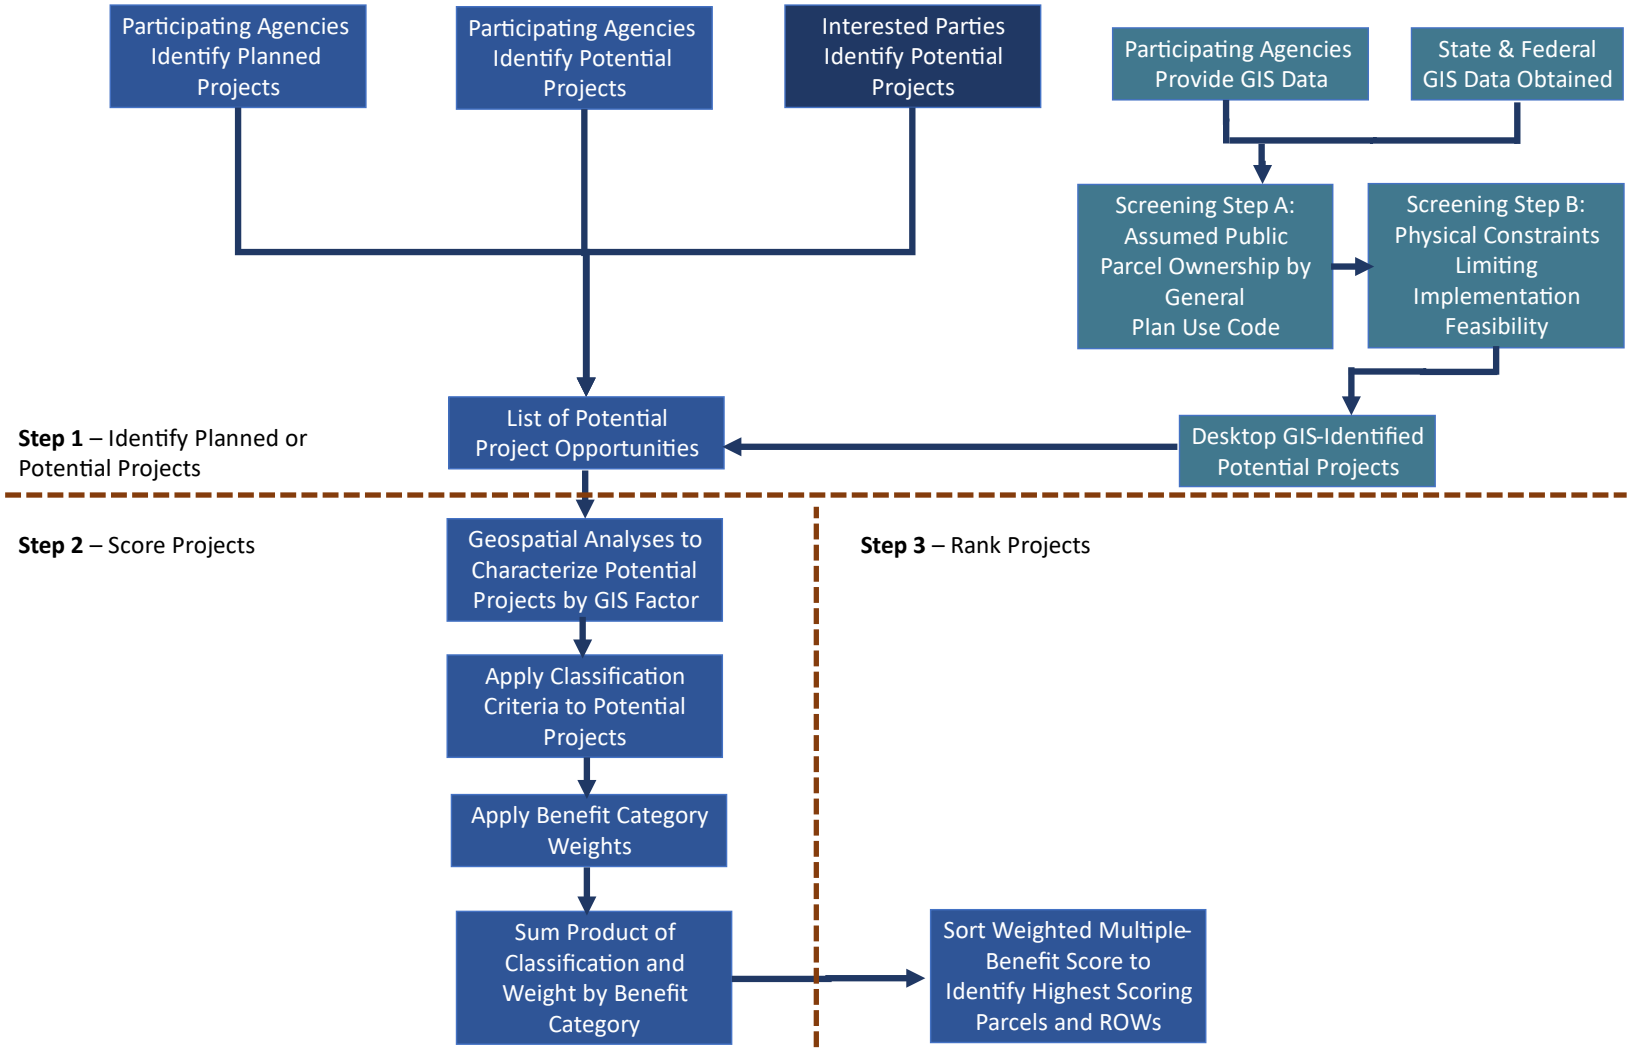

Figure 5-1. Project Identification, Quantification, and Prioritization Overview Flowchart

5.2 IDENTIFICATION OF PLANNED AND POTENTIAL PROJECTS

The identification of the planned and potential projects included three steps: a) identifying planned projects from the Participating Agencies (**Section 5.2.1**), b) identifying potential projects from the Participating Agencies, Tribal Governments and Interested Parties (**Section 5.2.2**), and c) conducting a desktop GIS-based analysis to identify additional potential projects within the region (**Section 5.2.3**).

5.2.1 Planned Projects

To identify planned projects throughout the San Joaquin County Region (within the Participating Agency jurisdictions), the Project Team requested information from each of the jurisdictions. The request for project information was developed to be consistent with the Outreach Strategy and included a spreadsheet structured to enter specific information about the planned projects including the project proponent, project location, facility type and drainage area, project planning phase, project scale, benefits achieved, and facility sizing. Planned projects identified by Participating Agencies in future iterations or revisions of the SWRP will be incorporated into the tabular summary presented in **Appendix E-1**[102].

5.2.2 Potential Projects

To identify potential projects throughout the San Joaquin County Region (within the Participating Agency jurisdictions), the Project Team requested information regarding potential multiple-benefit projects that could be implemented within San Joaquin County. An initial potential project request was sent out to Participating Agencies to identify potential projects that may evolve into planned projects, be the focus of grant applications, or otherwise transition from a project concept into a detailed implementable design. Tabular summaries of the potential projects identified by Participating Agencies are presented in **Appendix E-1**.

An additional potential project request form was distributed to Tribal Governments and Interested Parties as part of the broader coordination and collaboration effort outlined in **Section 3** as well as the Education, Outreach, and Public Participation process discussed in **Section 6**. A summary of potential projects submitted by Interested Parties is presented in **Appendix E-2**.

5.2.3 Desktop GIS-Identified Potential Projects

A GIS-driven desktop screening evaluation was conducted to identify potential projects in public rights-of-way (ROW) and public parcels according to the criteria developed through the optimization and prioritization assessment.

[102] The focus of the SWRP is primarily on locations for potential projects, rather than specific planned or potential projects. However, since the SWRP is a living document, projects that are identified in the future can be evaluated and included in the SWRP. No planned projects were identified and submitted by Participating Agencies during the initial SWRP development process in the winter of 2023/2024. As such, the document and **Appendix E** only identify potential projects.

For this analysis, spatial data (GIS data, computer aided design [CAD] data, or Google Earth files) were needed to identify potential projects and characterize the site suitability for project implementation. The data needs are described in **Table 5-1**, along with data obtained from publicly available sources.

Table 5-1. Data Obtained and Used for GIS-based SWRP Project Identification

Data Obtained from Participating Agencies
Parcels with ownership information and parcel use code
Road centerlines
Storm drain network information
Phase I and Phase II MS4 boundaries
Groundwater aquifer characteristics including aquifer thickness and depth to groundwater
Mapped elevated flood risk for events in 1994 and 1998
Data Obtained from Publicly Available Sources
Groundwater basin boundaries from DWR
Average depth to groundwater from the California Statewide Groundwater Elevation Monitoring (CASGEM) periodic groundwater management measurement program administered by DWR
Soils data from the Natural Resources Conservation Service (NRCS) in Soil Survey Geographic Database (SSURGO) format
Landslides, liquefaction, and other geotechnical hazard information from the California Geological Survey
GeoTracker sites from California Department of Toxic Substances Control
National Elevation Dataset (NED) digital elevation model (DEM) (10 meter) resolution from USGS
Mapped Disadvantaged and Severely Disadvantaged Communities by census block from DWR

The desktop GIS analysis consisted of a multi-criteria screening process, which included the following:[103]

1. Identified publicly owned parcels by using County parcel assessor dataset use codes. (**Appendix F, Table F-1**).
2. Screened publicly owned parcels from Step 1 to isolate parcels that are at least 0.1 acres in size and with average slope less than 10% (estimated using USGS topographic data).
3. Parcels meeting Step 2 screening criteria were assessed for physical constraints that could preclude project implementation. Parcels that did not meet size, slope, and feasibility screening criteria were not considered as project opportunity sites.
4. Identified non-interstate highway public ROW within urban areas. Roadways considered in Step 3 included state and county highways and connecting roads; and local, neighborhood, and rural roads.
5. Identified land uses or adjacent land uses based on a combination of land use categories and use codes provided by the San Joaquin County Assessor. These land uses were combined into specific land use categories for use in the analysis.

A total of 3,567 parcels assumed to be publicly owned were initially identified, evaluated, and incorporated into the multi-benefit project evaluation and prioritization process. Similarly, 37,376 potential ROW projects, reflecting all mapped road segments within San Joaquin County Region, were initially identified, evaluated, and incorporated into the multi-benefit project evaluation and prioritization process.

- A tabular summary of potential parcel-based projects identified by the desktop GIS-driven evaluation is presented in **Appendix E-3.**
- Maps of potential parcel-based projects identified by the desktop GIS-driven evaluation are presented in **Appendix E-4**.
- A tabular summary of potential right of way-based projects identified in the desktop GIS-driven evaluation are presented in **Appendix E-6**.
- Maps of potential right of way-based projects identified in the desktop GIS-driven evaluation are presented in **Appendix E-7.**

5.2.4 Non-Parcel or Right of Way Reference Projects

A component was added into the SWRP document that could accommodate potential projects that may only have a narrative description instead of a readily identifiable parcel number or road segment. As such, **Appendix E-8** has been included in the SWRP to allow for the incorporation of these types of potential projects .

[103] This analysis did not include screening checks that should occur as part of project concept development in the future, which include, but are not limited to, the presence of: geotechnical hazards, seasonally high groundwater, environmentally sensitive areas, proximity to drinking water wells, proximity to septic systems and drain fields, mapped groundwater contamination plumes, steep slopes in drainage areas, and other feasibility checks. In addition, future screening should include other checks such as drainage tie-ins, land use checks, or other data verification.

5.3 PROJECT CLASSIFICATION

All projects were evaluated using the multiple benefit metrics-based approach presented in **Section 5.5**. All projects were classified based on the following information:

1. Project type (**Section 5.3.1**);
2. Infiltration and recharge feasibility (**Section 5.3.2**);
3. Land use type (**Section 5.3.3**); and
4. Drainage area (**Section 5.3.4**).

As part of this step, potential project locations that were identified in the GIS analysis were manually altered, as needed to better reflect practical concerns (e.g., multiple small co-located parcels may be grouped into one potential project location; clearly infeasible project locations may have been removed).

5.3.1 Project Type

Projects were categorized as ROW/green street projects, regional, or parcel-based.

1. All street-based projects were identified as ROW/green street projects.
2. Projects located on a parcel were classified as regional if:
    a. Minimum parcel size of at least 0.5 acre; and
    b. Within a Phase I or Phase II MS4 boundary.
3. All other parcel locations were identified as parcel-based projects.

5.3.2 Infiltration and Recharge Infeasibility

All potential project locations were categorized as feasible, partially feasible, or infeasible for infiltration/groundwater recharge, as follows:

1. Groundwater recharge feasible – Groundwater recharge is feasible if infiltration is feasible and the following conditions are satisfied: surficial and subsurface soil provide sufficient permeability, reliable hydrogeologic connectivity to aquifer, sufficient groundwater storage available, and vadose zone/soil quality are acceptable.
2. Infiltration feasible; not suitable for groundwater recharge – The site has none of the infiltration hazards present and the soil underlying the facility is relatively well draining (identified as hydrologic soil group A or B), but does not meet criteria for groundwater recharge.
3. Infiltration safe but only partially feasible – This is the case when none of the above constraints exist, but the soil underlying the facility is relatively poorly draining (identified as hydrologic soil group C or D).
4. Hazardous/infeasible for infiltration (i.e., facilities must be lined) – projects that are located:
    a. In any portion, over geotechnical hazard areas (e.g., landslides, liquefaction hazards, other available information);
    b. Mostly over known soil contamination or groundwater contamination plumes; or

c. Within 100 feet of a site with soil or groundwater contamination (based on proximity to active Geotracker[104] sites)

5.3.3 Land Use Type

Potential projects were assigned land use types based on the parcel use codes from San Joaquin County's parcel assessor dataset. A tabular summary of use codes and associated narrative descriptions is presented in **Table F-1** of **Appendix F**. The County's parcel use codes were aggregated into the following land use groups allowing for broader project groups to be associated with each potential project opportunity:

- Residential;
- Commercial;
- Industrial;
- Agricultural
- Recreational;
- Institutional; and
- Utilities & Government.

5.3.4 Drainage Area

For each identified project, the project drainage area was identified and characterized as follows:

1. All planned projects with identified drainage areas were characterized as provided.
2. For ROW projects for which drainage area has not been characterized, the roadway and an assumed tributary width (e.g., 50 feet per side) that extends into the adjacent parcels was considered the project drainage area.
3. For parcel-based projects for which drainage area has not been characterized, the entire parcel was assumed to make up the drainage area.
4. For regional projects for which the drainage area has not been characterized, the drainage area characterization (i.e., slope and land use) was roughly approximated.

5.4 PROJECT DATABASE

The projects identified and classified using the methods described above were compiled into a database that includes all of the project information that was provided (for planned projects) as well as information identified for potential projects as part of the GIS screening process. Following the compilation of projects, additional information was gathered for each through a desktop analysis. This information was then used to score the identified potential projects. A description of the scoring process is found in the sections that follow.

[104] GeoTracker is the State Water Resource Control Board's data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. https://geotracker.waterboards.ca.gov/

5.5 METRICS-BASED MULTI-BENEFIT EVALUATION

The planned and potential projects included in the project database were evaluated using an automated scoring process based on quantitative metrics that account for multiple benefits, as described in this section. The scoring scheme described below was adapted from the method used to develop the SWRP for San Mateo County (SMCWPPP, 2017),[105] the Ventura Countywide Municipal SWRP,[106] SWRP for Alameda Countywide Clean Water Program,[107] and Contra Costa Watersheds SWRP[108] and is consistent with the SWRP Guidelines.[109]

The quantitative metrics and qualitative components that are scored are associated with providing the multiple benefits identified in the State's SWRP Guidance (i.e., general suitability, water quality, water supply, flood control, environmental benefit, and community & Tribal benefit) derived from the implementation of the project. The raw scores from the multi-benefit evaluation were generated from the preliminary project ranking. A weighted score was applied to the raw scores to equally distribute each of the multiple-benefit categories. **Appendix E** provides the ranked project database.

5.5.1 Methodology

Using the information compiled in the project database, each project received a total score and weighted score using the metrics-based point system identified in **Table 5-2** through **Table 5-8**. The total score for each benefit category is based on the scored factors as identified below.

General Suitability (Table 5-2)

- *Parcel Area (For Regional and Parcel-Based Projects Only)* – This scoring component provides more points for larger parcel areas, assuming that it would be easier to site a project on a larger parcel.
- *Location Slope* – This scoring component is related to ease of construction and implementation. Flatter locations typically require less grading and hydraulic connection considerations.
- *Infiltration Feasibility* – Retention of runoff through percolation or infiltration is known to provide enhanced pollutant reduction, reestablishment of natural drainage, recharge potential, and reduction of runoff rates, among other beneficial outcomes. This project component is assumed to apply to all benefit categories.
- *Proximity to Existing Infrastructure* – This scoring component weights more points for projects near existing storm drains.

[105] San Mateo County Stormwater Resource Plan (2017)
[106] Ventura Countywide Municipal Stormwater Resource Plan (2016)
[107] Alameda Countywide Clean Water Program Storm Water Resource Plan (2019)
[108] Contra Costa Watersheds Stormwater Resource Plan (2019)
[109] State Water Board, December 2015.
(https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swgp/docs/prop1/swrp_finalguidelines_dec2015.pdf)

Table 5-2. Project Metrics-Based Multi-Benefit Scoring for General Suitability

Project Component	Points		
	0	0.75	1.5
Parcel Area (for Regional and Parcel Based projects only)	< 1 acre	1 - < 4 acres	> 4 acres
Location Slope	7-10%	3-7%	0-3%
Infiltration Feasibility	No/Partial	Infiltration Only	Groundwater Recharge
Proximity to Existing Infrastructure	Greater than 500 feet from a storm drain	--	Less than 500 feet from storm drain

Water Quality (Table 5-3)

- *Regional Facility* – One additional point is awarded for regional projects, as these projects would remove a larger pollutant load than a parcel-based or ROW project.
- *Removes Urban Pollutant Loads from Stormwater* – Points (specific to water quality) are provided to facilities designed as green infrastructure or treatment control facilities.
- *Improves Groundwater Quality* – Points are provided to facilities that improve groundwater quality in areas with historical exceedances of constituents of concern.

Table 5-3. Project Metrics-Based Multi-Benefit Scoring for Water Quality

Project Component	Points		
	0	1	2
Regional Facility	--	Yes	--
Removes Urban Pollutant Loads from Stormwater	Outside urbanized area	--	Inside urbanized area
Improves Groundwater Quality (in areas with historical exceedances of constituents of concern)	No expected benefit, project located in areas with water quality concerns	No expected benefit, project is not located in close proximity of areas with water quality concerns	Directly benefits areas of GW quality concern

Water Supply (Table 5-4)

- *Augments Water Supply* – Increasing points are received based on potential water supply provided. Projects located over infiltrating soils and overlying potential water supply aquifers that promote infiltration are given one point, while Interested Party projects that are specifically designed to augment water supply will be given two points.
- *Augments Groundwater Supply* – Points are provided to facilities that augment groundwater supplies; extra points are provided to facilities that enhance groundwater levels in critical areas (e.g., interconnected surface water or for shallow domestic wells).

Table 5-4. Project Metrics-Based Multi-Benefit Scoring for Water Supply

Project Component	Points		
	0	1	2
Augments Water Supply	--	Infiltrating green infrastructure or infiltrating flood control project over potential water supply aquifer	Harvest/use or other water augmentation project
Augments Groundwater Supply	--	Overall enhancement of water levels in the basin	Overall enhancement of groundwater levels in a local area

Flood Control (Table 5-5)

- *Provides Flood Control Benefits* – Interested Party flood control facilities receive points specific to providing flood control benefits. Green infrastructure projects (fully or partially infiltrating) are assumed to provide some flood control benefits, while projects specifically designed to address flooding issues are given more points.

Table 5-5. Project Metrics-Based Multi-Benefit Scoring for Flood Control

Project Component	Points		
	0	2	4
Provides Flood Control Benefits	Does not provide flood control benefits	Provides flood control benefits by reducing runoff and increasing infiltration and recharge	Provides flood control benefits in high-risk flood zones

Environmental (Table 5-6)

- *Re-establishes Natural Water Drainage Systems* - Fully and partially infiltrating green infrastructure projects are given one point for providing hydrologic benefit.
- *Develops, Restores, or Enhances Habitat and Open Space* – Hydromodification control, stream restoration, and habitat restoration projects receive points specific to providing environmental benefits.

Table 5-6. Project Metrics-Based Multi-Benefit Scoring for Environmental

Project Component	Points		
	0	1	2
Re-establishes Natural Water Drainage Systems	--	Fully and partially infiltrating green infrastructure project	Stream restoration or hydromodification control
Develops, Restores, or Enhances Habitat and Open Space	--	Green infrastructure project	Habitat restoration project

Community & Tribal (Table 5-7)

- *Protects Tribal Cultural Resources (TCRs)* – Points are allocated to projects that protect TCRs as they are identified in consultation with Tribal Governments.
- *Provides Community Enhancement* – Projects that specifically provide public use areas or public education components are given points.
- *Provides Disadvantaged Community Benefits* – Points are provided to projects that are located in disadvantaged and severely disadvantaged communities (SDACs) and disadvantaged communities (DAC)s.

Table 5-7. Project Metrics-Based Multi-Benefit Scoring for Community & Tribal

Project Component	Points		
	0	1	2
Protects Tribal Cultural Resources (TCRs)	--	--	Project is in TCR area
Provides Community Enhancement (enhanced or created recreational and public use areas with potential projects for community involvement and education)	--	Green infrastructure project	Public use area or public education project component
Disadvantaged Community Benefits	--	--	Project is in DAC/SDAC areas

An overview of project factors by benefit category, associated maximum weights by benefit category, and the maximum potential total score for each potential project is presented in **Figure 5-2**.

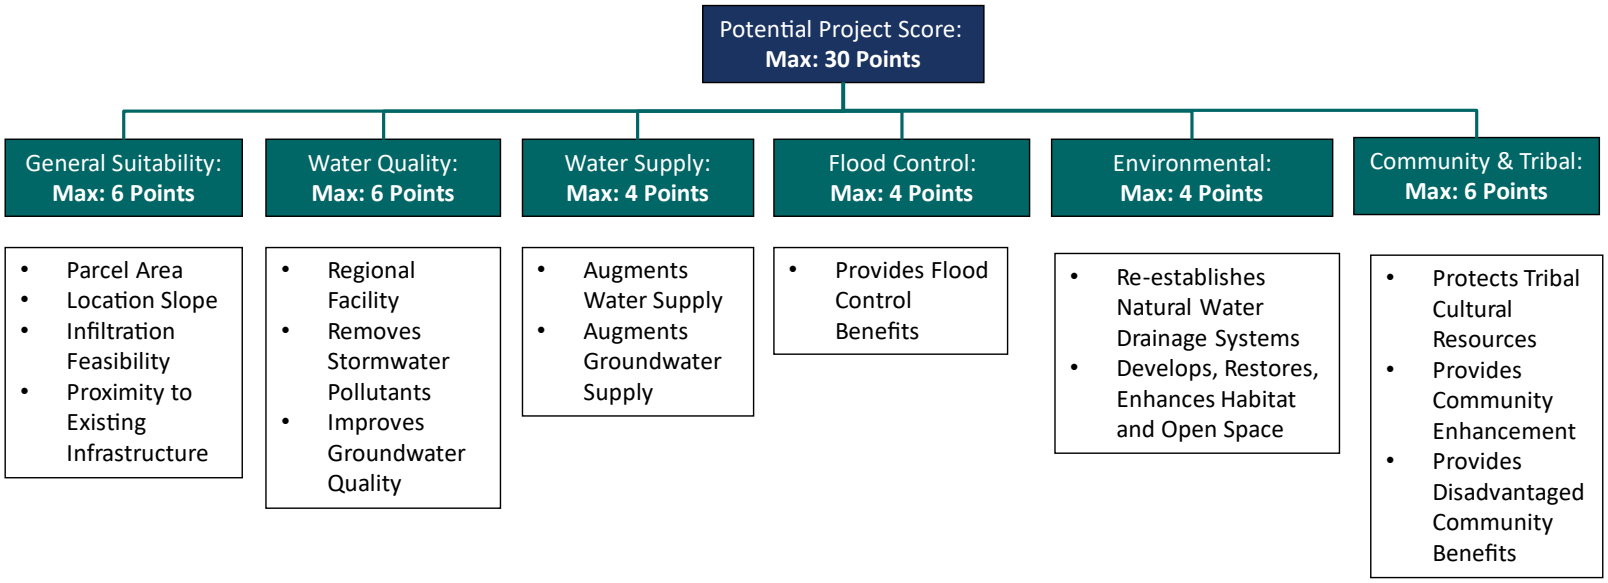

Figure 5-2. Overview of Project Benefit Category Point Allocation and Maximum Project Score for the Multiple Benefits Evaluation

Participating Agencies elected to weight each benefit category equally (set at one-sixth or approximately 16.7% for each benefit category) as presented in **Table 5-8**.

- For General Suitability and Flood Control, the allocation of points yielded non-integer values for the category's four factors (e.g.; 0.75, 1.5, and 3) (**Table 5-2)**.
- Point allocations for the other categories are integer values ranging from 0 for no benefit, 1 for moderate benefit, and 2 for more extensive benefit as shown in **Table 5-3** through **Table 5-7**.

Table 5-8. Relative Assignment of Weights by Project Benefit Category

Benefit Category	Weight[a]
General	16.7%
Water Quality	16.7%
Water Supply	16.7%
Flood Control	16.7%
Environmental	16.7%
Community & Tribal	16.7%

[a]16.7% is presented for simplicity as the computation reflects one-sixth of the total weight summing to 100%.

5.6 PRIORITIZATION OF SCORED PROJECTS

The quantitative metrics-based multi-benefit evaluation methodology was applied to all potential projects. The array of multiple projects benefits were quantified based on the equal weights by benefit category and criteria outlined in **Table 5-3** through **Table 5-7**, coupled with the weighting in **Table 5-8** above, yielding a weighted metrics-based multi-benefit evaluation score for each parcel or ROW.

A comprehensive tabular summary of the prioritized potential parcel-based projects reflecting planned projects identified by Participating Agencies, potential projects identified by Participating Agencies and Interested Parties, and desktop GIS-driven evaluation projects is presented in **Appendix E-5** with corresponding figures presenting potential projects by jurisdiction in **Appendix E-6**.

A tabular summary of potential right of way-based projects identified in the desktop GIS-driven evaluation are presented in **Appendix E-6** with corresponding figures presenting potential projects by jurisdiction in **Appendix E-7.** A tabular summary of projects that cannot be identified based on a parcel number or right of way, such as future potential Tribal Cultural Resource (TCR) related projects that may need to be described in a narrative manner, are presented in **Appendix E-8**.

6. EDUCATION, OUTREACH, AND PUBLIC PARTICIPATION (GUIDELINES SECTION VI.F)

6.1 OVERVIEW

The following section provides an overview of the purpose and methods for outreach to regional and Tribal governments and non-governmental partners (including IRWMPs, watershed/advisory groups, non-municipal public landowners, NGOs, and the general public) during development of the San Joaquin Region SWRP[110].

Appendix C includes information on specific audiences, materials and schedules implemented during SWRP development and provides a summary of the required and recommended components for community participation.

6.1.1 Purpose of the Outreach and Coordination Strategy

Water Code Section 10562 (b)(4) requires that the San Joaquin County Region SWRP facilitate community participation and the SWRP Guidelines state the following:

> *"To maximize community-based benefits, key stakeholders and the public should be involved in all appropriate implementation steps of the Storm Water Resource Plan. Public education and opportunities for public participation in actions, decisions, and projects implemented through watershed-based storm water management should be provided."*

The San Joaquin County Region SWRP Outreach Strategy was developed with the intent to engage community members during SWRP development and on an ongoing basis during SWRP implementation. The Outreach Strategy focuses on community engagement and collaboration, utilizing local knowledge and community perspectives to promote the effective identification and implementation of stormwater management and water quality projects.

6.1.2 Outreach Approach

The Outreach Strategy includes both general public engagement and targeted outreach to specific audiences, as specified in Section **6.1.3**. An overview matrix summarizing the outreach methods by specific audience is described in further detail in Section **6.1.4**. The Outreach Strategy focused on SWRP development and obtaining community input on proposed stormwater projects and prioritization. The implementation phase of the SWRP will continue to be conducted by the Participating Agencies involved in development of the SWRP, regional and Tribal governments, and other Interested Parties.

6.1.3 Key Outreach Groups and Partners

Outreach was categorized into three separate groups since outreach methods varied depending on the interested party. The three groups included:

- Governments – Regional and Tribal Governments (**Section 6.1.3.1**)

[110] The Participating Agencies refer to outreach audiences as "regional and Tribal governments and non-Tribal partners", because this can foster respectful communication during Government-to-Government consultation and amongst all collaborating parties.

- Non-Tribal Partners, Group A - IRWMPs and Watershed/Advisory Groups (**Section 6.1.3.2**)
- Non-Tribal Partners, Group B - Non-municipal public landowners, NGO, and the general public (**Section 6.1.3.3**)

6.1.4 Regional and Tribal Governments

Regional governments include the agencies funding the development of the SWRP (i.e. the SWRP Participating Agencies), namely the County of San Joaquin and the Cities of Lodi, Manteca, Stockton, and Tracy.

The San Joaquin County Public Works Department (one of the Participating Agencies) contacted thirteen Tribal Governments to facilitate Government-to-Government collaboration, specifically the Buena Vista Rancheria of Me-Wuk Indians, the California Valley Miwok Tribe, the California Valley Miwok Tribe AKA Sheep Rancheria of Me-Wuk Indians of California, the Chicken Ranch Rancheria of Me-Wuk Indians, the Confederated Villages of Lisjan Nation, the Guidiville Rancheria of California, the Ione Band of Miwok Indians, the Muwekma Ohlone Indian Tribe of the San Francisco Bay Area, the Nashville Enterprise Miwok-Maidu-Nishinam Tribe, the Northern Valley Yokut / Ohlone Tribe, the United Auburn Indian Community of the Auburn Rancheria, the Wilton Rancheria, and the Wuksachi Indian Tribe/ Eshom Valley Band.

6.1.5 Non-Tribal Partners, Group A

Group A Non-Tribal Partners include IRWMPs and watershed/advisory groups. The two primary regional IRWMPs in San Joaquin County are the Eastern San Joaquin IRWMP and the Westside-San Joaquin IRWMP. The SWRP Participating Agencies also identified several watershed and advisory groups that will play critical roles in broader community outreach and coordination of stormwater management projects identified in the SWRP.

6.1.6 Non-Tribal Partners, Group B

The Non-Tribal Partner Group B outreach audience consists of non-municipal public landowners, NGOs and the general public. The non-municipal public landowners include, but are not limited to, school districts, park districts, water agencies, transportation/transit districts, housing authorities, and private utilities. The Participating Agencies also conducted outreach with NGOs, including stewardship councils, foundations, sustainability groups, environmental education coalitions, land trusts and preserves, organizations serving historically underserved communities, and organizations serving business and community interests.

6.1.7 Matrix of Outreach Methods and Implementation Schedule

Table 6-1 details the specific outreach methods used to reach each outreach audience specified in **Section 6.1.3**. The full implementation schedule of outreach activities is detailed in **Table 6-2**.

Table 6-1. Matrix of Outreach Methods to Interested Parties

Interested Parties		Outreach Method				
Category	Government or Group	Government-to-Government Consultation	Meetings[a]	Targeted Emails	General Flyers	Regional Webpage
Governments	Tribal	X	X	X		X
	Regional (including Participating Agencies)		X	X	X	X
Non-Tribal Partners: Group A	IRWMPs		X	X	X	X
	Watershed/ Advisory Groups		X	X	X	X
Non-Tribal Partners: Group B	Non-Municipal Public Landowners			X	X	X
	Other Organizations			X	X	X
	General Public				X	X

[a] Meetings were held upon request

Stages of Development and Implementation	Date
Outreach with Interested Parties	December 2023 – Ongoing
Review of a Methodology for Ranking Stormwater Projects	January 16 - March 13, 2024
Opportunity for Project Submittal	April 5 – April 29, 2024
Review of the Draft SWRP	June 28 – July 19, 2024
SWRP Modification/ Project Implementation	Ongoing, As Needed

6.2 SUMMARY OF OUTREACH ACTIVITIES

Outreach and coordination involved a wide range of activities including sending emails and certified invitation letters to Tribal Governments (as part of Government-to-Government consultation), hosting virtual information meetings with Governments and both Group A and Group B non-Tribal partners (upon request), sending emails to regional and Tribal Governments and non-Tribal Partners during each phase of SWRP development, posting informational flyers, and developing and regularly updating a SWRP webpage on the San Joaquin County website. Further information on specific components of each outreach activity are provided in the following sections.

6.2.1 Government to Government Consultation

Members of the Project Team met with a DWR Tribal Liaison to develop a certified letter of invitation to Tribal Governments in the San Joaquin County Region to participate in the development and implementation of the SWRP. Contact information for Tribal Governments with cultural or traditional affiliation to the San Joaquin County area was provided by the Native American Heritage Commission (NAHC). A letter was drafted to each Tribal Government including information on the purpose of the SWRP and opportunities for collaboration. Copies of all letters sent to Tribal Governments can be found in **Appendix C (Attachment B)**.

6.2.2 Targeted Emails

All outreach audiences received detailed emails with information on the SWRP and opportunities for involvement during each phase of SWRP development. Copies of all emails sent to all outreach audiences can be found in **Appendix C** (**Attachment B** and **C**).

6.2.3 General Flyers

The Participating Agencies developed informational flyers in the early stages of SWRP development to share information on the SWRP and provide opportunities for public participation and feedback. One flyer was developed for the City of Stockton, and a separate flyer was developed for the County and the cities of Lodi, Manteca, and Tracy. Copies of these flyers are provided in **Appendix C (Attachment D)**. Each Participating Agency posted flyers in their own jurisdictions in public spaces including municipal utilities departments, city halls, public works departments, libraries, online websites, and at regional cleanup events.

6.2.4 Regional Webpage

The County of San Joaquin developed a webpage[111] as part of the County Website called "Regional and Tribal Engagement". The website included detailed information on the following:

1. The definition of a SWRP;
2. The boundaries and regional characterization map for the San Joaquin Region SWRP;
3. Information on stormwater and its impacts on water quality;
4. Information on how green infrastructure projects can improve water quality (with picture examples of green infrastructure developments);
5. Tribal Engagement information; and

[111] http://www.sjwater.org/Stormwater-Management/Regional-and-Tribal-Engagement

6. Opportunities for involvement and contact information for the SWRP Project Team.

The website was updated during each stage of SWRP development in order to readily inform outreach audiences on SWRP progress and how they can participate. The SWRP website was initially developed in December of 2023, and will remain on the county website on an ongoing basis through SWRP implementation (**Attachment E**).

7. IMPLEMENTATION STRATEGY AND SCHEDULE (GUIDELINES SECTION VI.E)

Implementation of the San Joaquin County Region SWRP will include both project implementation and adaptive management on a watershed- and project-level basis. Successful implementation requires continued engagement with Interested Parties, coordination with water quality compliance programs, and specific actions for individual projects, such as obtaining necessary environmental permits, conducting Tribal consultation to protect and restore Tribal Cultural Resources (TCRs), and identifying and obtaining funding resources.

7.1 SWRP IMPLEMENTATION

7.1.1 Responsible Entities

The Participating Agencies and regional and Tribal governments are the primary developers and coordinators of the SWRP. It is expected that the agencies identified on the prioritized project opportunity list will be responsible for the development and implementation of those projects on an as-needed basis as funding becomes available. While many projects are anticipated to have one responsible entity as the lead, some regional projects may include several responsible entities.

It is anticipated that the Participating Agencies will conduct the following activities as a part of the SWRP implementation:

- Facilitate meetings on an ongoing basis to discuss and coordinate the implementation of water quality programs and projects and discussions of SWRP updates, as needed;
- Outreach to Interested Parties to obtain input for project identification and implementation;
- Consultation with Tribal Governments to protect TCRs and prioritize projects that repair or restore TCRs; and
- Fund SWRP updates, as needed and to the extent feasible.

7.1.2 Community Participation

Through on-going feedback mechanisms and direct solicitation, the Participating Agencies will encourage continued Government-to-Government collaboration and community involvement/participation in the San Joaquin County Region SWRP through adaptive management and implementation. It is anticipated that outreach for new potential projects will occur periodically with SWRP updates.

In addition, all Interested Parties are encouraged to participate by submitting individual projects or suggestions for projects eligible for inclusion in the SWRP. Guidelines for submitting individual projects or suggestions for projects can be found in **Appendix B**. The guidelines and instructions therein include details on the type of information required for submittal or inclusion in the SWRP.

Community engagement and participation will also occur during individual project implementation. Community engagement strategies will focus on the community where the project is located and will be implemented by the project sponsor.

The SWRP will be made available to the public through the Stormwater Management webpage on the San Joaquin County Website[112].

7.2 ACHIEVEMENT OF MULTIPLE BENEFITS

The Participating Agencies recognize that stormwater is a resource and can be managed in such a way as to provide multiple benefits. As such, the SWRP draws from existing regional plans and builds upon existing efforts, including the Eastern San Joaquin IRWMP and the Westside-San Joaquin IRMWP, and other relevant plans referenced herein. Continuing the use of this integrated approach will allow for the implementation of dry weather and stormwater capture projects as well as the achievement of the multiple benefits at the regional scale.

In keeping with this approach, the project evaluation methodology in **Section 5** scores potential projects based on quantitative metrics and qualitative components associated with providing the identified multiple benefits (water quality, water supply, flood control, environmental benefit, and community and Tribal benefit) derived from the implementation of specific projects. The projects that provide more benefits will score higher, which encourages the development and submittal of projects that achieve a greater number of benefits. Each of the projects selected for implementation will be monitored to ensure that the multiple benefits are achieved.

7.3 DECISION SUPPORT TOOLS AND SUPPORTING DATA

The Participating Agencies have developed or are in the processes of developing a number of tools that can be used as decision support tools for the implementation of projects identified in the SWRP. **Section 5** describes the decision support tools used to analyze and prioritize projects and provides the data necessary to use these tools. These tools and data will be used throughout the SWRP implementation.

7.4 IMPLEMENTATION STRATEGY, TIMELINE, AND TRACKING

Once finalized, the SWRP will be submitted to the Greater San Joaquin County Regional Water Coordinating Committee for incorporation into the Eastern San Joaquin IRWMP, and to the San Luis & Delta-Mendota Water Authority for incorporation into the Westside-San Joaquin IRWMP (anticipated to occur in August 2024).

The SWRP will also be provided to Engineering/Capital Improvement Project (CIP) planning divisions at each Participating Agency to consider the feasibility of pursuing funding for incorporating water quality features / low impact development elements into existing or future planned projects.

Individual project implementation will be managed by the regional or Tribal Government with jurisdiction at the project location. Regional authorities or Tribal Governments may facilitate or

[112] http://www.sjwater.org/Stormwater-Management/Regional-and-Tribal-Engagement

manage larger regional projects through a Memorandum of Understanding (MOU) or other agreements, as needed.

As funding opportunities become available (**Section 7.5**), calls for projects will be advertised, and if necessary, the project database will be updated. Projects will be re-assessed and ranked according to the methodology described in **Section 5** that encourages multi-benefit projects that support stormwater and dry weather capture and use. Agencies sponsoring projects selected for implementation will be responsible for implementing the project-specific strategy, including:

- Project design;
- Collaboration with Interested Parties and consultation with Tribal Governments to ensure protection of TCRs through project implementation;
- Complying with CEQA and NEPA, including public process;
- Obtaining local, state and federal project permits;
- Implementing the project;
- Tracking project implementation and effectiveness of the strategies identified in the planning documents, permits or grant agreements, where applicable;
- Completing reports required by permits or grants.

To ensure the successful transition from project selection to implementation, projects may be brought to the Participating Agencies for review and collaboration to ensure that the project proponent understands the permitting processes and requirements. Project timelines are typically under continuous development, such that as funding becomes available, detailed timelines for feasibility analysis, design and construction for selected projects will be developed at that time.

Long-term implementation schedules will be determined by the level of funding available through grants and other sources, as well as integration of stormwater and dry weather capture features into regularly scheduled CIP improvements. Additionally, for larger regional projects, schedules will likely require more time for planning, phasing, design, and construction, and are therefore expected to be implemented over a longer timeframe. Ultimately, planning documents for specific projects will identify project-specific implementation schedules and timelines.

The SWRP is designed to be a living document that will be updated periodically in response to future calls for projects, and as project sponsors submit new information for projects already on the list or as they submit additional projects for consideration.

As projects are implemented, the SWRP will be periodically updated to incorporate project designs, feasibility analysis and individual project status and/or the addition of new potential project locations (e.g., new parcels will be added to the “potential projects” list). Parcels for which projects are planned will go through the scoring process again to ensure that all project benefits have been identified. Updates to the SWRP are projected to be completed approximately once every five years, although project opportunity lists may be updated more frequently.

7.5 RESOURCES FOR PLAN IMPLEMENTATION AND FUNDING NEEDS

The resources necessary for Plan implementation include: 1) projection of additional funding needs and sources for administration and implementation needs; and 2) schedule for arranging and securing Plan implementation financing.

The initial development of the SWRP was funded by the Participating Agencies. The County of San Joaquin will administer the project database and update it as needed after calls for projects, as project sponsors add new projects, or as existing projects are updated with new information. It is anticipated that the Participating Agencies will update the SWRP in the future, as needed or approximately every five years.

Project implementation will depend on funding availability. Through capital improvement and planning processes, each Participating Agency may refine the list of prioritized potential projects for further development. Regional or Tribal Governments may develop partnerships with other agencies or entities to support project planning and implementation. The funding necessary to implement projects identified by the SWRP in **Appendix E** will be obtained by the municipal agency, Tribal Government, non-Tribal partner, or partnership of Interested Parties working to implement the identified projects. Project implementation will depend on the projected cost of each project and funding availability.

The funding strategy for the administration and maintenance of the SWRP and implementation of projects may include the use of one or more of the following types of funding sources:

- Stormwater program funding;
- General funds;
- Municipal CIP funding;
- Grant funding;
- New taxes or other levees;
- Partnerships with Caltrans or other governmental agencies;
- Transportation funding; and/or
- Other state or federal grant programs.

For example, the Participating Agencies may coordinate with the California Department of Transportation (Caltrans) to fund mutually beneficial projects to assist in meeting their state-wide TMDL implementation and/or trash capture stormwater permit requirements.

The viability of the funding options for the implementation of projects will ultimately be evaluated based on several criteria including but not limited to, need for ballot approval, reliability, and potential barriers to implementation.

As funding is identified for projects, the initial task for project implementation will involve a planning phase that will identify necessary permits, including evaluations for the California Environmental Quality Act (CEQA). All necessary federal, state, and local permits, as well as CEQA evaluations, will be obtained by project proponents.

Stormwater Resource Plan Checklist and Self- Certification

Storm Water Resource Plan Checklist and Self-Certification

This Storm Water Resource Plan (SWRP) checklist and self-certification identifies where each of the required and/or recommended SWRP components are addressed within the San Joaquin County Region SWRP. The SWRP document and appendices will be used by the State Water Resources Control Board (SWRCB) as a part of their review to ensure that the San Joaquin County Region SWRP meets the SWRP Guidelines[1] and statutory water code requirements.

STORM WATER RESOURCE PLAN - PRIMARY CONTACT INFORMATION	
Primary Contact Name **Phone Number** **Email**	Chris Boyer, County of San Joaquin (209) 468-9360 cboyer@sjgov.org
Date Submitted to State Water Resource Control Board	August 2, 2024
Regional Water Quality Control Board	Central Valley Regional Water Quality Control Board

STORM WATER RESOURCE PLAN INFORMATION	
Storm Water Resource Plan Title & Date Completed	San Joaquin County Region Stormwater Resource Plan (August 2024)
Public Agency Preparers	County of San Joaquin City of Lodi, City of Manteca, City of Stockton, City of Tracy
IRWM Submission	Greater San Joaquin County Regional Water Coordinating Committee (for Eastern San Joaquin Integrated Regional Water Management Plan) (Date) San Luis & Delta-Mendota Water Authority (for the Westside-San Joaquin Integrated Water Resources Plan) (Date)
Plan Description	The *San Joaquin County Region Stormwater Resource Plan* was developed to facilitate the identification, prioritization, and implementation of stormwater and dry weather runoff capture and use projects that provide multiple benefits including improved regional water quality, reduced localized flooding, increased water supplies, and environmental and community enhancement.

STORM WATER RESOURCE PLAN CHECKLIST AND SELF-CERTIFICATION		
Mandatory Required Elements per California Water Code are Shaded and Text is **Bold**

[1] Storm Water Resource Plan Guidelines, December 15, 2015

WATERSHED IDENTIFICATION (GUIDELINES SECTION VI.A)		
Y	**1. Plan identifies watershed and subwatershed(s) for storm water resource planning.**	**10565(c) 10562(b)(1) 10565(c)**
References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)[2] The San Joaquin County Region boundary delineates the planning area of the San Joaquin County Region SWRP, as described in **Section 1.2 (pages 2-3) and Figure 1-1 (page 3)**. The four watersheds within the SWRP planning area are generally described in **Section 3**, with more detailed summaries in **Section 3.6** and as illustrated in **Figure 3-1 (page 18), Figure 3-2 (page 21), Figure 3-3 (page 23), Figure 3-4 (page 25), Figure 3-5 (page 29) , Figure 3-6 (page 32), Figure 3-7 (page 35),** and **Figure 3-8 (page 38)**.		
Y	**2.** Plan is developed on a watershed basis, using boundaries as delineated by USGS, CalWater, USGS Hydrologic Unit designations, or an applicable integrated regional water management group, and includes a description and boundary map of each watershed and sub-watershed applicable to the Plan.	
References: *San Joaquin County Region Stormwater Resource Plan* (August 2024) As described in **Section 3**, the SWRP planning area boundary is based on the San Joaquin County jurisdiction, with a focus on the four watersheds, as defined by the USGS HUC-8 watershed boundaries. Several maps depict the planning area and watersheds, including **Figure 1-1 (page 3), in Figure 3-1 (page 18), Figure 3-2 (page 21), Figure 3-3 (page 23), Figure 3-4 (page 25), Figure 3-5 (page 29) , Figure 3-6 (page 32), Figure 3-7 (page 35), and Figure 3-8 (page 38).**		
Y	**3.** Plan includes an explanation of why the watershed(s) and sub-watershed(s) are appropriate for storm water management with a multiple-benefit watershed approach.	
References: *San Joaquin County Region Stormwater Resource Plan* (August 2024) **Section 1 and-Section 3** describe how the effort to create a SWRP for the San Joaquin County Region was undertaken to efficiently use resources to integrate the SWRP development process with existing stormwater compliance coordination efforts.		

[2] The *San Joaquin County Region Stormwater Resource Plan* may be accessed by the public at the following website http://www.sjwater.org/Stormwater-Management/Regional-and-Tribal-Engagement

WATERSHED IDENTIFICATION
(GUIDELINES SECTION VI.A)

Y	**4.** Plan describes the internal boundaries within the watershed (boundaries of municipalities; service areas of individual water, wastewater, and land use agencies, including those not involved in the Plan; groundwater basin boundaries, etc.; preferably in a GIS shape file).

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Internal boundaries within the San Joaquin County Region are discussed in **Sections 3.1- 3.4 (pages 16 – 25**), with Figures provided as data was readily available.

Y	**5.** Plan describes the water quality priorities within the watershed based on, at a minimum, applicable TMDLs and consideration of water body-pollutant combinations listed on the State's Clean Water Act Section 303(d) list of water quality limited segments.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 4.3 (pages 43-44) summarizes the assessment and prioritization process undertaken by the County of San Joaquin and City of Stockton to identify the highest priority water quality constituents within the region. This assessment considered a number of factors including the applicable TMDLs and water-body pollutant combinations listed on the State's Clean Water Act Section 303(d) list of water quality limited segments.

Y	**6.** Plan describes the general quality and identification of surface and ground water resources within the watershed (preferably provided in a GIS shape file).

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 1 and Figure 1-1 (page 3) identifies and describes the surface water resources and **Section 3.4 and Figure 3-4 (page 25)** identifies and describes the groundwater basins and resources within the San Joaquin County Region.

Y	**7.** Plan describes the local entity or entities that provide potable water supplies and the estimated volume of potable water provided by the water suppliers.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 3.2 (**pages 19-21**) describes potable water suppliers within the planning area of the San Joaquin County Region SWRP.

Y	**8.** Plan includes map(s) showing location of native habitats, creeks, lakes, rivers, parks, and other natural or open space within the sub-watershed boundaries.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Figure 1-1 (page 3), in Figure 3-1 (page 18), Figure 3-2 (page 21), Figure 3-3 (page 23), Figure 3-4 (page 25), Figure 3-5 (page 29) , Figure 3-6 (page 32), Figure 3-7 (page 35), and Figure 3-8 (page 38) include creeks, lakes, rivers, parks and other open space within the four watershed boundaries.

Y	**9.** Plan identifies (quantitative, if possible) the natural watershed processes that occur within the sub-watershed and a description of how those natural watershed processes have been disrupted within the sub-watershed (e.g., high levels of imperviousness convert the watershed processes of infiltration and interflow to surface runoff increasing runoff volumes; development commonly covers natural surfaces and often introduces non-native vegetation, preventing the natural supply of sediment from reaching receiving waters).

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 3.6 (pages 26-38) describe how regional urbanization has led to the modification and disruption of watershed processes within the SWRP Planning area.

WATER QUALITY COMPLIANCE
(GUIDELINES SECTION V)

Y	**10. Plan identifies activities that generate or contribute to the pollution of storm water or dry weather runoff, or that impair the effective beneficial use of storm water or dry weather runoff.**	**10562(d)(7)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 4.1 (pages 39-40) describes the anthropogenic activities that may generate or contribute to the pollution of storm water or dry weather runoff and general pollutants of concern.

Y	**11. Plan describes how it is consistent with and assists in, compliance with total maximum daily load implementation plans and applicable national pollutant discharge elimination system permits.**	**10562(b)(5)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 4.2 (pages 40-42) describes how the San Joaquin County Region SWRP is consistent with and assists in complying with applicable municipal stormwater permit requirements including Total Maximum Daily Loads (TMDLs) to address the identified pollutant generating activities and pollutants of concern.

Y	**12. Plan identifies applicable permits and describes how it meets all applicable waste discharge permit requirements.**	**10562(b)(6)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 4.2 (pages 40-42) identifies requirements in the applicable permits and describes how the SWRP assists in meeting the applicable waste discharge permit requirements.

ORGANIZATION, COORDINATION, COLLABORATION
(GUIDELINES SECTION VI.B)

Y	**13. Local agencies and nongovernmental organizations were consulted in Plan development.**	**10565(a)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 6 describes the coordination and collaboration with local agencies and nongovernmental organizations during the development of the SWRP. **Sections 6.1.3 and 6.1.4 (pages 59-61**) describe the various groups that were consulted during the development of the SWRP and the mechanism(s) used for outreach.

Y	**14. Community participation was provided for in Plan development.**	**10562(b)(4)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 6 and **Appendix C** describe the strategies that were used for community participation and public education.

Y	**15.** Plan includes description of the existing integrated regional water management group(s) implementing an integrated regional water management plan.	

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 2.3.1 (pages 7-9) identifies and describes the two existing IRWM groups implementing an IRWMP within San Joaquin County.

ORGANIZATION, COORDINATION, COLLABORATION
(GUIDELINES SECTION VI.B)

Y	**16.** Plan includes identification of and coordination with agencies and organizations (including, but not limited to public agencies, nonprofit organizations, and privately-owned water utilities) that need to participate and implement their own authorities and mandates in order to address the storm water and dry weather runoff management objectives of the Plan for the targeted watershed.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 6 and Appendix C describe coordination and outreach to the agencies and organizations within the San Joaquin County Region and identifies the Interested Parties, including public agencies (**Section 6.1.3.1 (page 60) and Section 6.1.3.2 (page 60)**), nonprofit organizations (**Section 6.1.3.3 (page 60**)), and privately-owned water utilities(**Section 6.1.3.3 (page 60**)) .

Y	**17.** Plan includes identification of nonprofit organizations working on storm water and dry weather resource planning or management in the watershed.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 6 and Appendix C describe coordination and outreach to the nonprofit organizations within the San Joaquin County Region (**Section 6.1.3.3 (page 60**)).

Y	**18.** Plan includes identification and discussion of public engagement efforts and community participation in Plan development.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 6 and Appendix C describe the public engagement and community participation efforts undertaken during *the* development of the San Joaquin County Region SWRP.

Y	**19.** Plan includes identification of required decisions that must be made by local, state or federal regulatory agencies for Plan implementation and coordinated watershed-based or regional monitoring and visualization.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 7 identifies decisions that must be made by regulatory agencies for SWRP implementation, and regional monitoring required by the Central Valley Region-wide Stormwater Permit and Phase II Small MS4 Permit.

Y	**20.** Plan describes planning and coordination of existing local governmental agencies, including where necessary new or altered governance structures to support collaboration among two or more lead local agencies responsible for plan implementation.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 6 describes the coordination among local government agencies for SWRP development and **Section 7** describes SWRP implementation.

Y	**21.** Plan describes the relationship of the Plan to other existing planning documents, ordinances, and programs established by local agencies.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 2.3 describes the relationship between the San Joaquin County Region SWRP and the local IRWMPs and other existing planning documents and programs established by local agencies.

N	**22.** (If applicable) Plan explains why individual agency participation in various isolated efforts is appropriate.

References:

This checklist item is not applicable to the San Joaquin County Region *SWRP* since it was developed as a multi-agency effort.

QUANTITATIVE METHODS (GUIDELINES SECTION VI.C)	
Y	**23.** For all analyses: Plan includes an integrated metrics-based analysis to demonstrate that the Plan's proposed storm water and dry weather capture projects and programs will satisfy the Plan's identified water management objectives and multiple benefits.
References: *San Joaquin County Region Stormwater Resource Plan* (August 2024) **Section 5** describes the quantitative, metrics-based approach and analyses used to identify, rank, and prioritize the potential, multiple benefit projects.	
Y	**24.** For water quality project analysis (section VI.C.2.a): Plan includes an analysis of how each project and program complies with or is consistent with an applicable NPDES permit. The analysis should simulate the proposed watershed-based outcomes using modeling, calculations, pollutant mass balances, water volume balances, and/or other methods of analysis. Describes how each project or program will contribute to the preservation, restoration, or enhancement of watershed processes (as described in Guidelines section VI.C.2.a)
References: *San Joaquin County Region Stormwater Resource Plan* (August 2024) **Section 5.5 (pages 53-58)** describes the modeling approach used to evaluating the multi-benefits value of each project and how they will contribute to the restoration of watershed processes and pollutant load reductions. S**ection 4** describes the relevant requirements in the Central Valley Region-wide Permit and Phase II Small MS4 Permit.	
Y	**25.** For storm water capture and use project analysis (section VI.C.2.b): Plan includes an analysis of how collectively the projects and programs in the watershed will capture and use the proposed amount of storm water and dry weather runoff.
References: *San Joaquin County Region Stormwater Resource Plan* (August 2024) **Sections 5.2-5.6 (pages 38-58)** describe how the stormwater and dry weather capture and use projects were identified, evaluated, and prioritized.	
Y	**26.** For water supply and flood management project analysis (section VI.C.2.c): Plan includes an analysis of how each project and program will maximize and/or augment water supply.
References: *San Joaquin County Region Stormwater Resource Plan* (August 2024) **Sections 5.2-5.6 (pages 38-58)** describe how the stormwater and dry weather capture and use projects were identified, evaluated, and prioritized. **Section 5.5 (pages 53-58)** describes how the volume of stormwater or dry weather runoff captured was quantified for projects, and **Appendix E** presents the results of quantification.	
Y	**27.** For environmental and community benefit analysis (section VI.C.2.d): Plan includes a narrative of how each project and program will benefit the environment and/or community, with some type of quantitative measurement.
References: *San Joaquin County Region Stormwater Resource Plan* (August 2024) **Section 5.5 (pages 53-58)** describes how environmental and community & tribal benefits were quantified for projects.	
Y	**28.** Data management (section VI.C.3): Plan describes data collection and management, including: a) mechanisms by which data will be managed and stored; b) how data will be accessed by Interested Parties and the public; c) how existing water quality and water quality monitoring will be assessed; d) frequency at which data will be updated; and e) how data gaps will be identified.
References: *San Joaquin County Region Stormwater Resource Plan* (August 2024) **Section 7.4 (pages 65-67)** describes mechanisms for tracking project implementation, and procedures and frequency for updating these data. **Section 7.5 (page 67)** describes monitoring, and how data will be made publicly available.	

IDENTIFICATION AND PRIORITIZATION OF PROJECTS
(GUIDELINES SECTION VI.D)

Y	**29. Plan identifies opportunities to augment local water supply through groundwater recharge or storage for beneficial use of storm water and dry weather runoff.**	**10562(d)(1)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Sections 5.2-5.6 (pages 38-58) describe how the stormwater and dry weather capture and use projects were identified, evaluated, and prioritized and how water supply benefits such as augmentation to water supply was evaluated. **Appendix E** presents the list of project opportunities.

Y	**30. Plan identifies opportunities for source control for both pollution and dry weather runoff volume, onsite and local infiltration, and use of storm water and dry weather runoff.**	**10562(d)(2)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Sections 5.2-5.6 (pages 38-58) describe how the stormwater and dry weather capture and use projects were identified, evaluated, and prioritized and how general suitability such as infiltration capacity and water quality was evaluated. **Appendix E** presents the list of project opportunities.

Y	**31. Plan identifies projects that reestablish natural water drainage treatment and infiltration systems, or mimic natural system functions to the maximum extent feasible.**	**10562(d)(3)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Sections 5.2-5.6 (pages 38-58) describe how the stormwater and dry weather capture and use projects were identified, evaluated, and prioritized and how environmental benefits such as re-establishing natural water drainage systems was evaluated. **Appendix E** presents the list of project opportunities.

Y	**32. Plan identifies opportunities to develop, restore, or enhance habitat and open space through storm water and dry weather runoff management, including wetlands, riverside habitats, parkways, and parks.**	**10562(d)(4)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Sections 5.2-5.6 (pages 38-58) describe how the stormwater and dry weather capture and use projects were identified, evaluated, and prioritized and how environmental benefits such as enhancing habitat and open space was evaluated. **Appendix E** presents the list of project opportunities.

Y	**33. Plan identifies opportunities to use existing publicly owned lands and easements, including, but not limited to, parks, public open space, community gardens, farm, and agricultural preserves, school sites, and government office buildings and complexes, to capture, clean, store, and use storm water and dry weather runoff either onsite or offsite.**	**10562(d)(5)** **10562(b)(8)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Sections 5.2-5.6 (pages 38-58) describe how the stormwater and dry weather capture and use projects were identified, evaluated, and prioritized and how community and tribal benefits such as preserving and providing recreational and public use areas was evaluated. **Appendix E** presents the list of project opportunities.

IDENTIFICATION AND PRIORITIZATION OF PROJECTS
(GUIDELINES SECTION VI.D)

Y	**34. For new development and redevelopments (if applicable): Plan identifies design criteria and best management practices to prevent storm water and dry weather runoff pollution and increase effective storm water and dry weather runoff management for new and upgraded infrastructure and residential, commercial, industrial, and public development.**	**10562(d)(6)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 2.3.2 (pages 11-12) identifies the new development and redevelopment design criteria and best management practices that would apply to regulated projects.

Y	**35. Plan uses appropriate quantitative methods for prioritization of projects. (This should be accomplished by using a metrics-based and integrated evaluation and analysis of multiple benefits to maximize water supply, water quality, flood management, environmental, and other community benefits within the watershed.)**	**10562(b)(2)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Sections 5.2-5.6 (pages 38-58) describe how the stormwater and dry weather capture and use projects were identified, evaluated, and prioritized.

Y	**36.** *Overall:* Plan prioritizes projects and programs using a metric-driven approach and a geospatial analysis of multiple benefits to maximize water supply, water quality, flood management, environmental, and community benefits within the watershed.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Sections 5.2-5.6 (pages 38-58) describe how the stormwater and dry weather capture and use projects were identified, evaluated, and prioritized.

Y	**37.** *Multiple benefits:* Each project in accordance with the Plan contributes to at least two or more Main Benefits and the maximum number of Additional Benefits as listed in Table 4 of the Guidelines. (Benefits are not counted twice if they apply to more than one category.)

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Sections 5.2-5.6 (pages 38-58) describe how the stormwater and dry weather capture and use projects were identified, evaluated, and prioritized. **Appendix E** presents the list of project opportunities.

IMPLEMENTATION STRATEGY AND SCHEDULE
(GUIDELINES SECTION VI.E)

Y	**38.** Plan identifies resources for Plan implementation, including: 1) projection of additional funding needs and sources for administration and implementation needs; and 2) schedule for arranging and securing Plan implementation financing.	

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 7.5 (page 67) describes the implementation strategy for the San Joaquin County Region SWRP, including resources for funding, administration, and implementation needs.

Y	**39. Plan projects and programs are identified to ensure the effective implementation of the storm water resource plan pursuant to this part and achieve multiple benefits.**	**10562(d)(8)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Appendix E presents the list of project opportunities, including the responsible parties in order to ensure the effective implementation of the SWRP.

Y	**40. The Plan identifies the development of appropriate decision support tools and the data necessary to use the decision support tools.**	**10562(d)(8)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 7.3 (page 65) describes specific decision support tools to aid in the implementation of the SWRP.

Y	**41.** Plan describes implementation strategy, including: a) Timeline for submitting Plan into existing plans, as applicable; b) Specific actions by which Plan will be implemented; c) All entities responsible for project implementation; d) Description of community participation strategy; e) Procedures to track status of each project; f) Timelines for all active or planned projects; g) Procedures for ongoing review, updates, and adaptive management of the Plan; and h) A strategy and timeline for obtaining necessary federal, state, and local permits.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

To the extent possible, **Section 7** describes the implementation strategy for the San Joaquin County Region SWRP.

Y	**42. Applicable IRWM plan:** **The Plan will be submitted, upon development, to the applicable integrated regional water management (IRWM) group for incorporation into the IRWM plan.**	**10562(b)(7)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

The SWRP will be submitted to the Greater San Joaquin County Regional Water Coordinating Committee IRWM group and the San Luis & Delta-Mendota Water Authority IRWM Group for incorporation into the IRWM plan(s). **Section 7.4 (pages 65-67)** describes the implementation schedule.

Y	**43.** Plan describes how implementation performance measures will be tracked.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 7.4 (pages 65-67) describes implementation tracking and data management tools and procedures for tracking implementation performance and other measures.

EDUCATION, OUTREACH, PUBLIC PARTICIPATION
(GUIDELINES SECTION VI.F)

Y	**44. Outreach and Scoping: Community participation is provided for in Plan implementation.**	**10562(b)(4)**

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 6 and **Appendix C** describe the overall Outreach, Education and Public Participation and Coordination Strategy, a timeline for community participation, as well as materials and resources used to engage with the public.

Y	**45.** Plan describes public education and public participation opportunities to engage the public when considering major technical and policy issues related to the development and implementation.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 6 and **Appendix C** describe the overall Outreach, Education and Public Participation and Coordination Strategy, a timeline for community participation, as well as materials and resources used to engage with the public.

Y	**46.** Plan describes mechanisms, processes, and milestones that have been or will be used to facilitate public participation and communication during development and implementation of the Plan.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 6 and **Appendix C** describe the overall Outreach, Education and Public Participation and Coordination Strategy, a timeline for community participation, as well as materials and resources used to engage with the public.

Y	**47.** Plan describes mechanisms to engage communities in project design and implementation.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 6 and **Appendix C** describe the overall Outreach, Education and Public Participation and Coordination Strategy, a timeline for community participation, as well as materials and resources used to engage with the public.

Y	**48.** Plan identifies specific audiences including local ratepayers, developers, locally regulated commercial and industrial Interested Parties, nonprofit organizations, and the general public.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 6 and **Appendix C** describe the overall Outreach, Education and Public Participation and Coordination Strategy, a timeline for community participation, as well as materials and resources used to engage with the public.

N	**49.** Plan describes strategies to engage disadvantaged and climate vulnerable communities within the Plan boundaries and ongoing tracking of their involvement in the planning process.

The SWRP does not describe specific strategies to engage disadvantaged or climate vulnerable communities, however, these factors may be considered during later stages of specific project implementation.

N	**50.** Plan describes efforts to identify and address environmental injustice needs and issues within the watershed.

The SWRP does not describe specific strategies to address environmental injustice needs and issues, however, these factors may be considered during later stages of specific project implementation.

Y	**51.** Plan includes a schedule for initial public engagement and education.

References: *San Joaquin County Region Stormwater Resource Plan* (August 2024)

Section 6 and **Appendix C** describe the overall Outreach, Education and Public Participation and Coordination Strategy, a timeline for community participation, as well as materials and resources used to engage with the public.

County of San Joaquin

APPENDIX B

Project Request for San Joaquin County Region Stormwater Resource Plan

PROJECT REQUEST FOR THE SAN JOAQUIN COUNTY REGION STORMWATER RESOURCE PLAN

The San Joaquin County municipal stormwater agencies (including the County of San Joaquin and the Cities of Lodi, Manteca, Stockton, and Tracy; also "Participating Agencies") have developed a Stormwater Resource Plan for the Region (San Joaquin County Region SWRP). The SWRP uses a watershed-based planning approach to evaluate existing and potential multi-benefit projects that address water quality, groundwater, and stormwater management. Stormwater and dry weather runoff capture projects included in the San Joaquin County Region SWRP will be eligible to apply for available State funding sources.

Existing or potential multi-benefit projects must have a stormwater management component and provide two or more benefits from the following categories:

- Water quality (e.g., increased filtration and/or treatment of runoff, nonpoint source pollution control, reestablished natural water drainage and treatment);
- Water supply (e.g., water supply reliability, water conservation, conjunctive use);
- Flood management (e.g., decreased flood risk by reducing runoff rate and/or volume, reduced sanitary sewer overflows);
- Environmental (e.g., wetland enhancement/creation, riparian enhancement, instream flow improvement, increased urban green space); and/or
- Community (e.g., enhanced and/or created recreational and public use areas, community involvement, employment opportunities provided).

Detailed descriptions of the benefit categories can be found in the SWRP Guidelines and in **Section 5** of the SWRP.

Multi-benefit stormwater and dry weather runoff capture projects submitted for inclusion in the SWRP should provide two or more benefits including, but not limited to:

- Creates and restores wetlands
- Riverside [riparian] habitats
- Instream flows
- Increase in park and recreation lands
- Urban green space
- Augments recreation opportunities for communities
- Increases tree canopy
- Reduces heat island effect
- Improves air quality
- Maximizes water quality
- Maximizes water supply
- Maximizes flood management
- Maximizes environmental benefits
- Maximizes other community benefits

Project examples include: neighborhood or regional-scale green infrastructure, such as sustainable streets projects; flood control facilities; stream or wetland restoration projects; and groundwater recharge or stormwater harvest and use projects.

If you are interested in adding a planned or potential project to the San Joaquin County Region SWRP, please send information about your projects using the accompanying spreadsheet to Karen Ashby by COB Nov 2.

INFORMATION FOR COMPLETING THE PLANNED PROJECTS SPREADSHEET

The project spreadsheet includes the following tabs:

- "Instructions"; and
- "Project Information"

The "Instructions" tab includes a description of each element in the database.

For a project to be included in the San Joaquin County Region SWRP project list, the "Project Information" tab needs to be completed. Each project should be included on a separate line in the spreadsheet.

- The "Required" (i.e., blue) column headers in the "Project Information" tab must all be provided.
- If additional information is known about the project, the "Optional" (i.e., yellow) column headers can also be completed.

Many columns include drop-down lists from which you can select when you click on the cell (supported by the hidden "Domains" tab in the spreadsheet).

For questions, or to submit the project information, contact the following:

- Karen Ashby, Larry Walker Associates
  Karena@lwa.com or (530) 753-6400 x232
- Becky Smith, Larry Walker Associates
  RebeccaS@lwa.com or (510) 883-9873 x423

Required: General Facility Information																			
Project Number	**Project Name**	**Project Description**	**Project Jurisdiction**	**Project Proponents**	**Project Scale**	**Location Description**	**Project Provided as shapefile (Preferred if GI, Flood Control, or Groundwater)**	**Shapefile name if provided**	**APN (required if Regional or on-parcel. If multiple APNs use a comma-separated list. Invalid or incomplete APNs may disqualify the project)**	**Latitude (only if APN is unavailable; Decimal Degrees)**	**Longitude (only if APN is unavailable; Decimal Degrees)**	**Street Address (only if APN is unavailable and lat/long is insufficient)**	**If Right of way project, must provide start and end point of project as pair of cross streets, pair of coordinates, pair of addresses. Single points will disqualify the project.**	**Dominant Project Benefit Category**	**Facility Type**	**Facility Type Details (Required if "other" selected)**	**Secondary Benefit (required if Project is not a GI project, and must be different from Dominant Benefit Category)**	**Drainage Area (acres) (required for GI, Flood Control)**	**Facility Size (required if GI or Flood Control)**

1. PURPOSE

The San Joaquin County Region Stormwater Resource Plan (San Joaquin County Region SWRP) was developed by the County of San Joaquin and cities of Lodi, Manteca, Stockton, and Tracy (Participating Agencies) to identify, prioritize, and ultimately implement stormwater and dry weather runoff capture projects that provide multiple benefits including improved regional water quality, reduced localized flooding, increased water supplies, and community & Tribal enhancement.

The San Joaquin County Region SWRP will enable regional and Tribal Governments and other eligible parties to apply for and receive state grant funding for stormwater and dry weather runoff capture projects consistent with State Water Code Sections 10560.

Water Code Section 10562(b)(4) specifically requires that the SWRP provide for community outreach and participation during the development and implementation of the Plan. The SWRP Guidelines[1] state the following:

> "To maximize community-based benefits, key stakeholders and the public should be involved in all appropriate implementation steps of the Storm Water Resource Plan. Public education and opportunities for public participation in actions, decisions, and projects implemented through watershed-based storm water management should be provided."

This Outreach Strategy was developed to identify and summarize the approach and materials used to engage with regional and Tribal Governments and other non-Tribal partners, consistent with the SWRP Guidelines Appendix A: Checklist and Self-Certification (Sections VI.B and VI.F), as shown in **Table C-1**. The Guidelines identify three required (gray) and seven recommended (white) outreach elements for the SWRP outreach.

This Strategy focuses on community engagement and collaboration and strives to utilize local knowledge and community perspectives to promote the effective identification and implementation of dry weather and stormwater capture projects.

[1] Storm Water Resource Plan Guidelines, State Water Resources Control Board, California Environmental Protection Agency. December 15, 2015. https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swgp/docs/prop1/swrp_finalguidelines_dec2015.pdf

Table C-1: Summary of SWRP Outreach Requirements and Other Components.

Guidelines	Checklist
Section VI.B, Water Code section 10565(a)	Local agencies and nongovernmental organizations were consulted in Plan development.
Section VI.B, Water Code section 10562(b)(4)	Community participation was provided for in Plan development.
Section VI.F, Water Code section 10562(b)(4)	Outreach and Scoping: Community participation is provided for in Plan implementation.
Section VI.F	Plan describes public education and public participation opportunities to engage the public when considering major technical and policy issues related to the development and implementation of the Plan.
Section VI.F	Plan describes mechanisms, processes, and milestones that have been or will be used to facilitate public participation and communication during development and implementation of the Plan.
Section VI.F	Plan describes mechanisms to engage communities in project design and implementation.
Section VI.F	Plan identifies specific audiences including local ratepayers, developers, locally regulated commercial and industrial stakeholders, nongovernmental organizations, nonprofit organizations, and the general public.
Section VI.F	Plan describes strategies to engage disadvantaged and climate vulnerable communities within the Plan boundaries and ongoing tracking of their involvement in the planning process.
Section VI.F	Plan describes efforts to identify and address environmental injustice needs and issues within the watershed.
Section VI.F	Plan includes a schedule for initial public engagement and education.

2. OUTREACH APPROACH

The outreach approach for the San Joaquin County Region SWRP will be conducted in two phases during a) SWRP development; and b) SWRP implementation. The general approach for the outreach is for the Participating Agencies to:

1) Identify key Interested Parties (regional and Tribal governments and non-Tribal partners);
2) Identify the various methods to deliver the materials to each Interested Party;
3) Develop targeted messages and materials for each Interested Party; and
4) Provide the outreach at critical time steps during the development and implementation of the SWRP.

Section 3 identifies the Interested Parties and **Section 4** includes an overview matrix indicating the outreach method by group. Targeted messages for each audience are developed and refined as needed, depending on the activities underway. Approaches to outreach may be modified as

needed to ensure that all contacts, mechanisms, and messaging are relevant to the current phase of the SWRP.

3. OUTREACH AUDIENCES

This section describes the specific regional and Tribal Governments and non-Tribal partners that will be the primary focus of the outreach efforts for the San Joaquin County Region SWRP. Outreach was categorized into three separate groups along with specific outreach methods for each depending on the government, agency or public audience.

- Governments – regional and Tribal Governments (**Section 3.1**)
- Non-Tribal Partners, Group A: Integrated Regional Watershed Management Plans (IRWMPs) and Watershed and Advisory Groups (**Section 3.2**)
- Non-Tribal Partners, Group B: non-municipal public landowners (**Section 3.3.1**), non-governmental organizations (**Section 3.3.2**), and the general public (**Section 3.3.3**)

Specific outreach methods for each Outreach Category are specified in **Section 4**.

3.1 REGIONAL AND TRIBAL GOVERNMENTS

Regional and Tribal Governments in and around San Joaquin County have developed and implemented a variety of programs and plans that address water quality management and watershed protection. Regional governments include the Participating Agencies, which are responsible for coordinating the development and ongoing implementation of the SWRP.

Contact information for Tribal Governments with cultural or traditional affiliation to the San Joaquin County area was provided by the Native American Heritage Commission (NAHC). The County of San Joaquin contacted thirteen Tribal Governments to facilitate Government-to-Government collaboration, including:

- Buena Vista Rancheria of Me-Wuk Indians;
- California Valley Miwok Tribe;
- California Valley Miwok Tribe AKA Sheep Rancheria of Me-Wuk Indians of California;
- Chicken Ranch Rancheria of Me-Wuk Indians;
- Confederated Villages of Lisjan Nation;
- Guidiville Rancheria of California, the Ione Band of Miwok Indians;
- Muwekma Ohlone Indian Tribe of the San Francisco Bay Area;
- Nashville Enterprise Miwok-Maidu-Nishinam Tribe;
- Northern Valley Yokut / Ohlone Tribe;
- United Auburn Indian Community of the Auburn Rancheria, the Wilton Rancheria; and
- Wuksachi Indian Tribe/ Eshom Valley Band.

3.2 NON-TRIBAL PARTNERS, GROUP A

IRWMPs and watershed and advisory groups comprise the Group A Non-Tribal Partners outreach category. These groups are directly involved in stormwater and water quality management efforts across the San Joaquin region and are critical to both development and implementation of the SWRP.

Within the San Joaquin County Region SWRP area there are two IRWMPs and associated outreach groups:

- Eastern San Joaquin Integrated Regional Water Management Plan; and
- Westside-San Joaquin Integrated Water Resources Plan

Outreach to the two IRWM groups will be conducted as a part of the Strategy to facilitate the submittal of the SWRP for incorporation into the applicable IRWM Plan(s) and for potential coordination of stormwater management projects in the future.

In addition, the SWRP Participating Agencies identified several watershed and advisory groups that will play critical roles in broader community outreach and coordination of stormwater management projects identified in the SWRP. These groups include the following:

- San Joaquin County Stormwater Quality Partnership Group
- Stockton Water Advisory Group
- Eastern San Joaquin Groundwater Sustainability Agency (GSA)
- South San Joaquin GSA
- Upper Mokelumne River Watershed Authority
- Lower Mokelumne River Watershed Stewardship Steering Committee
- San Joaquin Delta Water Quality Coalition
- South San Joaquin Irrigation District (SSJID)

3.3 NON-TRIBAL PARTNERS, GROUP B

The Non-Tribal Partner Group B outreach audience consists of non-municipal public landowners (**Section 3.3.1**), non-governmental organizations (**Section 3.3.2**), and the general public (**Section 3.3.3**). Outreach with these organizations and groups is critical to the development and implementation of an effective SWRP.

3.3.1 Non-Municipal Public Landowners

SWRP Guidelines characterize non-municipal entities that own public lands and easements that could be used for multiple-benefit projects as valuable partners:

> "Many local agencies, especially water supply agencies, can directly benefit from projects that use storm water and dry weather runoff as a resource; these beneficiaries have the potential to be important partners and/or serve crucial inter-agency coordination roles."

The non-municipal public landowners include, but are not limited to, school districts, park districts, water agencies, transportation/transit districts, housing authorities, and private utilities.

The SWRP Participating Agencies identified the non-municipal public landowners that would potentially have parcels large enough for dry weather or stormwater capture projects and that may be able to partner on projects with regional and Tribal Governments in the future. Partnering on multi-benefit stormwater projects with the California Department of Transportation (Caltrans) and/or Phase II non-traditional stormwater permittees may also assist in meeting other water quality compliance requirements.

Table C-2 summarizes the non-municipal public landowners that will be coordinated with as a part of the Outreach Strategy.

Table C-2. Non-municipal Public Landowners for SWRP Outreach.

Type of Public Landowner/Name	Participating Agency Affiliation
School Districts	
Lodi Unified School District	City of Lodi
Manteca Unified School District	City of Manteca
Stockton Unified School District	City of Stockton
Tracy Unified School District	City of Tracy
Jefferson Unified School District	City of Tracy
Transportation/Transit Districts	
California Department of Transportation – District 10	County of San Joaquin
Housing Authorities	
Housing Authority of the County of San Joaquin	County of San Joaquin

3.3.2 Other Non-Governmental Agencies (NGOs)

The Guidelines emphasize the importance of collaboration with non-governmental organizations (NGOs) during the development and implementation of the SWRP. This category includes, but is not limited to stewardship councils, foundations, sustainability groups, environmental education coalitions, land trusts and preserves, organizations serving historically underserved communities, and business and community interests.

Table C-3 summarizes the other non-governmental organizations that will be coordinated with as a part of the Outreach Strategy.

Table C-3. Groups and Organizations for SWRP Outreach.

Type of Group	Participating Agency Affiliation
Non-governmental Organizations	
WhollyH20	City of Lodi
Stewardship Through Education	City of Lodi
Tree Lodi	City of Lodi
Point Blue Conservation Science	City of Lodi
Earth Project	City of Tracy
Tree Foundation	City of Tracy
Friends for Parks, Recreation, and Community Services	City of Tracy
Business/Community Interests	
League of Women Voters	County of San Joaquin
Chamber of Commerce	City of Lodi
Lodi Rules Sustainable Winegrowing Program	City of Lodi
Chamber of Commerce	City of Tracy
Rotary Club	City of Tracy
Community Interest	
Southside Community Organization	City of Tracy
Coalition of Tracy Citizens to Assist the Homeless/ Emerson House	City of Tracy
African American Association	City of Tracy
Interfaith Ministries	City of Tracy
Boys and Girls Club	City of Tracy
Public Health Organizations	
Memorial Hospital Foundation	City of Lodi
Sutter Hospital	City of Tracy

3.3.3 General Public

The Guidelines require that opportunities be provided for community participation during the development and implementation of the SWRP. While this can be largely achieved by providing outreach to the audiences identified in Sections 3.1 through 3.4, some of the outreach focus will also provide opportunities for interested individuals who do not identify with specific groups or organizations to get involved.

4. MATRIX OF OUTREACH APPROACHES

Table C-4 summarizes the outreach methods that will be used to contact regional and Tribal Governments and non-Tribal Partners discussed in **Section 3**. Additional information regarding each of the methods is described below.

Table C-4. Matrix of Outreach Methods to Reach Regional and Tribal Governments and Non-Governmental Partners.

Collaborations and Interested Parties		Outreach Method				
Category	Government or Group	Government-to-Government Consultation	Meetings[a]	Targeted Emails	General Flyers	Regional Webpage
Governments	Tribal	×	×	×		×
	Regional (including participating agencies funding SWRP)		×	×	×	×
Non-Tribal Partners: Group A	IRWMPs		×	×	×	×
	Watershed/ Advisory Groups		×	×	×	×
Non-Tribal Partners: Group B	Non-Municipal Public Landowners			×	×	×
	Other Organizations			×	×	×
	General Public				×	×

[a] Meetings with Tribal governments and Non-Tribal Partners, Group A, scheduled upon request

4.1 GOVERNMENT-TO-GOVERNMENT CONSULTATION

While the development of the San Joaquin County Region SWRP does not require Tribal consultation or official Government-to-Government consultation (per Federal definitions[2]), the Participating Agencies recognize and respect Tribal self-government and sovereignty and are

[2] White House Memorandum on Uniform Standards for Tribal Consultation, November 30, 2022. https://www.whitehouse.gov/briefing-room/presidential-actions/2022/11/30/memorandum-on-uniform-standards-for-tribal-consultation/#:~:text=Tribal%20consultation%20is%20a%20two-way%2C%20Nation-to-Nation%20exchange%20of,Nations%20regarding%20Federal%20policies%20that%20have%20Tribal%20implications.

committed to engaging with Tribal Governments, developing partnerships, and promoting collaborative and transparent Tribal engagement processes to ensure the creation of the best SWRP that meets Tribal Partner interests and benefits watershed sustainability. The Participating Agencies have designated members of the County of San Joaquin County Public Works Department as the regional Points of Contact for Government-to-Government consultation with Tribal Nations regarding the development and implementation of the SWRP.

The San Joaquin County Public Works Department sent formal letters via certified mail to thirteen Tribal governments to invite them to participate in the development of the SWRP (**Attachment B**). Letters were developed with support from members of the California Department of Water Resources (DWR) Office of the Tribal Policy Advisor. In addition to formal letters, the County Public Works Department also sent email invitations to Tribal Nations with the formal letters attached to more immediately facilitate communication. Subsequent emails were sent to Tribal Governments during each phase of outreach.

4.2 MEETINGS

The SWRP Participating Agencies held about a dozen meetings during the development of the SWRP from July 2023 to July 2024. Meeting materials are provided in **Attachment A**.

It is anticipated that these meetings will continue during the implementation of the SWRP, however the frequency will be on an as-needed basis.

The Project Team (a consultant team engaged with the SWRP Participating Agencies) hosted virtual information meetings with IRWMPs and watershed/ advisory groups upon request. Meeting materials are provided in **Attachment C**.

4.3 TARGETED EMAILS TO GROUP A AND GROUP B NON-TRIBAL PARTNERS

The SWRP Participating Agencies developed email distribution lists for Group A and Group B non-Tribal Partners based on readily accessible information and contacts. The email distribution lists provided an efficient and cost-effective way to reach a broad audience across San Joaquin County. In some cases, existing email distribution lists were used instead of creating new ones.

Email templates were composed and adjusted slightly between Group A and Group B audiences. Five emails were sent to Group A and Group B outreach groups at various stages of SWRP development and implementation. All emails generally included the following components:

1. Purpose of the SWRP;
2. Relevance of the SWRP to the outreach audience; and
3. Actions, if any, requested by the outreach audience.

The email templates for each phase of outreach to non-Tribal Government Partners are provided in **Attachment C**. Emails will be used during the implementation of the SWRP on an as-needed basis.

4.4 GENERAL FLYER

A general flyer was developed for the San Joaquin County Region SWRP, and is included as **Attachment D**. A second flyer was developed with improved accessibility for the City of Stockton to fit their public outreach framework.

4.5 REGIONAL WEBPAGE

The County of San Joaquin hosted a website to disseminate the web-based outreach identified in this Outreach Strategy. The outreach materials were hosted at www.sjwater.org.

If deemed necessary in the future, a stormwater resource information page could be created to provide general information on the SWRP and to serve as the landing place for interested party audiences to obtain information, submit projects, or request to be added to the outreach list. If a webpage is not feasible, then news items and documents can continue to be posted within the existing website architecture.

A web link and a QR Code were provided in outreach materials to provide public access to the SWRP. Information on the regional webpage is provided in **Attachment E**.

5. OUTREACH SCHEDULE

The outreach has and will occur based on key milestones during the development of the SWRP and during implementation in the future. The outreach mechanisms are utilized as outlined in **Table C-5**.

Table C-5. Outreach for Development and Implementation of the SWRP.

SWRP Milestone	Government-to-Government Consultation	Meetings	Emails	Flyers	Website
Participating Agency Coordination (Ongoing)		×			
Initial Outreach	×		×	×	×
Proposed Quantification Methodology	×		×		×
Proposed Project Ranking and Benefits	×		×		×
Draft SWRP	×		×		×
SWRP Modification/ Project Implementation (Ongoing)	×		×		×

After the San Joaquin County Region SWRP is developed, outreach will continue to ensure that regional and Tribal Governments and non-Tribal partners are engaged in any modifications that may be made to the SWRP as well as during project identification, design, and/or

implementation. To this end, two-way communication and outreach will be essential during project design and implementation, particularly with communities that could be affected by proposed storm water or dry weather runoff capture projects.

During project planning, design, and implementation, it is anticipated that input from local communities will be solicited through public meetings and/or workshops. As projects are funded for implementation, additional parties may be identified by the lead agencies or project sponsors, and a point of contact identified. Additional parties may include developers, local commercial and industrial owners/operators, nongovernmental and nonprofit organizations, and the general public. Lead agencies for specific projects will engage the public during the planning, design and construction phases of their projects and will comply with public noticing requirements for other environmental regulatory requirements such as the California Environmental Quality Act (CEQA) and the National Environmental Protection Act (NEPA).

Meeting Agenda

Topic	Lead	Time
1. Welcome & Introductions	Roy Valadez	11:00 – 11:10 am
2. Development of SWRP	Karen Ashby	11:10 – 11:45 am
3. Organization and Oversight	Roy Valadez	11:45 – 12:00 pm
4. Near Term Tasks	Karen Ashby	12:00 – 12:20 pm
5. Meeting Wrap Up	Karen Ashby	12:20 – 12:30 pm

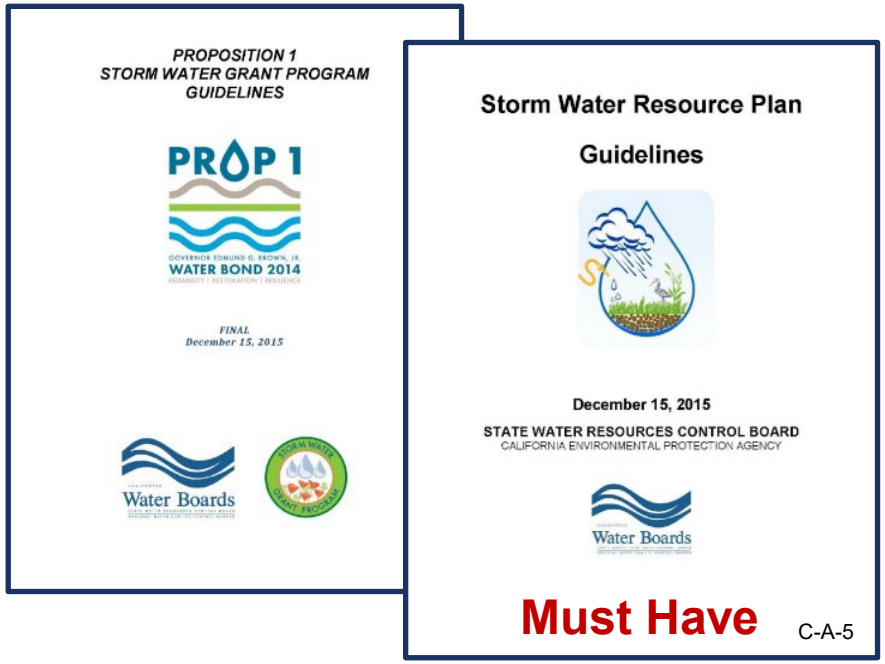
DEVELOPMENT OF SWRP

Why is a Storm Water Resource Plan Necessary?

The California Stormwater Management Planning Act requires the development of a Storm Water Resource Plan in order to receive grant funds for stormwater management projects *from any bond approved by voters after January 2014*.

Required for storm water and dry weather runoff capture projects

This requirement applied to Proposition 1 which authorized $200 million in grants for multi-benefit stormwater management projects (2014).



What is a Storm Water Resource Plan?

A SWRP is a planning document that identifies and prioritizes storm water and dry weather runoff capture projects within a regional area that can be implemented to improve surface water quality.

Can develop as…..

Storm Water Resource Plan (SWRP)

Single Document

OR

Functional Equivalent Storm Water Resource Plan (FE-SWRP)

Collection of Documents

Map of SWRP and FE-SWRPS with DWR Concurrence (may not be up to date)

What Does a Storm Water Resource Plan Do?

A SWRP uses a watershed-based project identification and prioritization approach to identify multi-benefit stormwater management project concepts within the region.

Targeted benefits include:

- Water quality improvement
- Water supply augmentation
- Flood management
- Habitat creation
- Additional environmental benefits (creek, wetland restoration)
- Community benefits (greening, traffic calming, etc.)

BIORETENTION

INFILTRATION BASIN

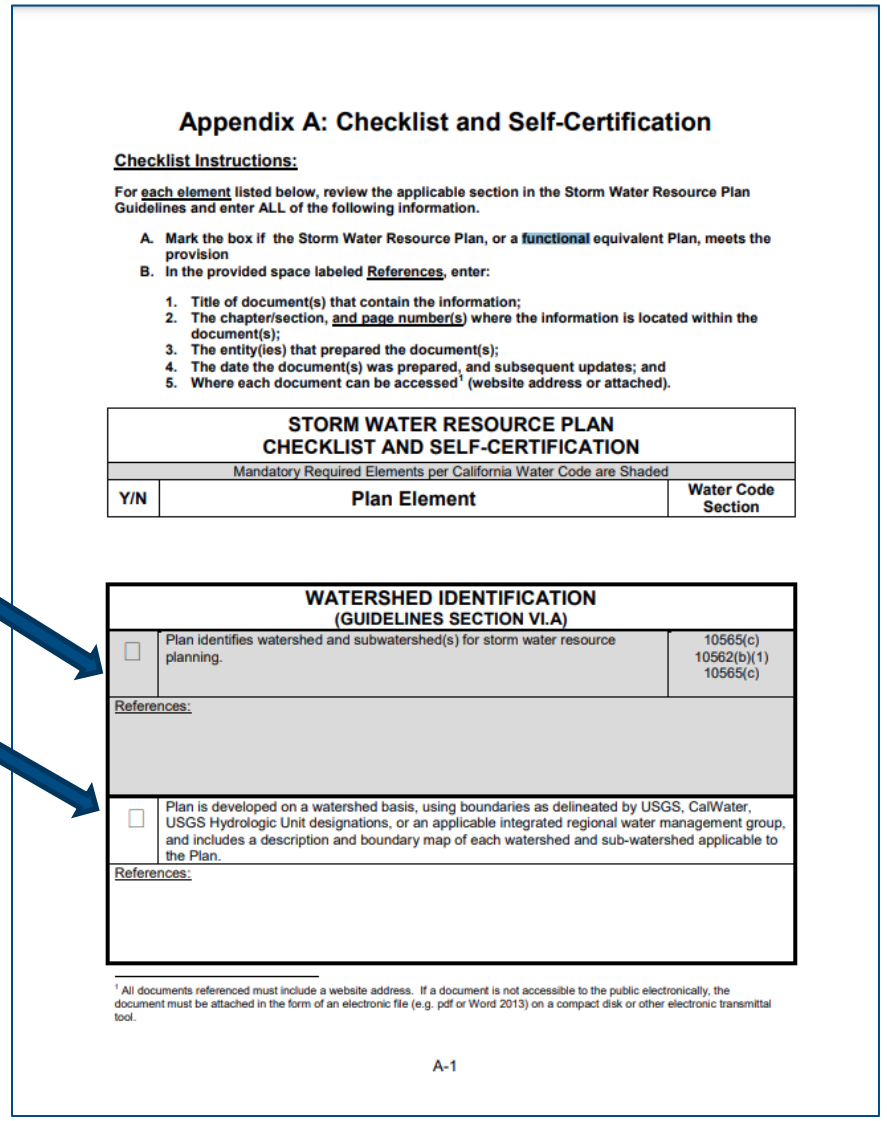
PERMEABLE PAVEMENT

What do the SWRP Guidelines Require?

- Must be consistent with CWC Section 10560
- Conform to the SWRP Guidelines
  - Mandatory Elements
  - Desired Elements
- Once completed, incorporate into applicable IRWM

[*Eastern San Joaquin IRWM*]

State Board will review before funding a grant



Appendix A: Checklist and Self-Certification

Checklist Instructions:

For each element listed below, review the applicable section in the Storm Water Resource Plan Guidelines and enter ALL of the following information.

A. Mark the box if the Storm Water Resource Plan, or a functional equivalent Plan, meets the provision
B. In the provided space labeled References, enter:

1. **Title of document(s) that contain the information;**
2. **The chapter/section, and page number(s) where the information is located within the document(s);**
3. **The entity(ies) that prepared the document(s);**
4. **The date the document(s) was prepared, and subsequent updates; and**
5. **Where each document can be accessed[1] (website address or attached).**

STORM WATER RESOURCE PLAN CHECKLIST AND SELF-CERTIFICATION		
Mandatory Required Elements per California Water Code are Shaded		
Y/N	**Plan Element**	**Water Code Section**
WATERSHED IDENTIFICATION (GUIDELINES SECTION VI.A)		
☐	Plan identifies watershed and subwatershed(s) for storm water resource planning.	10565(c) 10562(b)(1) 10565(c)
References:		
☐	Plan is developed on a watershed basis, using boundaries as delineated by USGS, CalWater, USGS Hydrologic Unit designations, or an applicable integrated regional water management group, and includes a description and boundary map of each watershed and sub-watershed applicable to the Plan.	
References:		

[1] All documents referenced must include a website address. If a document is not accessible to the public electronically, the document must be attached in the form of an electronic file (e.g. pdf or Word 2013) on a compact disk or other electronic transmittal tool.

A-1

Potential Boundary for a San Joaquin County SWRP

Align with the IRWM Regional Planning Area

Note: Section 4.8.3 of 2020 IRWMP

"*The GSJCRWCC have not yet developed a Storm Water Resources Plan. San Joaquin County is in active discussions with city of Stockton and San Joaquin Area Flood Control (SJAFCA) regarding the development of an SWRP. No projects are applying for funding as part of this IRWMP Addendum that claim a stormwater benefit*."

ORGANIZATION AND OVERSIGHT

Cost Share Breakdown

Agencies include:	Population [Jan 1 2022] From OWOW Subscription	% Budget	Total Cost
San Joaquin County	159,170		$ 100,000
City of Stockton	322,489	57%	$ 42,403
City of Tracy	94,538	17%	$ 12,431
City of Lodi	66,570	12%	$ 8,753
City of Manteca	86,859	15%	$ 11,421
Total	570,456		$ 175,008

QUESTIONS?

NEAR TERM TASKS

Task 1 – Compile Knowledge of Region

Purpose: utilize existing information to establish the location, status and quality, importance of existing water resources, identify where natural watershed processes have been altered, and opportunities and constraints to the implementation of stormwater projects.

Handout

Task 1 – Compile Knowledge of Region

Document Review & Summarization

San Joaquin County
Stormwater Resource Plan (SWRP)
Document Request

PURPOSE:

Larry Walker Associates, Inc. (LWA) is requesting documents from the County of San Joaquin and regional agencies within the County political boundary, namely the Cities of Stockton, Tracy, Lodi, and Manteca. The requested documents are not an exhaustive list but include examples of those that may assist LWA in completing the agreed upon scope of work to develop the SWRP. LWA recognizes that the participating agencies may or may not have certain documents available. Additionally, documents not identified in the table but that may provide similar information should be included. LWA may need to request additional information and documents as needed.

If a document is not available, please note that in the table below and upload a copy of this file to the Dropbox link provided.

FORMAT:

The documents provided can be saved as pdfs, Microsoft Word files, or may be sent as links to content stored on websites (links can be inserted in the table below and this file uploaded to Dropbox).

DOCUMENT UPLOAD LOCATION: PASSWORD= SWRP

https://www.dropbox.com/sh/64tlaaquaqgmidh/AAD4qMYUYb80XbROX04DO9Sxa?dl=0

REQUESTING THE FOLLOWING DOCUMENTS:

Document Requested	Available? (Y/N)	Website link, if applicable
County of San Joaquin		
Eastern San Joaquin Integrated Regional Water Management Plan (IRWMP)		
Flood Management Plan		
Other?		
Participating Agencies (County of San Joaquin, Stockton, Tracy, Lodi, Manteca)		
Storm Drain Master Plans		
General Plans		
Regional EIRs that may provide characterization information		
Capital Improvement Plan Project List & Schedule		
Low Impact Development (LID) Management Planning Efforts		
Urban Water Management Plans		
Other?		

Note: Please also provide the information requested in the Spatial Data Request

Page 1 of 1

Data Review & Summarization

San Joaquin County
Stormwater Resource Plan (SWRP)
Spatial Data Request

PURPOSE:

Larry Walker Associates, Inc. (LWA) is requesting information in geospatial format to identify local features associated with the SWRP for the County of San Joaquin and other stormwater agencies within the County political boundary, namely the Cities of Stockton, Tracy, Lodi, and Manteca. The information identified below is not an exhaustive list of potential features but includes features that may assist LWA in completing the agreed upon scope of work to identify potential SWRP project opportunities and develop the SWRP. LWA recognizes that the participating agencies may or may not have certain information available. LWA may need to request additional information and documents as needed.

FORMAT:

Digital Spatial Data Layers would ideally be provided as geo-referenced ArcGIS 10.x shapefiles, geodatabases, or as raster image files (.img). We may be able to convert autocad datasets (.dwg) into ArcGIS 10.x format if they are not available as shapefiles or geodatabases. Tabular datasets cataloging specific features (e.g., lists of existing structural BMPs) can be converted to viable shapefiles if latitude and longitude is included.

UPLOAD LOCATION:

https://www.dropbox.com/work/SJC%20SWRP%20Data%20Upload

REQUESTING SPATIAL DATA LAYERS FOR THE FOLLOWING:

- **Administrative Datasets**
  - NPDES MS4 Regulated Area
  - Municipal Boundaries
  - Water Agency Boundaries
- **Land Use Datasets**
  - Parcels with relevant attributes including:
    - Zoning
    - Ownership
    - Whether the parcel pays taxes (to isolate publicly owned parcels)
  - Land use/land cover
  - Land use planning datasets (general plans, specific plans, zoning, etc.)
  - Agricultural Land Use / Crop type
- **Environmental Datasets**
  - Streams/Rivers/Waterbodies
  - Watersheds and subwatersheds
  - City/County specific rain gauge locations
  - Soil types
- **Stormwater/Water Quality Program Datasets**
  - Storm Drains Network
    - Inlets
    - Outfalls
    - Open channels
    - Gravity mains
    - Laterals

Page 1 of 2

Task 1 – Compile Knowledge of Region

	Project Task	Task Role / Responsibility	Month / Week of	July 3	10	17	24	31	August 7	14	21	28	September 4	11	18	25

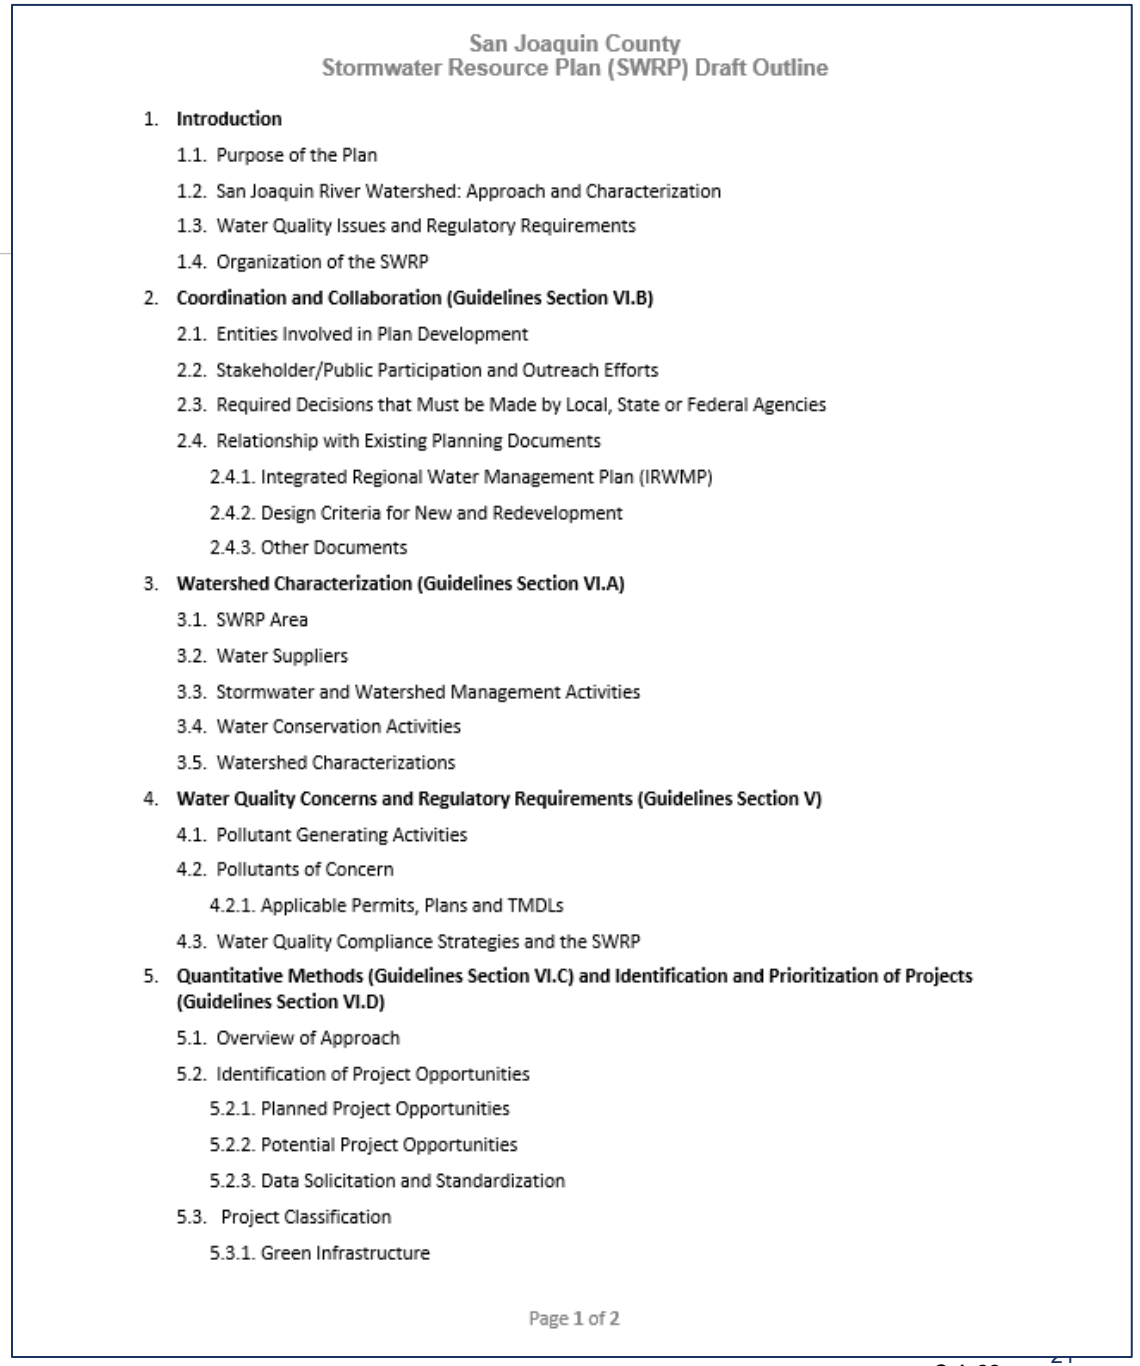
	Completed document and data request to LWA	SJC Group								14						
	Document and Data Review and Summarization - Draft summary table(s) of existing resources and datasets	LWA										28				
	Comments on draft summary table(s)	SJC Group												11		
	Final summary table of existing resources and datasets	LWA														25

Task 2 – SWRP Outline

Purpose: Assists in guiding discussions during the project and help the participating agencies conduct internal discussions.

Handout



San Joaquin County
Stormwater Resource Plan (SWRP) Draft Outline

1. **Introduction**
   - 1.1. Purpose of the Plan
   - 1.2. San Joaquin River Watershed: Approach and Characterization
   - 1.3. Water Quality Issues and Regulatory Requirements
   - 1.4. Organization of the SWRP
2. **Coordination and Collaboration (Guidelines Section VI.B)**
   - 2.1. Entities Involved in Plan Development
   - 2.2. Stakeholder/Public Participation and Outreach Efforts
   - 2.3. Required Decisions that Must be Made by Local, State or Federal Agencies
   - 2.4. Relationship with Existing Planning Documents
     - 2.4.1. Integrated Regional Water Management Plan (IRWMP)
     - 2.4.2. Design Criteria for New and Redevelopment
     - 2.4.3. Other Documents
3. **Watershed Characterization (Guidelines Section VI.A)**
   - 3.1. SWRP Area
   - 3.2. Water Suppliers
   - 3.3. Stormwater and Watershed Management Activities
   - 3.4. Water Conservation Activities
   - 3.5. Watershed Characterizations
4. **Water Quality Concerns and Regulatory Requirements (Guidelines Section V)**
   - 4.1. Pollutant Generating Activities
   - 4.2. Pollutants of Concern
     - 4.2.1. Applicable Permits, Plans and TMDLs
   - 4.3. Water Quality Compliance Strategies and the SWRP
5. **Quantitative Methods (Guidelines Section VI.C) and Identification and Prioritization of Projects (Guidelines Section VI.D)**
   - 5.1. Overview of Approach
   - 5.2. Identification of Project Opportunities
     - 5.2.1. Planned Project Opportunities
     - 5.2.2. Potential Project Opportunities
     - 5.2.3. Data Solicitation and Standardization
   - 5.3. Project Classification
     - 5.3.1. Green Infrastructure

Task 7	**Distribute Materials to Stakeholder Group - Hold Meetings**	All														

Estimated Budget

Task/ Scope Item	Planning Level Estimated Cost
Task 1. Compile Knowledge of Region	$13,895
Task 2 - Develop Stormwater Resource Plan Outline	$5,740
Task 3 - Develop Quantitative, Metric-Based Methodology for Identifying & Prioritizing Projects	$11,123
Task 4 - Develop a Priority Project List	$20,362
Task 5 - Quantify Benefits of Priority Projects	$35,603
Task 6 - Produce Draft & Final Stormwater Resource Plan	$55,563
Task 7 – Public Outreach / Stakeholder Meetings	$10,939
Task 8 – Coordination and Management	$21,783
Estimated Total	**$175,008**

Estimated Breakdown by Agency & Contracting Mechanism

Agency	Estimated Cost	Contract / PO in Place?
County of San Joaquin	$100,000	PO to be Issued
City of Stockton	$42,403	Contract Mechanism in Place
City of Tracy	$12,431	PO in Place
City of Lodi	$8,753	PO to be Issued
City of Manteca	$11,421	Contract Mechanism in Place
Total	**$175,008**	

Draft MOU from County?
In the future – contract status will be provided

QUESTIONS?

TASK 1 – KNOWLEDGE OF REGION

Task 1 – Compile Knowledge of Region

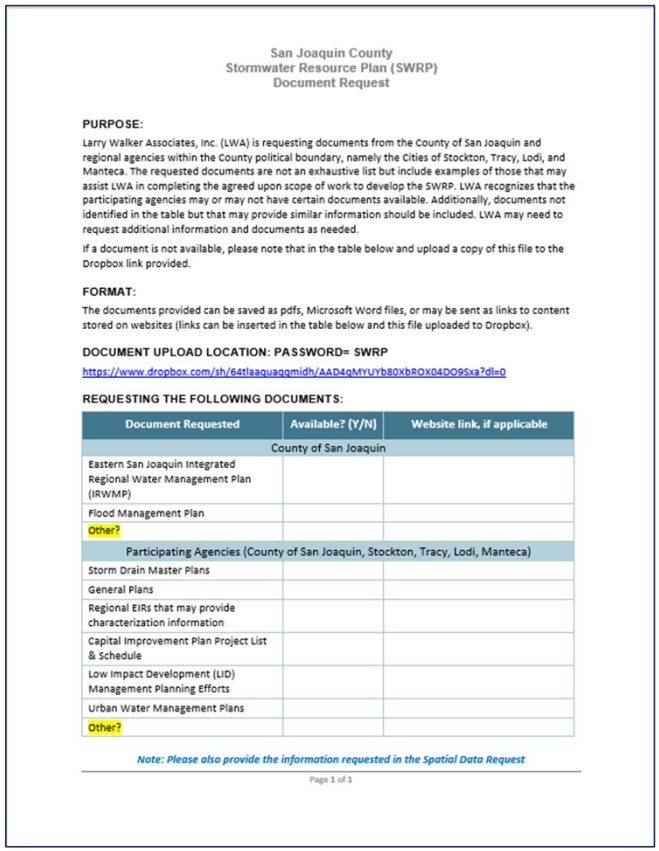
Purpose: utilize existing information to establish the location, status and quality, importance of existing water resources, identify where natural watershed processes have been altered, and opportunities and constraints to the implementation of stormwater projects.

Initial Data Received (Follow Up)

1) Ground truth with SWRP document
2) Assess needs of project ID and quantification

Task 1 – Compile Knowledge of Region

Document Review & Summarization



San Joaquin County
Stormwater Resource Plan (SWRP)
Document Request

PURPOSE:

Larry Walker Associates, Inc. (LWA) is requesting documents from the County of San Joaquin and regional agencies within the County political boundary, namely the Cities of Stockton, Tracy, Lodi, and Manteca. The requested documents are not an exhaustive list but include examples of those that may assist LWA in completing the agreed upon scope of work to develop the SWRP. LWA recognizes that the participating agencies may or may not have certain documents available. Additionally, documents not identified in the table but that may provide similar information should be included. LWA may need to request additional information and documents as needed.

If a document is not available, please note that in the table below and upload a copy of this file to the Dropbox link provided.

FORMAT:

The documents provided can be saved as pdfs, Microsoft Word files, or may be sent as links to content stored on websites (links can be inserted in the table below and this file uploaded to Dropbox).

DOCUMENT UPLOAD LOCATION: PASSWORD= SWRP

https://www.dropbox.com/sh/64tlaaquaqqmidh/AAD4qMYUYb80XbROX04DO9Sxa?dl=0

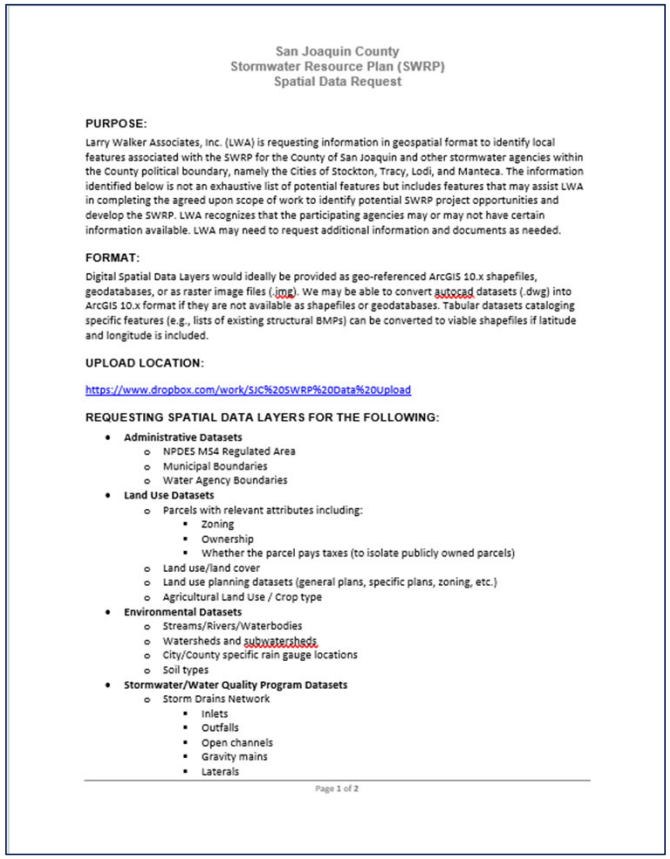
REQUESTING THE FOLLOWING DOCUMENTS:

Document Requested	Available? (Y/N)	Website link, if applicable
County of San Joaquin		
Eastern San Joaquin Integrated Regional Water Management Plan (IRWMP)		
Flood Management Plan		
Other?		
Participating Agencies (County of San Joaquin, Stockton, Tracy, Lodi, Manteca)		
Storm Drain Master Plans		
General Plans		
Regional EIRs that may provide characterization information		
Capital Improvement Plan Project List & Schedule		
Low Impact Development (LID) Management Planning Efforts		
Urban Water Management Plans		
Other?		

Note: Please also provide the information requested in the Spatial Data Request

Page 1 of 1

Data Review & Summarization



San Joaquin County
Stormwater Resource Plan (SWRP)
Spatial Data Request

PURPOSE:

Larry Walker Associates, Inc. (LWA) is requesting information in geospatial format to identify local features associated with the SWRP for the County of San Joaquin and other stormwater agencies within the County political boundary, namely the Cities of Stockton, Tracy, Lodi, and Manteca. The information identified below is not an exhaustive list of potential features but includes features that may assist LWA in completing the agreed upon scope of work to identify potential SWRP project opportunities and develop the SWRP. LWA recognizes that the participating agencies may or may not have certain information available. LWA may need to request additional information and documents as needed.

FORMAT:

Digital Spatial Data Layers would ideally be provided as geo-referenced ArcGIS 10.x shapefiles, geodatabases, or as raster image files (.img). We may be able to convert autocad datasets (.dwg) into ArcGIS 10.x format if they are not available as shapefiles or geodatabases. Tabular datasets cataloging specific features (e.g., lists of existing structural BMPs) can be converted to viable shapefiles if latitude and longitude is included.

UPLOAD LOCATION:

https://www.dropbox.com/work/SJC%20SWRP%20Data%20Upload

REQUESTING SPATIAL DATA LAYERS FOR THE FOLLOWING:

- **Administrative Datasets**
  - NPDES MS4 Regulated Area
  - Municipal Boundaries
  - Water Agency Boundaries
- **Land Use Datasets**
  - Parcels with relevant attributes including:
    - Zoning
    - Ownership
    - Whether the parcel pays taxes (to isolate publicly owned parcels)
  - Land use/land cover
  - Land use planning datasets (general plans, specific plans, zoning, etc.)
  - Agricultural Land Use / Crop type
- **Environmental Datasets**
  - Streams/Rivers/Waterbodies
  - Watersheds and subwatersheds
  - City/County specific rain gauge locations
  - Soil types
- **Stormwater/Water Quality Program Datasets**
  - Storm Drains Network
    - Inlets
    - Outfalls
    - Open channels
    - Gravity mains
    - Laterals

Page 1 of 2

QUESTIONS?

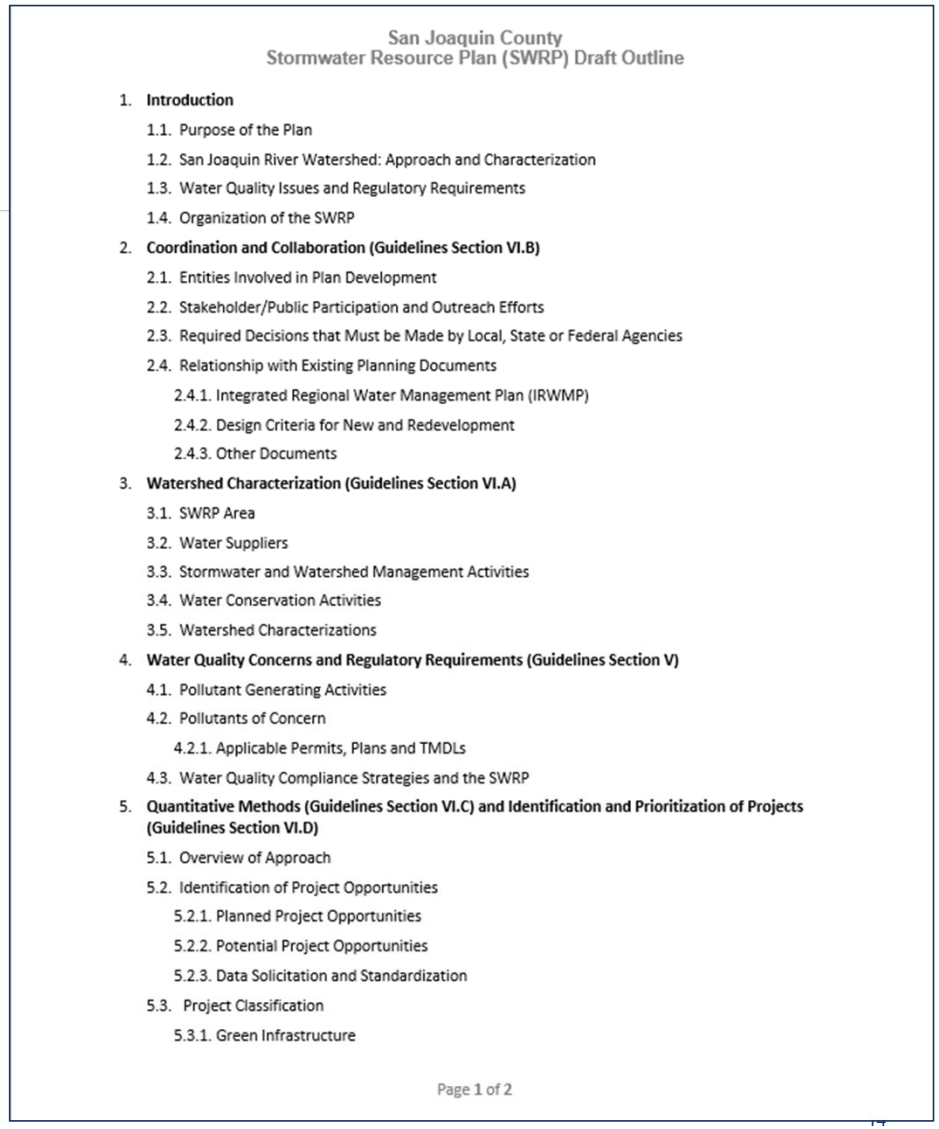
TASK 2 – SWRP OUTLINE

Task 2 – SWRP Outline

Purpose: Assists in guiding discussions during the project and help the participating agencies conduct internal discussions.

No comments received

Finalize SWRP Outline – Today



San Joaquin County
Stormwater Resource Plan (SWRP) Draft Outline

1. **Introduction**
   - 1.1. Purpose of the Plan
   - 1.2. San Joaquin River Watershed: Approach and Characterization
   - 1.3. Water Quality Issues and Regulatory Requirements
   - 1.4. Organization of the SWRP
2. **Coordination and Collaboration (Guidelines Section VI.B)**
   - 2.1. Entities Involved in Plan Development
   - 2.2. Stakeholder/Public Participation and Outreach Efforts
   - 2.3. Required Decisions that Must be Made by Local, State or Federal Agencies
   - 2.4. Relationship with Existing Planning Documents
     - 2.4.1. Integrated Regional Water Management Plan (IRWMP)
     - 2.4.2. Design Criteria for New and Redevelopment
     - 2.4.3. Other Documents
3. **Watershed Characterization (Guidelines Section VI.A)**
   - 3.1. SWRP Area
   - 3.2. Water Suppliers
   - 3.3. Stormwater and Watershed Management Activities
   - 3.4. Water Conservation Activities
   - 3.5. Watershed Characterizations
4. **Water Quality Concerns and Regulatory Requirements (Guidelines Section V)**
   - 4.1. Pollutant Generating Activities
   - 4.2. Pollutants of Concern
     - 4.2.1. Applicable Permits, Plans and TMDLs
   - 4.3. Water Quality Compliance Strategies and the SWRP
5. **Quantitative Methods (Guidelines Section VI.C) and Identification and Prioritization of Projects (Guidelines Section VI.D)**
   - 5.1. Overview of Approach
   - 5.2. Identification of Project Opportunities
     - 5.2.1. Planned Project Opportunities
     - 5.2.2. Potential Project Opportunities
     - 5.2.3. Data Solicitation and Standardization
   - 5.3. Project Classification
     - 5.3.1. Green Infrastructure

Page 1 of 2

QUESTIONS?

TASK 7 – STAKEHOLDER OUTREACH

Task 7 – Public Outreach / Stakeholder Meetings

Purpose: Provide community participation in SWRP development and implementation

Stakeholders may include:

- SWRP Participating Agencies
- Non-municipal public landowners (school districts, park districts, water agencies, transit districts, private utilities, etc.)
- Watershed groups
- Non-governmental organizations
- IRWM
- General Public

Task 7 SWRP mandatory requirements per CWC

A stormwater resource plan shall… provide for community participation in plan development and implementation.
(Wat. Code 10562, subd. (b)(4).)

Plan should include or provide the following, per SWRP guidelines Section VI.F:

i. public education and public participation **opportunities to engage the public** when considering major technical/policy issues regarding development and implementation of the Plan

Task 7 SWRP mandatory requirements per CWC

Plan should include or provide the following, per SWRP guidelines Section VI.F:

ii. Mechanisms, processes, and milestones that have been or will be used **to facilitate public participation and communication** during development and implementation of the Plan

iii. Mechanisms **to engage communities** in project design and implementation

iv. identifies **specific audiences** including local ratepayers, developers, locally regulated commercial and industrial stakeholders, nonprofit organizations, and the general public

Task 7 SWRP mandatory requirements per CWC

Plan should include or provide the following, per SWRP guidelines Section VI.F:

v. strategies **to engage disadvantaged and climate vulnerable communities** within the Plan boundaries and **ongoing tracking** of their involvement in the planning process

vi. efforts to **identify and address environmental injustice needs** and issues within the watershed.

vii. Schedule for initial public engagement and education

Task 7 Proposed Approach

Stakeholder Audience	Outreach Method				
	Meetings	Targeted Emails	General Flyer	County Webpage	Presentations
SWRP Participating Agencies (us ☺)	x				
Non-Municipal Public Landowners (need)		x	x	x	
Watershed Groups and NGOs (need)		x	x	x	
IRWM members		x			x
General Public				x	

** Existing committees/sub-committees for outreach

What we need from you: 1. list of key stakeholders

Non-Municipal Public Landowners:

- school districts
- park districts
- water agencies
- transportation/transit districts
- private utilities
- housing authorities
- Indigenous Nations
- the State of CA
- Caltrans
- Phase II non-traditional stormwater permittees (public universities)
- Future permittees (K-14 school districts)

Watershed Groups and NGOs:

- Watershed Associations, Audubon Societies
- Stewardship Councils, Foundations, Sustainability Groups
- Environmental Education Coalitions
- Land Trusts, Preserves
- Sierra Club
- Organizations serving historically underrepresented communities
- Public Health Organizations (hospitals)
- Business and community interests (League of Women Voters, Interfaith Councils, local real estate agents and developers, well drilling contractors, Hispanic Networks)
- Regional Park Districts
- News media (radio, journal)
- Additional: Farm Bureau and Resource Conservation District

QUESTIONS?

MEETING WRAP UP / ACTION ITEMS

Next Meeting Date: Oct 5

Action Items

- **Project Team**
  - Draft MOU from County? – XXX
  - Task 1 – Develop Draft Summary of Existing Information – Sep 25
  - Task 1 – Final Summary of Existing Information – Oct 30
  - Task 2 – Finalize SWRP Outline (modify in future as needed) Today
  - Task 7 – Develop Draft Outreach Strategy – Sep 25

- **San Joaquin County Group Agencies**
  - Task 1 – Review Summary of Existing Information – Oct 16
  - Task 7 – Review Draft Outreach Strategy – Oct 16
  - Task 7 - List of stakeholders – ASAP (see slide 22)
  - Agency-specific contact for data provided for SWRP (email/phone) - ASAP

THANK YOU!

San Joaquin County Group Stormwater Resource Plan (SWRP)

October 5, 2023
Meeting #3

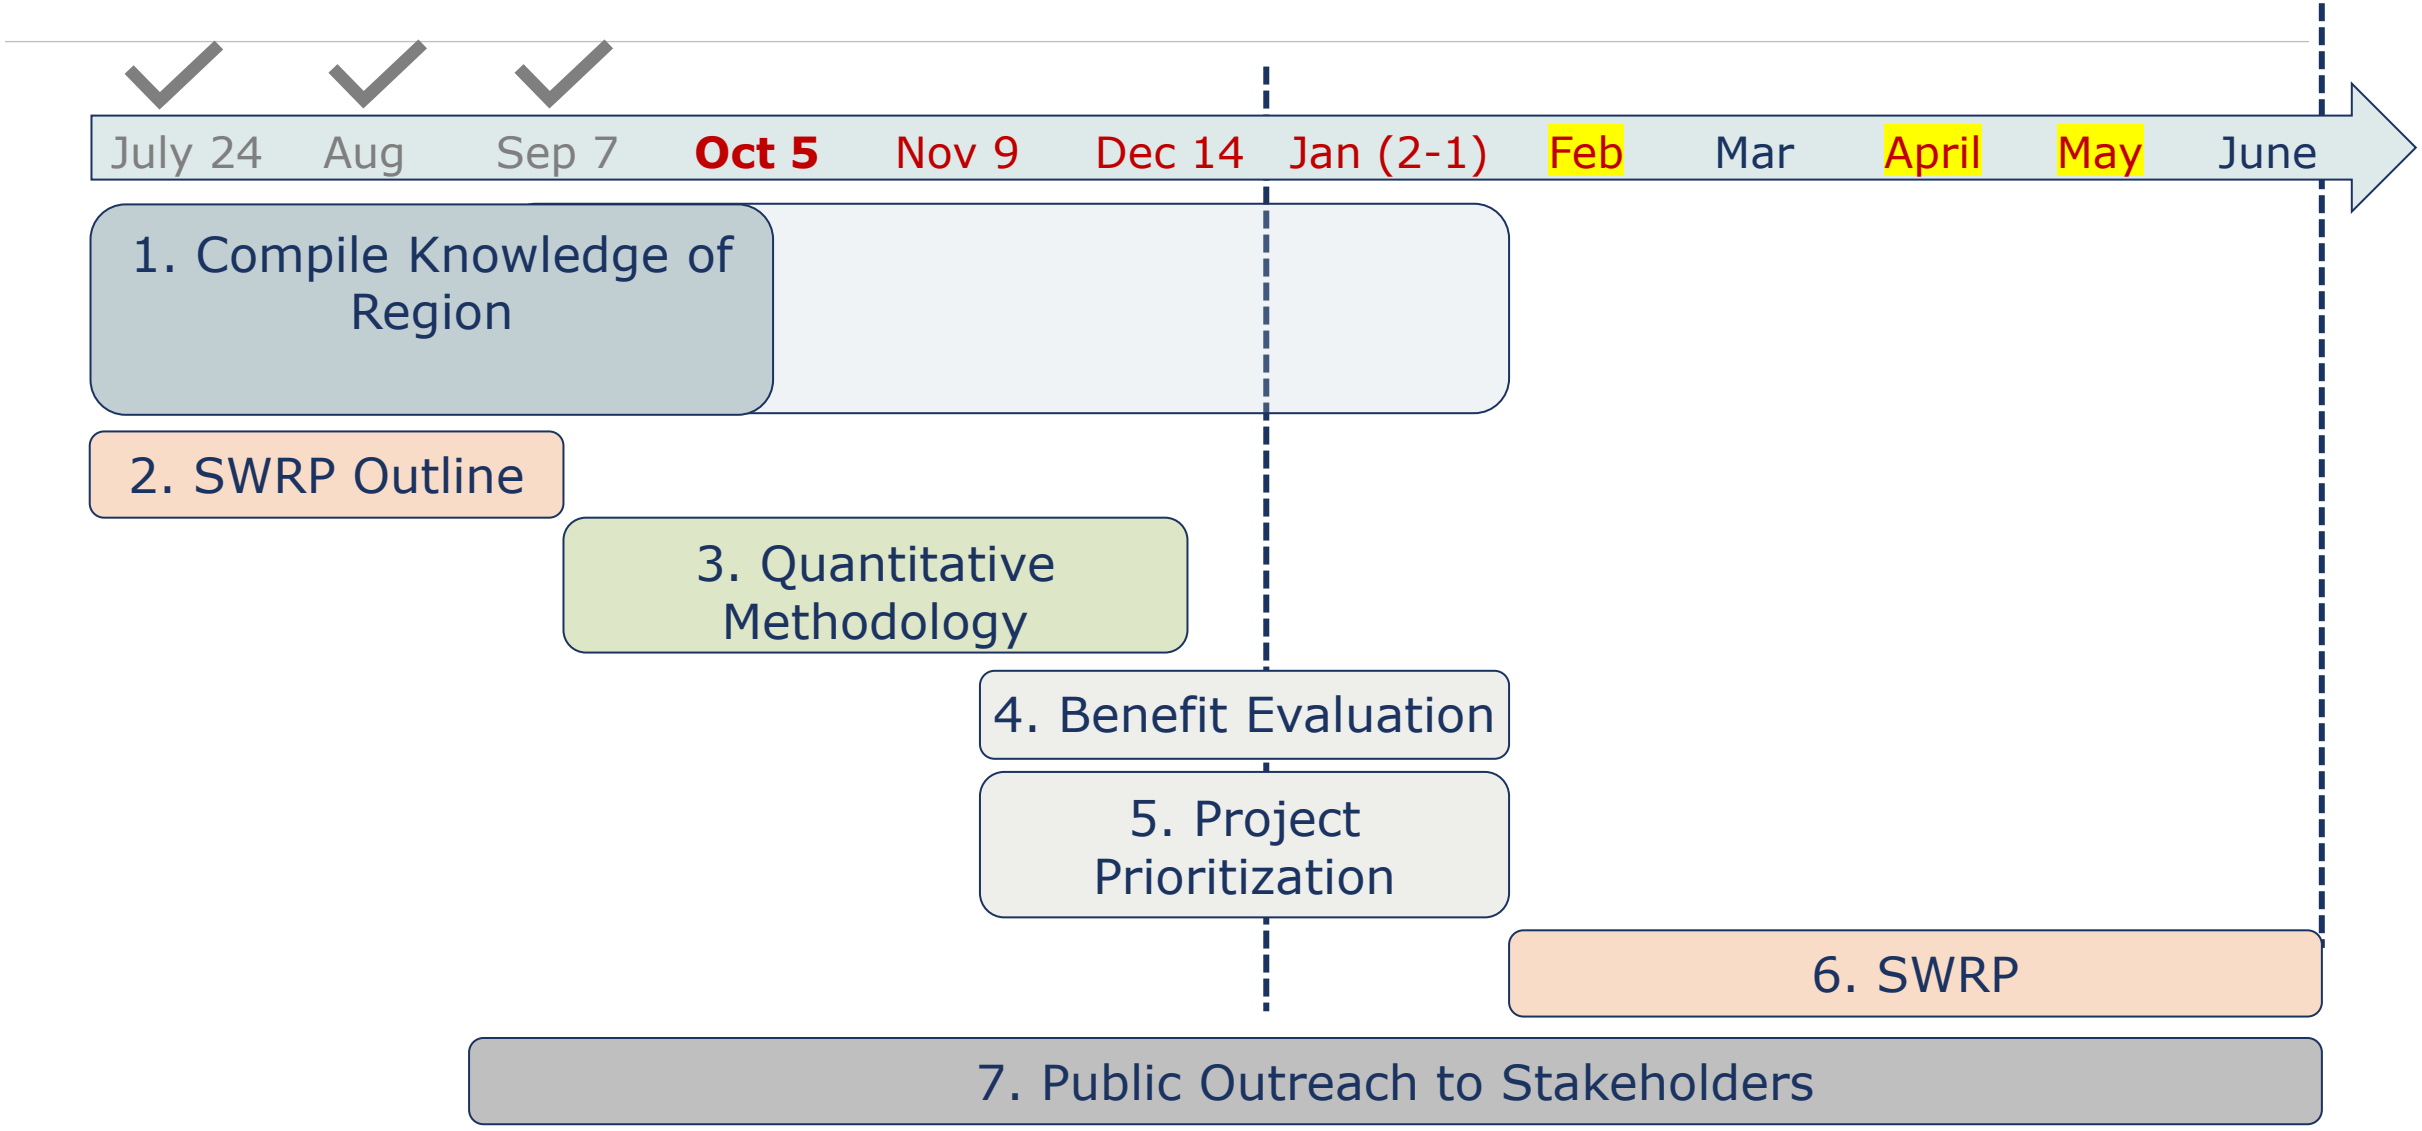
Meeting Agenda

Topic	Lead	Time
1. Welcome and Agenda (*recording?*)	Karen Ashby	2:00 – 2:05 pm
2. Logistics: Schedule & Budget	Karen Ashby	2:05 – 2:30 pm
3. Task 1 – Knowledge of Region	Becky Smith	2:30 – 2:45 pm
4. Task 7 – Drafted Outreach Strategy	Becky Smith	2:45 – 3:15 pm
5. Meeting Wrap Up	Karen Ashby	3:15 – 3:30 pm

LOGISTICS
SCHEDULE AND BUDGET

Group Meetings
To Be Scheduled

Schedule Overview (FY 2023-2024)



Detailed Schedule – Tasks 1, 3, and 7

	Project Task	Task Role / Responsibility	Month / Week of
	SJC Group Coordination Meetings (w/ summary of key action items and decisions)	All	
	Task 1 Compile Knowledge of Region		
Task 1	~~Document and data request submittal to agencies~~	LWA	
Task 1	Completed document and data request to LWA	SJC Group	
Task 1	**Document and Data Review and Summarization -** Draft summary table(s) of existing resources and datasets	LWA	
Task 1	Comments on draft summary table(s)	SJC Group	
Task 1	Final summary table of existing resources and datasets	LWA	
	Task 3 Develop Criteria and Quantitative Metric Based Methodology for Identifying and Prioritizing Project Locations		
Task 3	**Draft quantitative metric based methodology for locating and prioritizing SWRP projects.**	LWA	
Task 3	Comments on draft quantitative metric based methodology	SJC Group	
Task 3	**Final quantitative metric-based methodology** for locating and prioritizing SWRP projects.	LWA	
Task 3	Develop initial list of potential SWRP project locations	LWA	
	Task 7 Support Public Outreach to Community Stakeholders		
Task 7	Identify Stakeholder Groups	All	
Task 7	**Develop Draft Outreach Strategy**	LWA	
Task 7	Comments on Draft Strategy	SJC Group	
Task 7	**Final Draft Outreach Strategy**	LWA	
Task 7	**Distribute Materials to Stakeholder Group - Hold Meetings**	All	

Detailed Schedule – Tasks 1, 3, and 7

	Project Task	Task Role / Responsibility	Month / Week of
	SJC Group Coordination Meetings (w/ summary of key action items and decisions)	All	
	Task 1 Compile Knowledge of Region		
Task 1	~~Document and data request submittal to agencies~~	LWA

Estimated Breakdown by Agency & Contracting Mechanism

Agency	Estimated Cost	Contract / PO in Place?	Status
County of San Joaquin	$100,000	PO to be Issued	XXX
City of Stockton	$42,403	Contract Mechanism in Place	XXX
City of Tracy	$12,431	PO in Place	XXX
City of Lodi	$8,753	PO in Place	XXX
City of Manteca	$11,421	Contract Mechanism in Place	XXX
Total	**$175,008**		

Draft MOU from County?
In the future – contract status will be provided

C-A-61

QUESTIONS?

TASK 1 – KNOWLEDGE OF REGION

Task 1 – Compile Knowledge of Region

Purpose: utilize existing information to establish the location, status and quality, importance of existing water resources, identify where natural watershed processes have been altered, and opportunities and constraints to the implementation of stormwater projects.

Internal Summary Memo

1) Review all identified data
2) Review all identified documentation
3) Request review and comment by October 23rd

This information will form the basis of the background section of the SWRP

Task 1 – Data

Spatial Data Type	Spatial Data	Specifics	SJC	Manteca	Stockton	Tracy	Lodi
Agency GIS/data contact			Miguel Moreno: mvmoreno@sjgov.org	Frank Guillory fguillory@manteca.gov	Trinity Guzman: trinity.guzman@stocktonca.gov	Jeff Davis: jeff.davis@cityoftracy.org	John Pizzo: jpizzo@lodi.gov
Administrative	NPDES MS4 Regulated Area		SJC shapefiles: NPDES_Phase1, NPDES_Phase2

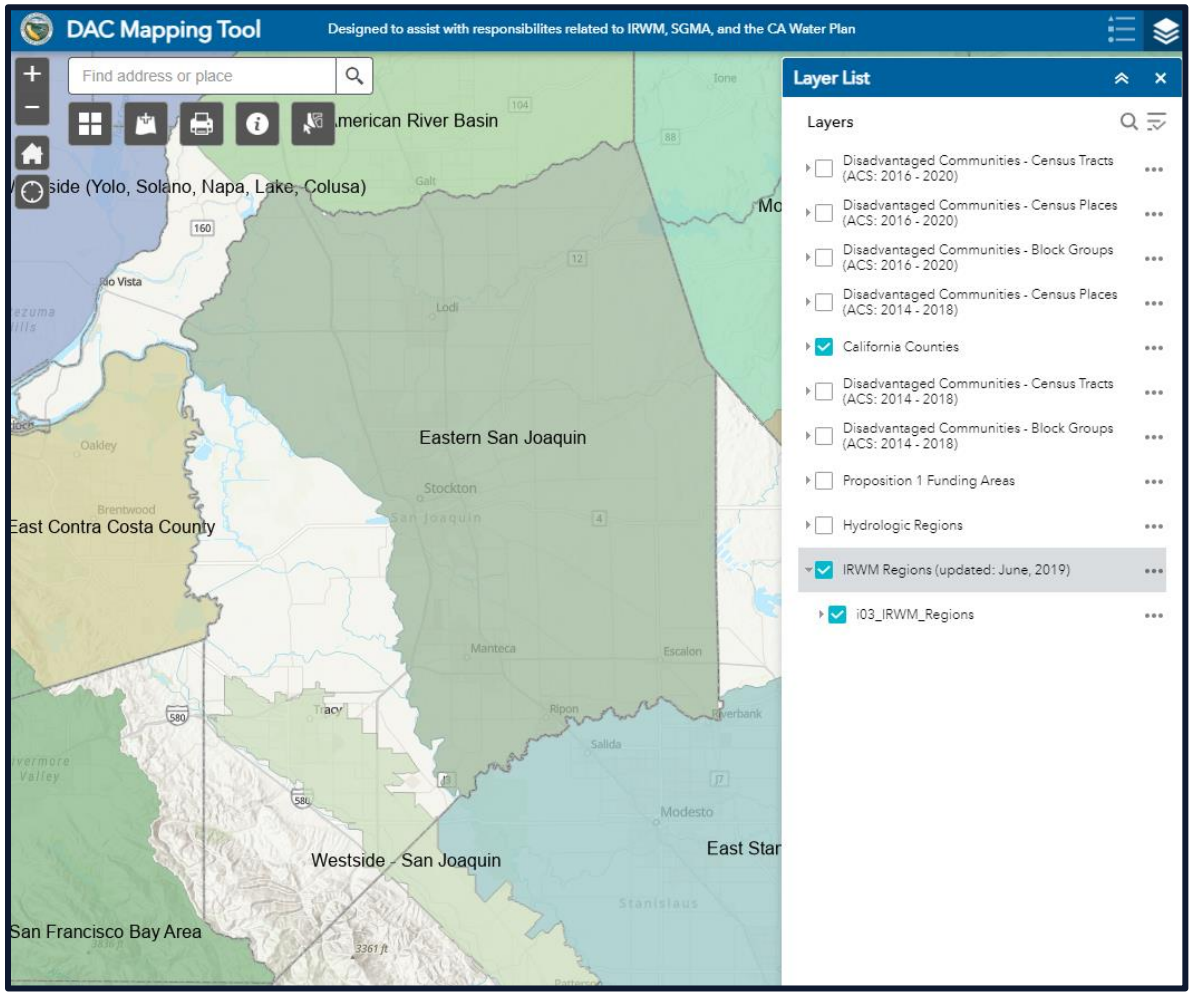
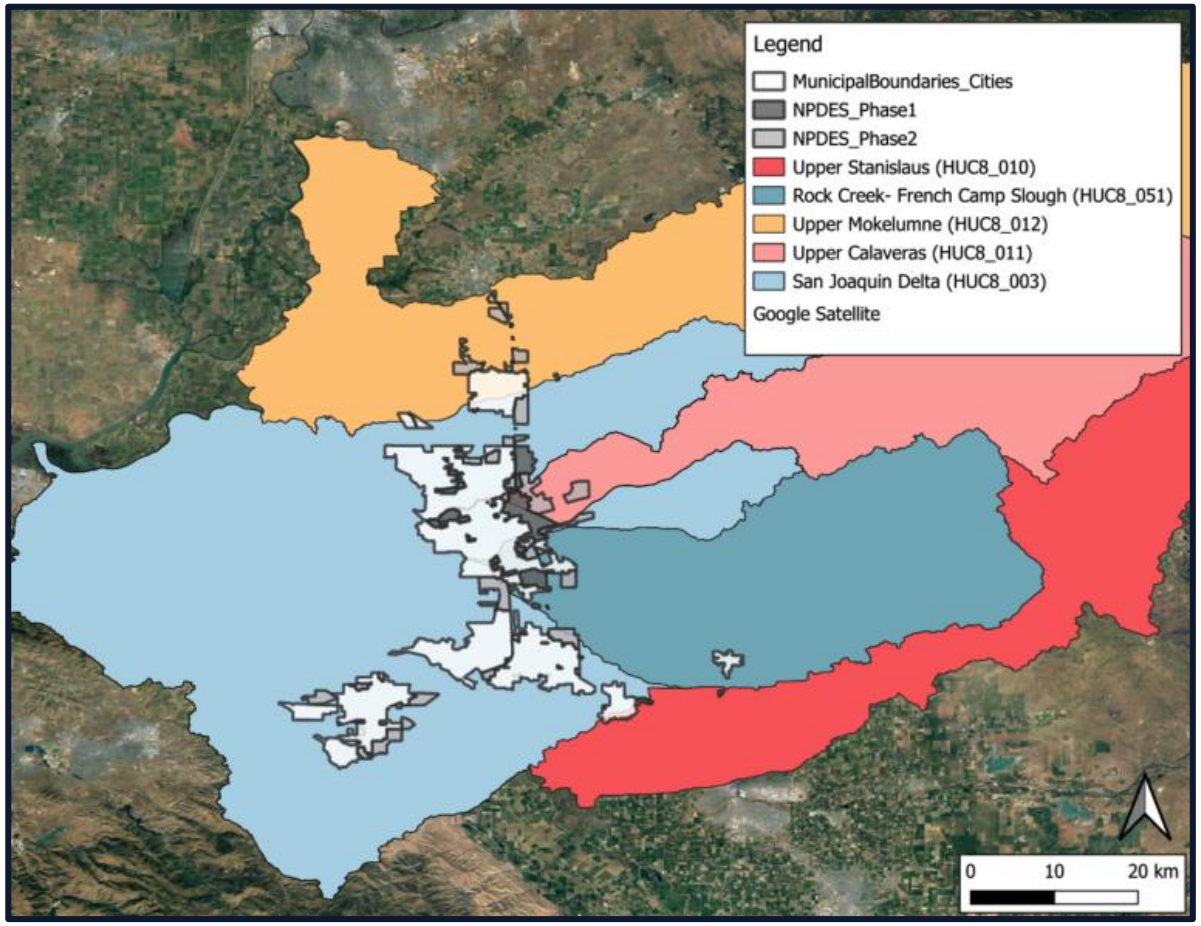
Capital Improvement Plan Project List & Schedule	San Joaquin County Capital Improvement Plan Fiscal Year 2023-24 to Fiscal Year 2027-28		Stockton FY 2023-2028 Capital Improvement Plan		agency specified none published
Low Impact Development Management Planning Efforts	Stormwater Quality Control Criteria Plan, Section 1.5	(not planning but manual: 2015 Manteca Multi-Agency Post-Construction Stormwater Standards Manual-- collaborated by SJC, Tracy, Lodi and Manteca)			Lodi Storm Water Management Program 2012
Urban Water Management Plans		City of Manteca 2020 Urban Water Management Plan	City of Stockton 2020 Urban Water Management Plan	Tracy 2020 Urban Water management Plan	Lodi 2020 Urban Water Management Plan

Task 1 – Documents: IRWMP and watersheds





We will propose watersheds for your approval

Task 1, Announcements and Action Items

San Joaquin County Group Agencies

- Need most-recent land use information for project identification
- Review document table, confirm whether identified documents are current or provide updated information

LWA:

- Will follow up with GIS/data contacts with any specific questions as we develop multi-benefit analysis

QUESTIONS?

TASK 7 – STAKEHOLDER OUTREACH

Purpose: Provide community participation in SWRP development and implementation

TASK 7 – STAKEHOLDER OUTREACH DOCUMENTS

SAN JOAQUIN COUNTY AND THE CITIES OF MANTECA, TRACY, LODI AND STOCKTON

San Joaquin County Regional Agency Stormwater Resource Plan

TABLE OF CONTENTS

Section	Page
6. EDUCATION, OUTREACH AND PUBLIC PARTICIPATION (GUIDELINES SECTION IV.F)	
6.1 Overview of Stakeholder Outreach and Coordination Strategy	
6.1.1 Purpose of the Stakeholder Outreach and Coordination Strategy	
6.1.2 Outreach Approach	
6.1.3 Key Stakeholder Audiences	
6.1.4 Matrix of Outreach Materials	
6.2 Summary of Outreach Activities	
7. IMPLEMENTATION STRATEGY FOR THE SWRP (GUIDELINES SECTION VI.E)	

APPENDIX C

San Joaquin County Regional Agency Stormwater Resource Plan Outreach Strategy

San Joaquin County Regional Stormwater Resource Plan Outreach Strategy Attachments

- Attachment A: Non-Municipal Public Landowners
- Attachment B: Outreach Materials
- Attachment C: SWRP Flyers
- Attachment D: Regional Webpage

Task 7 SWRP Mandatory Requirements per CWC

Guidelines	Checklist
Section VI.B, Water Code section 10565(a)	Local agencies and nongovernmental organizations were consulted in Plan development.
Section VI.B, Water Code section 10562(b)(4)	Community participation was provided for in Plan development.
Section VI.F, Water Code section 10562(b)(4)	Outreach and Scoping: Community participation is provided for in Plan implementation.
Section VI.F, recommended	Plan describes public education and public participation opportunities to engage the public when considering major technical and policy issues related to the development and implementation of the Plan
Section VI.F, recommended	Plan describes mechanisms, processes, and milestones that have been or will be used to facilitate public participation and communication during development and implementation of the Plan
Section VI.F, recommended	Plan describes mechanisms to engage communities in project design and implementation.
Section VI.F, recommended	Plan identifies specific audiences including local ratepayers, developers, locally regulated commercial and industrial stakeholders, nongovernmental organizations, nonprofit organizations, and the general public.
Section VI.F, recommended	Plan describes strategies to engage disadvantaged and climate vulnerable communities within the Plan boundaries and ongoing tracking of their involvement in the planning process.
Section VI.F, recommended	Plan describes efforts to identify and address environmental injustice needs and issues within the watershed.
Section VI.F, recommended	Plan includes a schedule for initial public engagement and education.

REQ

Task 7, Announcements and Action Items

San Joaquin County Group Agencies:

- Provide missing information noted in the following slides (stakeholders, representative IRWMP contacts)
- Provide initial SWRP outreach to SWRP applicable stakeholders (initial outreach email templates to be provided by LWA soon!)
- Determine one website location for SWRP public information to be posted

LWA:

- Develop email templates for initial SWRP outreach to stakeholders from agencies
- Revise stakeholder list to only include SWRP-applicable stakeholders

Task 7, Appendix C, Section 4: Matrix of Outreach Approaches

Stakeholder Audience	Outreach Method			
	Meetings	Targeted Emails	General Flyer	County Webpage
SWRP Participating Agencies	X			
Non-Municipal Public Landowners		X	X	X
Watershed Groups and NGOs		X	X	X
IRWMPs		X	X	
General Public			X	X

Appendix C, Section 3.2
Non-Municipal Public Landowners

San Joaquin County	City of Lodi	City of Tracy	City of Manteca	City of Stockton
• [need information] • Housing Authority of the County of San Joaquin • Defense Logistics Agency • East Bay Municipal Utility District • San Joaquin County Agricultural Commissioner • California Department of Conservation	• Lodi Unified School District • City of Lodi Parks Department • Ione Band of Miwok Indians • Bogle Winery • Lange Twin Winery • Shoup Land Surveying • Duarte Nursery	• Tracy Unified School District • Jefferson Unified School District • Tracy Rural Fire District • Caltrans District 10 • California Highway Patrol- Tracy	• Terra Land Group • South San Joaquin Irrigation District • Manteca Unified School District	• Request further stakeholder information • Stockton Community Development Committee • Stockton Parks and Recreation Commission • Stockton Planning Commission • Stockton Port Commission

Appendix C, Section 3.3
Watershed Groups and other NGOs

San Joaquin County	City of Lodi	City of Tracy	City of Manteca	City of Stockton
• [need information] • Delta Regional Monitoring Program • League of Women Voters San Joaquin County • North San Joaquin Water Conservation District	• Lodi Memorial Hospital Foundation • Lodi Chamber of Commerce • Tree Lodi • Point Blue Conservation Science • Lodi Rules Sustainable Winegrowing Program • WhollyH20 • Stewardship Through Education	• Southside Community Organization • Tracy African American Association • Tracy Rotary • Tracy Boys and Girls Club • Sutter Tracy Hospital • Tracy Interfaith Ministries • Tracy Chamber of Commerce • McHenry House Tracy Family Shelter • Tracy Earth Project • Tracy Tree Foundation • Coalition of Tracy Citizens to Assist the Homeless/ Emerson House	• Request further stakeholder information • San Joaquin Area Flood Control Agency	• Request further stakeholder information • Water Advisory Group

Appendix C, Section 3.4 and 3.5
IRWMPs and the General Public

3.4 IRWMPS

While not official stakeholders according to SWRP guidelines, the two separate Integrated Regional Water Management Plans (IRWMPs) for the SWRP area, namely the Westside Sacramento IRWMP and the Greater San Joaquin IRWMP, are considered stakeholders in this Outreach Strategy to facilitate future coordination of stormwater management projects identified in the SWRP. Representative contacts for each IRMWP are specified in Attachment B.

While this Outreach Strategy focuses on SWRP development and the identification of key stormwater management projects, communication with IRWMPs through this process will prepare for future implementation actions and continued outreach through those programs. This communication and collaboration satisfies the General Requirement Section VI.F, Water Code section 10562(b)(4), namely "Community participation is provided for in Plan implementation."

3.5 GENERAL PUBLIC

The general public must be included in SWRP development in order to satisfy Guideline Requirement Section VI.B, Water Code section 10565(a) (**Table X**), "Community participation was provided for in Plan development." The general public represents a critical stakeholder group that may largely overlap with previously identified groups, however may also include community members outside of regional organizations. General Public outreach is essential to maximizing potential benefits of future stormwater management projects, because integrating community knowledge and perspectives, particularly from members of historically underserved or underrepresented communities, may provide information on the most pressing community needs.

Appendix C, Section 4.2

Outreach Method			
Meetings	Targeted Emails	General Flyer	County Webpage
	✘		

4.2 TARGETED EMAILS

SWRP participating agencies developed email distribution lists for the stakeholder audiences listed in above **Sections 3.2-3.4**. Construction of the email distribution list provided an efficient and cost-effective way to reach a broad stakeholder audience.

Email templates were composed and adjusted slightly for each stakeholder group, and included the following key components:

1. Explanation of purpose of SWRP
2. Explanation of relevance to specific stakeholder group
3. Link to SWRP draft on San Joaquin County website, and request for comments on SWRP draft from stakeholder group by specific deadline and to a specified email.

Specific email templates sent to each stakeholder group are detailed in **Attachment B** of this Appendix.

Appendix C, Section 4.3

Outreach Method			
Meetings	Targeted Emails	General Flyer	County Webpage
		✘	

4.3 GENERAL FLYER

A general flyer was developed for the San Joaquin Regional SWRP project, and is included as **Attachment C** to this Appendix. Only one flyer was developed, however flyers were distributed by SWRP participating agencies and were therefore personalized to reflect participating agency logos. The flyer included the following information:

1. Explanation of the importance of green infrastructure and stormwater projects on watershed sustainability and regional water quality protection.
2. Images of green infrastructure and stormwater projects.
3. Explanation of the purpose of the SWRP.
4. Explanation of how potential stormwater projects were categorized and ranked in the SWRP using metric based evaluation. Metrics listed here included: water quality, community benefits, environmental benefits, flood control, sustainability, and water supply.
5. A link to the draft SWRP, and a QR code for easy download.
6. The email address for community members to submit comments.

The general flyer was intended to reach the general public, and provide an opportunity for all community members to engage in SWRP development.

Appendix C, Section 4.4

Outreach Method			
Meetings	Targeted Emails	General Flyer	County Webpage
			✘

4.4 COUNTY WEBPAGE

The County of San Joaquin uploaded the draft SWRP on the county website by collaborating with the County webmaster. Information on the SWRP was also provided (discuss)? This link was utilized in all other outreach methods to provide public access to the SWRP. Information on the regional webpage is provided in **Attachment D** to this Appendix.

QUESTIONS?

MEETING WRAP UP / ACTION ITEMS

Next Meeting Date: November 9th

Action Items

Project Team

- Tasks 1 & 7 – Provide Data/Document memo & Draft Outreach Strategy to agencies – October 9 (next Monday)
- Task 1 – Finalize Summary of Existing Information – Oct 30
- Task 7 – Provide initial outreach email templates for agencies – Oct 30
- Task 7 – Finalize draft of Outreach Strategy – Oct 30
- Task 3 – Draft quantitative metric-based methodology for SWRP projects – Oct 30

San Joaquin County Group Agencies

- Task 1 – Review Data/Document memo, provide comment on missing information – Oct 23
- Task 7 – Review Draft Outreach Strategy, provide comment – Oct 23
- Task 7 – Send initial outreach emails to stakeholder groups – tbd
- Coming Soon: Request for Project Ideas, Request for Additional Information – tbd

THANK YOU!

Estimated Budget

Task/ Scope Item	Planning Level Estimated Cost
Task 1. Compile Knowledge of Region	$13,895
Task 2 - Develop Stormwater Resource Plan Outline	$5,740
Task 3 - Develop Quantitative, Metric-Based Methodology for Identifying & Prioritizing Projects	$11,123
Task 4 - Develop a Priority Project List	$20,362
Task 5 - Quantify Benefits of Priority Projects	$35,603
Task 6 - Produce Draft & Final Stormwater Resource Plan	$55,563
Task 7 – Public Outreach / Stakeholder Meetings	$10,939
Task 8 – Coordination and Management	$21,783
Estimated Total	**$175,008**

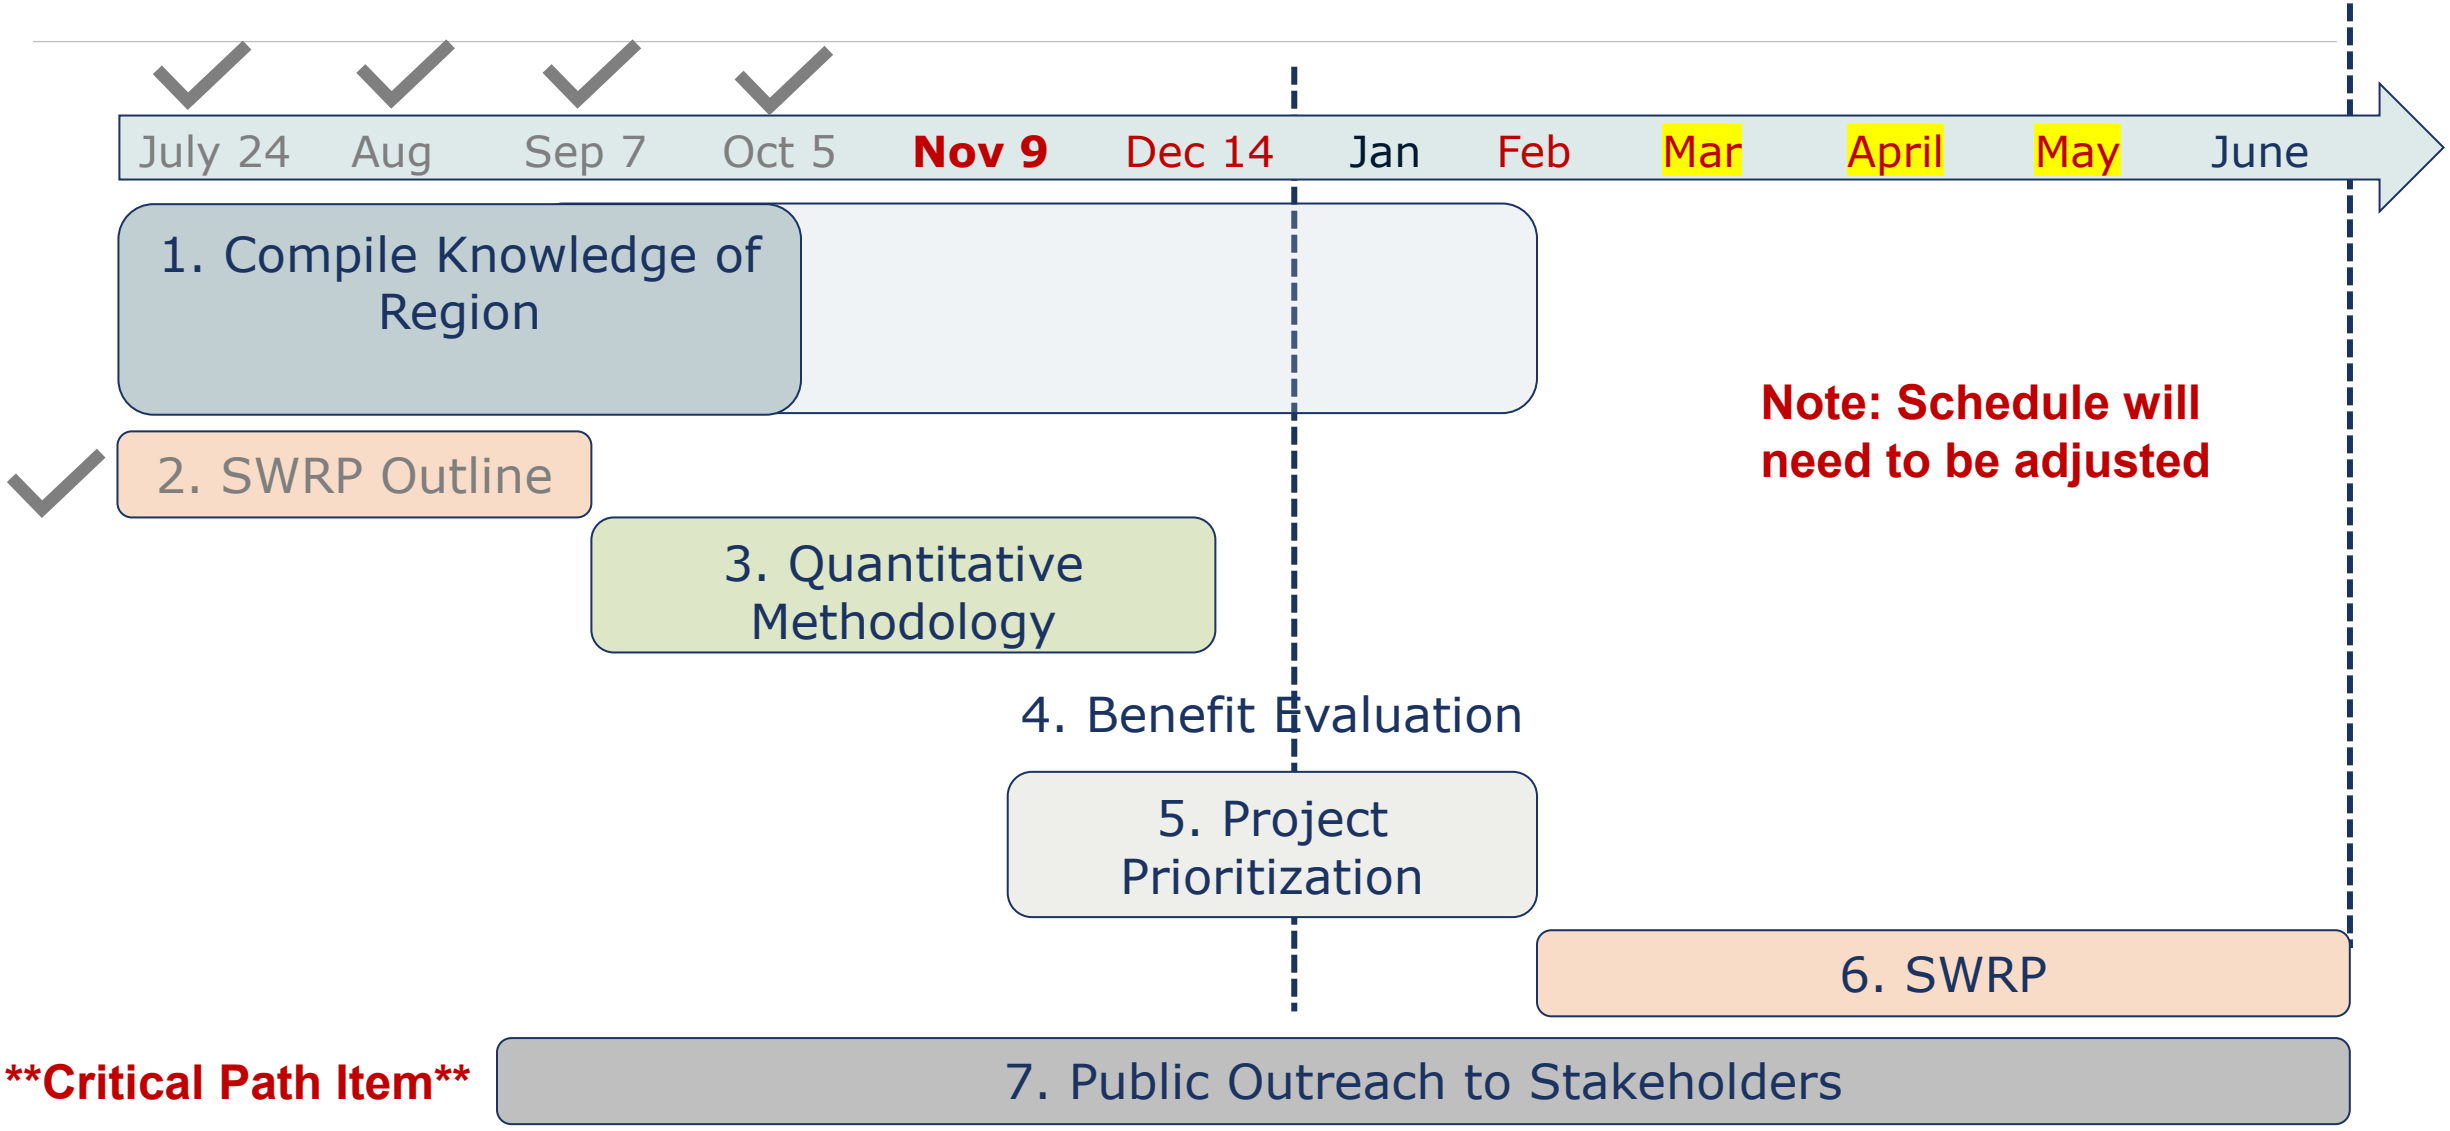
Schedule Overview (FY 2023-2024)



Budget Update (end of Oct)

Agency	Estimated Cost	Invoiced to Date
County of San Joaquin	$100,000	XXX
City of Stockton	$42,403	XXX
City of Tracy	$12,431	XXX
City of Lodi	$8,753	XXX
City of Manteca	$11,421	XXX
Total	**$175,008**	

Draft MOU from County?

QUESTIONS?

TASK 1 – KNOWLEDGE OF REGION

Task 1 – Compile Knowledge of Region

Purpose: utilize existing information to establish the location, status and quality, importance of existing water resources, identify where natural watershed processes have been altered, and opportunities and constraints to the implementation of stormwater projects.

Internal Summary Memo

PARKS DISTRICT MESSAGE

Dear Parks District Representative:

The San Joaquin County municipal stormwater agencies (including the County of San Joaquin and the Cities of Stockton, Tracy, Lodi, and Manteca) **are developing (Steps X-X emails)/are pleased to announce the development of (Steps X-X emails)** a regional Stormwater Resource Plan (SWRP). The SWRP is required as a condition of receiving State grant funding for stormwater and dry weather runoff capture projects (also known as green infrastructure projects). The SWRP is intended to be a resource for park districts and other interested parties that may want to obtain grant funding for local projects in the future.

Property owned by your district may be eligible for grant-funded stormwater and dry weather runoff capture projects that are designed to reduce stormwater pollution and provide additional community benefits, such as watershed improvement, enhancement and/or creation of recreational and public use areas, and increased green space and connectivity. Green infrastructure projects, if sited on park district property, may provide opportunities for your district to partner with your local municipality. Further information on the SWRP can be found in the attached flyer.

[For email sign-off, reference table with text for each outreach step]

MESSAGE TO BUSINESSES

Dear Watershed Stakeholders and Businesses:

The San Joaquin County municipal stormwater agencies (including the County of San Joaquin and the Cities of Stockton, Tracy, Lodi, and Manteca) **are developing (Steps X-X emails)/are pleased to announce the development of (Steps X-X emails)** a regional Stormwater Resource Plan (SWRP). The SWRP is required as a condition of receiving grant funding for stormwater and dry weather runoff capture projects (also known as green infrastructure projects). The SWRP requirement is intended to encourage the use of stormwater and dry weather runoff as a resource to improve water quality, reduce localized flooding, and increase water supplies for beneficial uses and the environment. As such, the SWRP is intended to be a resource for watershed groups and other interested parties that may want to obtain grant funding for local projects in the future.

Text insert for farming stakeholders: ***Farmers in your jurisdiction may benefit from SWRP projects that use stormwater for crop irrigation or groundwater recharge and that may create opportunities to partner with the local municipality.***

Green infrastructure projects may be sited in your watershed(s) to reduce stormwater pollution, use stormwater as a valuable resource, enhance habitat, and provide additional watershed and community benefits (further information on the SWRP can be found in attached flyer).

[For email sign-off, reference table with text for each outreach step]

C-A-107

SWRP Milestone	Emails	Email Signature Text
Initial Outreach	✘	We welcome your input as we identify potential future multi-benefit stormwater and dry weather runoff projects for the draft SWRP. Please contact rebeccas@lwa.com or karena@lwa.com to receive a project request form and submit your ideas for consideration in the SWRP by X, 2023
Proposed Quantification Methodology	✘	We have developed a proposed quantification methodology for ranking potential future multi-benefit stormwater and dry weather runoff projects, and we welcome your input on the proposed methodology. Please contact rebeccas@lwa.com or karena@lwa.com to receive a project request form and submit your ideas for consideration in the SWRP by X, 2023
Proposed Project Ranking and Benefits	✘	We welcome your input on the proposed ranking of stormwater and dry weather runoff projects for the draft SWRP. Please contact rebeccas@lwa.com or karena@lwa.com to receive a project request form and submit your ideas for consideration in the SWRP by X, 2023
Draft SWRP	✘	We welcome your feedback. The draft SWRP is posted on the County Website for a public review and comment period of 30 days. Please provide any feedback on the SWRP via email to rebeccas@lwa.com or karena@lwa.com by X, 2023.
SWRP Modification/ Project Implementation (Ongoing)	✘	We welcome your input and thoughts on project implementation. The draft SWRP is posted on the County Website for a public review and comment period of 30 days. Please provide any feedback on the SWRP via email to rebeccas@lwa.com or karena@lwa.com by X, 2023.

San Joaquin County Region Stormwater Resource Plan

BACKGROUND: WATER QUALITY CONCERNS

Stormwater is runoff from rain or snowmelt that travels along impervious surfaces (paved streets, parking lots, and building rooftops) and does not soak into the ground.

In most cases, stormwater:

- flows untreated directly to water bodies through sewer systems;
- carries pollutants (trash, chemicals, oils, dirt and sediment) with it that can harm streams, rivers, lakes, and coastal waters.

GREEN INFRASTRUCTURE

provides control measures that:

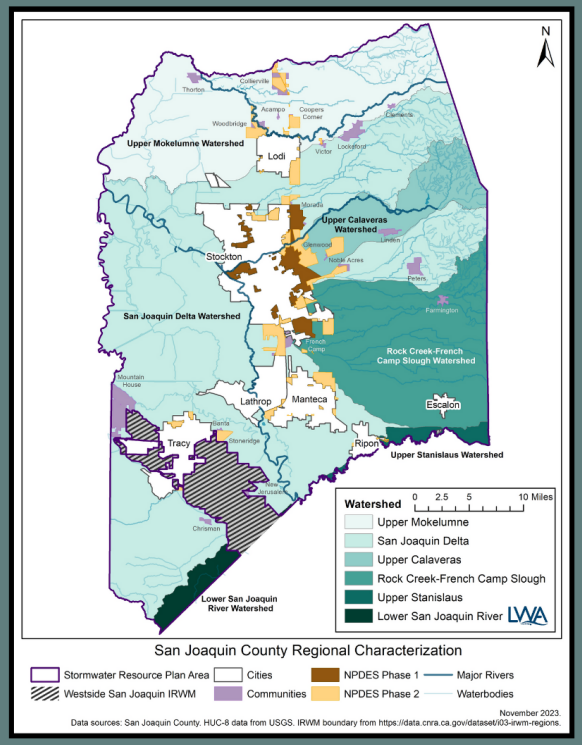
- mimic natural systems to absorb and filter stormwater, which removes pollutants and slows or reduces runoff into storm sewers and surface waters;
- can reduces erosion and flood risk, as well as protect water quality for humans and aquatic organisms.

PURPOSE OF THE STORMWATER RESOURCE PLAN (SWRP): The San Joaquin County Region Stormwater Resource Plan is being developed to **identify** and **prioritize green infrastructure projects** and programs that benefit regional water quality in the San Joaquin County Region (County and Cities of Stockton, Manteca, Lodi, and Tracy). A SWRP is required by the State Water Resources Control Board for cities and counties to be eligible for grant funding from the State for projects in stormwater management and green infrastructure.

CONSIDER GETTING INVOLVED: We welcome your input as we develop the SWRP. Please **visit the county webpage** or **scan the code below** to get involved. There are opportunities for you to submit your project ideas, comment on the draft methodology and project ranking, and comment on the draft SWRP.

SWRP AREA

County of San Joaquin, Cities of Stockton, Manteca, Lodi and Tracy



METHODS FOR IDENTIFYING AND PRIORITIZING STORMWATER PROJECTS

After receiving project ideas from the public, agencies will begin identifying parcels suitable for projects using geographic information system (GIS) data, scoring each parcel using an automated metric-based evaluation, and ranking scored projects based on their weighted benefits. Suitable parcels will be scored across six benefit categories:

- General Sustainability
- Water Quality
- Water Supply
- Flood Control
- Environmental
- Community

Photos below depicting green infrastructure: stormwater planters and vegetated swales that can absorb stormwater flows from streets and parking lots. Photo Credi: X

[photos of green stormwater infrastructure will go here]

C-A-123

Task 7- Outreach Status, website

WE WANT TO HEAR FROM YOU!

To identify and prioritize projects that benefit all regional stakeholders, the SWRP Development Team seeks to involve the public, public agencies, Tribal governments, and non-governmental organizations. Developing and implementing the SWRP is a multi-step process, and you can get involved at any time. We welcome your contribution to the process.

Please refer to the **Stages of Engagement** table below to identify opportunities for you to get involved during the different phases of SWRP development. This table will be updated during each phase of engagement with guidance on how you can get involved. Please email rebeccas@lwa.com or karena@lwa.com to learn more about a specific Stage of Engagement or request further information or clarification.

Stages of Engagement	Timeline
Initial Outreach with Regional Stakeholders (we want to hear from you!)	December 2023 - Ongoing
Development of a Methodology for Ranking Stormwater Projects	*To be announced- 2024*
Review of the Current Ranked List of Projects and Opportunity for Your Project Submittal	*To be announced- 2024*
Review of the Draft SWRP	*To be announced- 2024*
SWRP Modification/ Project Implementation (Ongoing)	*To be announced- 2024*

Task 7- Outreach Status, Announcement Email

Stages of Engagement	Timeline
Initial Outreach with Regional Stakeholders (we want to hear from you!)	December 2023 - Ongoing
Development of a Methodology for Ranking Stormwater Projects	*To be announced- 2024*
Review of the Current Ranked List of Projects and Opportunity for Your Project Submittal	*To be announced- 2024*
Review of the Draft SWRP	*To be announced- 2024*
SWRP Modification/ Project Implementation (Ongoing)	*To be announced- 2024*

SWRP Initial Announcement Email for all Stakeholders (in Groups 2 and 3)

Dear [recipient]:

We are excited to announce a new watershed sustainability effort that we hope [you/ your group/ the organization/ the government] may be interested in getting involved in.

The County of San Joaquin and the Cities of Stockton, Tracy, Lodi, and Manteca have joined together to support the development of a San Joaquin County Region Stormwater Resource Plan (SWRP). A Stormwater Resource Plan (SWRP) is a planning document that identifies and prioritizes projects focused on the sustainable management of **storm water and dry weather runoff** (further information on these can be found on our website: link [here] and QR code below). The projects that could be included in the SWRP (also referred to as green infrastructure projects) would ideally provide multiple benefits including improved regional water quality, reduced localized flooding, increased water supply, and community enhancement.

For a regional storm water or dry weather runoff project to be eligible to receive State grant funding for implementation, it must be included in the SWRP document (*with few exceptions, see footnote below).* Therefore, a core component of SWRP development is outreach and collaboration with stakeholders (public agencies, Tribal governments, 501(c)(3) nonprofit organizations, public entities, and water companies) to identify and prioritize potential projects that would go into the SWRP.

We want to hear from you! How can you get involved?

During the development of the SWRP, which will take about 6-9 months to complete, there will be several opportunities for you to be involved or to submit project ideas to be included in the plan.

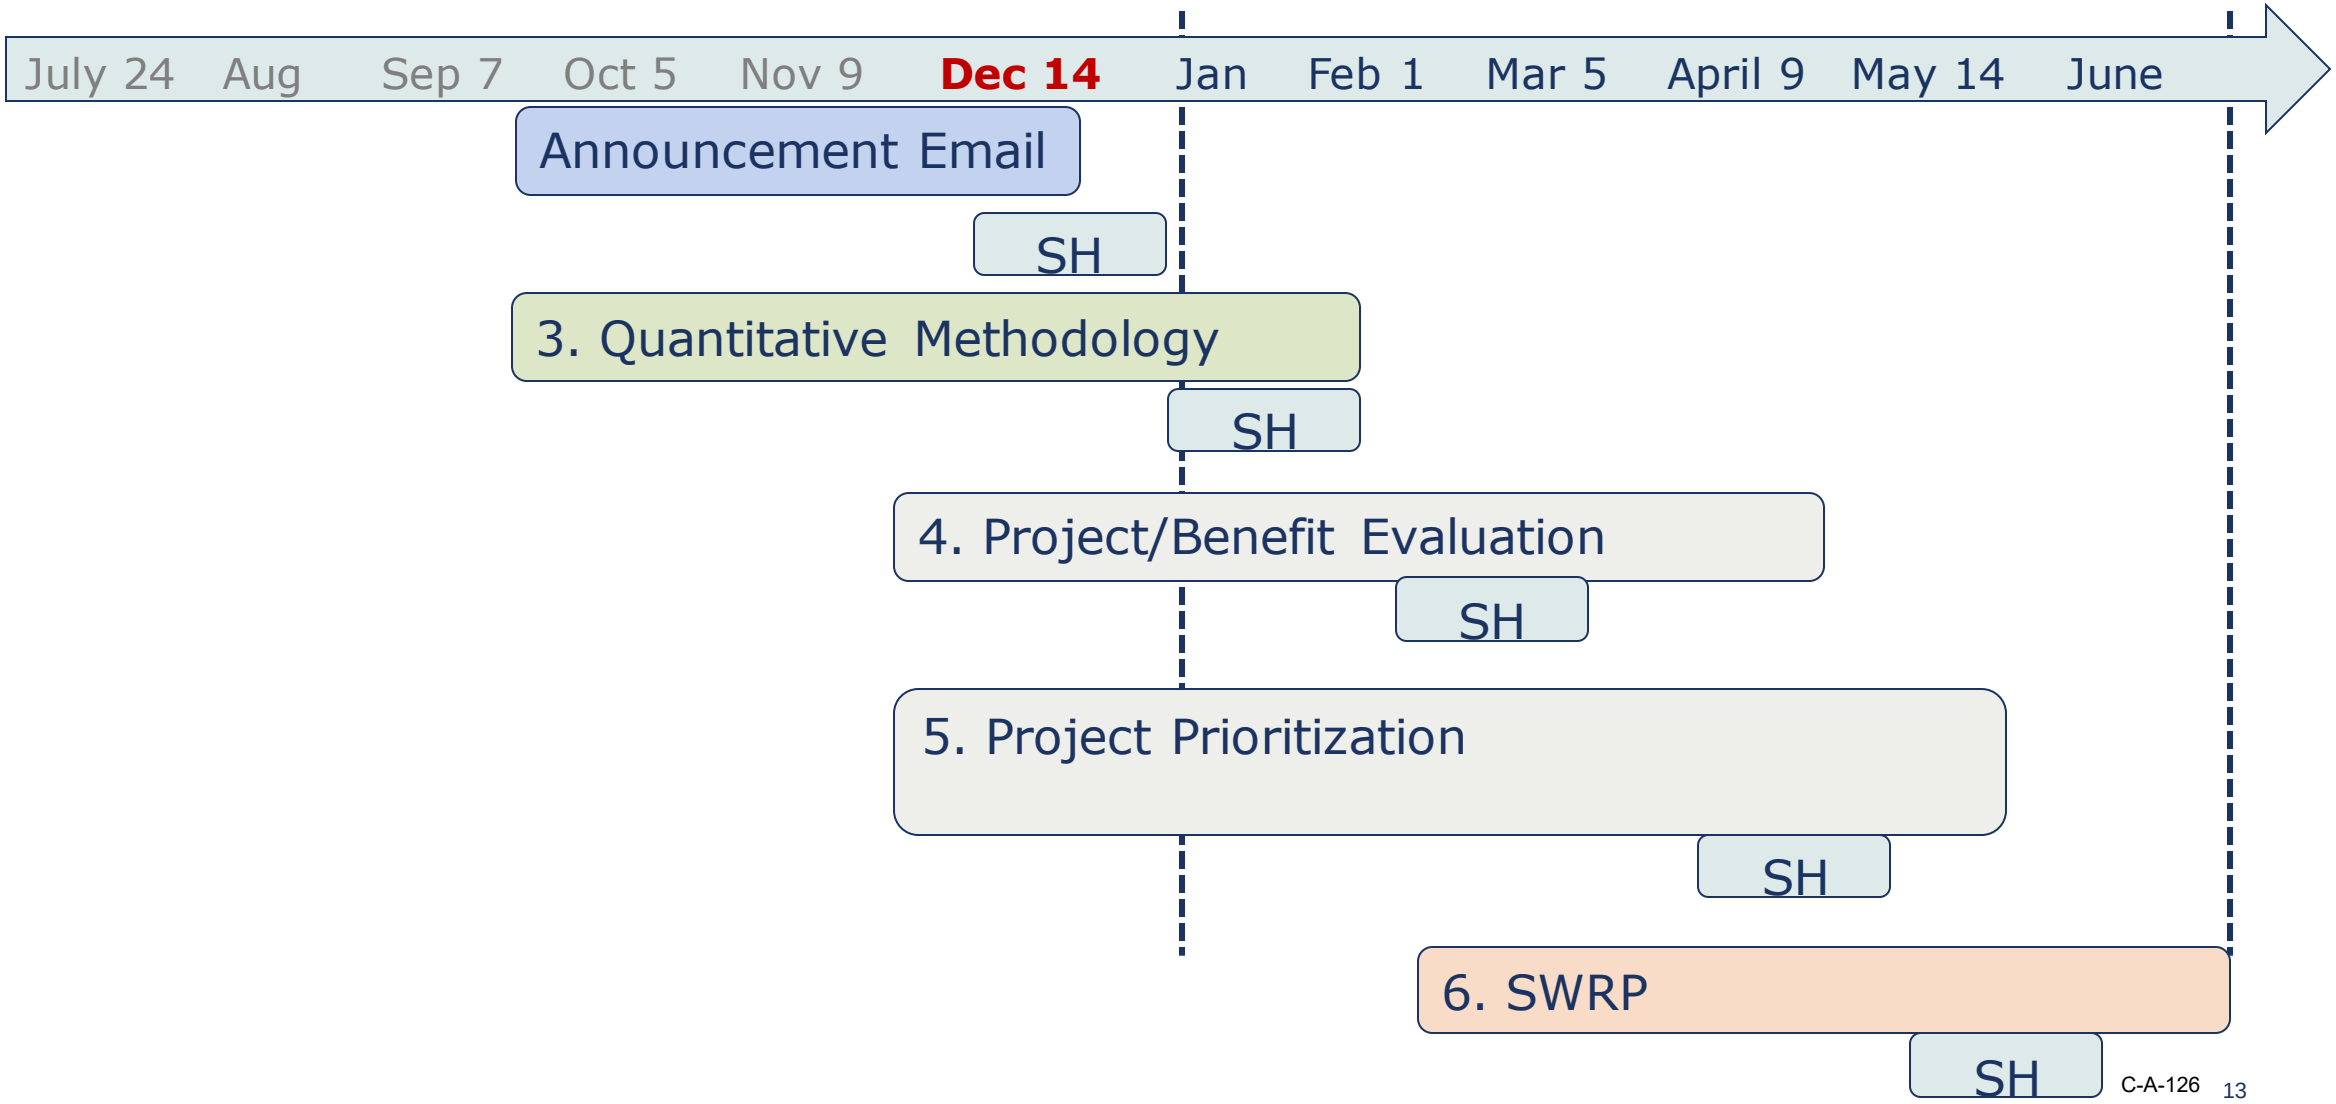
You can find out about these opportunities by doing one or more of the following:

1) Provide us with your direct email requesting to be contacted; and/or
2) Visit this website to receive the most current information XXX.

If you have any questions please reach out to rebeccas@lwa.com or karena@lwa.com .

Footnote → exceptions where a SWRP is not required are: (1) for projects benefiting a disadvantaged community (DAC) with a population of 20,000 or less that is not a copermittee for an MS4 permit issued to a municipality with a population of more than 20,000, and (2) for projects that are in an Area of Special Biological Significance (ASBS) and are covered under an approved ASBS Compliance Plan.

Schedule Overview (FY 2023-2024) w/ Stakeholder (SH) Review



Task 7, What we need per last meeting

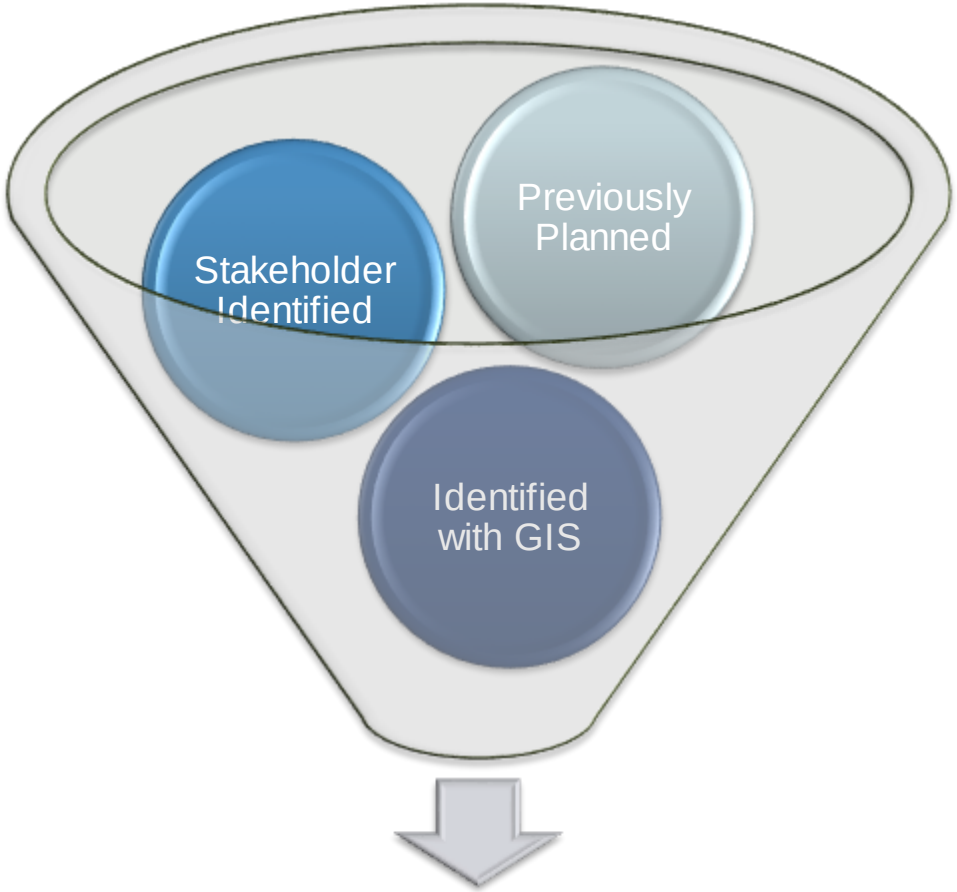
Agency	Critical TO DO:
County	~~Provide contact information for the Eastern AND South San Joaquin GSAs~~ ~~Provide contact person for the website~~
Stockton	~~Provide contacts for the water and stormwater divisions~~ ~~Provide eastside IRWMP and~~ **Stockton Water Advisory Group contacts** ~~Provide Category 3 stakeholder contact information~~ Stockton recently hired someone to lead diversity, equity inclusion initiatives. Stockton will reach out to request information on Tribal contacts/ relationships and preferred modes of contact with Tribes ~~Provide information for other water agencies~~ Provide Department of Transportation contact
Lodi	Provide contact information for school districts ~~Provide contact information for Margaret with the Plant Material Center~~ Provide contact information for Michele Workman, who works with Tribes Provide contact information for Janice Magdich with the San Joaquin Rail Commission Provide contact information for: Lodi Memorial Hospital Foundation
Tracy	~~Provide emails for participating agency members of the SJC Stormwater Quality Partnership group~~
Manteca	Provide the contact information for transportation and transit contacts.

QUESTIONS?

TASK 3: DEVELOP CRITERIA AND QUANTITATIVE METRIC BASED METHODOLOGY FOR IDENTIFYING AND PRIORITIZING PROJECT LOCATIONS

Purpose: Develop and apply standardized approach to quantify benefits and ”prioritize” potential projects

Components of SWRP Potential Project List



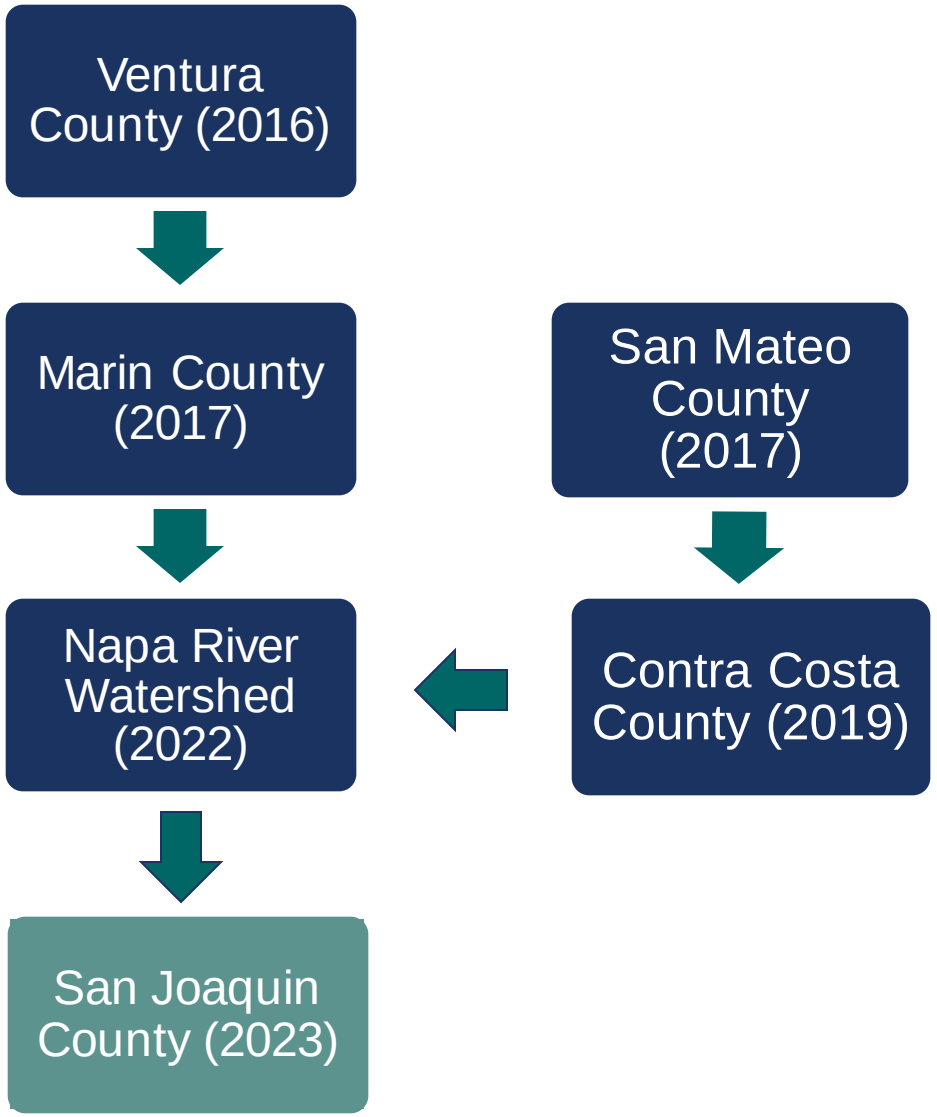
C-A-130

Adapted Proven and Successful Approach

Approach adapted from SWRPs developed in other areas

- Project identification with GIS, weighting and point allocation approved by the State
- Considered an acceptable "prioritization" of projects
- Projects identified in SWRPs have received Prop 1 grant funding

Proven approach that has achieved SWRP goals



C-A-131

Previously Planned or Identified

Existing Planning Documents:

- Stockton/San Joaquin Watershed Reasonable Assurance Analysis (July 2019)
- Eastern San Joaquin IRWMP (2020) and Westside-San Joaquin IRWMP (2019)
- Eastern San Joaquin Groundwater Sustainability Plan (GSP) (2022)

Stakeholder Identified Projects:

- Municipal entities with projects in CIP or project proponent
- NGO or third party entity projects (e.g.; daylighting streams or surface wetlands)

Potential Projects Identified via GIS Analyses:

- Publicly owned open space
- Street rights of way

C-A-132

Existing Planned Projects

- Identify Planned Project Location
- Establish Planned Project Type

- Note Planned Project in Parcel/Non-Parcel Dataset

C-A-133

Stakeholder Identified Projects

- Identify Potential Project Location
- Establish Planned Project Type

- Note Potential Stakeholder Identified Project in Parcel/Non-Parcel Dataset

C-A-134

Potential Projects Identified via GIS Analyses

- Geospatial datasets requested & received from key stakeholders
- Publicly owned parcels extracted by ownership and tax status
- Publicly owned non-parcel areas (e.g.; rights of way) extracted
- General parcel characterization including area, slope, infiltration rate (K_{sat}), proximity to stormdrain infrastructure, and mapped land use
- Physical constraint characterization including mapped landslides, shallow groundwater, CDFW threatened/critical habitat, and hazardous waste sites

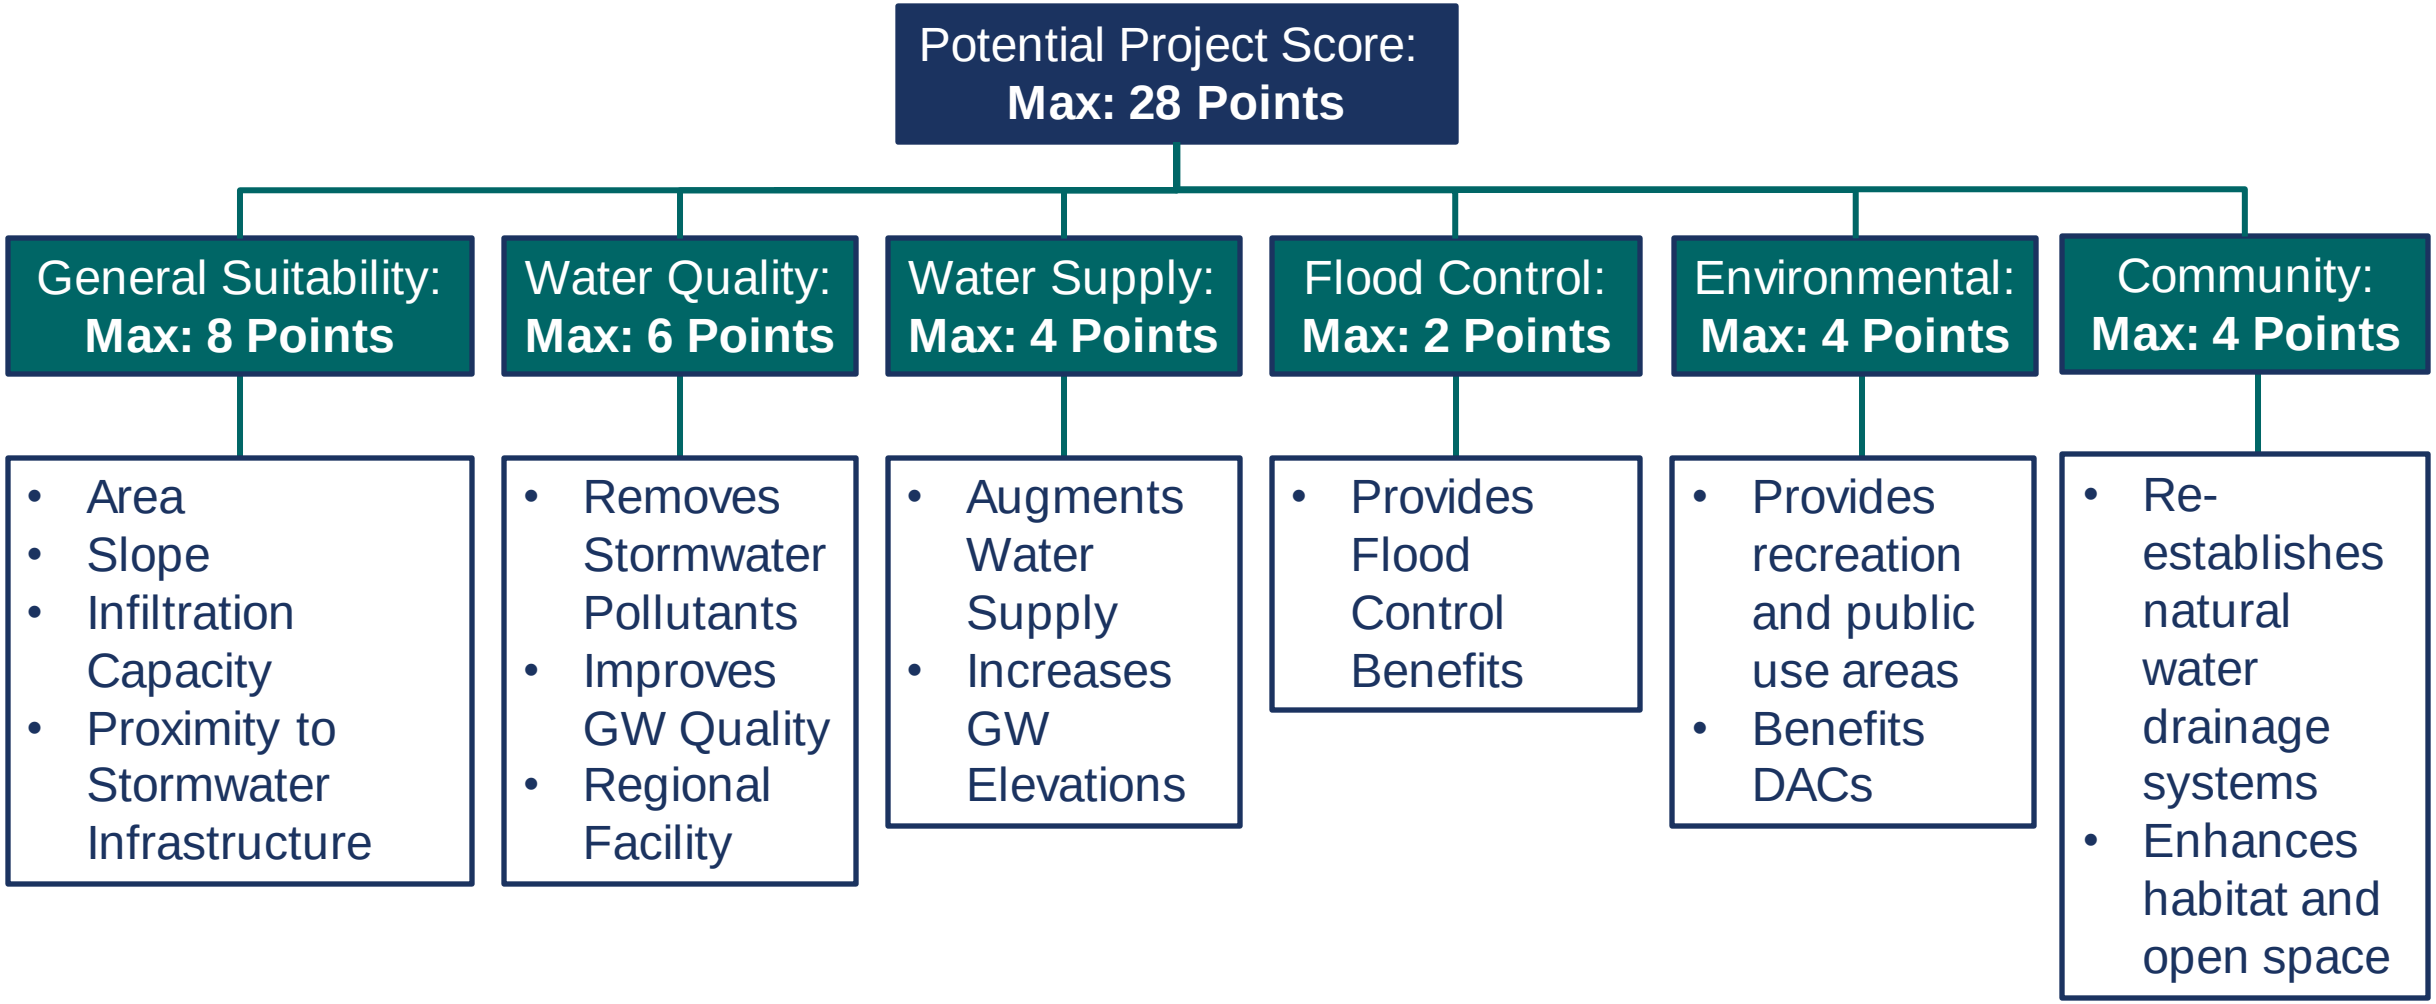
C-A-135

Feedback from Group

- Identification of Projects
  - a. Confirm that your agency DOES NOT have any planned or potential projects; OR
  - b. Submit planned / potential projects using the template provided – see attached email

- Are there any other resources or planning documents that identify projects that would affect urban hydrology or the way precipitation and subsequent runoff flow through the landscape?

Assigning Points in the Quantitative Metric-based Methodology



Do you agree with the point assignment for each category?

Benefit Scores - Weight

Benefit Category	Number of Criteria	Option 1 – Round Number Weighted Criteria	Option 2 - Equal Weight for each Category*	Option 3 – Specific Weighted Criteria
General	4	20%	17%	30%
Water Quality	3	20%	17%	21%
Water Supply	2	20%	17%	14%
Flood Control	1	10%	17%	7%
Environmental	2	20%	17%	14%
Community	2	10%	17%	14%

*17% represented for simplicity though calculation uses 1 ÷ 6 = 0.1667

How do you want to weight each benefit category?

C-A-138

Example Point Summary: General Suitability

Benefit Addressed	Project Element	Points*		
		0	1	2
General Suitability	Parcel Area (for Regional and Parcel-Based projects only)	< 1 acre	1 - < 4 acres	> 4 acres
General Suitability	Location Slope	7-10%	3-7%	0-3%
General Suitability	Infiltration Feasibility	No/Partial	Infiltration Only	GW Recharge
General Suitability	Proximity to existing infrastructure	Greater than 500 feet from a storm drain	--	Less than 500 feet from storm drain

*Maximum of 8 points, 4 elements x up to 2 points/element)

C-A-139

Example Point Summary: Water Quality

Benefit Addressed	Project Element	Points*		
		0	1	2
Water Quality	Regional facility	--	Yes	--
Water Quality	Removes urban pollutant loads from stormwater	Outside urbanized area	--	Inside urbanized area
Water Quality	Improves groundwater quality in areas with historical exceedances of constituents of concern	No expected benefit, project located in areas with water quality concerns	No expected benefit, project is not located in close proximity of areas with water quality concerns	Directly benefits areas of GW quality concern

*Maximum of 6 points, 3 elements x up to 2 points/element)

Example Point Summary: Water Supply & Flood Control

Benefit Addressed	Project Element	Points*		
		0	1	2
Water Supply	Augments water supply	--	Infiltrating green infrastructure or infiltrating flood control project over potential water supply aquifer	Harvest/use or other water augmentation project
Water Supply	Project is in critical areas with GW level depression or for shallow domestic wells	--	Overall enhancement of water levels in the basin	Overall enhancement of groundwater levels in a local area
Flood Control	Provides flood control benefits	Does not provide flood control benefits	Provides flood control benefits by reducing runoff and increasing infiltration and recharge	Provides flood control benefits in high-risk flood zones

*Maximum of 6 points, 3 elements x up to 2 points/element)

C-A-141

Example Point Summary: Environmental & Community

Benefit Addressed	Project Element	Points*		
		0	1	2
Environmental	Re-establishes natural water drainage systems	--	Fully and partially infiltrating green infrastructure project	Stream restoration or hydromodification control
Environmental	Develops, restores, or enhances habitat and open space	--	Green infrastructure project	Habitat restoration project
Community	Provides enhanced or created recreational and public use areas with potential opportunities for community involvement and education	--	Green infrastructure project	Public use area or public education project component
Community	Provides community benefits in Disadvantaged Communities (DACs)	--	--	Project is in DAC/SDAC areas

*Maximum of 8 points, 4 elements x up to 2 points/element)

C-A-142

Theoretical Example A

Potential Project	Rank	Weighted Score	General Suitability					Water Quality				Water Supply		
			Size	Slope	Infiltration	Proximity to Existing Infrastruct-ure	Total Benefit (Gen. Suitability)	Regional Facility	Removes Pollutant Loads	Groundwa-ter Quality	Total Benefit (Water Quality)	Augments Water Supply	Groundwat-er Critical Area	Total Benefit (Water Supply)
OP_A	-	3.17	2	2	2	2	8	1	2	1	4	1	1	2

Potential Project	Flood Control	Environmental			Community			Total Score
	Total Benefit (Flood Control)	Natural Water Drainage Systems	Habitat and Open Space Enhancements	Total Benefit (Environmen-tal)	Recreation	Disadvantag-ed Community	Total Benefit (Community)	
OP_A	2	1	1	2	1	0	1	19

Example Calculation*:

General Suitability + Water Quality + Water Supply + Flood Control + Environmental + Community = Total

(8 x 0.17) + (4 x 0.17) + (2 x 0.17) + (2 x 0.17) + (2 x 0.17) + (1 x 0.17) = 3.17

*17% represented for simplicity though calculation uses 1 ÷ 6 = 0.1667

C-A-143

Theoretical Examples A & B

Potential Project	Rank	Weighted Score	General Suitability					Water Quality				Water Supply		
			Size	Slope	Infiltration	Proximity to Existing Infrastruct-ure	Total Benefit (Gen. Suitability)	Regional Facility	Removes Pollutant Loads	Groundwa-er Quality	Total Benefit (Water Quality)	Augments Water Supply	Groundwat-er Critical Area	Total Benefit (Water Supply)
OP_A	2	3.17	2	2	2	2	8	1	2	1	4	1	1	2
OP_B	1	3.50	1	1	1	1	4	1	2	1	4	2	1	3

Re-cap Feedback from Group

- Any suggested comments, questions, or feedback about the:
  - Proposed potential SWRP project characterization approach?
  - Proposed potential SWRP project point allocation approach?
  - Proposed equal weighting of benefit categories (~17% for each)?

QUESTIONS?

TASK 4: PRIORITY PROJECTS

Purpose: Prioritize planned projects based on potential to achieve multiple benefits and be implemented and maintained.

Project Identification

Project Request (Public and Private Parcels)

PROJECT REQUEST FOR THE SAN JOAQUIN COUNTY REGION STORMWATER RESOURCE PLAN

The San Joaquin County municipal stormwater agencies (including the County of San Joaquin and the Cities of Stockton, Tracy, Lodi, and Manteca; also "participating agencies") have developed a Stormwater Resource Plan for the Region (San Joaquin County Region SWRP). The SWRP uses a watershed-based planning approach to evaluate existing and potential multi-benefit project opportunities that address water quality, groundwater, and stormwater management. Stormwater and dry weather runoff capture projects included in the San Joaquin County Region SWRP will be eligible to apply for available State funding sources.

Existing or potential multi-benefit project opportunities must have a stormwater management component and provide two or more benefits from the following categories:

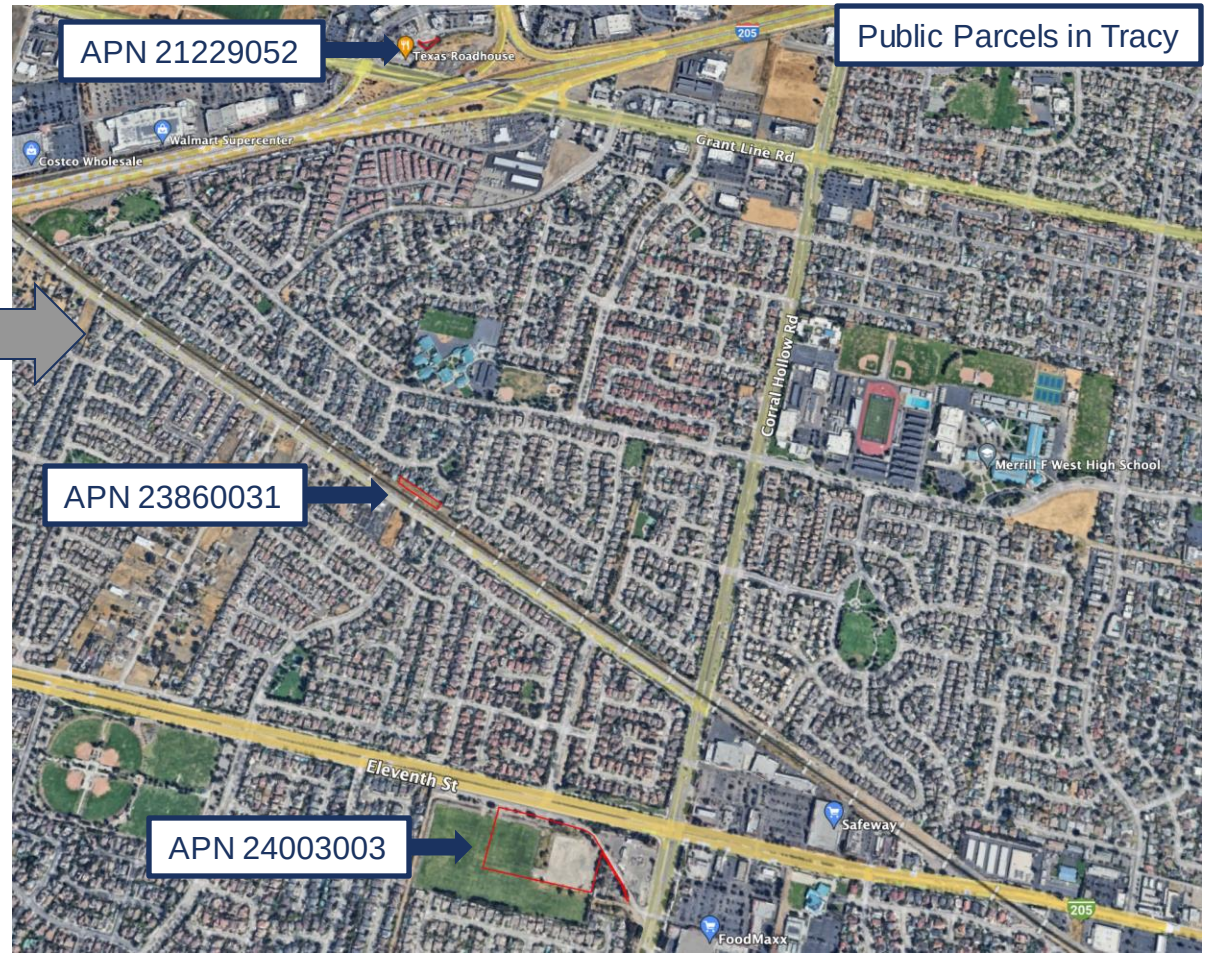
- Water quality (e.g., increased filtration and/or treatment of runoff, nonpoint source pollution control, reestablished natural water drainage and treatment);
- Water supply (e.g., water supply reliability, water conservation, conjunctive use);
- Flood management (e.g., decreased flood risk by reducing runoff rate and/or volume, reduced sanitary sewer overflows);
- Environmental (e.g., wetland enhancement/creation, riparian enhancement, instream flow improvement, increased urban green space); and/or
- Community (e.g., enhanced and/or created recreational and public use areas, community involvement, employment opportunities provided).

Detailed descriptions of the benefit categories can be found in the SWRP Guidelines and in **Section 5** of the SWRP.

Multi-benefit stormwater and dry weather runoff capture projects submitted for inclusion in the SWRP should provide two or more benefits including, but not limited to:

- Creates and restores wetlands
- Riverside [riparian] habitats
- Instream flows
- Increase in park and recreation lands
- Urban green space
- Augments recreation opportunities for communities
- Increases tree canopy
- Reduces heat island effect
- Improves air quality
- Maximizes water quality
- Maximizes water supply
- Maximizes flood management
- Maximizes environmental benefits
- Maximizes other community benefits

GIS Analysis (Public Parcels Only)



Project Request – Participating Agencies and Stakeholders

PROJECT REQUEST FOR THE SAN JOAQUIN COUNTY REGION STORMWATER RESOURCE PLAN

The San Joaquin County municipal stormwater agencies (including the County of San Joaquin and the Cities of Stockton, Tracy, Lodi, and Manteca; also "participating agencies") have developed a Stormwater Resource Plan for the Region (San Joaquin County Region SWRP). The SWRP uses a watershed-based planning approach to evaluate existing and potential multi-benefit project opportunities that address water quality, groundwater, and stormwater management. Stormwater and dry weather runoff capture projects included in the San Joaquin County Region SWRP will be eligible to apply for available State funding sources.

Existing or potential multi-benefit project opportunities must have a stormwater management component and provide two or more benefits from the following categories:

- Water quality (e.g., increased filtration and/or treatment of runoff, nonpoint source pollution control, reestablished natural water drainage and treatment);
- Water supply (e.g., water supply reliability, water conservation, conjunctive use);
- Flood management (e.g., decreased flood risk by reducing runoff rate and/or volume, reduced sanitary sewer overflows);
- Environmental (e.g., wetland enhancement/creation, riparian enhancement, instream flow improvement, increased urban green space); and/or
- Community (e.g., enhanced and/or created recreational and public use areas, community involvement, employment opportunities provided).

Detailed descriptions of the benefit categories can be found in the SWRP Guidelines and in **Section 5** of the SWRP.

Multi-benefit stormwater and dry weather runoff capture projects submitted for inclusion in the SWRP should provide two or more benefits including, but not limited to:

- Creates and restores wetlands
- Riverside [riparian] habitats
- Instream flows
- Increase in park and recreation lands
- Urban green space
- Augments recreation opportunities for communities
- Increases tree canopy
- Reduces heat island effect
- Improves air quality
- Maximizes water quality
- Maximizes water supply
- Maximizes flood management
- Maximizes environmental benefits
- Maximizes other community benefits

1) Agency Request
   Oct 12 – present – **No projects submitted**
   Need to have end date

2) Stakeholder Review/Request – **Feb/Mar**

Blue categories represent REQUIRED information
Yellow categories are to be completed if data is available

Required/Optional	Field Name	Field Instructions	Dropdown Options
	Project Name	Provide a brief project name	
	Project Description	Provide a Project description narrative detailing why this project qualifies as a multi-benefit project under the requirements of the SWRP guidelines. Additional information on SWRP Guidelines can be found at the following link: https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swgp/docs/prop1/swrp_finalguidelines_dec2015.pdf	
	Project Jurisdiction	Indicate the city, town, or community the project is located in.	
	Project Proponents	Identify the project proponents/key leads of the project implementation.	
	Project Type	Pick the value from the list of dropdown options that most clearly aligns with the broad category of your project. If you have more than one project, please use a separate line item for each project type.	(GI) Regional (GI) Right-of-Way (GI) Single Parcel Flood Control Groundwater Programmatic Watershed
	Location Description	Describe Project location with a narrative. This can be any additional information that would help identify the site or boundary of the effort, and is meant as a supplement to the Project Description field.	
	Project Provided as shapefile (Preferred if GI or Flood Control)	If possible, provide the accompanying shapefile indicating where the project will be and what the drainage area will be. Indicate if this information was included with the submission of this spreadsheet.	True/False

MEETING WRAP UP / ACTION ITEMS

Next Meeting Date: February 1

Action Items

Project Team

- Task 7 – Send Announcement Email to Stakeholders – Week of Dec. 18
- Task 7 – Finalize and Send Flyers to Agencies for Distribution– Week of Dec. 18
- Task 7 – Update Website with Next Phase of SWRP (Opportunity for Comment on Draft Methodology)– January
- Task 7 – Revise Emails to Stakeholders Announcing Methodology – January
- Task 3 – Send out email re feedback on Quantitative Methodology – Jan
- Task 4 – Initiate project benefit evaluation – Jan/Feb

San Joaquin County Group Agencies

- SJC – set up website for public outreach - ASAP Dec
- Task 7 -- Post Outreach Flyers in City Halls & Public Areas – December-January
- Task 7 – Send any additional information (emails) re stakeholders – no later than end Dec
- Task 3 – Identify projects and submit information to project Team – no later than mid-Jan

THANK YOU!

QUESTIONS?

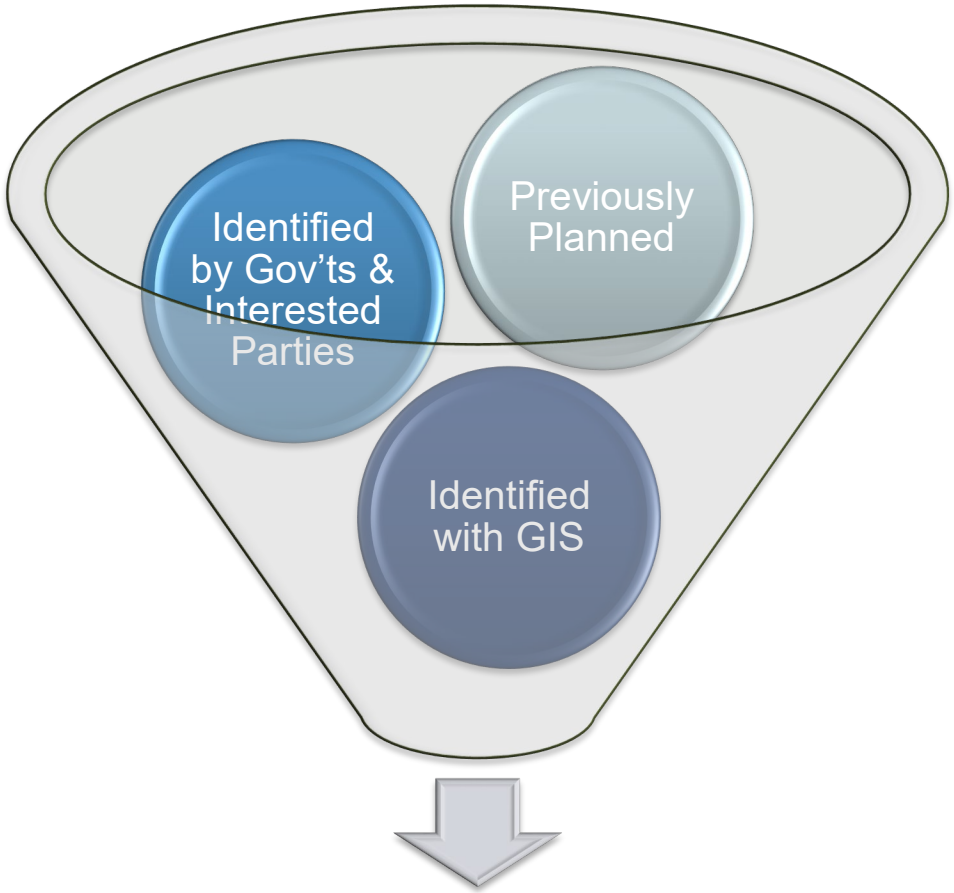
TASK 3: DEVELOP CRITERIA AND QUANTITATIVE METRIC BASED METHODOLOGY FOR IDENTIFYING AND PRIORITIZING PROJECT LOCATIONS

Goals for today:

1) Review the Feedback Received
2) Finalize the Methodology

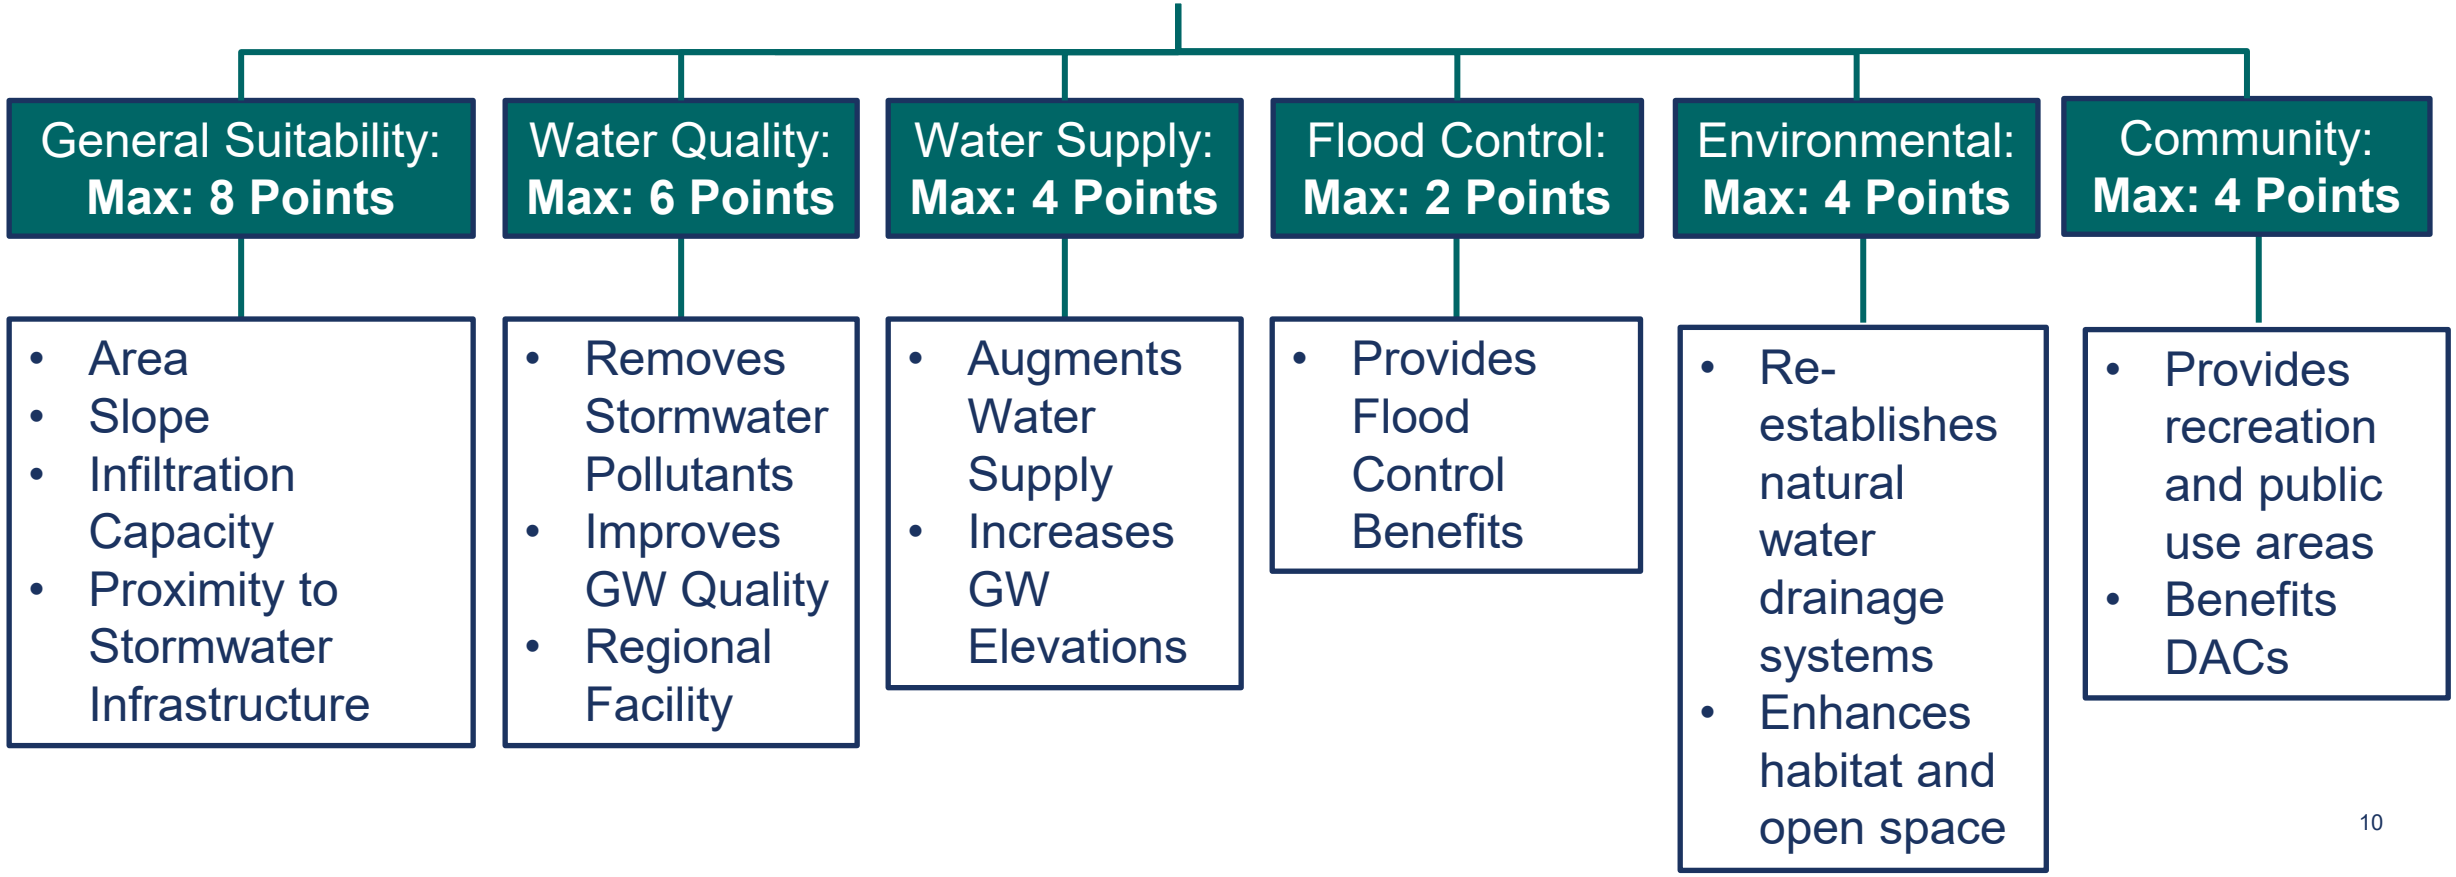
Purpose: Develop and apply standardized approach to quantify benefits and ”prioritize” potential projects

Components of SWRP Potential Project List



C-A-166

Assigning Points in the Quantitative Metric-based Methodology



Benefit Scores - Weight

Benefit Category	Number of Criteria	Option 1 - Equal Weight for Each Criteria	Option 2 - Equal Weight for each Category*	Option 3 - Example - Custom
General	4	30%	17%	20%
Water Quality	3	21%	17%	20%
Water Supply	2	14%	17%	20%
Flood Control	1	7%	17%	10%
Environmental	2	14%	17%	20%
Community	2	14%	17%	10%

Example Point Summary: General Suitability

Benefit Addressed	Project Element	Points*		
		0	1	2
General Suitability	Parcel Area (for Regional and Parcel-Based projects only)	< 1 acre	1 - < 4 acres	> 4 acres
General Suitability	Location Slope	7-10%	3-7%	0-3%
General Suitability	Infiltration Feasibility	No/Partial	Infiltration Only	GW Recharge
General Suitability	Proximity to existing infrastructure	Greater than 500 feet from a storm drain	--	Less than 500 feet from storm drain

C-A-169

Example Point Summary: Water Quality

Benefit Addressed	Project Element	Points*		
		0	1	2
Water Quality	Regional facility	--	Yes	--
Water Quality	Removes urban pollutant loads from stormwater	Outside urbanized area	--	Inside urbanized area
Water Quality	Improves groundwater quality in areas with historical exceedances of constituents of concern	No expected benefit, project located in areas with water quality concerns	No expected benefit, project is not located in close proximity of areas with water quality concerns	Directly benefits areas of GW quality concern

Example Point Summary: Water Supply & Flood Control

Benefit Addressed	Project Element	Points*		
		0	1	2
Water Supply	Augments water supply	--	Infiltrating green infrastructure or infiltrating flood control project over potential water supply aquifer	Harvest/use or other water augmentation project
Water Supply	Project is in critical areas with GW level depression or for shallow domestic wells	--	Overall enhancement of water levels in the basin	Overall enhancement of groundwater levels in a local area
Flood Control	Provides flood control benefits	Does not provide flood control benefits	Provides flood control benefits by reducing runoff and increasing infiltration and recharge	Provides flood control benefits in high-risk flood zones

C-A-171

Example Point Summary: Environmental & Community

Benefit Addressed	Project Element	Points*		
		0	1	2
Environmental	Re-establishes natural water drainage systems	--	Fully and partially infiltrating green infrastructure project	Stream restoration or hydromodification control
Environmental	Develops, restores, or enhances habitat and open space	--	Green infrastructure project	Habitat restoration project
Community	Provides enhanced or created recreational and public use areas with potential opportunities for community involvement and education	--	Green infrastructure project	Public use area or public education project component
Community	Provides community benefits in Disadvantaged Communities (DACs)	--	--	Project is in DAC/SDAC areas

C-A-172

Theoretical Example A

Potential Project	Rank	Weighted Score	General Suitability					Water Quality				Water Supply		
			Size	Slope	Infiltration	Proximity to Existing Infrastruct-ure	Total Benefit (Gen. Suitability)	Regional Facility	Removes Pollutant Loads	Groundwa-ter Quality	Total Benefit (Water Quality)	Augments Water Supply	Groundwat-er Critical Area	Total Benefit (Water Supply)
OP_A	-	3.83	2	2	2	2	8	1	2	1	4	1	1	2

Potential Project	Flood Control	Environmental			Community			Total Score
	Total Benefit (Flood Control)	Natural Water Drainage Systems	Habitat and Open Space Enhancements	Total Benefit (Environmen-tal)	Recreation	Disadvantag-ed Community	Total Benefit (Community)	
OP_A	2	1	1	2	1	0	1	19

*17% represented for simplicity though calculation uses 1 ÷ 6 = 0.1667

Feedback Received

- Participating Agency Feedback Dec 14 – Jan 15
  - SJC: Roy Valdez
  - Suggest a higher max score for Flood Control.
  - Option 1: Re-allocated 2 points from “general suitability” to “flood control”
  - Option 2: Custom weighting to emphasize flood control

- Interested Party Feedback Jan 16 – Jan 29
  - No feedback received

Group Comments & Discussion

General Suitability:
Max: ~~8~~ 6 Points

- Area
- Slope
- Infiltration Capacity
- Proximity to Stormwater Infrastructure

Flood Control:
Max: ~~2~~ 4 Points

- Provides Flood Control Benefits

Benefit Category	Number of Criteria	Option 3 - Example - Custom
General	4	20%
Water Quality	3	20%
Water Supply	2	20%
Flood Control	1	~~10%~~ 20%
Environmental	2	~~20%~~ 10%
Community	2	10%

QUESTIONS?

TASK 4/5: CONDUCT MULTIPLE BENEFIT EVALUATION AND PRIORITIZATION OF POTENTIAL PROJECT LOCATIONS

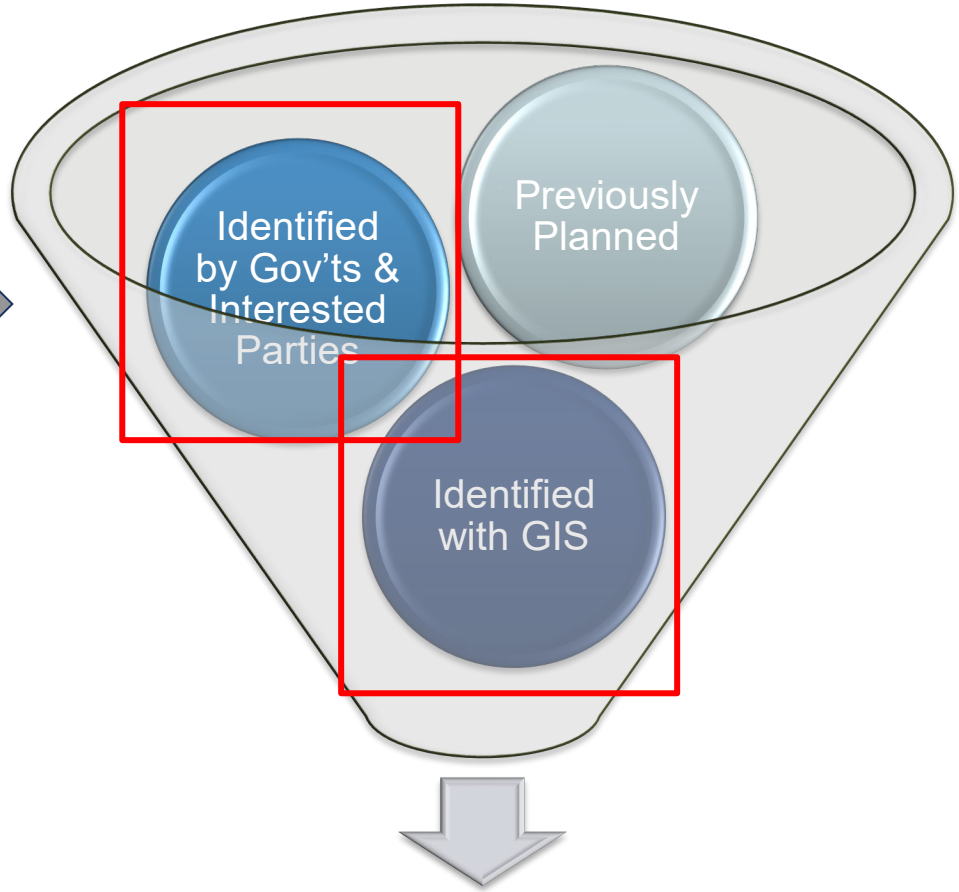
Goals for today:

1) Review Current Status
2) Determine Next Steps Based on Interested Parties Feedback (Task 7)

Purpose: Quantify multiple benefits and ”prioritize” potential parcel and road projects using methodology developed in Task 3.

Components of SWRP Potential Project List

- Stormwater basin at South Dutra Park
- Regional stormwater pump basin (Woodward Ave to Williamson St to Apicella Court to San Joaquin River)



C-A-177

Potential Projects Identified via GIS Analyses

- Geospatial datasets requested & received from key stakeholders
- Publicly owned parcels extracted by ownership and tax status
- Publicly owned non-parcel areas (e.g.; rights of way) extracted
- General parcel characterization including area, slope, infiltration rate (K_{sat}), proximity to stormdrain infrastructure, and mapped land use
- Physical constraint characterization including mapped landslides, shallow groundwater, CDFW threatened/critical habitat, and hazardous waste sites

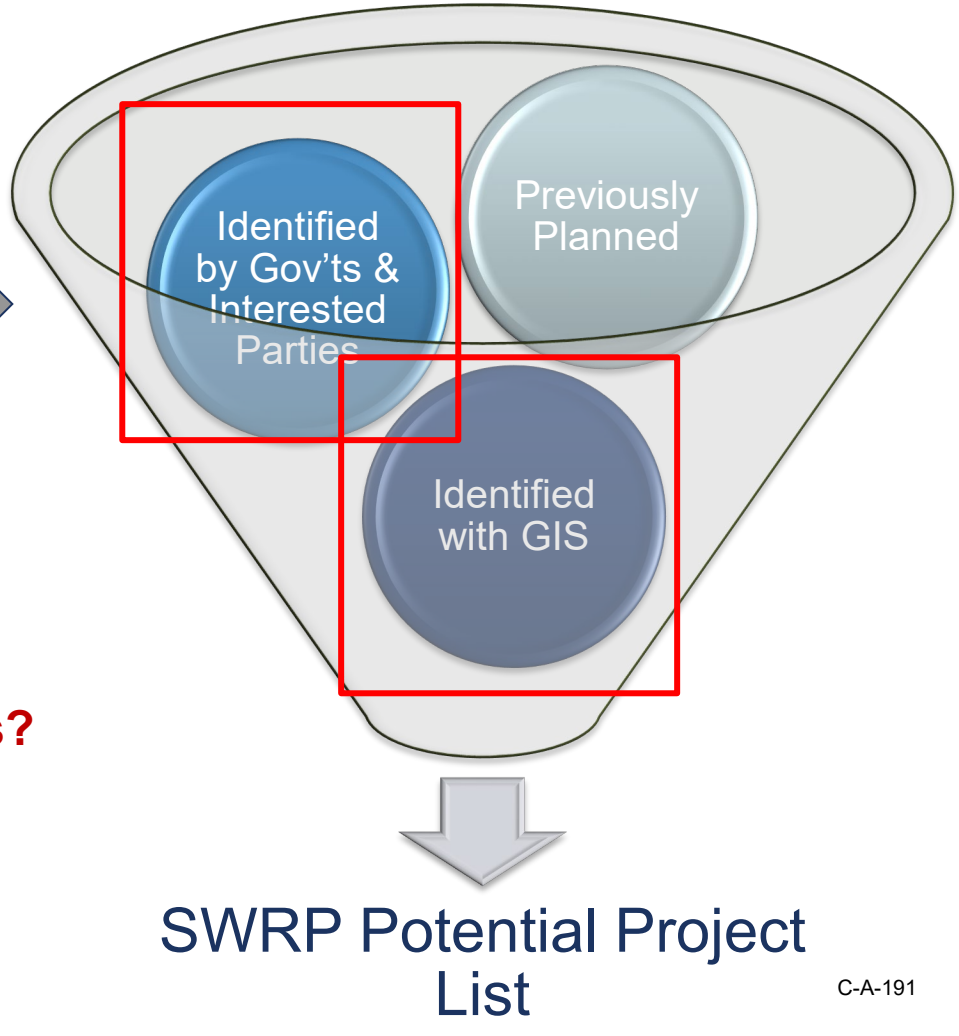
SWRP Potential Project List – Next Steps

- Stormwater basin at South Dutra Park
- Regional stormwater pump basin (Woodward Ave to Williamson St to Apicella Court to San Joaquin River)



Do we extend timeline for participating agencies?

Do we open call for projects with Interested Parties? (Task 7 discussion)

TASK 7: OUTREACH UPDATES

Goals for today:

1) Review Current Status
2) Determine Next Steps

Purpose: Provide community participation in SWRP development and implementation.

Interested Parties Update

1) Website developed, published and updated
2) Flyers developed, revised and posted *(and more soon to be posted pending revisions)*
3) Emails sent to available contacts:
   - Announcement Email (to various interested parties)
   - Draft Methodology Informational Email (to various interested parties)
4) Meetings/ Presentations with/to interested parties:
   - Lower Mokelumne River Watershed Group
   - San Joaquin Council of Governments
   - DWR Tribal Liaison
   - Eastern San Joaquin IRWM representative
5) Letter drafted to Tribal governments and approved by Tribal Liaison (pending Tribal contact within PA's)

C-A-193

Revisions to approach upon meeting with the DWR Tribal Liaison

1) Revision of language
2) Identified communication method to foster respect
3) Identified need for long-term agency contact(s)
4) Framework for SWRP document revised to consider Tribal contact sensitivity (this should have minimal impact on the SWRP document itself, aside from slight structural change to the outreach section)

SWRP Outreach Framework

Collaborations and Interested Parties		Outreach Method				
Category	Government or Group	Government-to-Government Consultation	Meetings[a]	Targeted Emails	General Flyers	Regional Webpage
Governments	Tribal	✘	✘	✘	✘	✘
	Regional (including participating agencies funding SWRP)		✘	✘	✘	✘
Non-Tribal Partners: Group A	IRWMPs		✘	✘	✘	✘
	Watershed/ Advisory Groups		✘	✘	✘	✘
Non-Tribal Partners: Group B	Non-Municipal Public Landowners			✘	✘	✘
	Other Organizations			✘	✘	✘
	General Public				✘	✘

C-A-195

Next Steps

1) Flyer revisions for City of Stockton
2) Continued Meetings/ Presentations to interested parties:
   - Meetings with the Eastern San Joaquin IRWM representative(s)
3) Send letter drafted to Tribal governments (determine key point of contact)

MEETING WRAP UP / ACTION ITEMS

Community & Tribal	Provides enhanced or created recreational and public use areas with potential opportunities for community involvement and education	--	Green infrastructure project	Public use area or public education project component
Community & Tribal	Provides community benefits in Disadvantaged Communities (DACs)	--	--	Project is in DAC/SDAC areas

C-A-216

QUESTIONS?

TASK 4/5: CONDUCT MULTIPLE BENEFIT EVALUATION AND PRIORITIZATION OF POTENTIAL PROJECT LOCATIONS

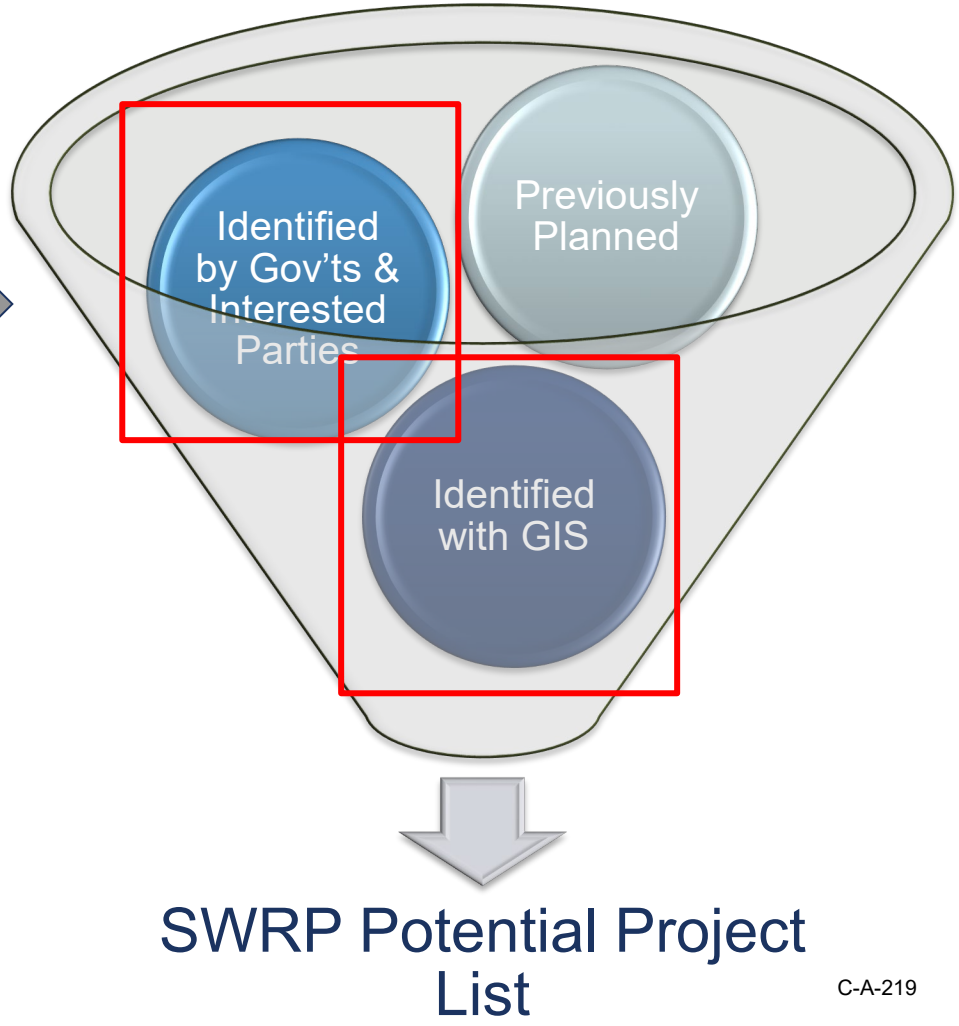
Goals for today:

1) Present draft potential project prioritization & evaluation
2) Discuss next steps for Interested Parties feedback

Purpose: Quantify multiple benefits and ”prioritize” potential parcel and road projects using methodology developed in Task 3.

Components of SWRP Potential Project List

- Stormwater basin at South Dutra Park
- Regional stormwater pump basin (Woodward Ave to Williamson St to Apicella Court to San Joaquin River)



C-A-219

Potential Projects Identified via GIS Analyses

- Geospatial datasets requested & received from key stakeholders
- Publicly owned parcels extracted by ownership and tax status
- Publicly owned non-parcel areas (e.g.; rights of way) extracted
- General parcel characterization including area, slope, infiltration rate (K_{sat}), proximity to stormdrain infrastructure, and mapped land use
- Physical constraint including mapped landslides & shallow groundwater as well as opportunities including historical flood areas

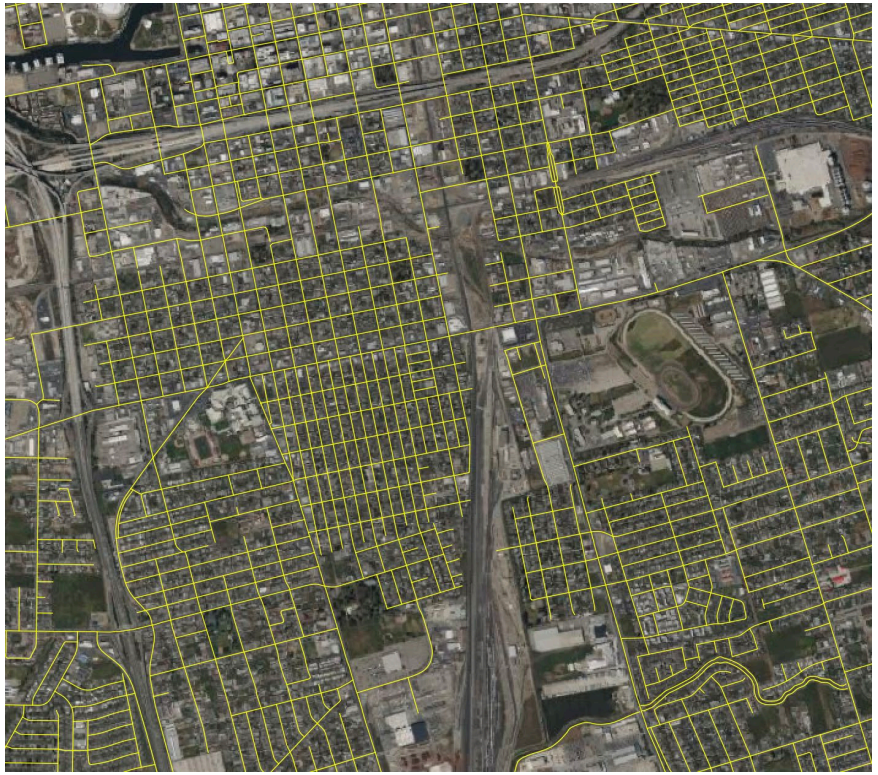
Potential Project Evaluation and Prioritization Summary

3,567 Parcels

37,376 Roads

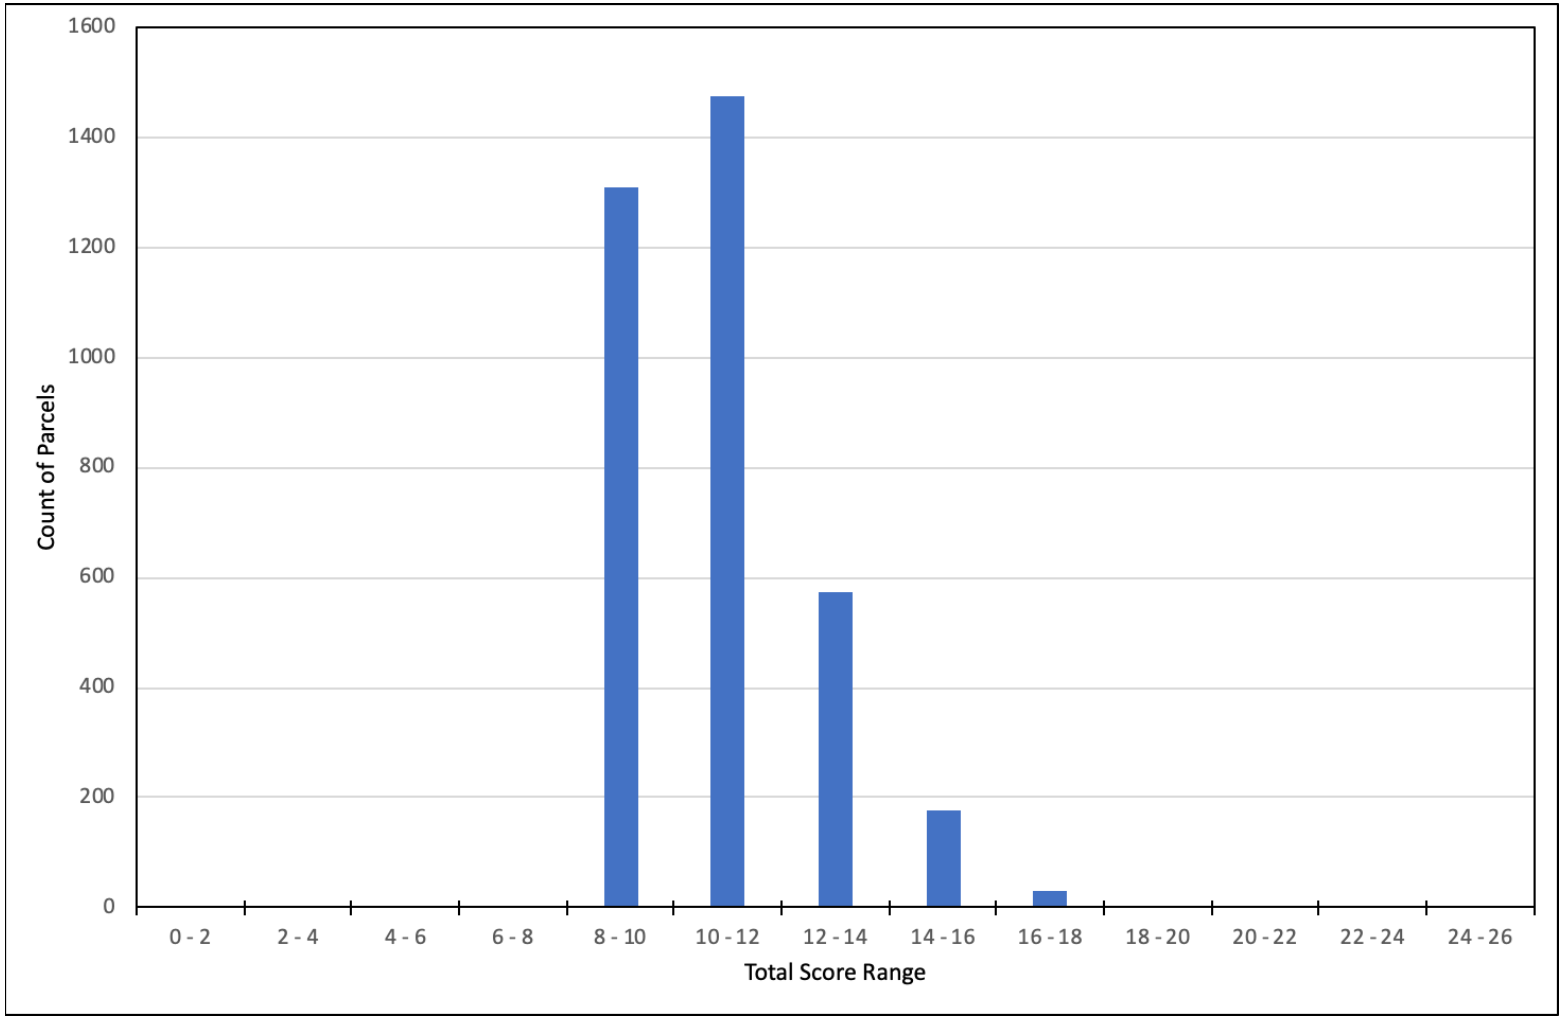


Potential Project Opportunities Summary: Parcels

Rank	Parcel APN	General Suitability	Water Quality	Water Supply	Flood Control	Environ-mental	Community & Tribal	Weighted Score	Total Score
1	1731001	5.25	4	3	4	2	3	3.54	21.25
2	19305010	5.25	4	3	0	2	3	2.88	17.25
3	19305023	5.25	4	3	0	2	3	2.88	17.25
4	19305019	5.25	4	3	0	2	3	2.88	17.25
5	19305024	5.25	4	3	0	2	3	2.88	17.25
6	1733005	2.25	3	3	4	2	3	2.88	17.25
7	19305018	5.25	4	3	0	2	3	2.88	17.25
8	17109008	4.5	4	3	0	2	3	2.75	16.5
9	9711024	4.5	4	3	0	2	3	2.75	16.5
10	17726012	4.5	4	3	0	2	3	2.75	16.5

Potential Project Opportunities Summary: Parcels

- Variability in scoring
  - Parcel size
  - Soil infiltration rates
  - Flood risk
- Limited variability
  - Slope
  - Shallow groundwater
- Scoring shows some parcels score better than others
- Parcels score lower than draft iteration based on revised flood risk

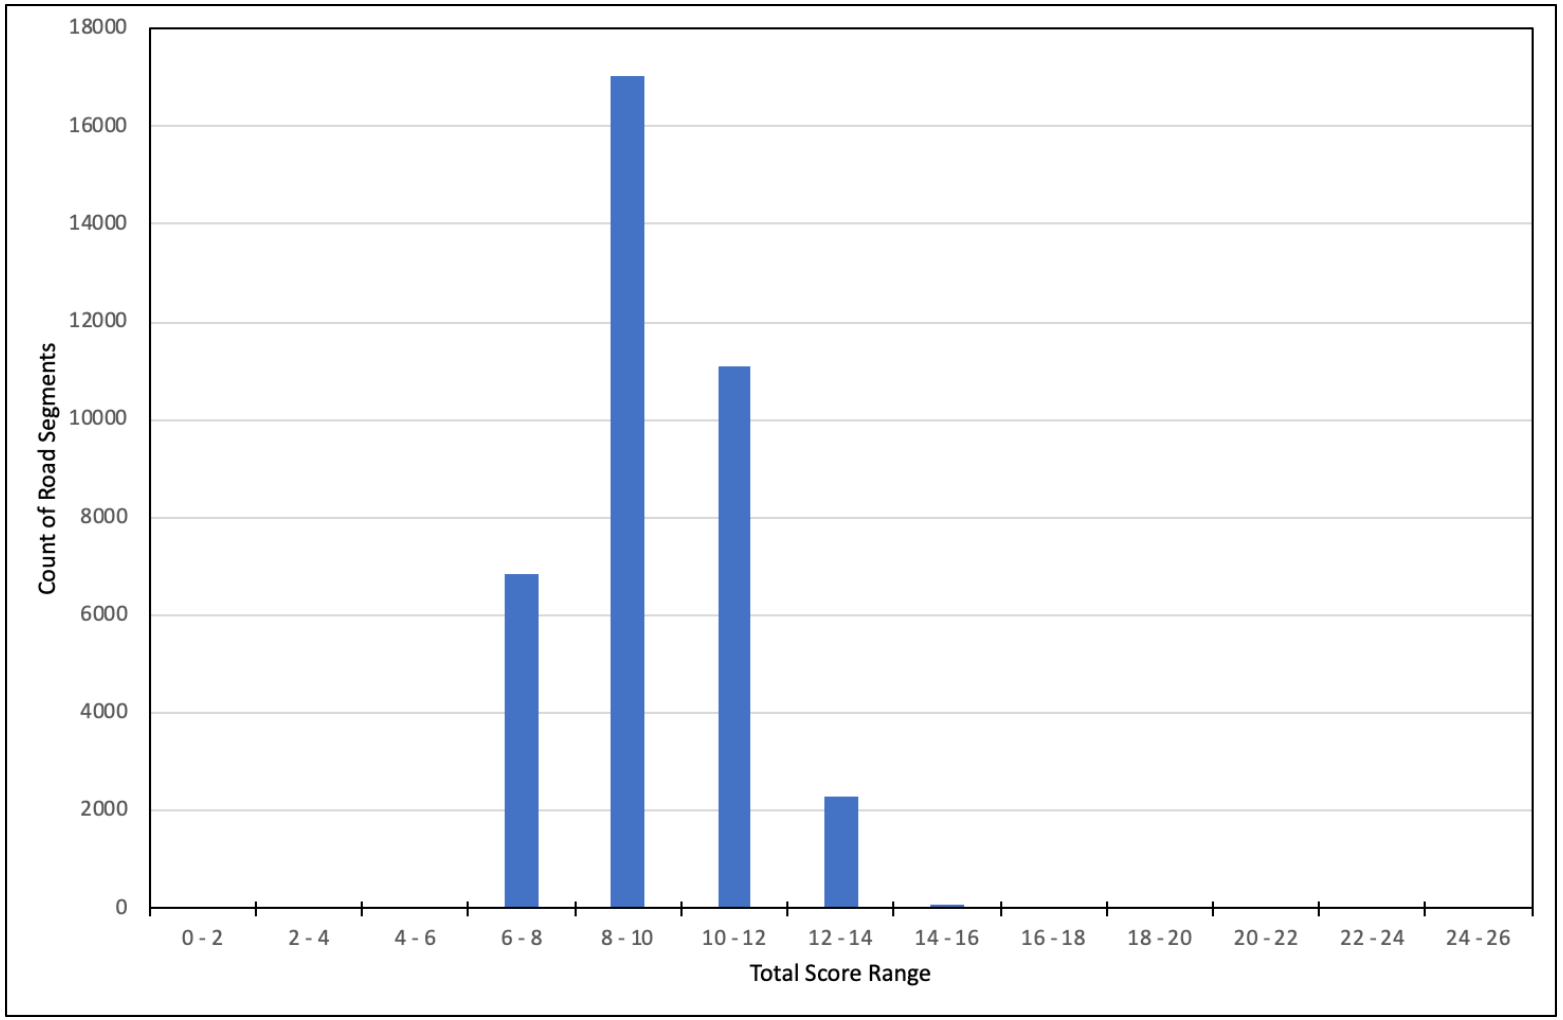


Potential Project Opportunities Summary: Roads

Rank	Road ID	Road Reference Left	General Suitability	Water Quality	Water Supply	Flood Control	Environ-mental	Community & Tribal	Weighted Score	Total Score
1	30050	5251-5419 WOODBRIDGE RD SJC 95220	1.5	3	3	4	2	3	2.75	17
2	23344	4871-5249 WOODBRIDGE RD SJC 95220	1.5	3	3	4	2	3	2.75	17
3	23049	19911-20009 HILDEBRAND AVE SJC 95220	1.5	3	3	4	2	3	2.75	17
4	19274	19501-19879 KENNEFICK RD SJC 95220	1.5	3	3	4	2	3	2.75	17

Potential Project Opportunities Summary: Roads

- Non-federal roads
- Assumed to be distributed/green streets
- Variability in scoring
  - Soil infiltration rates
  - Historical flood area
  - Phase 1 or 2 area
- Limited variability
  - Slope
  - Shallow groundwater
- Lower scores for roads than parcels
  - Available area
  - Not regional



Potential Project Evaluation and Prioritization Summary

- Darker blues represent higher weighted scores
- Scoring reflects desktop GIS analysis for public parcels and roads
- **Not required** to implement higher scoring projects
- State effectively wants alternate opportunities considered
- Potential project evaluation is general and preliminary
- GIS analysis supplemented with additional IP projects
- Additional project evaluation required
  - Conceptual design
  - Benefits estimation/characterization based on attributes
  - CEQA/NEPA compliance
  - Site-specific evaluation (e.g.; soils, survey, etc.)
  - 30% design
  - Detailed design
- Projects must be in SWRP to be eligible for State grant funding

QUESTIONS?

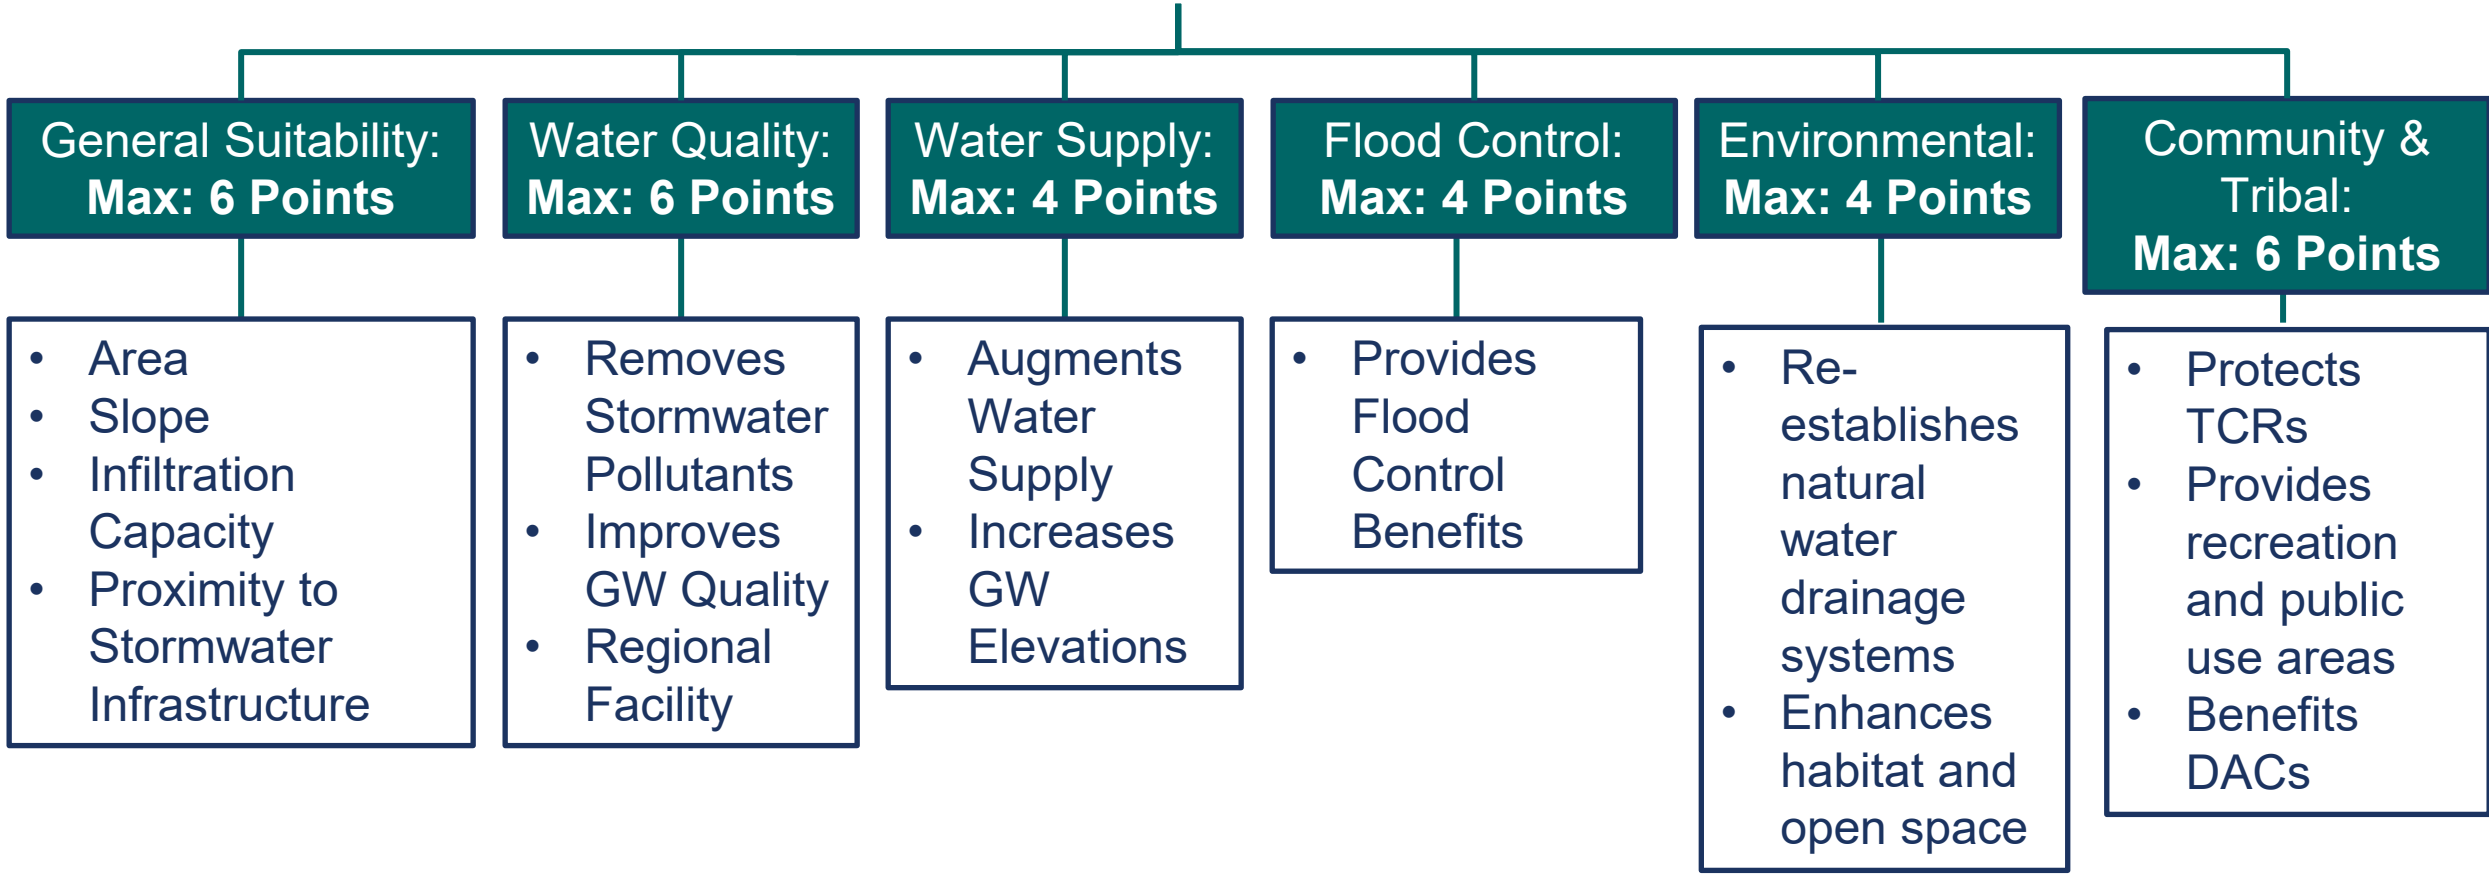
TASK 4/5: CONDUCT MULTIPLE BENEFIT EVALUATION AND PRIORITIZATION OF POTENTIAL PROJECT LOCATIONS

Goals for today:

a) Present summary of projects submitted
b) Discuss finalization of the Task

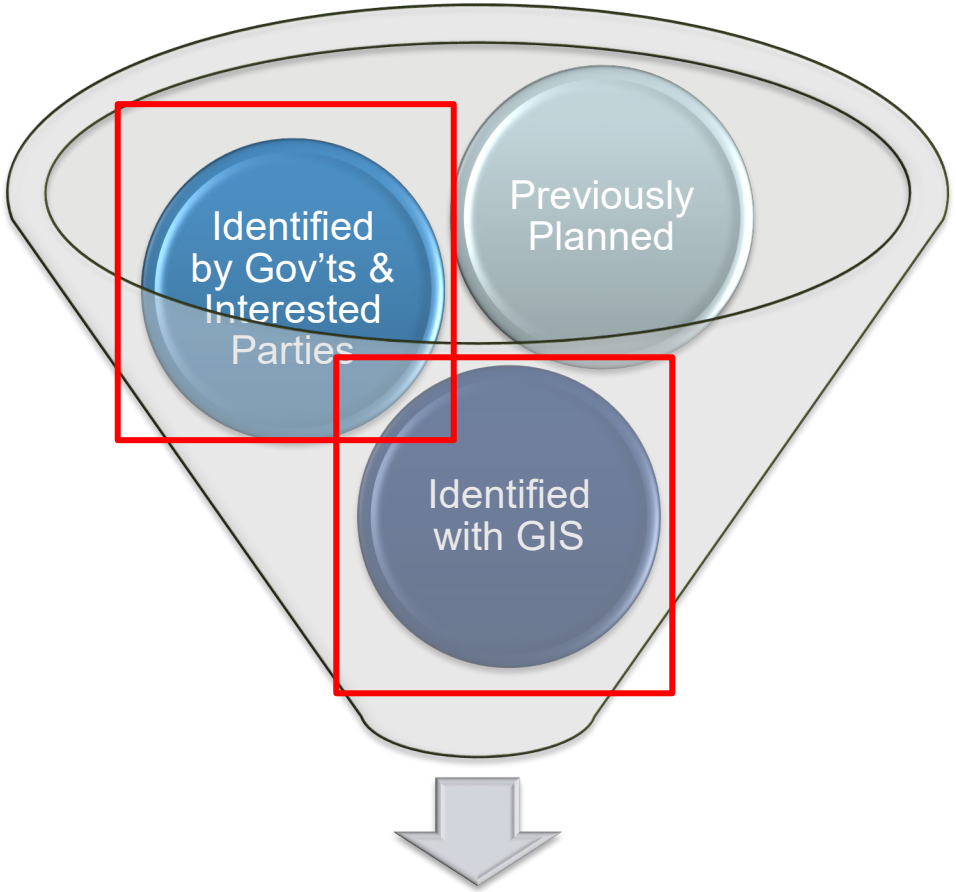
Purpose: Quantify multiple benefits and ”prioritize” potential parcel and road projects using methodology developed in Task 3.

Assigning Points in the Quantitative Metric-based Methodology



C-A-249

Components of SWRP Potential Project List

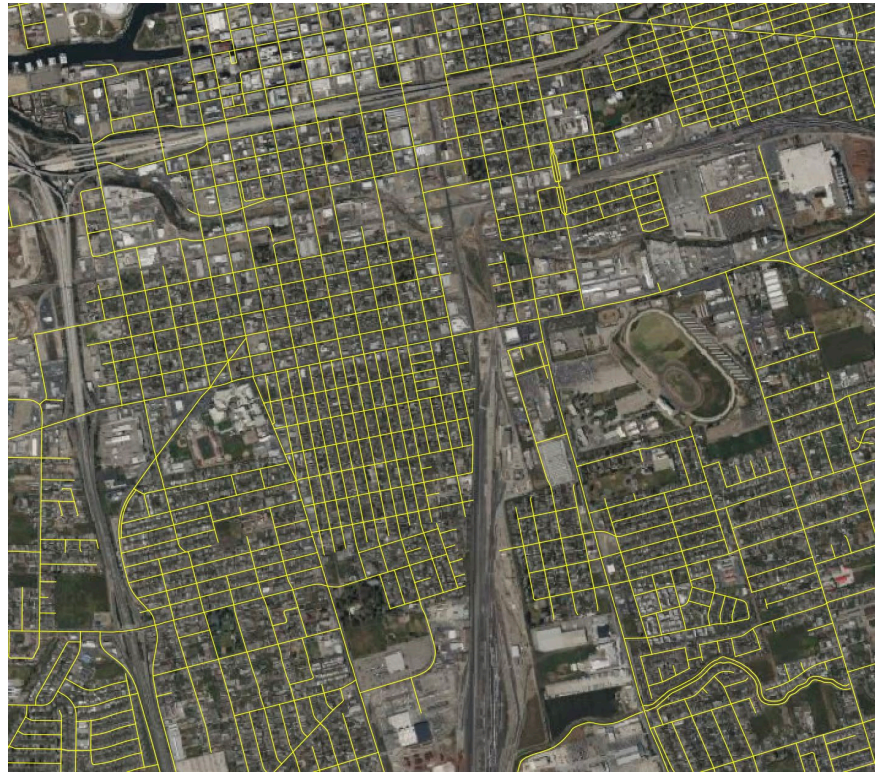


C-A-250

Desktop GIS Potential Project Evaluation and Prioritization

3,567 Parcels

37,376 Roads



C-A-251

Government Submitted Projects (1 of 1)

- **Manteca** - South Dutra Park stormwater basin
  - Incorporate a stormwater basin into 11.4 acre South Dutra park through the incorporation of a diversion from stormwater drain 8.
  - South Dutra Park south of 1850 Sparrowhawk St. in Manteca

- **Manteca** - Regional stormwater pump basin
  - Incorporate a regional stormwater pump basin in southern Manteca including lines, pump station and outfall utilizing rehabbed Oakwood Shores WW treatment plant site.
  - Woodward Ave to Williamson St to Apicella Court to San Joaquin River

- **City of Tracy** - Tracy Nature Park
  - Incorporation of infiltration canals located on the north of the site across from the legacy field complex to capture and infiltrate runoff
  - 86 acre site located just north of I-205 and bounded by Corral Hollow Rd on the west and North Tracy Blvd. to the east

C-A-252

Interested Party Submitted Projects (1 of 3)

- **Stockton East Water District and East Bay MUD** - West Linden Pipeline
  - Provide surface water to 5,674 agricultural land during extreme weather events to recharge via flood-MAR and dry wells.
  - Between Jack Tone, Baker, Duncan, and Eight Mile Road

- **Stockton East Water District** - Clements Pipeline
  - Provide surface water to 570 acres of land for use in lieu of groundwater and allow for flood-MAR during non-irrigation months
  - Calaveras River at the corner of Comstock & Houston Rd

- **Stockton East Water District** - Mosher Pipeline
  - Provide surface water to 179 acres of land for use in lieu of groundwater and allow for flood-MAR during non-irrigation months
  - Mosher Slough at the corner of Messick and N. Clements Rd.

C-A-253

Interested Party Submitted Projects (2 of 3)

- **Stockton East Water District** - Houston Pipeline
  - Provide surface water to 343 agricultural land during extreme weather events to recharge via flood-MAR and dry wells.
  - Calaveras River at the corner of Comstock & Houston Rd.

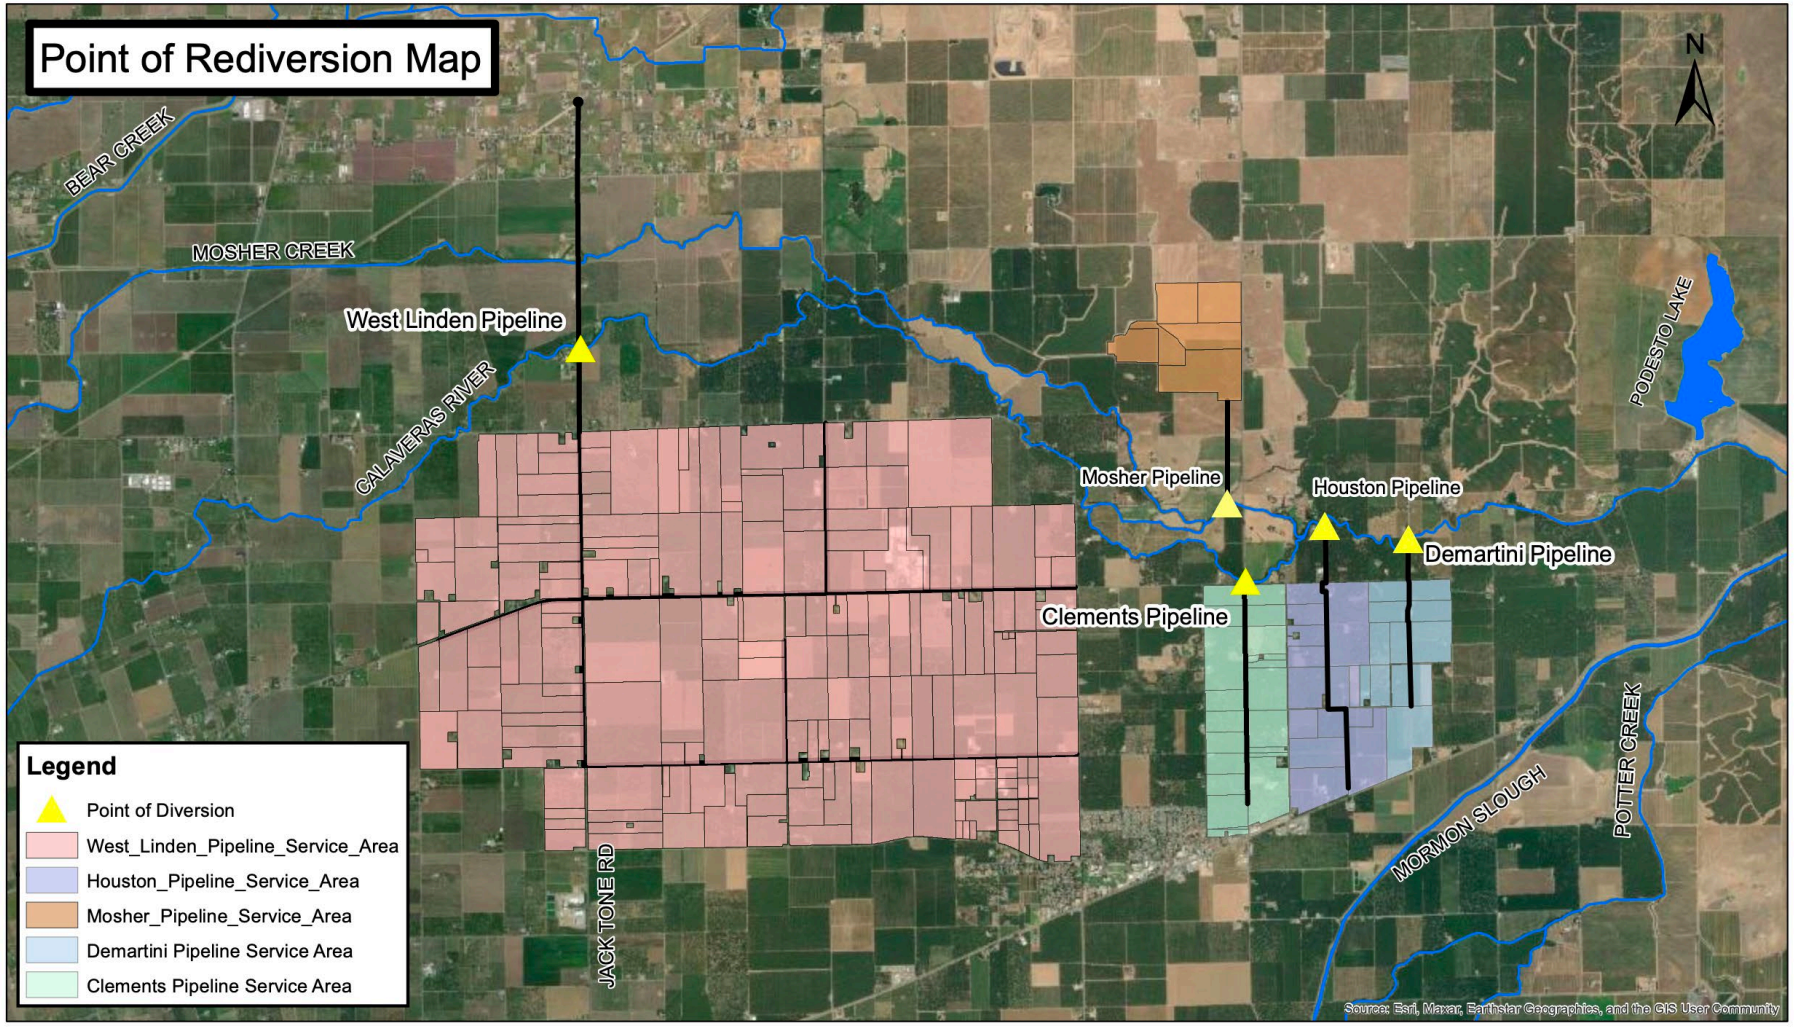
- **Stockton East Water District** - Demartini Pipeline
  - Provide surface water to 367 acres of land for use in lieu of groundwater and allow for flood-MAR during non-irrigation months
  - Calaveras River at the corner of Comstock & Demartini Rd.

- **Stockton East Water District** - Bellota Pipeline Flood-MAR
  - Use some of the ~42 parcel along the Bellota Pipeline for Flood-MAR.
  - Along the existing Bellota Pipeline.

Interested Party Submitted Projects (3 of 3)

- **Stockton East Water District** - Bellota Pipeline Modifications
  - Continued Diversion of raw water from New Hogan Reservoir to aquifer recharge ponds and to treat for drinking water on the District's Water Treatment Plant (WTP) campus in Stockton
  - Between HWY 26 and E. Shelton Rd where they connect with Escalon Bellota Rd.

Stockton East Water District - Projects



C-A-256

Government Submitted Project Scoring

Project Name	Project Proponent	Weighted Score	Total Score
South Dutra Park Stormwater Basin	SSJID	3.54	21.25
Stormwater Pump Station at Oakwood Shores	Oakwood Shores, Manteca, SSJID	2.88	17.25
Tracy Nature Park	City of Tracy	3.25	19.5

Interested Party Submitted Project Scoring

Project Name	Project Proponent	Weighted Score	Total Score
Clements Pipeline	Stockton East Water District	3.67	22
Mosher Pipeline	Stockton East Water District	3.67	22
Houston Pipeline	Stockton East Water District	3.67	22
Demartini Pipeline	Stockton East Water District	3.67	22
Bellota Pipeline Flood-MAR	Stockton East Water District	3.67	22
Bellota Pipeline Modifications Project	Stockton East Water District	3.67	22
West Linden Pipeline	Stockton East Water District	3.50	21

C-A-258

Question for the Group – Which Option Should we Use for the Interested Party Project Submittals?

- Potential projects from Stockton East Water District include privately owned parcels (mostly agricultural lands)
- Which of the following options should be used for the incorporation of the project from Stockton East?
  - Option 1 – Identify project narrative and scoring, but not specify the parcels
  - Option 2 – Identify project narrative and include the parcels separately for scoring (**Recommended**)
  - Option 3 – Identify project with the specific parcels for narrative and scoring

QUESTIONS?

TASK 6: DEVELOPMENT OF STORMWATER RESOURCE PLAN (SWRP) DOCUMENT

Goals for today:

a) Discuss development of and timeline for SWRP

Purpose: Develop Draft and Final Stormwater Resource Plan (SWRP) based on the State Guidelines and completed tasks.

Task 2 – SWRP Outline

San Joaquin County
Stormwater Resource Plan (SWRP) Draft Outline

1. **Introduction**
   - 1.1. Purpose of the Plan
   - 1.2. San Joaquin River Watershed: Approach and Characterization
   - 1.3. Water Quality Issues and Regulatory Requirements
   - 1.4. Organization of the SWRP
2. **Coordination and Collaboration (Guidelines Section VI.B)**
   - 2.1. Entities Involved in Plan Development
   - 2.2. Stakeholder/Public Participation and Outreach Efforts
   - 2.3. Required Decisions that Must be Made by Local, State or Federal Agencies
   - 2.4. Relationship with Existing Planning Documents
     - 2.4.1. Integrated Regional Water Management Plan (IRWMP)
     - 2.4.2. Design Criteria for New and Redevelopment
     - 2.4.3. Other Documents
3. **Watershed Characterization (Guidelines Section VI.A)**
   - 3.1. SWRP Area
   - 3.2. Water Suppliers
   - 3.3. Stormwater and Watershed Management Activities
   - 3.4. Water Conservation Activities
   - 3.5. Watershed Characterizations
4. **Water Quality Concerns and Regulatory Requirements (Guidelines Section V)**
   - 4.1. Pollutant Generating Activities
   - 4.2. Pollutants of Concern
     - 4.2.1. Applicable Permits, Plans and TMDLs
   - 4.3. Water Quality Compliance Strategies and the SWRP
5. **Quantitative Methods (Guidelines Section VI.C) and Identification and Prioritization of Projects (Guidelines Section VI.D)**
   - 5.1. Overview of Approach
   - 5.2. Identification of Project Opportunities
     - 5.2.1. Planned Project Opportunities
     - 5.2.2. Potential Project Opportunities
     - 5.2.3. Data Solicitation and Standardization
   - 5.3. Project Classification
     - 5.3.1. Green Infrastructure

MEETING WRAP UP / ACTION ITEMS

LAST Meeting Date: July 25

Action Items

- **Project Team**
  - Task 6 – Develop Draft SWRP – Ongoing see schedule
  - Develop outreach emails and website language – Week of June 17

- **San Joaquin County Group Agencies**
  - Task 6 - Review/comment on SWRP – June 21
  - Task 6 - Review/comment on SWRP – July 19 - Aug 4

THANK YOU!

ATTACHMENT B

Tribal Government Outreach Materials

1. INTRODUCTION

The formal invitation letter (sent via certified mail) and subsequent emails to Tribal Governments are organized according to the Stages of Engagement table below:

Stages of Engagement	Timeline	Mail #	Meetings
Outreach with regional and Tribal governments and interested parties (we want to hear from you!)	December 2023 - Ongoing	1	Upon request
Review of a Methodology for Ranking Stormwater Projects	January 16 - March 13, 2024	1	Upon request
Opportunity for Your Project Submittal	April 5- April 29, 2024	2	Upon request
Review of the Draft SWRP	June 28- July 19	3	Upon request
SWRP Modification/ Project Implementation (Ongoing)	*To be announced-2024*	4	Upon request

This document provides the contents of the certified letter and all emails (#1-4) sent to Tribal Governments. The Participating Agencies sought guidance from a Tribal Liaison with the Department of Water Resources before beginning outreach to Tribal Governments. While a third-party consultant conducted outreach to Participating Agencies (those funding the development of the SWRP) and to non-Tribal partners, San Joaquin County representatives issued all outreach to Tribal Governments in the hopes of initiating Government-to-Government collaboration and developing partnerships early in the process during SWRP development, prior to SWRP implementation.

This document is broken up into the following sections:

2: Certified Letter to Tribal Governments

The letter was formatted and sent from San Joaquin County by certified mail. The contents of the letter, excluding any formal letterhead or signatures, is provided in Section 2.

3: Emails to Tribal Governments

Emails were sent to Tribal Governments for each stage of SWRP development. The initial outreach announcement and invitation to provide comment on SWRP methodology were included together in Email 1 (and in the invitation letter sent via certified mail). A follow-up email was sent to all Tribal Governments to extend the deadline to provide feedback on the proposed methodology, because the Participating Agencies realized that the initially proposed timeline was too short to enable review and response. Subsequent emails were sent during each phase of SWRP development. The contents of each email are provided in Section 3.

2. CONTENTS OF CERTIFIED LETTER TO TRIBAL GOVERNMENTS

February 21, 2024

[Title] [Full Name]
[Street Address]
[City Town Zip]

SUBJECT: INVITATION TO PARTICIPATE IN SAN JOAQUIN COUNTY REGION STORM WATER RESOURCE PLAN DEVELOPMENT

Dear [Formal Title] [Last Name]:

This letter serves as an invitation to the [Tribe Name] to participate in the development of the San Joaquin County Region Storm Water Resource Plan (SWRP).

The SWRP is a planning document that identifies and prioritizes projects focused on the sustainable management of storm water and dry weather runoff. In order for any storm water or dry weather runoff projects to be eligible to receive future state grant funding, they must be included in the SWRP. There are a few exceptions to this requirement[1]. Once developed, the SWRP will include a list of potential projects that regional, Tribal Governments and non-Tribal partners have identified so that those projects may become eligible to receive future state grant funding. Therefore, the San Joaquin County Department of Public Works (Public Works) is seeking input from Tribal Partners on the development of this document and on the identification of storm water and dry weather capture projects (including green infrastructure projects) that may be of interest or align with Tribal environmental initiatives. The intention of the SWRP is also to be a living document, where the project list developed now can be updated in the future to include new projects identified by Tribal and non-Tribal partners.

Further information on the SWRP can be found on our website or through the QR code at the end of this letter.

The participating agencies funding the development of the SWRP are Public Works and the Cities of Lodi, Manteca, Stockton and Tracy. Projects included in the SWRP (primarily green infrastructure projects) would ideally provide multiple benefits, including improved regional water quality, reduced localized flooding, increased water supply, and community enhancement. Inclusion of a project in the SWRP does not determine whether that project will receive funds, rather it is a requirement for the project to become eligible to apply for future grant funding from the State Water Resources Control Board Storm Water Grant Program.

[1] *"Exceptions where a SWRP is not required are: (1) for projects benefiting a disadvantaged community (DAC) with a population of 20,000 or less that is not a co-permittee for an MS4 permit issued to a municipality with a population of more than 20,000, and (2) for projects that are in an Area of Special Biological Significance (ASBS) and are covered under an approved ASBS Compliance Plan. If an applicant or project is exempt from the SWRP requirement, the project must still be included and implemented in an adopted Integrated Regional Water Management Plan (IRWMP)" (Source: California State Water Resources Control Board, Prop 1 Storm Water Grant Program FAQs Sheet, https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swgp/docs/prop1/prop1_swgp_faq.pdf)*

Currently, there are no active grant program solicitations from the State Water Resources Control Board, however the SWRP is being developed in anticipation of future opportunities. Previous grant funding cycles from the state listed eligible applicants as "public agencies, nonprofit organizations, public utilities, federally recognized Indian Tribes, State Indian Tribes listed on Native American Heritage Commission's California Tribal Consultation List, and mutual water companies"[2].

The SWRP is in the early stages of development, and we seek to include Tribal and non-Tribal Partners in each step of this development, as well as the development of the SWRP project list itself. As one of the first steps in the development of the SWRP, the Project Team needs to develop a standardized approach to quantify the benefits of and prioritize (rank) each of the projects that will be included in the SWRP project list. The ranking method involves assigning scores to the various multi-benefit components of a project (those benefits being environmental, water quality, water supply, community, and flood control as well as general suitability of the project). There are several options as to how each of these benefits are weighed; for example, one option is to weigh all benefits equally (thereby assigning each benefit to the same score value). The Project Team has developed a proposed approach to this methodology, which can be found on our website (link/QR code on the next page) and is requesting comments on this proposed approach by close of business day on February 29, 2024. Notably, whatever method is chosen for ranking projects can be updated in the future, as can the ranking of projects themselves. Further, the ranking of a project does not impact the eligibility of that project to receive future grant funding; rather, it is an internal metric to organize projects for future grant opportunities.

If you are interested in getting involved in the development of the SWRP (such as submitting project ideas, offering input on project ranking methodology, etc.) or have any questions or concerns about the SWRP, please contact us to set up a virtual informational meeting. Your engagement in the current and future stages of SWRP development aids us in creating the best plan that meets Tribal Partner interests and benefits watershed sustainability.

Please contact Chris Boyer, Water Resources Engineer, at cboyer@sjgov.org or Roy Valadez, Stormwater Manager at rvaladez@sjgov.org if you are interested in getting involved in SWRP development or proposing a project for the SWRP. You can also reach them via telephone by contacting the San Joaquin Water Resources Division at (209) 468-3000.

Respectfully,
San Joaquin County Region SWRP Project Team

3. EMAILS TO TRIBAL GOVERNMENTS

EMAIL #1 TO TRIBAL GOVERNMENTS:

Dear Chairperson [formal name and title here],

We are reaching out today to invite the [Tribe name] to participate in the development of the San Joaquin County Storm Water Resource Plan (SWRP). The attached document for our formal invitation, which should also be arriving to you shortly via certified mail. The agencies funding the development of this plan, namely the County of San Joaquin and the Cities of Lodi, Tracy, Manteca and Stockton, are committed to engaging with Tribal partners and developing partnerships. We are focused on promoting a collaborative and transparent Tribal engagement process to ensure creation of the best Plan that meets Tribal Partner interests and benefits watershed sustainability.

As a bit of background, the SWRP is a planning document that identifies and prioritizes projects (including green infrastructure projects) focused on the sustainable management of storm water and dry weather runoff (further information on this effort can be found on our website (click here) or if you follow the QR code below). **For a regional storm water or dry weather runoff project to be eligible to receive State grant funding for implementation, it must be included in the SWRP document** (*with few exceptions, footnote below).* Currently there are no active grant program solicitations from the State Water Resources Control Board, however the SWRP is being developed in anticipation of future opportunities. **Once developed, the SWRP will include a list of potential projects that regional and Tribal Governments and non-Tribal partners have identified so that those projects may become eligible to receive future state grant funding**. Therefore, we are seeking input from Tribal Partners on the development of this document and on the identification of projects (including green infrastructure projects) that may be of interest or align with Tribal environmental initiatives.

The SWRP is in the early stages of development, and we seek to include Tribal Partners in each step of this development, as well as in the development of the SWRP project list itself. **Our first step is to seek input on the draft methodology that we have developed that determines the ranking of projects within the SWRP project list**. We have prepared a draft methodology for review, available on our website, and welcome your feedback by **February 28th, 2024**. Our next step will be to reach out again to request your input on project ideas to include in the draft SWRP.

If you are interested in getting involved in the development of the SWRP or have any questions or concerns about the SWRP, please let us know and we can set up a virtual informational meeting. Your engagement in the current and future stages of SWRP development aids us in creating the best Plan possible to further Tribal and non-Tribal Partner environmental initiatives.

Respectfully,

The San Joaquin County Region SWRP Project Team

"Exceptions where a SWRP is not required are: (1) for projects benefiting a disadvantaged community (DAC) with a population of 20,000 or less that is not a co-permittee for an MS4 permit issued to a municipality with a population of more than 20,000, and (2) for projects that are in an Area of Special Biological Significance (ASBS) and are covered under an approved ASBS Compliance Plan. If an applicant or project is exempt from the SWRP requirement, the project must still be included and implemented in an adopted Integrated Regional Water Management Plan (IRWMP)" (Source: California State Water Resources Control Board, Prop 1 Storm Water Grant Program FAQs Sheet, https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swgp/docs/prop1/prop1_swgp_faq.pdf)

EMAIL #1 FOLLOW-UP TO TRIBAL GOVERNMENTS:

Hello,

We hope this email finds you well! We wanted to follow up on the email (and attached letter) we sent to you on Wednesday, February 21st regarding the timeline we included in our invitation to participate in the development of the San Joaquin County Region Storm Water Resource Plan (SWRP). As you may recall from our email/letter, the SWRP is a planning document that, once developed, will ideally list green storm water infrastructure projects that Tribal and non-Tribal Partners would like to include to enable those projects to become eligible to receive future State grant funding.

One of our current action items is to seek your feedback on the draft methodology (provided on our website linked below) that we have developed to rank the projects that will eventually go into the SWRP project list. The ranking does not impact how eligible a project will be in the future to receive funds, it is more an internal metric to organize projects for planning purposes. We had initially requested your feedback by February 28th, **however realized upon further reflection that this does give you sufficient time to review all of the details. We are therefore reaching out to extend the timeline to provide feedback to March 13th**, in the hopes that this will allow your Government sufficient time to review the methodology and/or reach out for if you would like to have a follow-up meeting with us.

Thank you very much for your patience, and please reach out if you have any questions or concerns.

Respectfully,

The San Joaquin County Region SWRP Project Team

EMAIL #2 PART 2 TO TRIBAL GOVERNMENTS:

Dear Chairperson [formal name and title here],

Earlier this year we reached out to announce the development of a San Joaquin County Region Stormwater Resource Plan (SWRP). The agencies funding the development of this plan, namely the County of San Joaquin and the Cities of Lodi, Tracy, Manteca and Stockton, are committed to engaging with Tribal partners and developing partnerships. We are focused on promoting a collaborative and transparent Tribal engagement process to ensure creation of the best Plan that meets Tribal Partner interests and benefits watershed sustainability.

The SWRP is a planning document that identifies and prioritizes projects (including green infrastructure projects) focused on the sustainable management of storm water and dry weather runoff (further information on this effort can be found on our website (click here) or if you follow the QR code below). **For a regional storm water or dry weather runoff project to be eligible to receive State grant funding for implementation, it must be included in the SWRP document** (*with few exceptions, footnote below).*

Once developed, the SWRP will include a list of potential projects that regional and Tribal Governments and non-Tribal partners have identified so that those projects may become eligible to receive future state grant funding. Therefore, we are seeking input from Tribal Partners on the development of this document and on the identification of projects (including green infrastructure projects) that may be of interest or align with Tribal environmental initiatives. **We are reaching out today to invite the [Tribe name] to submit projects to include in the SWRP Project List by April 29th, 2024.**

If you are interested in submitting projects to go into the SWRP Project List, please complete the Project Request Form (spreadsheet attached to this email), specifically the tab "Project Information". Each project should be included as a separate line in the "Project Information" tab. The "Required" (i.e., blue) column headers in the "Project Information" tab must all be provided. If additional information is known about the project, the "Optional" (i.e., yellow) column headers can also be completed. Many columns include drop-down lists from which you can select when you click on the cell. All proposed projects must be located within the boundaries of the San Joaquin County Region (website map for further information).

Your engagement in the current and future stages of SWRP development aids us in creating the best Plan possible to further Tribal and non-Tribal Partner environmental initiatives. Please reach out to us if you have any questions or would like to meet to discuss the SWRP and/or SWRP Project List.

Respectfully,

The San Joaquin County Region SWRP Project Team

"Exceptions where a SWRP is not required are: (1) for projects benefiting a disadvantaged community (DAC) with a population of 20,000 or less that is not a co-permittee for an MS4 permit issued to a municipality with a population of more than 20,000, and (2) for projects that are in an Area of Special Biological Significance (ASBS) and are covered under an approved ASBS Compliance Plan. If an applicant or project is exempt from the SWRP requirement, the project must still be included and implemented in an adopted Integrated Regional Water Management Plan (IRWMP)" (Source: California State Water Resources Control Board, Prop 1 Storm Water Grant Program FAQs Sheet, https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swgp/docs/prop1/prop1_swgp_faq.pdf)

EMAIL #3 TO TRIBAL GOVERNMENTS:

Dear Chairperson [formal name and title here],

Since reaching out earlier this year, we are pleased announce that we have completed a draft of the San Joaquin County Region Stormwater Resource Plan (SWRP). The agencies funding the development of this plan, namely the County of San Joaquin and the Cities of Lodi, Tracy, Manteca and Stockton, are committed to engaging with Tribal partners and developing partnerships. We are focused on promoting a collaborative and transparent Tribal engagement process to ensure creation of the best Plan that meets Tribal Partner interests and benefits watershed sustainability. **We are reaching out today to invite the [Tribe name] to review the SWRP draft and provide feedback, edits or comments by July 19th, 2024.**

The SWRP is a planning document that identifies and prioritizes projects (including green infrastructure projects) focused on the sustainable management of storm water and dry weather runoff. Ideally the projects identified in the SWRP will have the potential to improve regional water quality, reduce localized flooding, increase water supply, and provide community enhancement. For a regional storm water or dry weather runoff project to be eligible to receive State grant funding for implementation, it must be included in the SWRP document (*with few exceptions, footnote below).* Therefore, the SWRP is critical to future sustainable project planning efforts.

Your engagement in SWRP development aids us in creating the best Plan possible to further Tribal and non-Tribal partner environmental initiatives. If you are interested in providing edits, input or feedback on the draft SWRP, please follow the steps below:

1) To download the SWRP draft and appendices, please click the link here. This should bring you to a Dropbox folder where you can download the files directly. If there are any issues with this download link, please reach out to us and we will work on correcting the issue as soon as possible.
2) To provide comments and feedback on the draft SWRP, please use the **comment form** (attached to this email) and email your form to rvaladez@sjgov.org once your review is complete.

Please reach out to us if you have any questions or would like to meet to discuss the draft as a whole. Thank you for your time and consideration.

Respectfully,

The San Joaquin County Region SWRP Project Team

"Exceptions where a SWRP is not required are: (1) for projects benefiting a disadvantaged community (DAC) with a population of 20,000 or less that is not a co-permittee for an MS4 permit issued to a municipality with a population of more than 20,000, and (2) for projects that are in an Area of Special Biological Significance (ASBS) and are covered under an approved ASBS Compliance Plan. If an applicant or project is exempt from the SWRP requirement, the project must still be included and implemented in an adopted Integrated Regional Water Management Plan (IRWMP)" (Source: California State Water Resources Control Board, Prop 1 Storm Water Grant Program FAQs Sheet, https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swgp/docs/prop1/prop1_swgp_faq.pdf)

ATTACHMENT C

Non-Tribal Partner Outreach Materials

1. INTRODUCTION

Emails and virtual meetings with Non-Tribal Partners (Groups A and B) are organized according to the Stages of Engagement table below:

Stages of Engagement	Timeline	Email #	Meetings
Outreach with regional and Tribal governments and Interested Parties (we want to hear from you!)	December 2023 - Ongoing	1	Upon Request
Review of a Methodology for Ranking Stormwater Projects	January 16 – March 13, 2024	2	Upon Request
Opportunity for Your Project Submittal	April 5- April 29, 2024	3	Upon Request
Review of the Draft SWRP	June 28- July 19	4	Upon Request
SWRP Modification/ Project Implementation (Ongoing)	*To be Announced-2024*	5	Upon Request

This document provides the contents of all emails (#1-5, table above) sent to Non-Tribal Partners from Groups A and B, as well as the list of meetings held with Non-Tribal Partners Groups A and B. The Participating Agencies learned new best practices for outreach upon meeting with a Tribal Liaison with the Department of Water Resources; therefore, while the term "stakeholder" was used in early emails, later emails have replaced this term with "Interested Party" or more specific distinctions for outreach audience members.

This document is broken up into the following sections:

2: Email #1 to Non-Tribal Partners Group B

Email #1 was the only email with contents that differed between non-Tribal Partners Groups A and B. The template used for outreach to non-Tribal Partners Group B (non-municipal public landowners including school districts, transportation/ transit districts, and housing authorities, as well as non-governmental organizations, businesses and community interest groups, and members of the general public) is provided in Section 2 of this document.

3: Email #1 to Non-Tribal Partners Group A

Email #1 was tailored to specific Non-Tribal Group A Partners, such that each of the following Partner groups received emails that differed slightly depending on the recipient's relationship to stormwater planning:

- Members of the Eastern IRWMP
- Members of the Westside IRWMP
- Members of other Watershed Groups (as a template)

The contents of each email to non-Tribal Partners Group A is provided in Section 3.

4: Emails #2-4 to Non-Tribal Partners Groups A and B

One template was drafted for emails to both Non-Tribal Partners Groups A and B for each remaining email to announce SWRP development. The contents of each email (for outreach stages 2-5 above) are provided in Section 4.

5: Meetings Held with Non-Tribal Partners Groups A and B

The consulting team supporting the Participating Agencies in development of the SWRP held several meetings (upon request) with Non-Tribal Partners Groups A and B. Information on these meetings is provided in Section 5 of this document.

2. EMAIL #1 TO NON-TRIBAL PARTNERS GROUP B

Hello!

I am reaching out to you today on behalf of the County of San Joaquin and the Cities of Lodi, Manteca, Stockton, and Tracy to announce a new watershed sustainability effort that we hope you may be interested in getting involved in.

The agencies have joined together to support the development of a San Joaquin County Region Stormwater Resource Plan (SWRP). A Stormwater Resource Plan (SWRP) is a planning document that identifies and prioritizes projects focused on the sustainable management of **storm water and dry weather runoff** (further information on these can be found on our website (click here) or if you follow the QR code below). For a regional storm water or dry weather runoff project to be eligible to receive State grant funding for implementation, it must be included in the SWRP document (*with few exceptions, footnote below).* The projects that could be included in the SWRP (also referred to as green infrastructure projects) would ideally provide multiple benefits including improved regional water quality, reduced localized flooding, increased water supply, and community enhancement.

A core component of SWRP development is outreach and collaboration with all stakeholders (public agencies, Tribal governments, 501(c)(3) nonprofit organizations, public entities, watershed groups and non-municipal public landowners) to identify and prioritize potential projects that would go into the SWRP. All stakeholders will have the opportunity to suggest projects that they would like to see included in the SWRP and eligible for future grant funding.

We want to hear from you! How can you get involved?

During the development of the SWRP, which will take about 6-9 months to complete, there will be several opportunities for you to be involved or to submit project ideas to be included in the plan.

You can find out about these opportunities by doing one or more of the following:

1) Provide us with your direct email requesting to be contacted; and/or
2) Visit this website to receive the most current information.

If you have any questions please reach out to rebeccas@lwa.com or karena@lwa.com .

Footnote → exceptions where a SWRP is not required are: (1) for projects benefiting a disadvantaged community (DAC) with a population of 20,000 or less that is not a copermittee for an MS4 permit issued to a municipality with a population of more than 20,000, and (2) for projects that are in an Area of Special Biological Significance (ASBS) and are covered under an approved ASBS Compliance Plan.

3. EMAIL #1 TO NON-TRIBAL PARTNERS GROUP A

TO EASTERN IRWMP:

Dear [*Representative Member*],

I am reaching out to you today on behalf of the County of San Joaquin and the Cities of Lodi, Manteca, Stockton, and Tracy. These agencies have joined together to support the development of a San Joaquin County Region Stormwater Resource Plan (SWRP), which can support the goals and ultimately be integrated into the Eastern San Joaquin Integrated Regional Water Management Plan (IRWMP).

The SWRP area will encompass the County of San Joaquin, excluding the area already covered by the existing Westside-San Joaquin SWRP. The SWRP will identify and prioritize projects focused on the sustainable management of storm water and dry weather runoff. For a regional storm water or dry weather runoff project to be eligible to receive State grant funding for implementation, it must be included in the SWRP (with several exceptions; footnote below). The projects included in the SWRP (also referred to as green infrastructure projects) will provide multiple benefits including improved regional water quality, reduced localized flooding, increased water supply, and community enhancement.

This email serves as a general announcement as we begin the process for the development of the SWRP. A core component of SWRP development is outreach and collaboration with all stakeholders (public agencies, Tribal governments, 501(c)(3) nonprofit organizations, public entities, watershed groups, non-municipal public landowners and the general public) to identify and prioritize potential projects that would go into the SWRP. All stakeholders will have the opportunity to suggest projects that they would like to see included in the SWRP and eligible for future grant funding. **We hope that you will consider getting involved and sharing this announcement email with other Eastern San Joaquin Subbasin stakeholders, the Advisory Water Commission, and the rest of the Greater San Joaquin County Regional Water Coordinating Committee.**

You can find more information about the SJC SWRP via our website -click here- or if you follow the QR code below.

If you have any questions please reach out to rebeccas@lwa.com or karena@lwa.com.

Thank you for your time and consideration.

Sincerely,

San Joaquin County Region SWRP Project Team

Footnote → exceptions where a SWRP is not required are: (1) for projects benefiting a disadvantaged community (DAC) with a population of 20,000 or less that is not a copermittee for an MS4 permit issued to a municipality with a population of more than 20,000, and (2) for projects that are in an Area of Special Biological Significance (ASBS) and are covered under an approved ASBS Compliance Plan.

SCAN ME

TO WESTSIDE IRWMP:

Dear [*Representative Member*],

I am reaching out to you today on behalf of the County of San Joaquin and the Cities of Lodi, Manteca, Stockton, and Tracy. These agencies have joined together to support the development of a San Joaquin County Region Stormwater Resource Plan (SWRP).

The SWRP area will encompass the County of San Joaquin, excluding the area already covered by the existing Westside-San Joaquin SWRP that you and your team helped develop. One exception we note however is the City of Tracy, which intends to be a Participating Agency in both Plans. The SWRP will identify and prioritize projects focused on the sustainable management of storm water and dry weather runoff. The projects included in the SWRP (also referred to as green infrastructure projects) will provide multiple benefits including improved regional water quality, reduced localized flooding, increased water supply, and community enhancement.

This email serves as a general announcement as we begin the process for the development of the SWRP. Given your previous involvement with the Westside-San Joaquin Integrated Water Management Group and the Westside-San Joaquin SWRP, we would greatly appreciate your input and feedback throughout the SWRP development and implementation process. We plan to send a series of emails in coming months with information on progress and ways to get involved, however if you or your team would like to meet to discuss the SWRPs, please let us know and we will happily set something up.

You can find more information about the SJC SWRP via our website -click here- or if you follow the QR code below.

Thank you for your time and consideration.

Sincerely,

San Joaquin County Region SWRP Project Team

SCAN ME

TO OTHER WATERSHED GROUPS:

Hello!

I am reaching out to you today on behalf of the County of San Joaquin and the Cities of Lodi, Manteca, Stockton, and Tracy to announce the development of a San Joaquin County Region Stormwater Resource Plan (SWRP).

A Stormwater Resource Plan (SWRP) is a planning document that identifies and prioritizes projects focused on the sustainable management of **storm water and dry weather runoff** (further information on these can be found on our website (click here) or if you follow the QR code below). For a regional storm water or dry weather runoff project to be eligible to receive State grant funding for implementation, it must be included in the SWRP document (*with few exceptions, footnote below).* The projects that could be included in the SWRP (also referred to as green infrastructure projects) would ideally provide multiple benefits including improved regional water quality, reduced localized flooding, increased water supply, and community enhancement.

A core component of SWRP development is outreach and collaboration with all stakeholders (public agencies, Tribal governments, 501(c)(3) nonprofit organizations, public entities, watershed groups and non-municipal public landowners) to identify and prioritize potential projects that would go into the SWRP. All stakeholders will have the opportunity to suggest projects that they would like to see included in the SWRP and eligible for future grant funding.

We want to hear from you! How can you get involved?

During the development of the SWRP, which will take about 6-9 months to complete, there will be several opportunities for you to be involved or to submit project ideas to be included in the plan. Please visit our website to receive the most current information, and if you have any questions please reach out to rebeccas@lwa.com or karena@lwa.com. We are also happy to meet with you virtually if it would be helpful to clarify any details.

Thank you for your time and consideration.

Sincerely,

San Joaquin County Region SWRP Project Team

Footnote → exceptions where a SWRP is not required are: (1) for projects benefiting a disadvantaged community (DAC) with a population of 20,000 or less that is not a copermittee for an MS4 permit issued to a municipality with a population of more than 20,000, and (2) for projects that are in an Area of Special Biological Significance (ASBS) and are covered under an approved ASBS Compliance Plan.

4. EMAILS #2-4 TO NON-TRIBAL PARTNERS, GROUPS A AND B

EMAIL #2 TO NON-TRIBAL PARTNER GROUPS A AND B:

Hello!

As you may recall, in December 2023 / January 2024 we reached out on behalf of the County of San Joaquin and the Cities of Lodi, Manteca, Stockton, and Tracy (Participating Agencies funding the development of the SWRP) to announce the development of a San Joaquin County Region Stormwater Resource Plan (SWRP).

A Stormwater Resource Plan (SWRP) is a planning document that identifies and prioritizes projects focused on the sustainable management of **storm water and dry weather runoff** (further information on these topics can be found on our website (click here) or if you follow the QR code below). For a regional storm water or dry weather runoff project to be eligible to receive State grant funding for implementation, it must be included in the SWRP document (*with few exceptions, footnote below).* The projects that could be included in the SWRP (also referred to as green infrastructure projects) would ideally provide multiple benefits including improved regional water quality, reduced localized flooding, increased water supply, and community enhancement.

A core component of SWRP development is outreach and collaboration with all regional and Tribal governments, interested groups, and the general public to identify and prioritize potential projects that could be included in the SWRP. We seek to include input and feedback from Native American Tribes and Tribal governments, public agencies, and regional Interested Parties including nonprofit organizations, public entities, watershed groups, non-municipal public landowners, and the general public.

Once developed, the SWRP will include a list of potential stormwater projects that regional and Tribal governments and Interested Parties would like to include in order for those projects to become eligible to receive future State grant funding.

The stages of engagement table below identifies the various opportunities that you have to get involved during the different phases of the SWRP development.

Stages of Engagement	Timeline
Outreach with Regional Stakeholders (we want to hear from you!)	December 2023 - Ongoing
Review of a Methodology for Ranking Stormwater Projects	**January 16 – 29, 2024 (with potential for extension)**
Review of the Current Ranked List of Projects and Opportunity for Your Project Submittal	*To be announced- 2024*
Review of the Draft SWRP	*To be announced- 2024*

SWRP Modification/ Project Implementation (Ongoing)	*To be announced- 2024*

As one of the first steps in the development of the SWRP, the Participating Agencies need to develop and apply a standardized approach to quantify the benefits of and "prioritize" (rank) each of the identified, potential projects that will be included in the SWRP. The method for ranking projects can be updated in the future, as can the ranking of projects themselves. Further, the ranking of a project does not impact the eligibility of that project to receive future grant funding; rather, it is an internal metric to organize projects for future grant opportunities.

The proposed quantitative methodology is based on other, similar approaches that have been developed in other SWRPs throughout the state.

The Participating Agencies are soliciting feedback on the proposed approach and are **requesting comments by close of business on January 29, 2024**.

A summary of the methodology is attached to this email, PDF file entitled "SJC Region SWRP-Overview of Quantitative Methodology Jan 16 2024".

Please visit our website or reach out to rebeccas@lwa.com or karena@lwa.com with any questions.
We are also happy to meet with you virtually if it would be helpful to clarify any details.

Thank you for your time and consideration.

Sincerely,

San Joaquin County Region SWRP Project Team

Footnote -> "Exceptions where a SWRP is not required are: (1) for projects benefiting a disadvantaged community (DAC) with a population of 20,000 or less that is not a co-permittee for an MS4 permit issued to a municipality with a population of more than 20,000, and (2) for projects that are in an Area of Special Biological Significance (ASBS) and are covered under an approved ASBS Compliance Plan. If an applicant or project is exempt from the SWRP requirement, the project must still be included and implemented in an adopted Integrated Regional Water Management Plan (IRWMP)" (Source: California State Water Resources Control Board, Prop 1 Storm Water Grant Program FAQs Sheet, https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swgp/docs/prop1/prop1_swgp_faq.pdf)

EMAIL #3 TO NON-TRIBAL PARTNER GROUPS A AND B:

Hello!

As you may recall, in December 2023 and January 2024 we reached out on behalf of the County of San Joaquin and the Cities of Lodi, Manteca, Stockton, and Tracy (Participating Agencies providing funding) to announce the development of a San Joaquin County Region Stormwater Resource Plan (SWRP).

A Stormwater Resource Plan (SWRP) is a planning document that identifies and prioritizes projects focused on the sustainable management of storm water and dry weather runoff (further information on these topics can be found on our website (click here) or if you follow the QR code below). For a regional storm water or dry weather runoff project to be eligible to receive State grant funding for implementation, it must be included in the SWRP document (*with few exceptions, footnote below).* **The projects that could be included in the SWRP (also referred to as green infrastructure projects) would ideally provide multiple benefits including improved regional water quality, reduced localized flooding, increased water supply, and community enhancement.**

A core component of SWRP development is outreach and collaboration to identify and prioritize potential projects that could be included in the SWRP. We seek to include input and feedback from Native American Tribes and Tribal governments, public agencies, and regional Interested Parties including nonprofit organizations, public entities, watershed groups, non-municipal public landowners, and the general public. Once developed, the SWRP will include a list of potential projects that these collaborators have identified so that the projects may become eligible to receive future state grant funding.

We are now in the process of developing the list of potential stormwater projects to include in the SWRP, and we want to hear from you! If you are interested in submitting a project for consideration, use the stages of engagement table and further instructions below:

Stages of Engagement	Timeline
Outreach with Regional Stakeholders (we want to hear from you!)	December 2023 - Ongoing
Review of a Methodology for Ranking Stormwater Projects	January 16 – March 13, 2024
Opportunity for Your Project Submittal	**April 5- April 29, 2024**
Review of the Draft SWRP	*To be announced- 2024*
SWRP Modification/ Project Implementation (Ongoing)	*To be announced- 2024*

The Participating Agencies have evaluated the public roads and parcels within their jurisdictions, ranked them using the quantitative methodology that was developed earlier this year, and prioritized based on the results of the ranking.

As an Interested Party you can:

1) Submit a project that you would like to have ranked and prioritized as a part of the SWRP.
    1) **If you would like to submit a project to be ranked and prioritized, you will need to complete and submit the Project Request Form (attached) by no later than 5pm April 29, 2024.**
    2) For a project to be included in the San Joaquin County SWRP project list, the "Project Information" tab needs to be completed. Each project should be included on a separate line in the spreadsheet.
        i. The "Required" (i.e., blue) column headers in the "Project Information" tab must all be provided.
        ii. If additional information is known about the project, the "Optional" (i.e., yellow) column headers can also be completed.
        iii. Many columns include drop-down lists from which you can select when you click on the cell (supported by the hidden "Domains" tab in the spreadsheet).
        iv. All proposed projects must be located within the boundaries of the San Joaquin County Region (website map for further information).

Please visit our website or reach out to rebeccas@lwa.com or karena@lwa.com with any questions.

We are also happy to meet with you virtually if it would be helpful to clarify any details.

Thank you for your time and consideration.

Sincerely,

San Joaquin County Region SWRP Project Team

Footnote -> "Exceptions where a SWRP is not required are: (1) for projects benefiting a disadvantaged community (DAC) with a population of 20,000 or less that is not a co-permittee for an MS4 permit issued to a municipality with a population of more than 20,000, and (2) for projects that are in an Area of Special Biological Significance (ASBS) and are covered under an approved ASBS Compliance Plan. If an applicant or project is exempt from the SWRP requirement, the project must still be included and implemented in an adopted Integrated Regional Water Management Plan (IRWMP)" (Source: California State Water Resources Control Board, Prop 1 Storm Water Grant Program FAQs Sheet, https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swqp/docs/prop1/prop1_swqp_faq.pdf)

EMAIL #4 TO NON-TRIBAL PARTNER GROUPS A AND B:

Hello!

As you may recall, over the past six months we have reached out on behalf of the County of San Joaquin and the Cities of Lodi, Manteca, Stockton, and Tracy to announce various stages of development of the San Joaquin County Region Stormwater Resource Plan (SWRP). **We are now pleased to announce that the draft SWRP has been fully developed and is available for your review.**

As a brief reminder, the Stormwater Resource Plan (SWRP) is a planning document that identifies and prioritizes projects (including green infrastructure projects) focused on the sustainable management of storm water and dry weather runoff. Projects would be aimed at improving regional water quality, reducing localized flooding, increasing water supply, and providing community enhancement. For a regional storm water or dry weather runoff project to be eligible to receive State grant funding for implementation, it must be included in the SWRP document (*with few exceptions, footnote below).* Therefore, the SWRP is critical to future sustainable project planning efforts across San Joaquin County.

We are now seeking your feedback on the draft SWRP before submitting it to the State Water Board. As an Interested Party, if you would like to offer your input and feedback on the draft SWRP, please:

1) Visit our website (link here, or follow the QR code below), scroll to the bottom of the webpage and click the text that says "**Download Draft SWRP**". Be sure that your computer fully downloads the draft SWRP and its appendices.
2) Click the text that says "**Download Comment Form**". This is the form you can use to provide comments and feedback on the draft SWRP.
3) Add any comments or input to your comment form while reviewing the SWRP, and then email your completed form to rebeccas@lwa.com or karena@lwa.com. Feel free to reach out to us with any questions you might have. We are happy to meet with you virtually if it would be helpful to clarify any details.

Thank you for your time and consideration.

Sincerely

San Joaquin County Region SWRP Project Team

Footnote -> "Exceptions where a SWRP is not required are: (1) for projects benefiting a disadvantaged community (DAC) with a population of 20,000 or less that is not a co-permittee for an MS4 permit issued to a municipality with a population of more than 20,000, and (2) for projects that are in an Area of Special Biological Significance (ASBS) and are covered under an approved ASBS Compliance Plan. If an applicant or project is exempt from the SWRP requirement, the project must still be included and implemented in an adopted Integrated Regional Water Management Plan (IRWMP)" (Source: California State Water Resources Control Board, Prop 1 Storm Water Grant Program FAQs Sheet, https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swqp/docs/prop1/prop1_swqp_faq.pdf)

5. MEETINGS HELD WITH NON-TRIBAL PARTNERS GROUPS A AND B

Meetings with Non-Tribal Partners Groups A and B were held upon request, and the dates and topics of each meeting are provided in the table below. Slideshow materials are also attached below.

Group	Date	Topic
Lower Mokelumne River Watershed Steering Committee	11/30/2023	• Initial outreach, information session
San Joaquin Council of Governments	01/11/2024	• Initial outreach, information session • Discussion of future collaboration for climate resiliency planning efforts
Stockton Unified School District (Stockton USD) Energy Education Specialist	04/17/2024	• Initial outreach, information session • Discussion of future collaborations between Stockton USD and City of Stockton to plan stormwater and climate resiliency projects

ATTACHMENT D

SWRP Flyers

1. INTRODUCTION

The Participating Agencies posted detailed informational flyers in public spaces across San Joaquin County and in the Cities of Lodi, Manteca, and Tracy. The City of Stockton developed a separate flyer to post in public spaces. Both flyers are included in the sections below, as follows:

2: Primary Flyer

The Primary Flyer in Section 2 was posted by the County and the Cities of Lodi, Tracy and Manteca in the following locations:

[insert list here]

3: Stockton Flyer

The Stockton Flyer in Section 3 was posted by the City of Stockton in the following locations:

- Municipal Utilities Department (MUD)
- City Hall
- Public Works Department
- Libraries
- Website

The Stockton Flyer was also distributed at two regional clean up events, and a ta drive-through recycling event.

2. PRIMARY FLYER

San Joaquin County Region Stormwater Resource Plan

We want your input!

PURPOSE OF THE STORMWATER RESOURCE PLAN (SWRP):

The San Joaquin County Region Stormwater Resource Plan is being developed to **identify and prioritize green storm water infrastructure projects** that benefit regional water quality in the San Joaquin County Region. The primary agencies funding this effort are the County and Cities of Stockton, Manteca, Lodi, and Tracy. In order for a future dry weather or stormwater capture project (such as a green stormwater infrastructure project) to be eligible to receive grant funding for implementation by the State Water Resources Control Board, it must be included in the SWRP. Therefore, a SWRP is a planning document that includes a list of potential stormwater projects that regional and Tribal governments and stakeholders would like to include in order for those projects to be eligible to receive future State grant funding.

Would you like to get involved in regional watershed sustainability? Want to suggest a green stormwater infrastructure project to be included in the SWRP?

See Page 2 of this flyer to learn how to get involved!

IMPACT OF STORMWATER ON WATER QUALITY

Stormwater is runoff from rain or snowmelt that can travel along impervious surfaces (paved streets, parking lots, and building rooftops) and flow, untreated, into the local waterways.

If the stormwater has picked up pollutants such as trash, chemicals, or sediment prior to discharging into a waterway, it can adversely affect the fish, aquatic insects and/or animals that rely on those waterbodies.

GREEN STORMWATER INFRASTRUCTURE

What is it?

Rainwater harvesting, rain gardens, planter boxes, green roofs, bioswales, permeable pavements, green streets and alleys, green parking, urban tree canopy, land conservation (see Flyer page 2 for pictures)

Green Stormwater Infrastructure:

- mimics natural systems to absorb and filter stormwater, which removes pollutants and slows or reduces runoff into storm sewers and surface waters;
- can reduce erosion and flood risk, as well as protect water quality for humans and aquatic organisms.

For further information on green infrastructure, you can visit the following:

https://www.epa.gov/green-infrastructure/what-green-infrastructure

Photos and images above depicting types of green stormwater infrastructure, which includes rainwater harvesting, rain gardens, planter boxes, green roofs, bioswales, permeable pavements, green streets and alleys, green parking, urban tree canopy, and land conservation. The top right image depicts a bioswale. The bottom right image depicts permeable pavement.

WE WANT TO HEAR FROM YOU!

A core component of SWRP development is outreach and collaboration with all regional and Tribal governments and stakeholders to identify and prioritize potential projects that could be included in the SWRP. We seek to include input and feedback from Native American Tribes and Tribal governments, public agencies, and regional stakeholders including nonprofit organizations, public entities, watershed groups, non-municipal public landowners, and the general public.

During the development of the SWRP, which will take about 6-9 months to complete, there will be several opportunities for you to get involved. One of these opportunities will be for you to suggest ideas for green stormwater infrastructure projects that you would like to see included and eligible for State grant funding.

Please refer to our website (see link and QR code) to determine the current stage of development, and reach out to rebeccas@lwa.com or karena@lwa.com to receive further information.

ATTACHMENT E

Regional Webpage

1. INTRODUCTION

San Joaquin County created a webpage within the Stormwater Management section of the San Joaquin County website called “Regional and Tribal Engagement”[1]. The purpose of this webpage is to provide Interested Parties and the public with background information on stormwater impacts and the SWRP. The webpage is also intended to inform Interested Parties about stages of SWRP development and implementation and ways to get involved in the process. The webpage was subdivided into sections according to the following topics:

- What is a Stormwater Resource Plan (SWRP)
- The San Joaquin County Region SWRP
- How does stormwater impact water quality?
- How can green infrastructure projects improve water quality?
- Tribal Engagement
- We want to hear from you!

The core content of the website, specifically all sections listed above, remained relatively unchanged throughout the duration of SWRP development from January to June 2024. However, information was added below the latter section (“We want to hear from you!”) and updated iteratively during each phase of SWRP development to provide opportunities for Interested Parties to collaborate and provide input throughout the process. Therefore, the following document is broken up into the following subsections:

2: Static Website Content

This section includes all the information provided on the SWRP Regional and Tribal webpage that remained unchanged throughout the six-month SWRP development period. It details the core content that was consistently available to users

3: Iterative Website Updates

This section provides a table outlining the changes made to the final section of the website ("We want to hear from you!") over the six-month SWRP development period. Each entry in the table corresponds to a different phase of the SWRP development process, highlighting the updates and opportunities for engagement during each phase.

[1] http://www.sjwater.org/Stormwater-Management/Regional-and-Tribal-Engagement

2. STATIC WEBSITE INFORMATION

WHAT IS A STORMWATER RESOURCE PLAN (SWRP)

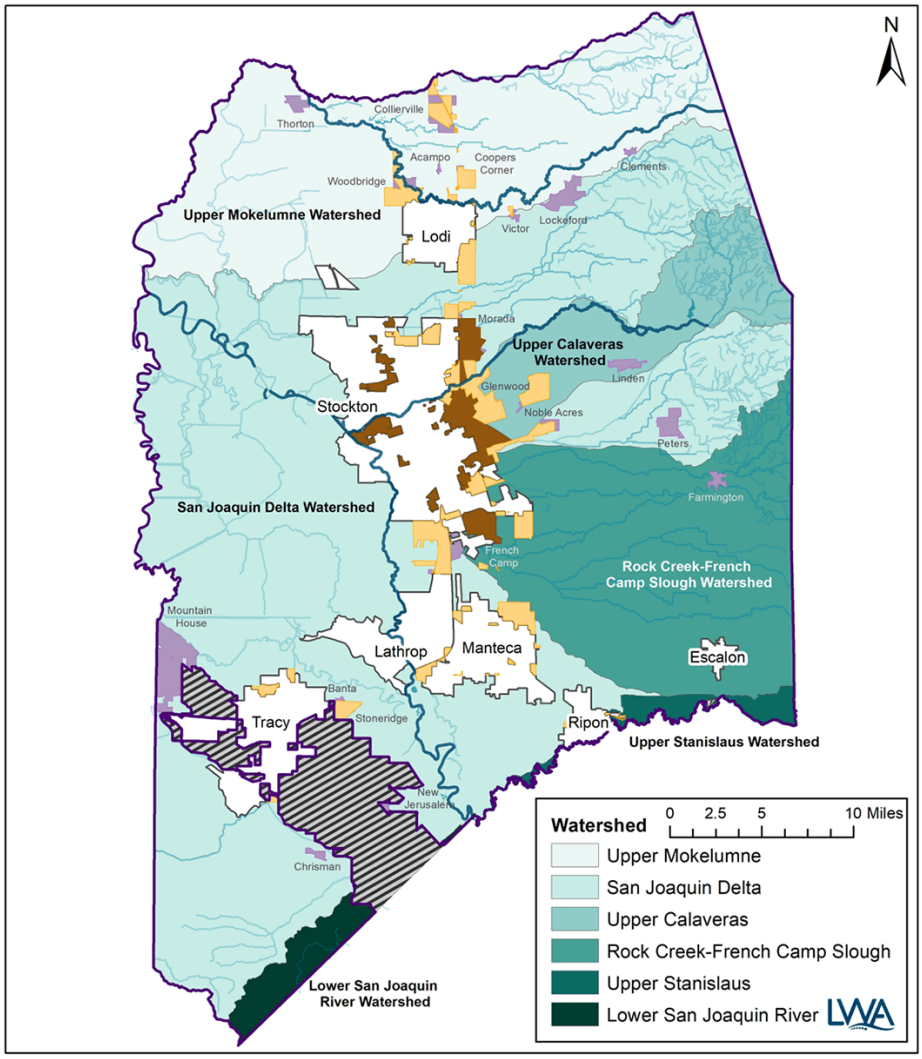
A Stormwater Resource Plan (SWRP) is a planning document that identifies and prioritizes projects focused on the sustainable management of stormwater and dry weather runoff. These projects (also referred to as green infrastructure projects) can provide multiple benefits including improved regional water quality, reduced localized flooding, increased water supplies, and community enhancement.

A project must be included in the SWRP document to be eligible to receive State grant funding (*with few exceptions; Footnote 1*). Projects can be submitted to be included in the SWRP by regional and Tribal governments, public agencies, 501(c)(3) nonprofit organizations, public entities, non-municipal public landowners, water companies, and the general public.

Once developed, **the SWRP will include a list of potential stormwater projects that regional and Tribal governments and Interested Parties would like to include in order for those projects to become eligible to receive future State grant funding**. This document and its list of projects can be updated in the future, to include new projects or to adjust the methodology used to prioritize projects.

THE SAN JOAQUIN COUNTY REGION SWRP

The San Joaquin County Region Stormwater Resource Plan (San Joaquin County Region SWRP) is being developed by the County of San Joaquin and cities of Lodi, Manteca, Stockton, and Tracy (Participating Agencies) to identify and prioritize stormwater and dry weather runoff capture projects.



San Joaquin County Regional Characterization

Stormwater Resource Plan Area | Cities | NPDES Phase 1 | Major Rivers
Westside San Joaquin IRWM | Communities | NPDES Phase 2 | Waterbodies

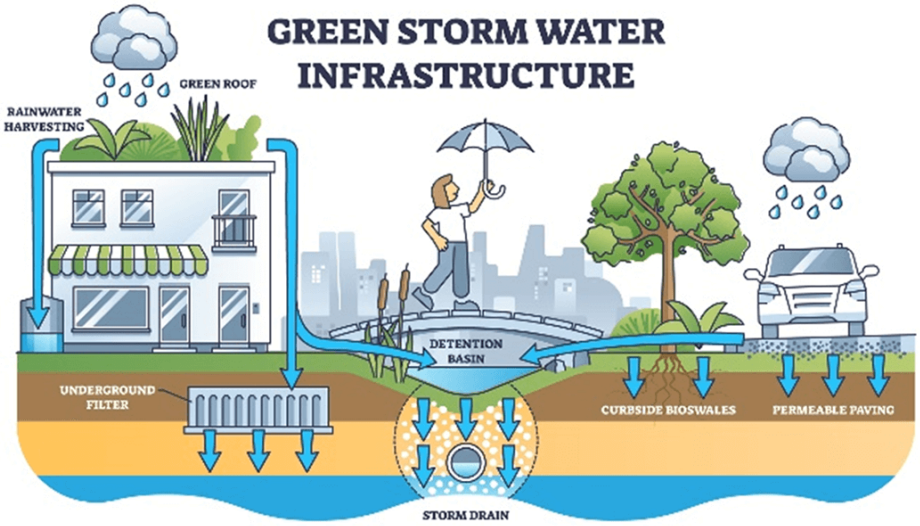
November 2023.
Data sources: San Joaquin County. HUC-8 data from USGS. IRWM boundary from https://data.cnra.ca.gov/dataset/i03-irwm-regions.

HOW DOES STORMWATER IMPACT WATER QUALITY?

Stormwater is runoff that can occur when there is rain or snowmelt. Likewise, dry weather urban runoff can occur when someone uses water and allows it to run off their property, for example when they are gardening, watering their lawn, or cleaning their car.

In natural or open space areas (e.g., parks, fields, gardens) stormwater and dry weather urban runoff can absorb into the ground. However, in areas where development has occurred, stormwater and dry weather runoff travels along impervious surfaces (e.g., rooftops, roads, and parking lots) and flows, untreated, into the local waterways. If the

stormwater has picked up pollutants such as trash, chemicals, or sediment prior to discharging into a waterway, it can adversely affect the fish, aquatic insects and/or animals that rely on that waterbody.



HOW CAN GREEN INFRASTRUCTURE PROJECTS IMPROVE WATER QUALITY?

Green stormwater infrastructure (GSI) is a type of development that uses natural materials (plants, soil, green space) or methods such as permeable pavement to absorb and filter storm water and urban runoff of pollutants. GSI helps to prevent flooding and pollution of local water bodies.

Types of GI include rainwater harvesting, rain gardens, planter boxes, green roofs, bioswales, permeable pavements, green streets and alleys, green parking, urban tree canopy, and land conservation.

GI Features:

Mimic natural systems to absorb and filter stormwater, which removes pollutants and slows or reduces runoff into storm drains and surface waters; and

Can reduce erosion and flood risk, as well as protect water quality for humans and aquatic organisms.

For further information on green infrastructure, you can visit the following: https://www.epa.gov/green-infrastructure/what-green-infrastructure

TRIBAL ENGAGEMENT

Tribal Engagement is important for the development and implementation of the Storm Water Resource Plan (SWRP). The agencies funding the development of the SWRP, namely the County of San Joaquin and the Cities of Lodi, Manteca, Stockton, and Tracy are committed to engaging with Tribal partners and developing partnerships. They are also focused on promoting collaborative and transparent Tribal engagement to ensure creation of the best Plan that meets Tribal Partner interests and benefits watershed sustainability.

Please contact Chris Boyer or Roy Valadez with the County of San Joaquin at cboyer@sjgov.org or rvaladez@sjgov.org if you are interested in getting involved in SWRP development or proposing a project for the SWRP. You can also reach them via phone by contacting the San Joaquin Water Resources Division at 209-468-3000.

WE WANT TO HEAR FROM YOU!

A core component of SWRP development is outreach and collaboration with all regional and Tribal governments, interested groups, and the public to identify and prioritize potential projects that could be included in the SWRP. We seek to include input and feedback from Native American Tribes and Tribal governments, public agencies, and regional Interested Parties including nonprofit organizations, public entities, watershed groups, non-municipal public landowners, and the general public.

During the development of the SWRP, which will take about 6-9 months to complete, there will be several opportunities for you to get involved. One of these opportunities will be for you to suggest ideas for green stormwater infrastructure projects.

Please refer to the **Stages of Engagement** table below to identify opportunities for you to get involved during the different phases of SWRP development. This table will be updated during each phase of engagement with guidance on how you can get involved. Please email rebeccas@lwa.com or karena@lwa.com to learn more about a specific Stage of Engagement or request further information or clarification.

Stages of Engagement	Timeline
Outreach with regional and Tribal governments and Interested Parties (we want to hear from you!)	December 2023 - Ongoing
Review of a Methodology for Ranking Stormwater Projects	January 16 – March 13, 2024
Opportunity for Your Project Submittal	April 5- April 29, 2024
Review of the Draft SWRP	June 28- July 19
SWRP Modification/ Project Implementation (Ongoing)	*To be announced- 2024*

Footnote 1: "Exceptions where a SWRP is not required are: (1) for projects benefiting a disadvantaged community (DAC) with a population of 20,000 or less that is not a co-permittee for an MS4 permit issued to a municipality with a population of more than 20,000, and (2) for projects that are in an Area of Special Biological Significance (ASBS) and are covered under an approved ASBS Compliance Plan. If an applicant or project is exempt from the SWRP requirement, the project must still be included and implemented in an adopted Integrated Regional Water Management Plan (IRWMP)" (Source: California State Water Resources Control Board, Prop 1 Storm Water Grant Program FAQs Sheet, https://www.waterboards.ca.gov/water_issues/programs/grants_loans/swgp/docs/prop1/prop1_swgp_faq.pdf)

3. ITERATIVE WEBSITE UPDATES

CHANGE 1 (FROM ORIGINAL OUTREACH ANNOUNCEMENT):

Placed the following text below the Stages of Engagement table:

Stages of Engagement	Timeline
Outreach with regional and Tribal governments and Interested Parties (we want to hear from you!)	December 2023 - Ongoing
Review of a Methodology for Ranking Stormwater Projects	**January 16 – March 13, 2024**

Review of the Proposed Quantitative Methodology for the Scoring and Ranking of Potential San Joaquin County Region SWRP Projects

As one of the first steps in the development of the SWRP, the Participating Agencies need to develop a standardized approach (methodology) to quantify the benefits of and "prioritize" (rank) each of the potential projects that will be included in the SWRP.

The proposed quantitative methodology is based on other, similar approaches that have been developed in other SWRPs throughout the state. The Participating Agencies are soliciting feedback on the proposed approach and are requesting comments by close of business on January 29, 2024. A summary of the methodology can be **downloaded here** and questions can be directed to rebeccas@lwa.com or karena@lwa.com.

***Important note**: the method for ranking projects can be updated in the future, as can the ranking of projects themselves. Further, the ranking of a project does not impact the eligibility of that project to receive future grant funding; rather, it is an internal metric to organize projects for future grant opportunities.*

CHANGE 2 (FROM METHODOLOGY STAGE TO PROJECT STAGE):

Replaced the text from the Methodology Stage (above) with new text (below) informing Interested Parties of their opportunity to submit projects in the SWRP

Stages of Engagement	Timeline
Outreach with regional and Tribal governments and Interested Parties (we want to hear from you!)	December 2023 - Ongoing
Review of a Methodology for Ranking Stormwater Projects	January 16 – March 13, 2024
Opportunity for Your Project Submittal	**April 5- April 29, 2024**

Opportunity for Your Project Submittal

The Participating Agencies have evaluated the public roads and parcels within their jurisdictions, ranked them using the quantitative methodology that was developed earlier this year, and prioritized based on the results of the ranking.

If you are interested in proposing a green stormwater infrastructure project to be ranked and prioritized in the SWRP, please follow the steps below:

1) **Complete and submit the Project Request Form (download here) by no later than 5pm April 29, 2024. Please email your spreadsheet to either rebeccas@lwa.com or karena@lwa.com.**
2) For a project to be included in the San Joaquin County Region SWRP project list, the "Project Information" tab of the Project Request Form needs to be completed. Each project should be included on a separate line in the spreadsheet.
    i. The "Required" (i.e., blue) column headers in the "Project Information" tab must all be provided.
    ii. If additional information is known about the project, the "Optional" (i.e., yellow) column headers can also be completed.
    iii. Many columns include drop-down lists from which you can select when you click on the cell (supported by the hidden "Domains" tab in the spreadsheet).
    iv. All projects must be located within the SWRP map boundaries (above).

If you have any questions on the SWRP or submitting a project, please direct them to rebeccas@lwa.com or karena@lwa.com.

CHANGE 3 (FROM PROJECT STAGE TO REVIEW STAGE):

Replaced the text from the Project Request Stage (above) with new text (below) informing Interested Parties of their opportunity to review the draft SWRP

Stages of Engagement	Timeline
Outreach with regional and Tribal governments and Interested Parties (we want to hear from you!)	December 2023 - Ongoing
Review of a Methodology for Ranking Stormwater Projects	January 16 – March 13, 2024
Opportunity for Your Project Submittal	April 5- April 29, 2024
Review of the Draft SWRP	**June 28- July 19**

Opportunity to Review the Draft SWRP

The Participating Agencies have developed a complete draft of the San Joaquin County Region Stormwater Resource Plan (SJC SWRP). The SWRP draft and all appendices can be downloaded here: **Download Draft SWRP**.

We want your suggestions and feedback! All are welcome to provide input. Your involvement is essential to developing a SWRP that benefits both environmental and community interests. If you are interested in reviewing the draft SWRP, please

1) Download the complete SWRP and its appendices from the link above

2) Download the comment form and use it to provide any comments, suggestions or feedback on the SWRP (**Download Comment Form here**). There are two example comments in the form already, to show you the format we are looking for.

   NOTE: for every comment/suggestion you enter in the form, please be sure to fill out the column that says "SWRP Document Section". We will need this information to know which section of the SWRP you are commenting on. Please also be as specific as possible in your comments or edit suggestions.

Once you have completed your review and filled out the comment form, please email your form to rebeccas@lwa.com or karena@lwa.com by no **later than 5 PM PT on July 19th, 2024.**

CHANGE 4 (FROM SWRP DEVELOPMENT TO IMPLEMENTATION):

Removed text on SWRP development, and replaced with the text below

Stages of Engagement	Timeline
Outreach with regional and Tribal governments and Interested Parties (we want to hear from you!)	December 2023 - Ongoing
Review of a Methodology for Ranking Stormwater Projects	January 16 – March 13, 2024
Opportunity for Your Project Submittal	April 5- April 29, 2024
Review of the Draft SWRP	June 28- July 19
SWRP Modification/ Project Implementation (Ongoing)	***To be announced- 2024***

Opportunity to Suggest Modifications to the SWRP or Get Involved in Project Implementation

Please reach out to Participating Agency representatives to either suggest a modification be made to the SWRP, or to request to get involved in SWRP Project Implementation.

APPENDIX D

Public Comment and Response Matrix

PUBLIC COMMENT AND RESPONSE MATRIX FOR THE SAN JOAQUIN COUNTY REGION STORMWATER RESOURCE PLAN

The San Joaquin County Region Stormwater Resource Plan (SWRP) Participating Agencies solicited feedback from Tribal Governments and non-Tribal Partners on the draft San Joaquin Region SWRP. The review and response period spanned from June 27th to July 19th, 2024. Comments were received from one reviewer, the Office of Metropolitan Planning within the California Department of Transportation (Caltrans) District 10. The comments and responses to comments are provided in **Table 1**.

Table 1. Public Comment and Response Matrix

Comment #	Comment	Changes Made	Response to Comment
1	Some storm water treatments, such as detention or retention basins, have often been considered key mechanisms for nature-based climate adaptation to extreme storms and resulting flood impacts (Caltrans, District 10).	Comment Incorporated	Added the following text to Section 1.1 (Purpose): *"Implementation of these projects will also strengthen regional climate adaptation efforts and enhance resilience to climate change impacts such as drought and flooding."*
2	The SWRP indicates the potential cross benefits of climate resilience and improved water quality considerations. The SWRP could benefit if it identified and briefly evaluated the potential future projected climate impacts (related to storm water/water quality) in the region, including changes in precipitation that could result in the following potential impacts of flooding, drought, and subsidence (Caltrans, District 10).	Comment Incorporated	This SWRP will be submitted for incorporation into the Eastern San Joaquin Integrated Regional Water Management Plan (ESJIRWMP). The ESJIRWMP includes a detailed analysis of regional climate change vulnerabilities and impacts. The ESJIRWMP also performs detailed project reviews to evaluate contributions of projects to climate adaptation and mitigation (e.g. capacity to remove atmospheric greenhouse gases) efforts. The following text was added to Section 2.3.1 of the SJC Region SWRP (Eastern San Joaquin Integrated Regional Water Management Plan): *"Projects identified in the SWRP may be further evaluated per the criteria developed as part of the Eastern San Joaquin IRWMP. For example, the ESJ IRWMP evaluates the capacity of*

Comment #	Comment	Changes Made	Response to Comment
			regional planning projects to protect resources under future greenhouse gas emissions scenarios (i.e. low emission, medium emission and high emission mid- and late- century scenarios). In 2014, the IRWM Plan conducted a climate vulnerability assessment under each emissions scenario to evaluate which systems in the region (e.g. water reserve and storage, water quality, ecosystems and habitats, localized flood risk, sea-level, hydropower generation) were most vulnerable to impacts of climate change[1]. Using the 2014 climate vulnerability assessment, the current ESJ IRWMP[2] evaluates projects to address regional climate vulnerabilities as well as evaluate projects for their impact on regional greenhouse gas emissions (i.e. the net emissions avoided or introduced through project implementation). These types of evaluations can be considered by interested parties when selecting projects from this SWRP for future implementation."
3a	Specific areas in the document that could benefit from this evaluation include the following: a. Section 2.3.3 Other Documents/Plans: Climate adaptation plans or local hazard mitigation plans should be reviewed in conjunction to determine the potential impacts to stormwater with projected changes to precipitation, drought, and flood due to	Comment not Incorporated	Regional information on climate projections and climate hazards are provided in detail as part of Eastern San Joaquin IRWMP (see Response to Comment #3b). Since the SWRP will be included as part of this regional plan, the SWRP does not specifically review local climate adaptation plans or hazard mitigation plans, rather it defers interested parties to the IRWMP climate information during project evaluations.

[1] https://www.esjirwm.org/Portals/0/assets/docs/IRWMP-2014/Eastern-SJ-2014-IRWMP-Chap15.pdf?ver=2014-06-26-111535-887

Comment #	Comment	Changes Made	Response to Comment
	future climate projections. (Caltrans, District 10)		
3.b	b. Section 5.2.3 Desktop GIS Identified Potential Project Opportunities: This section would be a good place to also include a readily available GIS layer for future climate projections that may affect the effectiveness or efficiency of potential storm water projects due to changes in precipitation. (Caltrans, District 10)	Comment not Incorporated	This SWRP will be submitted for incorporation into the Eastern San Joaquin IRWMP, which includes all relevant climate projection information for region. More specifically, the ESJ 2014 IRWMP provides the most current climate change projections for San Joaquin County[3]. The projections are based on downscaled Global Climate Model (GCM) simulations for mid-century and late-century conditions under three different greenhouse gas emissions scenarios. Model outputs from these climate projections are reported as regional percent changes in precipitation, temperature, wind, evapotranspiration, and runoff (among other projections) by season. Climate projections are not readily available as map layers, and these outputs would require significant resources beyond the scope of the SWRP. Any projects that interested parties would like to pursue can be evaluated for co-benefits to regional water quality and climate adaptation, in collaboration with the ESJ IRWMP.

[3] https://www.esjirwm.org/Portals/0/assets/docs/IRWMP-2014/Eastern-SJ-2014-IRWMP-Chap15.pdf?ver=2014-06-26-111535-887

Comment #	Comment	Changes Made	Response to Comment
3.c	c. Table 5-1: Data Obtained and Used for GIS-based SWRP Opportunity Identification. We suggest inclusion of ground subsidence information from USGS to include the presence of peat soil data to inform existing and future stormwater planning and projects. (Caltrans, District 10)	Comment not Incorporated	Providing information on regional subsidence or the presence of peat soil is beyond the scope of the SWRP, however this type of information could be considered at the individual project level by interested parties seeking to evaluate project feasibility and effectiveness.
4	Including the consideration of future climate projections as they relate to storm water and water quality in this proposed plan could have mutual benefits for counties of the San Joaquin Region in future collaboration efforts (Caltrans, District 10).	Comment Incorporated	See response to Comment #2.

APPENDIX E-8

Potential Project Opportunities Identified by Narrative Description

Rank	Project Name*	Narrative Description	Jurisdiction	Weighted Score	General Suitability					Water Quality				Water Supply			Flood Control	Environmental			Community & Tribal				Weighted Score
					Size	Slope	Infiltration	Proximity to Existing Infrastructure	Total Benefit (Gen. Suitability)	Regional Facility	Removes Pollutant Loads	Groundwater Quality	Total Benefit (Water Quality)	Augments Water Supply	Groundwater Critical Area	Total Benefit (Water Supply)	Total Benefit (Flood Control)	Natural Water Drainage Systems	Habitat and Open Space Enhancements	Total Benefit (Environmental)	Recreation	Disadvantaged Community	Tribal	Total Benefit (Community)	

*Note: Narrative project summary purposefully blank in the July 2024 iteration of the San Joaquin County Region Stormwater Resource Plan. Table included for future use if and when projects not associated with parcels that may be better described narratively can be included.

APPENDIX F

Public Parcel Screening by County of San Joaquin Parcel Assessor Dataset Use Codes

Table F-1. Public Parcel Screening by County of San Joaquin Parcel Assessor Dataset Use Codes

USE CODES	AREA	DESCRIPTION	CATEGORY	Assumed Public
0	R	USE CODE NOT ASSIGNED	RESIDENTIAL	No
1	R	VAC RES LOT - DEV W/UTILITIES	RESIDENTIAL	No
2	R	VAC LOT W/ PROBLEMS THAT PRECLUDE BUILDING A RESIDENCE	RESIDENTIAL	No
3	R	VAC LOT - TOTALLY UNUSABLE (INCURABLE)	RESIDENTIAL	No
4	R	VAC RES LOT W/MINOR MISC RES. IMPRS (GARAGE, POOL, ETC)	RESIDENTIAL	No
5	R	VAC RES SUBDIVISION SITE	RESIDENTIAL	No
6	R	VAC RES LOT-UNDEVELOPED	RESIDENTIAL	No
7	R	POTENTIAL RES SUBDIVISION	RESIDENTIAL	No
10	R	SINGLE FAMILY DWELLING(SFD)	RESIDENTIAL	No
11	R	CONDOMINIUM UNIT	RESIDENTIAL	No
12	R	PLANNED UNIT RES DEVELOPMENT (PURD)	RESIDENTIAL	No
13	R	SINGLE FAMILY RESIDENCE W/SECONDARY RES SQ FT	RESIDENTIAL	No
14	R	SFD W/SECONDARY USE (BARBER SHOP, BEAUTY PARLOR, ETC)	RESIDENTIAL	No
15	R	ZERO LOT LINE RESIDENCE	RESIDENTIAL	No
16	R	RES LOT W/MOBILEHOME	RESIDENTIAL	No
17	R	SINGLE FAMILY W/COMMON WALL (DUET,HALF-PLEX,etc)	RESIDENTIAL	No
20	R	VAC LOT (ZONED FOR TWO UNITS)	RESIDENTIAL	No
21	R	ONE DUPLEX - ONE BUILDING	RESIDENTIAL	No
22	R	TWO SFDS ON SINGLE PARCEL	RESIDENTIAL	No
30	R	VAC LOT ZONED FOR 3 OR 4 UNITS	RESIDENTIAL	No
31	R	SINGLE TRIPLEX -(3 UNITS, 1 STRUCTURE)	RESIDENTIAL	No
32	R	THREE UNITS - 2 OR MORE STRUCTURES	RESIDENTIAL	No
34	R	SINGLE FOURPLEX	RESIDENTIAL	No
35	R	FOUR UNITS, 2 OR MORE STRUCTURES	RESIDENTIAL	No
40	C	VAC LOTS ZONED FOR APARTMENTS	RESIDENTIAL	No
41	C	5-10 RES UNITS - SINGLE BUILDING	RESIDENTIAL	No

USE CODES	AREA	DESCRIPTION	CATEGORY	Assumed Public
42	C	5-10 RES UNITS - 2 OR MORE BUILDINGS	RESIDENTIAL	No
43	C	11-20 RES UNITS - ONE STRUCTURE	RESIDENTIAL	No
44	C	11-20 RES UNITS - 2 OR MORE BUILDINGS	RESIDENTIAL	No
45	C	21-40 RES UNITS	RESIDENTIAL	No
46	C	41-100 RES UNITS	RESIDENTIAL	No
47	C	OVER 100 UNITS	RESIDENTIAL	No
